Kahouna Fish Pond would be rated number three in importance, behind Molii and Heeia fish ponds that are also being nominated to the National Register. However, this may be misleading, for only four good examples of Hawaiian fish ponds exist on Oahu where there were known to be almost 100 at about the turn of the 20th century.

Kahouna is in good condition, highly visible to the public, and could be developed into an excellent example of this form of Hawaiian sea tillage.

Like most other fish ponds in the state, Kahouna has been subjected to great pressures for development. Fish ponds almost always occur in very favorable locations, are easily developed into waterfront property, and most are in private ownership. Therefore, it is crucial to Hawaii that a sample of these unique structures be preserved, Kahouna included.
