#### Describe the present and original (if known) physical appearance

The Christopher Knoell farmstead represents an example of a well-preserved early farmstead in eastern Nebraska. The homestead still retains the majority of representative structures used in the farming and cattle raising operations of the Christopher Knoell and Lyle Bang families from the 1800's to the present. The most significant building of the farmstead is the two story brick Italianate house built in 1888. The barn, built in 1908-09, is situtated directly west of the house. The remaining farm buildings, including a garage, wash house, chicken shed, privy, cob house, corn crib, granary, machine shed, cattle shed and an additional small shed, are arranged in an extended yard effect around the brick house. The farmstead is surrounded by natural features including winding creeks and virgin prairie lands, as well as large windbreaks to the north and east. The nomination includes 160 acres of land. The farm is still occupied and operated as a family farm. Structural and historical integrity of the site have been preserved except for alterations made to the house including the installation of a wrought iron railing on a second story walkout porch, and the removal of two exterior chimneys.

The Christopher Knoell farmstead is located in Nickerson township of Dodge county approximately six miles northwest of Fremont, the county seat. The site lies in the valley between the Elkhorn and Platte rivers, with Rawhide Creek running through the southwestern-most portion of the farmland. An additional small creek flows along the northeast edge of the farm buildings. The main farm group is located on land obtained by Christopher Knoell in 1871.

The remaining lands include crop fields, pasture, virgin prairie and additional creek bottom lands, which were purchased by Christopher Knoell in 1869 and 1871. The lands included in the nomination are representative of the historic Knoell agricultural farm and are only those immediately adjacent and intimately associated with the farmstead. This nomination does not include the entire area of the historic farm which by 1919 included 1093 acres - some of which is now owned by other persons.

The farmstead is a relatively compact group of buildings including some twelve separate structures situated in an extended farm yard arrangement. Access to the site is directly into the yard along a quarter mile land from the northwest. The dwelling is the focal point of the farmstead, with the garage, barn, chicken shed and privy occupying the northern boundary. The yard is terminated at the southeast end of the grass lane by the granary and corn crib (see sketch map). The majority of the outbuildings (see sketch map, site #'s 1-7, 11, 12) are arranged in a grid-like pattern leaving the southern boundary open. In William Tishler's The Site Arrangement of Rural Farmsteads he states: "the most convenienct disposition of the outhouses of a farm. . . is in the form of a long rectangle, or a square, as the case may be, open at one side, -- generally at the south, -- so as to admit the air to the cattle in the yards, and allow sufficient sunshine to them in winter." Perhaps this is the reasoning Christopher Knoell incorporated into the layout and operation of his farm and cattle raising business.

# NATIONAL REGISTER OF HISTORIC PLACES INVENTORY -- NOMINATION FORM

CONTINUATION SHEET Description ITEM NUMBER 7 PAGE 2

The following list, according to the Historic American Building Survey formula, describes the significant structures and sites included in the farmstead (see sketch site plan for items #1-12).

- 1. <u>House</u>: brick, cross-shaped in plan,  $8.56 \times 14.7$  meters ( $28'1'' \times 48'3''$ ), two stories, low-pitched hip roof with wide eaves, paired brackets, two story bay window, four original porches, Eastlake detailing, second story walkout, tall, narrow one-over-one pane windows with stilted flat arched stone window hoods and lugsills, stone belt course, lower level walkout, 1888, two exterior chimneys (north, west facades) have been removed, original balustrade on second story has been replaced with wrought iron, Italianate style.
- 2. <u>Barn</u>: wood frame with clapboarding, rectangular shape, 8.7 x 15.45 meters  $(26'6'_2'' \times 50'8'_2'')$ , gable roof, "turkey tail" overhang over loft door, 1908-09.
- 3. Garage: wood frame with clapboarding, rectangular shape, 3.21 x 6.8 meters  $(10'6'' \times 22'4'')$  one story, gable roof. Lumber from original house was used in construction. Late 1930's.
- 4. Chicken shed: wood frame with clapboarding, rectangular shape 3.74  $\times$  9.8 meters (12'3"  $\times$  32'2") one story, one room, shed roof, strip windows.
- 5. Wash house: wood frame with clapboarding, rectangular shape, 3.15 x 5.0 meters (10'4" x 16'5") one story, gable roof.
- 6. Privy: wood frame with clapboarding, square, 1.28 x 1.29 meters (4' $2\frac{1}{2}$ " x 4'3") gable roof.
- 7. Cob house: wood frame with clapboarding, rectangular shape with shed roof addition to the east, 4.97 x 6.26 meters ( $16'4'' \times 20'6'_2''$ ), one story.
- 8. Corn crib: wood frame, rectangular shape, 9.7 x 15.34 meters (31'10" x 50'4"), one story, gable roof, cupola.
- 9. Granary: wood frame with clapboarding, rectangular shape, 4.7 x 9.29 meters (15'5"  $\times$  30'6"), one story, gable roof.
- 10. Marchine shed: wood frame with clapboarding, rectangular shape 11.05 x 12.23 meters  $(36'3'' \times 40'1\frac{1}{2}'')$ , one story, gable roof, c. 1910.
- 11. Shed: wood frame with clapboarding, square, approximately 1.8 x 1.8 meters  $(6' \times 6')$ , gable roof.
  - 12. Cattle shed: wood frame with metal siding, rectangular shape, shed roof.

One natural site should be noted. It is an 12 acre area of virgin prairie land, located directly southwest of Rawhide Creek.

CONTINUATION SHEET Description

ITEM NUMBER

PAGE

The Knoell house was built by Christopher Knoell in 1888. The earlier, original home was a one-and-one-half story, two room wooden structure that was built just northwest of the present brick house. The house is no longer extant. The Christopher Knoell farmstead has remained in the family for five generations. In 1974, the house was sold to Mr. and Mrs. Lyle Bang. Mr. Bang is a nephew of Theodore Knoell, oldest son of Henry Knoell, son of Christopher Knoell, builder of the house. The house is presently occupied by Mr. Bang's son and daughterin-law, Mr. and Mrs. Scott Bang.

#### Statement of Significance (in one paragraph)

The Christopher Knoell farmstead is significant to the early settlement of Dodge County and to the development of agriculture in Nebraska. The farmstead remains as an excellent example of the "typical" Nebraskan farm, remarkably intact, with the majority of buildings still extant. Architecturally significant, the Christopher Knoell house exemplifies the Italianate style of architecture, which was popular in the United States during the last half of the 19th century. In Nebraska, the residence may well be one of the state's finest small-scale Italianate dwellings. The house is historically significant to Dodge County through its association with an early pioneer family, demonstrating their endeavors for residential comfort and style.

Architecturally, the Knoell house remains as one of Nebraska's fine examples of the Italianate style of architecture. The Italianate style was popular in the United States during the 1840's-1880's, characterized by low-pitched, heavily bracketed roofs, rectangular plans and tall, narrow windows. The house is devoid of excessive detail, as is characteristic of most extant examples of the style in Nebraska. The Eastlake detailing found on the two front porches is common to many late 19th century styles in Nebraska. The bay window is a standard feature of the style in the state. In American Architectural Styles 1600-1940, R. T. Panek states: "Italian types are the most subdued. There may be a classically decorated entrance porch, usually there are bay windows, and always there is a bracketed cornice." The Italianate mode in general exemplified the tendency to move away from the Rigid classicism of the well-defined revival styles toward the more romantic associations that the picturesque styles offered. The Italianate style gave opportunities to develop and experiment with the theory and practice of the picturesque, and offered more flexibility and freedom in conception and execution.

Christopher Knoell was born in Germany in the year 1832 and came to the United States with his family in 1847, landing at New York harbor. They traveled to Wisconsin where his parents, Mr. and Mrs. Henry Knoell, established a home and employed Christopher in the farm work. In the early 1860's the Knoell family came to Dodge county, and in 1864 Mr. Henry Knoell purchased 160 acres and leased farmland to his son, Christopher. In 1869 Christopher purchased 160 acres of land adjoining his father's land and by 1875 he owned 520 acres. Mr. Knoell served as one of 42 volunteers who organized a company to control Indian troubles

within the area. After his discharge, he traveled to Iowa City, Iowa to purchase threshing machines to set up a business for himself in custom threshing and haying. In doing so, he became one of the earliest threshers to harvest the golden grain in the Elkhorn and Platte valleys. The original home (no longer extant) was a one-and-one-half story, two room frame structure that was located immediately northwest of the brick house. The present brick house was built by Mr. Knoell and his family beginning in the spring of 1888. They began hauling the brick in 1887, from the Hooper brickyard in Hooper, Nebraska. As one of the early pioneer settlers of Dodge county, Mr. Knoell became one of the prosperous farmers in the community, acquiring a total of 1093 acres at the time of his death.
