construction history (descriptions, names, dates, etc. relating to major additions or alterations to original structure)

House originally built in 1894 with an associated "shanty", coop and outhouse.

Rear porch enclosed in 1920s; shanty has been modified with green house addition on south side.

continued    yes XX no

historical background (discuss important persons and events associated with this structure)

Outbuildings and water line hook-up tap are still intact. Best example of hipped box in Louisville. The type was and remains relatively common in the older portions of town.

This house was built by Gerardo LaSalla who also built and managed the first movie theater in Louisville.

significance (check appropriate categories and briefly justify below)

architectural significance:

- represents the work of a master
  - possesses high artistic values
  - represents a type, period or method of construction
- Level of Significance: Local

historical significance:

- associated with significant persons
  - associated with sig. events patterns
  - contributes to an historic district
- Area of significance: Architecture  
Dates: 1900-

statement of significance

The LaSalla House is one of the few residences in the community that retains its original outbuildings, which make it an important illustration for Louisville of a late 19th century urban residential complex. The house is also the town's best example of a hipped box design. It retains both interior and exterior integrity.
