NATIONAL REGISTER OF HISTORIC PLACES
REGISTRATION FORM

1311

This form is for use in nominating or requesting determination of individual properties and districts. See instructions in ~~How to Complete the National Register of Historic Places Registration Form~~ (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name Torre water catchment

other names/site number Hatsuho Water Catchments on Guam or Site #66-08-1135

2. Location

street & number Hatsuho Golf Course

city or town Yigo (Piga) vicinity N/A

state Guam code 010 county N/A code N/A

zip code 96929

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1986, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property X meets does not meet the National Register Criteria. I recommend that this property be considered significant X nationally X statewide X locally. (See continuation sheet for additional comments.)

8. Statement of Significance
=====

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B Property is associated with the lives of persons significant in our past.
- C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D Property has yielded, or is likely to yield information important in prehistory or history.

Criteria Considerations (Mark "X" in all the boxes that apply.)

- A owned by a religious institution or used for religious purposes.
- B removed from its original location.
- C a birthplace or a grave.
- D a cemetery.
- E a reconstructed building, object, or structure.
- F a commemorative property.
- G less than 50 years of age or achieved significance within the past 50 years.

Areas of Significance (Enter categories from instructions)

- Conservation
- Community Planning and
- Development
- Ethnic Heritage
- _____
- _____
- _____

Period of Significance 1900-1940

Significant Dates N/A

Significant Person (Complete if Criterion B is marked above)

Cultural Affiliation Lifestyle of Chamorro farmers before WWII.

Architect/Builder Juan dela Torre

Narrative Statement of Significance (Explain the significance of the property on one or more continuation sheets.)

Torre Water Catchment
name of property
Dededo, Guam
county and State

Description

The Torre Water Catchment is octagonal in shape. It is a partially subterranean concrete pit or tank, with an octagonally shaped exterior and a cylindrical interior. The walls of the catchment are constructed of concrete packed around limestone gravel and cobbles. The interior surface is plastered. The structure extends .60 meters above and 2.10 meters below the present ground surface. The exterior diameter of the structure is 5.19 meters with walls ranging between .27 meters and .46 meters in thickness.

The Torre water catchment is located in Dededo in an area more commonly known as "Machanao". This is area is one of the most northern areas of Guam. This area is far from water.

This catchment was built by a farmer named Mr. Juan Dela Torre in approximately 1916, for whom the catchment was named after. The land where the catchment sits was once a farm. Dispute over eligibility of historic significance was brought by Hatsuho International, present owner and golf course developer on July 6, 1990. During the construction of the Hatsuho Country Club. The Torre Water Catchment was overlooked by Paul H. Rosendahl, Ph.D., Inc., Hatsuho's contract Archaeologist, who was hired to provide a survey of the property prior to its construction.

In a letter dated May 7, 1990, during dispute of eligibility, Paul H. Rosendahl, Ph.D., Inc. recommended that the water catchment not be preserved. The Historic Preservation Review Board determined that the structure was historically significant and urged Hatsuho International to keep it intact.

Today, it is included in the Guam Register of Historic Sites. The golf course has been completed and the water catchment is on the perimeter of the putting green on "hole North 6".

The interior of the catchment has been lined with plastic and filled in with gravel. There is also a plaque explaining its significance to visitors who come to golf there.

Torre Water Catchment
name of property
Dededo, Guam
county and State

Significance

The Torre water catchment meet two criteria of significance for nomination, these are: 1) structures that are associated with events that have made a significant contribution to the broad patterns of our history, 2) structures that embody a distinctive characteristic of a type, period or method of construction or that possess high artistic value.

The water catchment provided water to those who chose to live in the area. They were able to consider long term occupancy with the structure. For many years up to the early 1900's, family owned property far from water was not often utilized because of the difficulty in accessing water.

This water catchment was hand built during a time when building materials were scarce and high in cost. It was designed and built by people who intended it to become a permanent structure for holding water. The labor used was provided by family members. The materials used were collected from around the vicinity of the property and the cement had to be purchased. This structure has survived many typhoons and World War II and has faired exceptionally well compared to the family homes that were once erected on the property and now no longer exist.

Please refer to Multiple Listing "Water catchments on Guam" for more information.
