OMB No. 10024-0018

United States Department of the Interior National Park Service

National Register of Historic Places Registration Form

RECEIVED

FEB 2 3 1993

NATIONAL REGISTER

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

I. Name of Property
nistoric name <u>Kanawha State Forest Historic District</u>
other names/site number
2. Location
street & numberCounty Route 42/43 2.6 mi. south of Charleston

Kanawha State Forest Historic District, Kanawha County, WV

	Section	number	7	Page	2
--	---------	--------	---	------	---

Narrative Description

The architectural character of buildings and structures in the Kanawha State Forest Historic District does not conform to any particular architectural style and may best be described as "Rustic Vernacular" architecture. These structures, placed in the Davis Creek valley surrounded by steep, forested mountainsides, are typical of those built by enrollees of the Civilian Conservation Corps (CCC) in many parts of the country during the depression years before World War II.

The District consists of four picnic shelters, administration building (existing residence for the Forest Superintendent), powder house, foot bridge and dam. Other manmade elements in the District include roads, toilets, playgrounds, picnic tables, and hiking trails. Manmade elements are skillfully blended with natural features such as creeks and hollows, open fields, forest land and mountains. This blend of manmade and natural elements reflects Franklin D. Roosevelt's "one with nature" philosophy.

Wood structural members were made from dead and/or down blighted chestnut trees. Foundations, chimneys, steps and shelter floors were made from locally quarried and worked sandstone. Stonework was laid in coursed ashlar pattern with convex tooled joints. Original wood shingle roofs were supported by king type trusses made from round log members nailed or fastened with wooden pins. The trusses, in turn, are resting on large log columns strengthened by diagonal knee braces. Shelter railings are either stacked logs between columns, or have open log pickets fitted between top and bottom rails.

The first recreational area in the District consists of the Foot Bridge site, the Dam, and Shelters #1 and #2. A comfort station, of sympathetic design, is part of the group. This building was not an original CCC unit but was built early in the 1940's. Picnic Shelters #1 and #2 are sited on a hillside bench overlooking the Foot Bridge site. The Foot Bridge, part of the original trail system, spanned Davis Creek about 100 feet downstream of the Dam and small lake.

Less than one-half mile above the lake, on the south side of Davis Creek, in a small clearing, is the Superintendent's Residence. Across a small stream, known as Pheasant Run, from the residence is the Forest Office, a non-conforming building, constructed in the late 1950's. A few hundred feet south-west of these two buildings is the original Powder House and two non-conforming service buildings.

Approximately four miles from the first two District areas are the picnic/recreation areas known as the Log Town HOllow Picnic Area and the Davis Creek Picnic Area where Shelters #4 and #5 are located. Also in these areas are three non-conforming shelters and a non-conforming comfort station.

National Register of Historic Places Continuation Sheet

Kanawha State Forest Historic District, Kanawha County, WV

Section number	 Page3	

Except for asphalt shingle replacement for wood shingles on the roofs and the addition of electricity in Shelters #4 and #5, the Picnic Shelters are in original condition. The Powder House and Superintendent's House have asphalt shingle roofs; the foot bridge is gone except for its stone abutments and weir gates have been removed from the dam. These seem to be the only changes in those structures.

The rustic architecture of the Kanawha State Forest exhibits fine craftsmanship and sensitivity to its environment. The structures are built of natural materials, have low silhouettes, good horizontal lines, and were carefully proportioned.

Architectural Description

Shelter No. 1: One of four remaining original 1938-1941 picnic shelters, this building is three bays wide and one bay deep. It's foundation and steps are fashioned from native sandstone laid in coursed ashlar style. The building has an open braced frame structure made with over-sized chestnut logs. The asphalt shingle covered roof is supported by trusses and the rear center bay consists of a stone chimney flanked on each side by a coursed log wall with fully notched corners. Railings consist of vertical log pickets between horizontal top and bottom log railings. The shelter is 34' x 26' wide a 14' gable ridge height. (C.)

Shelter No. 2: This original shelter is located on the same woodland bench as No. 1. It is three bays wide and three bays deep and is constructed in a similar manner as No. 1, with coursed ashlar sandstone foundation and chestnut structural members. Shelter 2 also has a fireplace and chimney. Railings are both open, as in Shelter 1, or made with stacked logs between columns. The shelter measures 39'-6" wide x 23'-6" deep with a 14' gable height. (C.)

<u>Comfort Station</u>: Noted on the graphic map as non-conforming building #1, this toilet building is located near the road and accessible to the first two shelters. The building has wood siding and asphalt shingle roof and is designed in a manner sympathetic with other Forest buildings. It does not have a negative impact on the original structures.(N.C.)

<u>Davis Creek Foot Bridge</u>: The foot bridge was part of the original trail system which tied the various recreation areas together. It consisted of two log beams with a wood board floor and braced handrails, all supported by standstone buttresses. The wood structure was declared unsafe during the summer of 1992 and dismantled.

The Davis Creek Dam: The dam was built in 1939-1940 to provide flood control in the Davis Creek watershed, and also to support a large recreational development including swimming, with bathrooms, beach and diving platform. Before it could be opened, however, the lake was found to be contaminated with bacillus coli-typhoid germs. Swimming was never allowed in the lake, however it remains as a flood control structure. The dam is constructed of reinforced concrete and native sandstone built on and physically

National Register of Historic Places Continuation Sheet

Kanawha State Forest Historic District, Kanawha County, WV

Section number.	7	Page4		

pinned to the solid rock stream bed. The impoundment wall is 100 feet long between faces of end walls and is approximately 10' in height. Retaining walls are faced with local sandstone. Flood control weir gates were part of the original construction, extending 3 feet beyond the top of the dam. The gates are no longer in place. (C.)

Superintendent's Residence: Originally built as the Forest Administration Building, this structure has served as the Superintendent's Residence for many years. The house is $1\frac{1}{2}$ stories, designed in a Vernacular Bungalow architectural style. Like most original buildings in the Forest, it is constructed of chestnut logs V-notched at corners, with chink and daub infill. It has a gable roof and gable dormers. Foundation, chimney and porch railing walls are of native sandstone laid in coursed ashlar. Overall dimensions are 46' wide by 35'-6" deep with a 23' height at the main gable end. There are front and rear covered porches. The roof is covered with asphalt shingles. (C.)

<u>Powder House</u>: An all-stone building, the Powder House was used to store black powder and dynamite during the CCC era. It is 7'-6" wide by 9' long with a 10' gable height. The gable style roof is covered with asphalt shingles. There is one solid 5-panel wood door and two wood windows protected with vertical iron bars. A feature of the building is a triangular shaped keystone located just over the center of the wood door lintel. (C.)

<u>Forest Office</u>: This non-conforming building was erected in the early 1950's. It is one-story, gable-roof, wood framed, and covered with wood siding like other forest buildings. The foundation is brick and there is a small front porch. It is noted on the graphic map as Non-conforming building No. 2. (N.C.)

<u>Service Buildings</u>: Located across a service compound from the Powder House are two service buildings (Non-conforming buildings #3 and #4). The smaller of the two (3 bay) was built in the 1980's while the larger (6 bay) was built in the 1960's according to forest staff members. They are gable-roof wood structures on concrete block foundations with wood siding, asphalt shingle roofs and wood overhead garage doors. The style of architecture as well as material selections make the buildings compatible with earlier forest buildings. (N.C.)

Shelter No. 4: The construction materials and basic design for this structure are similar to Shelters #1 and #2 except that this shelter is open on all four sides. It does not have a fireplace. The shelter has three bays across the front and is one bay deep. The front center bay is open, as the main entrance, and all other bays have log picket railings. The building is 34'-4" long by 16'-2" wide and is 14' high at the ridge. The truss supported roof is covered with asphalt shingles. (C.)

National Register of Historic Places Continuation Sheet

		Kanawha	State	Forest	Historic	District,	Kanawha	County,	, W	V
Section number7	Page_	5						٠		

Shelter No. 5: Shelter No. 5 has three bays across the front and is one bay deep. The rear center bay extends to the rear with a stone chmney surrounded by notched logs. The shelter is built of chestnut logs with sandstone foundation and chimney laid in random ashlar. Two rear bays, two front bays and the end bays have log picket railings. (C.)

<u>Shelters No. 3, No. 6, and No. 7</u>: These three non-conforming shelters are much later that Shelters #4 and #5 but are designed and built in a similar manner to the original shelters. They have asphalt shingles over truss supported roofs, wood columns, stone foundation walls and floors. (N.C.)

<u>Toilets</u>: The comfort station for Log Town Hollow and Davis Creek recreation areas is centrally located between the two. Like the other non-conforming buildings in the District its architecture reflects the rustic vernacular style of original 1938-1942 CCC architecture, with the exception that materials used are in more modern forms, such as sawn timbers instead of round logs. (N.C.)

NOTE: The contributing resources are marked in Section 7 with a C. The noncontributing resources are indicated with N.C. The use of the term "nonconforming" refers to noncontributing resources that do not fall within the period of significance, 1938-1942.

National Register of Historic Places Continuation Sheet

Kanawha State Forest Historic District, Kanawha County, WV

Section	number	_8	Page	2
---------	--------	----	------	---

Buildings and structures in the Kanawha State Forest Historic District are, in retrospect, memorials to a very important period in the history of the United States - the Great Depression years, 1938-1942. They are also remmnants of a rustic style of architecture developed to use natural building materials in harmony with the environment. The architectural artifacts, along with roads and trails in the Kanawha State Forest, remain as symbols of a nation's struggle to emerge from history's worst economic depression. The buildings and structures are still being used as originally intended and still reflect President Franklin D. Roosevelt's "one with nature" philosophy.

When Roosevelt became President the country was mired in a situation of seemingly hopeless unemployment. Roosevelt asked Congress for a program that would place unemployed youth in the forests to perform government-sponsored work. Eight days later the Emergency Conservation Work Act was passed, along with \$10 million in funding. The law mandated an initial recruitment of 250,000 young men between the ages of 18 and 25. Recruits were required to be unemployed, physically fit, unmarried, and willing to make allotments to their families. They were provided with food, clothing, equipment, and shelter but of the \$30 per month each was paid, \$25 was automatically sent home.

The War Department administered the camps which were built in the style and organization of existing military establishments. Military officers were upper level managers and the men wore military style clothing (for ceremonial events) and the camps were operated in more-or-less the manner of a military program. Other government agencies had responsibilities for CCC camps, including the Agricultural Department (U.S. Forest Service and Soil Convservation Service) and the Interior Department (National Park Service).

More than 4500 CCC camps were established throughout the country, in every state and Alaska. West Virginia had 18 camps. The Kanawha State Forest Camp was designated S-76. The "S" stood for State Forest. All enrollees were provided with educational opportunities in addition to the obvious development of their labor skills. Evening classes were held in many subjects, according to interviews conducted with former Kanawha State Forest enrollees.

The Kanawha State Forest Historic District exhibits, to all those who use its facilities, the mandate of the law which created the Civilian Conservation Corps, "... That for the purpose of relieving the acute condition of widespread distress and unemployment now existing in the United States, and in order to provide for the restoration of the country's depleted natural resources and the advancement of an orderly program of public works, the President is authorized ... to provide for employing citizens of the United States who are unemployed; in the construction, maintenance, and carrying on of public works of a public nature ... which are suitable for timber production, the prevention of forest fires, floods and soil erosion, plant and pest control, the

construction, maintenance and repair of paths, trails and fire lanes in the national parks and forests The Kanawha State Forest Historic District contains the only architectural artifacts of this great era remaining in Kanawha County.

The remaining buildings and structures are quite significant architecturally because they belong to a unique style designed by military engineers to be used in training young inexperienced enrollees new crafts and trades which could not only benefit them individually but strengthen the American economy with skilled craftsmen.

The architectural style blended with its environment and softened any adverse effect the State Forest development may have had on the natural ecology. All the development brought to the county and its urban communities new recreational opportunities unavailable before.

Non-conforming Picnic Shelter. The architecture of this shelter clearly indicates an effort to be sympathetic to original shelters without copying them. View is toward the east.

Photograph No. 17

This photograph shows a forest road in original condition as constructed in the Period of Significance (1938-1942). The most heavily used main forest road is paved with asphalt today. View is toward the south.

Photograph No. 18

This is a winter photograph of a portion of the Teaberry Rock Trail in the District. The trail is typical of other trails which tie the Historic District elements together. View is toward the west.

NOTE: The use of the term "nonconforming" refers to noncontributing resources.

National Register of Historic Places Continuation Sheet

Kanawha State Forest Historic District, Kanawha County, WV

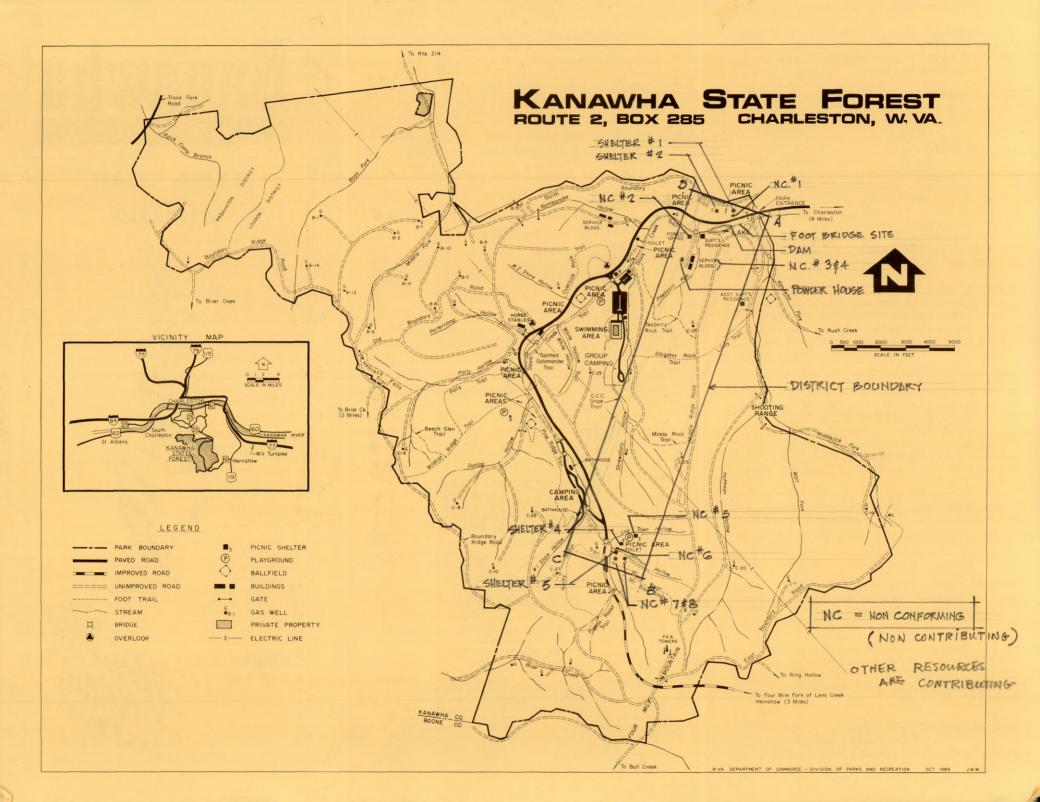

Section number10	Page2_	
		

Verbal Boundary Description

Beginning point A is located on east-west UTM grid line 4237 at the confluence of Kanawha Fork and Davis Creek which point occurs on the Kanawha State Forest boundary; thence South 16,375 feet to point B at east-west TUM grid line 4232; thence West along that same line 4000 feet to point C; thence North 16,375 feet to point D at east-west grid line 4237; thence East along that same line 4000 feet to beginning.

Boundary Justification

The boundary of the Kanawha State Forest Historic District was designed to include all eight historic buildings and structures built by the Civilian Conservation Corps. The boundary also includes roads and trails bulit by the CCC which connect the historic structures. Within the boundary are eight support structures which compliment the historic structures, however were built in later years. These include a Forest Office and two Service Buildings. Relative to the architectural style of the CCC buildings, these structures will be considered non-conforming. Other non-conforming structures include 3 picnic shelters and two comfort stations.

CCC Snipe Trail - 3/4 mile. Easy interpretative trail that begins behind the group camp and ends at Mossy Rock Trail. Named to honor the work done by the CCCs. Limited to hikers only.

Spotted Salamander Trail - 1/4 mile. A wheelchair accessible nature trail across the street from the stables.

Davis Creek Trail - $2\ 1/2$ miles. *Yellow* O Fairly level trail beginning at the footbridge below the lake and following Davis Creek to Dunlop Hollow. Other access at forest office and at swimming area. Bicycles are permitted on this trail.

Alligator Rock Trail - 1/2 mile. Yellow ♦ A steep trail beginning on the Shrewsbury Hollow Road above the pool area and ends on Middle Ridge Road. Limited to hikers only.

Overlook Rock Trail - 1 1/2 miles. Yellow \Diamond A moderately steep trail beginning in the first hollow above the swimming area and ending on #2 Store Hollow. A small outcropping of rocks offers a view of parts of the Davis Creek Watershed. Limited to hikers only.

White Hollow Trail - 1 1/2 miles. Orange ◇ A moderate trail which begins at the mouth of White Hollow just below the "Big Rock" and ends across Dunlop Hollow. Limited to hikers only.

Polly Trail - 1 1/2 miles. Red

An easy to moderate trail that goes up Polly Hollow until it intersects with Wildcat Ridge Trail. Limited to hikers only.

Wildcat Ridge Trail - 2 miles. *Blue* O Trail begins between first and second creek crossings in Dunlop Hollow. A steep climb leads to the ridge top where the trail becomes fairly level. Bicycles are permitted on this trail.

Pine Ridge Trail - 1 1/2 miles. Yellow A moderate trail beginning at Dunlop Hollow Ballfield and ending on the c-26 gas road. Limited to hikers only.

#1 Store Trail - 1/4 mile. Blue □ A short trail starting near the first bathhouse in the campground and ending on Pine Ridge Trail. Non-campers can park outside the campground entrance to hike this trail. Limited to hikers only.

Logtown Trail - 3/4 mile $Yellow \Delta$ An easy to moderate trail that begins behind shelter #3 and ends on Middle Ridge Road. Limited to hikers only.

Johnson Hollow Trail - 3/4 mile. Orange □ An easy to moderate trail that begins behind shelter #7. Limited to hikers only.

Pigeon Roost Trail -3/4 mile. *Red* O An easy trail that goes up Pigeon Roost Hollow to the Boundary Road. Bicycles are permitted on this trail.

Rocky Ridge Trail - 2 miles. *Blue* □ A moderate ridge-top trail with some steepness. Access from Pigeon Roost Trail and shelter parking lot. Limited to hikers only.

<u>Lindy Trail</u> - 1/2 mile. *Blue* Δ A moderate trail beginning on Middlelick Fork and ending at Alligator Rock Trail. Limited to hikers only.

Mossy Rock Trail - 3/4 mile. $Red \Delta$ An easy to moderate trail that goes from the head of Shrewsbury Hollow to Middle Ridge Road. Bicycles are permitted on this trail.

Hemlock Falls Trail - 3/4 mile. Yellow Δ A moderate trail that goes from Polly Hollow to the Old Boundary Road. Limited to hikers only.

Beech Glenn Trail - 1 1/2 miles. Blue \square Easy and natural trail that begins in Polly Hollow and ends at Wildcat Ridge Trail.

Black Bear Mt. Bike Trail - 1/2 mile. Blue O A steep and challenging downhill trail from Middle Ridge Road.
