NATIONAL REGISTER OF HISTORIC PLACES
REGISTRATION FORM

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in Guidelines for Completing National Register Forms (National Register Bulletin 16).

Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries. Use letter quality printers in 12 pitch. Use only 25% or greater cotton content bond paper.

1. Name of Property

Describe present and historic physical appearance.

The Moose Entrance kiosk is a small building with a steeply pitched gable roof and a very high window to wall ratio for occupant ease of visibility. The building is set on the northeastern edge of the park scenic highway northwest of the headquarters building. Near this kiosk are two modern kiosks set in the roadway. The overall area is on the bottomlands of the Snake River near where the road climbs out of the bottom onto a tableland at the base of the Teton Range. The kiosk was at one time farther north along the road, and was moved to its present location during the early 1960s. It was built in the rustic style. The kiosk and the other National Park Service Rustic buildings at Grand Teton are characterized by log construction with some other wood products, such as board and batten type materials for doors. Trim is of rough cut "millwaste" type lumber and decoration is minimal. The building is one story and has a steeply pitched roof. The design appears to be from a standard set of plans used by the National Park Service during the 1930s. Clearly evident is the attempt by the National Park Service to achieve the feeling of primitive log structures built with a high degree of craftsmanship. Earthtones are the predominate colors with brown stained walls and green wood shingles. Even though the building has been moved the exterior feeling, design, and character have not been lost. It still serves the same function that it did historically. The quality that sets the building apart from its surroundings is its rustic architecture. There are no associated contributing outbuildings or structures for the kiosk.
