DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Holzwarth Historic District is located in a spectacular setting near the headwaters of the Colorado River, flanked by the Never Summer Range to the west and the Front Range to the east. Included in the historic district are over a dozen buildings relating to the Holzwarth homestead and the development of the Holzwarth Trout Lodge. Dating from about 1905 to about 1945, these structures reflect the gradual and informal growth of facilities for the accommodation of guests. These buildings are presently used as a center from which the National Park Service interprets the Holzwarth ranch and pioneer life in the Colorado Valley. This adaptive use is expected to continue. Some of the recently constructed buildings may be removed to restore the facility to its early appearance; razed buildings of the early period (hay barn, horse barn, cow barn, corral, privy, shed, chicken house, pig pen, root cellar, smoke house), for which excellent documentation is in hand, may be reconstructed. Cyclical maintenance, consistent with the historic structures, will be executed.

A hay meadow, reclaimed by the Holzwarth's from a jumble of beaver ponds, is included in the boundaries of the District, and consonant with its historic use, the National Park Service expects this area to be used for grazing and haying with implements of the historic period.

The Holzwarth homestead cabin, the east room of the present structure (1), was built in 1917 of V notched log construction with pole battens and concrete chinking. Protruding logs in the east wall evidence an interior partition, long since removed. Window openings in the south wall of the cabin have been closed or modified by the insertion of log segments cut to appropriate length.

A 15' x 25' room of V notched log construction was added to the west wall of the original cabin ca. 1920, and a porch to the south of the added room completed the rectangular plan of the existing structure. This portion of the structure is battened with split poles and chinked with concrete.

At some later time, perhaps about 1935, the living quarters were enlarged by moving a portion of the exterior wall 7' to the south so as to include the easternmost 13' of the porch, and the remaining portion of the porch was enclosed.

The interior of the cabin is partitioned into a living room, closet, bath, bedroom, and kitchen. The interior was remodeled and finished with wall board about 1940. Numerous items--furniture, taxidermal specimens, books, kitchen utensils, and other personal effects--once owned by the Holzwarth family, were transferred to the United States with the cabin, and these must be regarded as historic appurtenances of the structure.

A few feet southeast of the homestead cabin are the earliest guest cabins of the dude ranch. Twin #1 was built ca. 1921. This 15½' x 19½' structure is of log construction, square notched with split pole battens spiked to the logs. A 4' porch extends across the front (west) of the building, and 4' deck extends across the back of the structure. It is interesting to note that Johnnie Holzwarth, building his first log cabin, placed the purlins of this structure so low that they are at no

STATEMENT OF SIGNIFICANCE

Though the Holzwarth's built their still-standing homestead cabin in 1917 with the intention of making a living by ranching, by 1920 they had begun construction of cabins for the accommodation of guests and gradually developed a well-known dude ranch. These buildings, of frame and log construction, are exemplary of the classic methods of construction in the beginning of the dude ranch industry; and the structures of the district are typical of those in which a homestead evolved gradually into a dude ranch. Since ranching--horses and hay--played such a vital role in the life of the Holzwarth family, included in the district is a portion of the hay meadow, where one can see horses grazing and, in season, haymaking with pioneer implements.

John G. Holzwarth, Sr. arrived in the United States, a German immigrant, in 1879 at the age of 14. To pay his passage, he worked for a time as a baker in St. Louis, but the circumstances of his employment were inhospitable, and he fled to Texas where he lived a romantic life mingling with rustlers, cooking for shepherders, and riding with the Texas Rangers. In time, he gravitated to the Granby area where his brother had homesteaded, settled at the Stillwater Ranch (though he did not file a homestead entry until 1890) at the site of today's Stillwater Campground and spent the next ten years breaking horses, freighting, and hunting for the Central City meat market.

With the panic of 1893, Holzwarth relinquished his homestead claim and returned to Denver where he met Sophia Lehmann, a German emigrant who was employed as a domestic servant in a wealthy Denver household. They were married in 1894, and within 10 years they were operating a boarding house and a saloon which prospered until the advent of prohibition in Colorado on January 1, 1916.

Facing the reality of prohibition, Holzwarth recalled the pleasant days he had spent "cowboying" in the Granby area and returned to the Colorado Valley. He built the subject homestead cabin in the summer 1917, although he did not file his homestead entry until March 1, 1919, a not uncommon practice in the region at that time. The patent on the homestead--the NW 1/4 of section 25, T5N, R75W--was issued January 13, 1923.

Meanwhile, the Holzwarths had purchased the adjacent Fleschuts-Lehman property on July 22, 1918. The family worked on the ranch in the summer 1919, returned to their home on Santa Fe Drive in Denver for the winter, and established their permanent residence in the homestead cabin in 1920.

ITEM NUMBER 8 PAGE three

Very shortly, like many other city-dwellers who have moved to the mountains, they found that various of their Denver friends followed them to the Colorado Valley to share the Holzwarth hospitality and enjoy a cheap summer vacation. In the summer of 1920, the Holzwarth's were visited by a group of Mr. Holzwarth's "drinkin' friends"---using the term given in interview by John G. Holzwarth, Jr.--who were so lazy and drunken that they even required the Holzwarth son, Johnnie, aged 18, to do their fishing for them--and then quarreled over the division of the fish. With the departure of the guests, Mrs. Holzwarth and Johnnie rebelled. Mrs. Holzwarth had long dreamed of opening a German-type mountain inn, and the homestead was promptly dubbed the Holzwarth Trout Lodge and rates established--even though Mr. Holzwarth roared that he would never permit his friends to be charged--at \$2.00 per day or \$11.00 per week.

Their very first guests were members and friends of the Carman family of Estes Park. Katherine Carman recalls that the family had ridden across the divide, expecting to stay at Squeaky Bob's Hotel de Mardscrabole, but on finding Bob's filled were directed to the Holzwarth's. As Johnnie remembers it, the ladies of the Carman party slept in the house and the men in the barn; Katharine Carman says only that "they shoved over and we got in".

Although the first tourist rental cabin was built in 1919, they were unable to meet the demand, and sleeping arrangements were often quite informal. Springs and mattresses were simply spread on the ground and visitors covered themselves with a piece of canvas for protection from the weather. But to the guests the inconvenience of a damp night and chilling morning seemed a small price to pay for the privilege of pulling up to Mrs. Holzwarth's table. Johnnie says that he kept a rod over the kitchen door, and when an order for trout reached the kitchen, he ran to the stream with his rod. They also served "roast", a viand not further identified since it frequently came from animals poached from the National Park, butchered, and concealed high in a tree until taken to the kitchen.

In the winters, to supplement their hardly-adequate income from the resort business, the Holzwarth's trapped, operating at one time 100 miles of trap lines extending over into Middle Park. Occasionally, with the permission of the National Park Service, the Holzwarth's trapped "predators" within the National Park, though--according to Johnnie--there were sometimes differences of opinion as to the definition of a predator.

Their income was also supplemented by Mr. Holzwarth's work as a taxidermist. He was severely injured when a wagon overturned on him soon after moving to the Colorado Valley and saw at once that he would be crippled to the extent that his participation in the work of the ranch would be severely limited. Accordingly, he studied taxidermy by mail and soon became quite proficient in the art.

ITEM NUMBER 8 PAGE Four

As early as 1922 the Fleshuts homestead cabin (on the east side of the Colorado River) was used for the accommodation of guests, and in 1923 the decision was made to move their operation across the river to the main road through the National Park. The first cabin at the new site was built in 1924, and the main lodge was constructed in 1929. With the main operation--now known as Holzwarth's Never Summer Ranch--moved to the east side of the river, the subject cabins were operated as rental cabins by Mrs. Holzwarth--inevitably known as "Mamma"--until her death and, subsequently, by the Holzwarth Never Summer Ranch.

The homestead was purchased on March 13, 1974 by The Nature Conservancy and was transferred to the United States on February 5, 1975.

Joseph Fleshuts was an evanescent figure in the Colorado Valley, for no record is found of his tenure with the exception of the documentation of his homestead. On November 1, 1902 he purchased the W $\frac{1}{2}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$ and the NE $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 25, T5N, R76W from the United States. Patent #74360 was issued to him from the land office on July 29, 1909. It is believed that Fleshuts left the valley about 1911, and the land was transferred due to his failure to pay the taxes.

ITEM NUMBER 7 PAGE ONE

point touched by the rafters. Rose (4), a 13' x 13' frame structure with enclosed porch, faced with slabs, is attached to Twin #1. This building was constructed ca. 1945. Twin #2 (3), built ca. 1923, is a frame structure, 16½' x 21' faced with slabs. An addition of butted log construction was attached to the north side of the building ca. 1950. A 4' porch extends from the front (west) of the original building, and a 2' deck runs along the back.

Three utility buildings lie a few feet west of the homestead cabin. The taxidermy shop (5), built ca. 1922, is a 13½' x 22½' frame building, faced with slabs, with a 6½' porch. This building contains various tools and implements, once used by the Holzwarth family, which contribute to the historic aspect of this structure. The Woodshed (6) is of frame construction with slab battens. Built ca. 1921, this structure is partitioned to provide room for a privy and the storage of wood and miscellaneous hand tools. The Ice House (7), built ca. 1920, is of square notched log construction, chinked with cow manure. The shed roof of this 8½' x 13½' structure is decked with rough sawed boards, supported by two log purlins and covered with composition roofing.

Scattered across the hillside to the west and north of the above-described group are various guest cabins. The Tent House (8), built ca. 1919, is a frame structure, 4' high, with a tent roof. Posts, standing approximately 1' outside the corners of the original building, support a superstructure of rough sawed rafters and decking, covered with composition roofing. Columbine (9), one of the more luxurious guest cabins, was built ca. 1922. The central outline of this log structure is 16' x 28', with additions on the back (west) for a porch, a bedroom, and a bath. Louise (10), of half log construction, was built ca. 1943. This one room cabin is 16½' x 14' with a 7' porch on the front (east) of the building. Tivoli (11), ca. 1944, is a 16½' x 32½' cabin of half log construction with a rubblestone chimney on the front (south) of the building. Castle (12) is a small frame cabin with clapboard siding. This cabin was built ca. 1935.

The Fleskuts Cabin (14) lies across the Colorado River, approximately ½ mile east of the above-listed cabins. Built by Joe Fleskuts as a homestead cabin ca. 1902, this cabin was first used for the accommodation of Holzwarth guests about 1922. This 16' x 21' structure is of dovetailed log construction, chinked with newspapers and concrete. Though barely evident now, at one time the logs were painted red and the rough sawed boards of the gables were painted green.

STATEMENT OF SIGNIFICANCE:

Date of Construction: / / ca.1943 Date of Alterations: / / Unknown
Architect/Designer: J. Holzwarth Historical Theme(s): Pioneer Settlement/Resort Indus
History of Structure: The Louise Cabin (Structure #751) was constructed ca. 1943, originally as a one-room structure with an open porch extending the full width of the E. elevation. The N. end of this porch was enclosed at some unknown time to form a bathroom. The Holzwarth homestead was established in 1917, and the land patent was issued in 1923. The guest operation started in 1919. The Nature Conservancy purchased the homesite in 1974 and transferred title to the NPS in 1975.
Evaluation of Structure: Historic Theme Contributing Non-Contributing _____
National Register Criteria: A B C D (Include integrity statement)
Holzwarth Ranch illustrates the gradual and informal growth of guest ranch facilities, and contributes to the historical and architectural character of the Pioneer/Resort theme. Louise Cabin is an important element of the ranch. Altered.

Date of Construction: / / ca. 1922 Date of Alterations: / / Unknown
 Architect/Designer: J. Holzwarth Historical Theme(s): Pioneer Settlement/Resort Ind
 History of Structure: The Columbine Cabin (Structure #752) was one of the more
valuable guest cabins at Holzwarth Ranch. It was built ca. 1922 and altered when
the porch was enclosed to become a part of the living room, and a bathroom was
added; soon after, a second addition was made of a bedroom on the W., and a porch
was added on the NW. The homestead was established 1917, and the land patent issued in 1923.
Operation began 1919. Purchased by Nature Conservancy 1974; to NPS, 1975.

PHYSICAL DESCRIPTION

TYPE OF STRUCTURE (NPS 28 CODE): BU
ARCHITECTURAL CHARACTER (STYLE): Rustic

CHIMNEYS: Two - of red brick, interior, one on the W. elev., the other on the N. elev.
Two - Metal vent pipes.

SITE (INCLUDE ORIENTATION OF STRUCTURE): Open, native pines, aspens, grasses and soils. Facade to E.

PORCHES: One - Wood platform porch, with shed roof hood and log column supports covers all of the facade and wraps around to cover part of S. elev. One - Enclosed, screened-in porch on NW corner.

OVERALL BUILDING PLAN (FOOTPRINT): Rectangular
Bays: 2 by 3; Piles: 2
OVERALL DIMENSIONS: 36'0" by 20'6"

WINDOWS: Five - 4-light casements. Two - 1 beside 1 sliders. Rectangular, white wood frames and screens, flat arches.

COMPOSITION (NPS 28 CODE): WD
STORIES: One

DOORS: Two - Single, wood paneled, both with one light upper, and wood screen doors. One white, on facade, the other, brown, on S. elev.

FOUNDATION: Low, 0'0" to 1'0" of stone and poured concrete.

ADDITIONS: 15' x 25' addition on W. elevation, and porch 1920. SW corner of porch enclosed, 1935. Interior remodeled, 1940.

WALLS: Brown logs with saddle notching at corners.

INTERIOR PLAN: Four rooms historically furnished and open to park visitors.

ROOF: Intersecting gables. Brown wood shingles with exposed log rafter ends.

INTERIOR FINISHES: Walls and ceiling: Plywood.
Floors: Tongue and groove wood flooring.

STATEMENT OF SIGNIFICANCE:

Date of Construction: / / ca. 1919 Date of Alterations: / /
 Architect/Designer: J. Holzwarth Historical Theme(s): Pioneer Settlement/Resort Indus-
 History of Structure: Structure #775, the Tent House, is unusual in that its low board and batten walls and separate roof surround an erected canvas tent, supported by an interior wood frame. The Holzwarth homestead was established in 1917, and the land patent was issued in 1923. In 1919 the guest operation was started. The homestead was purchased by The Nature Conservancy in 1974 and title was transferred to the NPS in 1975.
 Evaluation of Structure: Historic Theme Contributing Non-Contributing _____
 National Register Criteria: A B C D (Include integrity statement)
Holzwarth Ranch illustrates the gradual and informal growth of guest ranch facilities, and contributes to the historical and architectural character of the Pioneer/Resort theme. The Tent House is an important element of the ranch. Unaltered.

STATEMENT OF SIGNIFICANCE:

Date of Construction: / ca.1902-¹⁹⁰⁹ Date of Alterations: / /
Architect/Designer: J. Fleshuts Historical Theme(s): Pioneer Settlement/Resort Inc
History of Structure: Joe Fleshuts purchased the land where his cabin now sits, on Nov. 1, 1902, and left the Valley in 1911. The land was transferred due to non-payment of taxes, and the property was purchased by the Holzwarths in 1918. By 1922, Fleshuts' homestead cabin was being used to house guests at the Holzwarth Ranch. Today the deteriorated structure is the only cabin to exist on the E. side of the Colorado River where the Holzwarth's Never Summer Ranch operated, as the others have been removed by the NPS. NP
Evaluation of Structure: Historic Theme Contributing X Non-Contributing receive title
National Register Criteria: A_B_C_D (Include integrity statement)
Fleshuts' cabin illustrates a typical western homestead cabin of the time. The cabin was later incorporated into the Holzwarth Ranch and is important also for demonstrating the growth of the guest ranch industry. It contributes to the historical character of the th

STATEMENT OF SIGNIFICANCE:

Date of Construction: / / ca. 1935 Date of Alterations: / / Unknown
Architect/Designer: J. Holzwarth Historical Theme(s): Pioneer Settlement & Resort
History of Structure: The Castle Cabin, Structure #791, was built in 1935 as a guest cabin for the Holzwarth Ranch. It is now used for storage. The screen porch on SE was added at a later, unknown, time. The Holzwarth homestead was established in 1917, and the land patent issued in 1923. In 1919 the guest operation began. The Nature Conservancy purchased the homestead in 1974, and transferred title to the NPS in 1975.
