DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

Built by Nathanael Greene in 1774, the Nathanael Greene Homestead is a well preserved and maintained eighteenth century farmhouse of simple, yet refined, design. Situated above the Pawtuxet River on thirteen acres of open field and woodland, the two-and-one-half story, five-bay-wide, rectangular, clapboard house, with its two interior brick chimneys, is set on a foundation of random, sandy-brown granite ashlar. The four room, center hall plan provides two rooms to either side of a central hall on each floor.

Facing east, the central entrance with its eight panel door and transom is embellished with fluted pilasters supporting a triangular pediment carved with dentils and a fan motif. The double-hung windows, with their twelve-light sashes and simple, pegged frames, are capped on the second story by the brokenout main cornice on both the front and rear facades.

The original interior remains intact and has been sympathetically restored and contains Greene memorabilia. A fine stairway rises at the rear of the hall in two runs. The turned balustrades, set three to a stair, and the turned newels support the rail which is not ramped. Except for the kitchen on the first floor, each room is very similar in appearance with cased cornerposts, cornice moldings, paneled doors, and simple mantelpieces composed of large, plain panels. The fireplace in the kitchen, with its paneled side ovens, is quite wide. The hardware throughout is original and is believed to have been forged nearby at the Greene family iron works. STATEMENT OF SIGNIFICANCE

The Nathanael Greene Homestead is significant for both its architectural merit and its historical association with General Nathanael Greene, who was second only to Washington in command of the Revolutionary War. The house is an exceptionally fine example of a simple, yet quite refined, <u>eighteenth</u> century Rhode Island farmhouse. Originally set on two thousand acres, the house still retains a setting of open fields and woodland along the Pawtuxet River. It has been very well preserved and was sympathetically restored in 1919 by the Nathanael Greene Homestead Association, Inc. Since that time it has been opened to the public as a museum.

The house was designed and built by Nathanael Greene in 1774. Greene's father had prospered as a forge and mill owner in Warwick and expanded his business to Coventry. By 1770 it was decided that his son, Nathanael, should make his home at the new iron works. While living there, Greene was instrumental in organizing the Kentish Guards in East Greenwich, chartered on October 29, 1774. Upon hearing the news of Lexington on April 19, 1775, Greene joined the Guards as a private soldier of war. His merit quickly promoted him through the ranks and eventually he was made a General.

During the first year of the Revolution, the house was used as a convalescing hospital for officers who had been vaccinated against smallpox. Greene returned to the homestead after the war, but moved his family to Newport in 1783. Eventually he moved to Mulberry Grove, a plantation near Savannah, Georgia, which had been given to him by that state as an appreciation for driving the British out of the South. He died at Mulberry Grove on June 19,,1786.

The house remained in the Greene family until 1899.

(1742-1726)
