CONSTRUCTION/MODIFICATION DATES 1894-1899/1912, 1944, 1952, 1959, 1961, 1976			

PHYSICAL DESCRIPTION

Old Main is an asymmetrical two story and basement structure constructed of locally quarried sandstone. The rustic appearance of Old Main is achieved by the use of coursed ashlar blocks of sandstone and is characteristic of Richardsonian Romanesque architecture. The main facade of the "T" shaped structure faces northward with two octagonal turrets flanking the main entry. A semi-circular wooden arch frames the main entry doors. Tower attic windows also have semi-circular arches. A Neo-Classical dentil motif follows around the base of the tower roofs and the cross bar above the entry doorway. Flush wall third story attic dormers and a hipped roof are covered with a standing seam metal roof. Windows are discrete with flat lintels and are of one over one double hung design with fixed transoms on the main level. Old Main has not had any major exterior modifications except for a new eave and gutter system. The interior has undergone several modifications. Old Main's front rooms were remodeled in 1944, and the interior was converted to a dormitory in 1961. In 1984, Old Main was converted to its original use as a classroom and office space, with minimal alteration. Much of the original fabric remains, including the pressed metal ceilings in several rooms, several cast iron columns, wooden floors and wainscotting.

STATEMENT OF SIGNIFICANCE/HISTORY

Old Main was the first building on the campus of the Northern Arizona Normal School. It was the center of instruction on campus throughout the period of significance, housing a variety of academic departments. Along with time spent in classrooms, the students devoted considerable time to study in Old Main's library until the Gammage Library was completed in 1930. For nearly ninety years the building has been in continuous service, and during this period has also assumed the recognized role as a symbol of the institution.

The structure set the standard for campus sandstone architecture for over forty years. The masonry treatment given Old Main was duplicated by skilled craftsman in six other district buildings. Old Main was the only district building constructed before 1900, and the only one of Richardsonian Romanesque style. Old Main is the preeminent example of its style in northern Arizona. It, like the remaining district structures, clearly characterizes the period in which it was constructed.

ARCHITECT/BUILDER Lester Byron/Joseph Schloser			
CONSTRUCTION/MODIFICATION DATES 1914/1927, 1954			

PHYSICAL DESCRIPTION

Morton Hall is a symmetrical three bay two story quarried sandstone building with a partial basement. Bearing walls are coursed ashlar with narrow beaded mortar joints. The entry features a parapeted portico with a round arch, original light standards, and small rectangular apertures. A gabled roof was added in 1927. The interior is divided into residence rooms with a small parlour and main lobby in front. Original characteristics still exist, including the floor plan, French doors, wooden newell posts, trim and transoms.

STATEMENT OF SIGNIFICANCE/HISTORY

The building was named for Mary Morton, one of the teachers for the first summer session taught in 1908. She later married a former school board member and they continued to be strong supporters of the school. The fifth building constructed on campus, Morton Hall was used as a dormitory and still is today.

Morton Hall contributes to the district from by virtue of its use of sandstone construction which followed the masonry characteristics of Old Main. It also evidences the transition of architectural styles on campus away from nineteenth century tastes. The structure incorporated a Georgian Revival plan and was the first of other district buildings with a more classical orientation. Morton Hall is also significant for its seventy-one year history as a residence hall for the institution. The building contains considerable integrity, and is an important contributor within the district.

CONSTRUCTION/MODIFICATION DATES 1916/1931, 1950, 1966			

PHYSICAL DESCRIPTION

Campbell Hall is a symmetrical, three bay, two story building of rough faced random ashlar sandstone masonry. Joints are neatly tooled with "V" grooves. Articulating a Colonial Revival format, the projecting portico features a pediment with oval window, four large wooden Tuscan columns and two concrete pilasters. The raised porch has a concrete deck and steps. Original sandstone sidewalls along the steps remain. The roof is hipped and covered with asphalt shingles. The pediment soffit is finished with beaded tongue and groove sheathing. The entry door opening is located between the pilasters and is arched with cut stone blocks. Above the entry, the French doors on the balcony remain, but a cast iron railing has been removed. The interior still retains such original features as floor plan, doors, moldings, transoms, and balustrades. Hallway ceilings have been lowered and the original six over six windows have been replaced by units resembling the original, but the building still has most of its historic architectural integrity.

STATEMENT OF SIGNIFICANCE/HISTORY

This building was constructed in 1916 and has always been used as a residence hall. A connecting annex between Campbell and Morton Hall was constructed in 1931. The dormitory was originally named after George Babbitt, and later became named for State Senator Hugh Campbell. For nearly seven decades, Campbell Hall has been among the student's favorite living quarters and has served for a number of years as the women's honor hall.

The building contributes to the district through its sandstone construction, and as an example of the Colonial Revival style.

CONSTRUCTION/MODIFICATION DATES 1918 - 1920/1952, 1954	

COUNTY Coconino	INVENTORY NO. Building 4
QUAD/COUNTY MAP	

PHYSICAL DESCRIPTION

Ashurst Auditorium is a large, rectangular three story building constructed of locally quarried red sandstone. Exterior walls are in a coursed ashlar pattern with tooled and beaded mortar joints. There is a beltcourse of stone around the west and north walls that divides the first and second floor, and a water table around the western and northern walls immediately below the first floor windows. The upper two stories have eleven full length windows on each side; these windows have been partially or totally blocked with red brick. Two have been blocked with the same stone as the original construction. Doors have been installed for access to the second floor. Concrete stairs to these doors were built, one around the southwest corner and one on the west end of the north side. A large window with a Roman keystone arch spans both upper stories on the west side. Two windows on either side of the hallway that connects Ashurst with Old Main have Roman keystone arches also. The roof is hipped and covered by standing seam metal. The eaves and the frieze are undecorated save for some simple molding. A marble plaque is located on the northwest corner facing north and is inscribed "Ashurst Auditorium 1918". The window sills built from solid blocks of stone. Below the watertable, the stone is different, being a white sandstone. In 1952, the second floor auditorium was converted into a music hall. Inside, the perimeter of the hall was converted into practice rooms, leaving a smaller auditorium in the center. Ashurst Auditorium continued Old Main's sandstone construction and masonry treatment, and from a short distance both structures appear to be one entity constructed at the same time.

STATEMENT OF SIGNIFICANCE/HISTORY

The significance of Ashurst Auditorium is that it was the first auditorium and gathering place for the Northern Arizona Normal School when it was completed in 1920. Prior to this time the school used the Orpheum Theater in downtown Flagstaff for large gatherings, dances, and graduation ceremonies. Such noted figures as Carl Sandburg spoke here during the 1930s. At a special assembly held at Ashurst Auditorium in April 1930, Dr. C. O. Lampland, director of the Lowell Observatory, announced the discovery of the planet Pluto.

The building is also significant as it continued the campus theme of sandstone construction. Ashurst Auditorium is a sensitive complement to its adjoining structure, Old Main.

SOURCES OF ABOVE INFORMATION/BIBLIOGRAPHY

See Bibliography, item 9.

GEOGRAPHICAL DATA/LEGAL DESCRIPTION/VERBAL BOUNDARY DESCRIPTION

Township 21 North, Range 7 East, Section 21, NE $\frac{1}{4}$ of the NW $\frac{1}{4}$. Ashurst Auditorium is located on the east side of Tormey Drive and the south side of McClellan Circle on the North Campus of Northern Arizona University in Flagstaff, Arizona.

GENERAL COMMENTS/FUTURE PLANS FOR PROPERTY

Ashurst Auditorium is in good shape, there is some erosion of some of the stones in areas where moisture collects. Today, most of its use is by the Music Department who regularly hold recitals and by the music students who use its practice rooms. The first floor is used for offices. Institutional plans are to restore the building within two years.

COUNTY Coconino	INVENTORY NO. Building 5
QUAD/COUNTY MAP	

PHYSICAL DESCRIPTION

The Blome Building is a symmetrical, three bay, two story sandstone structure with a medium sloped standing seam metal hip roof over a rectangular plan. The masonry is rough-cut and laid in a random ashlar pattern with beaded mortar joints. The building's Neo-Classical styling features a Greek Revival portico with a large pediment supported by four Tuscan columns and four pilasters. Windows, recently replaced, are discrete and grouped in twos or fours. The interior was remodeled in 1982, and several original windows and door areas filled in since 1935 were opened.

STATEMENT OF SIGNIFICANCE/HISTORY

The Blome Building served a central function as an elementary school on the campus of Northern Arizona Normal School. It was in this building students majoring in elementary education practiced their student teaching. This location had been the original site of the first school in Flagstaff founded in 1883. The building remained in this use until the 1950's when it became the Student Personnel Building which housed a variety of services for university students. The Blome Building also contributes to the district because it continued the theme of sandstone construction on the campus. The structure still retains its primary exterior historic architectural qualities and is an important example of Neo-Classical/Greek Revival style architecture.

COUNTY Coconino	INVENTORY NO. Building 6
QUAD/COUNTY MAP	

PHYSICAL DESCRIPTION

Gammage Library is a three bay two story building with a rectangular plan and an Italian Renaissance Revival Style entry. The building is topped by a hipped roof with bracketed boxed eaves. It is Georgian Revival in massing, with exterior walls of coursed ashlar sandstone with cast stone quoins, and original accordian aluminum casement windows. The building features a central bay featuring a two story, round arched, art stone frontispiece. The border of the frontispiece is articulated with foliated scrollwork and topped by a small anthemion. The first floor entry is a jack arched opening with a horizontal keystone. Above this, "Gammage Library" is deeply inscribed in two art stone blocks. The second floor opening consists of two round arched multi-light windows with textured colored glass and original aluminum sash. The textured windows are divided and framed by Corinthian pilasters. An art stone tablet depicting an open book is positioned midway between the top of the frontispiece and the ridge of the pediment located above.

Gammage has had some interior modifications but many original characteristics remain such as an Italian Renaissance Revival staircase, marbleized columns, wood wainscotting, scored plaster walls, and coffered ceiling in the library room. In 1958, a northern addition was constructed. The addition is compatible with the Library in overall height, construction material, roof form, and type of exterior windows.

STATEMENT OF SIGNIFICANCE/HISTORY

Gammage Library was dedicated on Sunday, December 14, 1930 in the reading room, presided over by Dr. Harold S. Colton, director of the Museum of Northern Arizona. Students and faculty assisted in moving books from the old library in Old Main to the new facility, which was named after Grady Gammage, President of the Northern Arizona State Teacher's College from 1926 to 1933. Under the direction of President J. Lawrence Walkup, the Administration addition was constructed in 1958. A sandstone veneer over concrete block was used to make the addition compatible with Gammage. The architectural integrity of the historic building has been maintained with the excellent quality of design which went into the addition construction. Gammage Library is a contributor to the district because of its historic functions as a library and administrative center for the campus. The structure also contributes to the major themes of sandstone construction and the stylistic evolution of the campus.

SOURCES OF ABOVE INFORMATION/BIBLIOGRAPHY

COUNTY Coconino	INVENTORY NO. Building 7
QUAD/COUNTY MAP	

PHYSICAL DESCRIPTION

North Hall is a symmetrical, three bay, two story and basement structure abutting Morton and Campbell Halls on the north ends. It is built of ashlar sandstone blocks laid in random courses. North Hall finished the quadrangle of sandstone dormitories, originating with the construction of Morton Hall twenty-one years earlier. The south wall is brick with stucco finish. The stucco is scored and painted to resemble coursed ashlar blocks. The Jeffersonian frontispiece consists of a wide pediment with a central oval window supported by four pairs of cast stone Tuscan pilasters. This feature complements its overall Georgian Revival format. The interior has a horse shoe shaped lounge looking into the inner quadrangle area, and a large wooden paneled fireplace. The remainder of the building is divided into residence area. The building originally had a dining hall which was removed in 1954. In 1985, the windows were replaced with units resembling the original. The exterior historic architectural integrity of the building remains substantially intact.

STATEMENT OF SIGNIFICANCE/HISTORY

North Hall provided a focal point for college residence life. Family style dinners were served in the dining room, and a large lounge with a fireplace provided a meeting place for the men and women who lived in Campbell and Morton respectively during the 1930's. The lobby also served as a music rental hall. North Hall contributes to the district due to its primary material of construction and its stylistic qualities which are based in Jeffersonian Classicism.

ARCHITECT/BUILDER Lescher & Mahoney/J.R. Porter Constr. Co	
CONSTRUCTION/MODIFICATION DATES 1952	

COUNTY Coconino	INVENTORY NO. Building 8
QUAD/COUNTY MAP	

PHYSICAL DESCRIPTION

The University Union is built from structural steel with brick veneer. It is "U" shaped in plan and topped with a medium sloped, gabled and hipped roofs. The building is a center for student activity including student government offices, two dining areas, a large lobby/study area, and an auditorium. Wrightian interior features are present in the wide use of wooden veneers and geometric moldings. The location, brick color and arched form design, makes the building generally compatible with the rest of the district.

STATEMENT OF SIGNIFICANCE/HISTORY

This building is a non-contributor. However, it is significant in that student groups in the late 1940s and early 1950s raised much of the money for construction of this building. Since the Union's completion in 1952, it has been the hub of student activity and has for many years been a university location for guest speakers, concerts, and other campus events.

HISTORIC USE Residence			
PRESENT USE Offices		ACREAGE	
ARCHITECT/BUILDER			
CONSTRUCTION/MODIFICATION DATES Dormers Built ca. 1904 Moved ca. 1921 added 1935			

PHYSICAL DESCRIPTION

The Herrington House is a one and a half story frame structure with a stone foundation situated south of Ashurst Auditorium. The structure was built as a Queen Anne cottage, but was remodeled into a bungalow after being moved to its current location in 1921. The house features a medium-sloped gable (west) and hipped (east) roof with open eaves, and wood shingle wall sheathing. Original clapboard siding is visible in places under the shingle siding. An exposed rock chimney was also added in the 1921 remodeling. A gable dormer sleeping porch on the rear facade, along with two smaller gable dormers on the north and south facades, were built in 1935. Addition of the dormers further enhanced the Bungalow appearance of the house. The President's House is essentially intact from the 1935 remodeling although it has not been well maintained.

STATEMENT OF SIGNIFICANCE/HISTORY

The Herrington House is significant for its use as the president's residence for thirty-seven years, after being acquired in 1919 along with parcels adjacent to the campus. It is most closely associated with President Lynn McMullen, who in 1921 directly oversaw, and provided the majority of the labor for moving the structure to the south of Ashurst Auditorium and remodeling the Queen Anne Cottage into a Bungalow.

The residence is the sole district contributor not constructed of sandstone, but is significant for its blend of turn-of-the-century territorial architecture with complementary modifications of later historic of later historic styling. With the 1921 and 1935 remodelings, the Herrington House became more suitable to the housing needs of the institutional head. Its proximity to the other district contributors amply exhibits the districts' character as a close-knit academic community.

SOURCES OF ABOVE INFORMATION/BIBLIOGRAPHY

See Bibliography, item 9.

GEOGRAPHICAL DATA/LEGAL DESCRIPTION/VERBAL BOUNDARY DESCRIPTION

Township 21 North, Range 7, Section 21, NE $\frac{1}{4}$. The Herrington House is located directly south of Ashurst Auditorium along Tormey Drive on the North Campus of Northern Arizona University in Flagstaff Arizona.

GENERAL COMMENTS/FUTURE PLANS FOR PROPERTY

Structural deterioration is evident in the roof and floor systems, as well as some deterioration of the bearing walls. Institutional plans may include moving the structure elsewhere or possible demolition.
