DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

The house was originally built in 1872 in what is now downtown Shreveport. Encroaching commercial and office construction made it necessary to move the house in order to preserve it.

In 1957, the main portion of the house was moved to its present location across from Centenary College. It consisted of four rooms with a large center hall. The attached architectural drawing shows the original, as well as the slightly revised, floor plan. As may be seen, the area to the right when entering the front door was initially divided into two rooms. This was modified by the removal of the intermediate partitions-creating a large room to be used for group meetings and social gatherings.

There were no further architectural alterations to the interior. High ceilings with their unique rosettes, the cast iron mantels and fireplaces, the tall floor-to-almost-ceiling high windows with cypress shutters all reflect the gracious living in the original house. Original hardware (such as crank door bell, etched glass around front door, door knobs, hinges) is still in use. Likewise, the exterior remained unchanged. The entire house, inside and out, was carefully restored to its original condition.

A later addition added to the back of the house was not compatible to the architecture of the house nor did it serve any historical purpose, so was not moved with the house.

S

To eliminate the need for further changing the main portion of the house, a $16' \times 40'$ flat-roofed, one story wing was added to the rear of the house after the 1957 move. This wing contains a rest room, a small store room, and kitchen and serving facilities to accomodate related functions of the Shreveport Symphony.

The attached drawings will provide more detailed structural information.
