The original adobe was a two story, Monterey style building with porches and balconies on at least three sides. It had a stairway at the rear. The interior of the first floor was divided by a wooden partition into two rooms. The second floor had a center hall with a bedroom on each side. The exterior and interior walls, except for the woodwork, were of adobe brick, plastered with adobe and whitewashed. This building remains virtually intact, although it was added to and somewhat remodeled by Miguel Leonis in the late 1870's. The building was restored to its appearance after Leonis's remodeling; considered its period of "highest and best use".

PRESENT PHYSICAL APPEARANCE

The present appearance is that of a two-story Monterey style adobe dwelling, as partially remodeled in the late 1870's. It has a pitched shingle roof, porches on both floors on three sides of the house, and a Calabasas fieldstone founda-The front adobe wall of the first floor has been panelled over with vertical tongue and groove redwood, the rest of the adobe walls are exposed. Half of the right side (east) and all of the rear (north) porches are enclosed with board and batten and divided into several rooms. On the left (west) of the adobe there is no porch, but a one story board and batten addition with a flat roof, orininally of tin squares soldered together, now covered with asphalt paper. There is a brick fireplace and a tall chimney on the left The front (south) and rear (north) walls of (west) side. the addition are parapetted, so that the roof is not visible. The windows in the adobe walls and the frame addition are double hung, 6 over 6, with solid wood exterior shutters having cast iron hinges carrying the legend "Pat'd 1843" and apparently imported from the Eastern United States. Two rear windows of the frame addition and all of the windows in the board and batten enclosure of the porches are single 6 light sash sliding sideways and without shutters.

The doors are typical mid-19th century four panelled doors, except that the ground floor front and rear doors to the adobe portion are extra thick, with the interiors being vertical tongue and groove boards. The hardware is mid-19th century cast iron, with porcelain doorknobs.

The house is painted white, with red and blue trim on the doors, windows and shutters, as determined by careful research.

The interior walls of the adobe portion downstairs are panelled with vertical 1X6 tongue and groove redwood boards with a bead detail, covering the original whitewashed adobe walls. There is a 1X6 tongue and groove ceiling and 1X6 tongue and groove plank floor. The 1X6 trim has a bead

STATEMENT OF SIGNIFICANCE

ARCHI TECTURE:

The house is a good example of a Monterey style adobe. Subsequent owners modified it almost entirely by additions: oak hardwood over the pine floors, a wing added to the rear, etc. In hardly any way did they disturb the early structure, so that most of the restoration was an uncovering process. As a consequence a very high percentage of the building is original rather than reconstruction.

AGE:

Documents now lost gave the construction dates as 1844-46, while California was still Mexican, and earlier than any remaining building in the San Fernando Valley with the exception of the San Fernando Mission.

HISTORY:

While the origin of the adobe is still obscure, it became in the late 1870's the home of some fascinating people. The wife, Espiritu Chihulla, was an Indian, the daughter of Odon. Odon and his brothers had been in charge of raising cattle for the San Fernando Mission. As a consequence, when the Mission lands were divided they were given a rancho, called El Escorpion. Espiritu was raised at the Mission and later inherited the Rancho, making her reasonably well-to-do. Her husband, Miguel Leonis, was a Basque sheepherder who increased her property substantially, remodeled the Adobe in the late 1870's, and died in 1889. His will described her as his "housekeeper" and cut her off with a pittance. Her sixteen year battle for her rights against overwhelming odds is a part of California history deserving of further study. She won the battle in 1905 and died at the Adobe in 1906.

EDUCATIONAL VALUE:

The high percentage of original material in the Adobe makes it more than usually valuable for scholars. Not only is the building largely original, but it has numerous original photographs of the family, several original pieces of furniture,

#7 Description, Leonis Adobe continued

detail and the deep reveals around windows and doors are also panelled. The woodwork (except the natural wood floor) is painted cream with a pumpkin yellow trim. The frame addition is of single construction with an open beam ceiling, divided into a dining room and kitchen. The woodwork is painted flat white to resemble the original whitewash. The floor is the original adobe. On the west wall of the dining room is a brick fireplace.

#8 Singificance, Leonis Adobe continued

and is furnished with 1870 and 1880 furniture and Persian carpets. An old barn dates back to 1912. A wealth of early photographs and two early watercolors in the Southwest Museum collection have enabled us accurately to reconstruct such outbuildings as a dovecote, chicken coops, bake oven, grape arbor, well and windmill, and tank house. One of the two privies is original, the other from a ranch nearby.

The barn contains a blacksmith shop and an early threshing machine; other wagons and early agricultural implements are nearby. The dovecote has pigeons, the chicken coops, Black Spanish chickens of a breed brought from Spain by the Franciscan Missionaries. The windmill pumps water, when the wind blows.

So, rather than a single isolated building, as many Adobes are now found, the Leonis Adobe provides a rather complete display of a working ranch of a century ago. For this reason, it is very actively used for field trips by Los Angeles area schools as well as many other types of organizations from Scouts (both boy and girl) to senior citizens and groups of tourists.

The Adobe is on the Historic American Building Survey, has been marked by the Native Daughters of the Golden West, has been designated Historic Cultural Monument Number One by the Cultural Heritage Board of the City of Los Angeles, has received an award from the Conference of California Historical Societies.
