

Mark Shackleton 53
J. L. Lundy Esq.
Bristol

Yours. I think is so?

I can furnish you the best Peruvian Guano at
2 3/4 cts per lb or \$47.50 per ton of 2000 lbs. It is put
up in bags of about 150 lbs each. There is no charge for
bags nor any tax allowed for ~~them~~ ^{they} are newly
made up of strong cotton for this purpose.

Bone dust we sell in Barrels at 2.25 \$ for coarse,
\$2.50 for shavings & \$3.00 for wet sawings. The last
we think the most economical application for soils.

I should advise an application of one or both the above
to your field. at the rate of 2000 lbs guano & 2 or 3 bbls of
bone dust. It is better that the guano be plowed in, & the
bone also, but neither deeply. If applied to grass land
it may be advantageously done in the spring just before
a rain. I can furnish the Superphosphate of lime at
2 1/4 cts & 2 1/2 cts. per lb the last being knapsack. I do not
deem it as economical application as either guano or bone
dust. I send you specimens of a paper in which containing
important agr. information

Very Respy
R. L. Allen

write W. Wendt
4th 19th to send 500 y^{rs}
of 4th 19th & 1500 y^{rs} by canoe
if left them 4th 50 y^{rs} 2000 y^{rs}
