___ See continuation sheet.

Verbal Boundary Description: ___ See continuation sheet.

The nominated property consists of a rectangle, 23 feet wide by 42 feet long, whose vertices coincide with the outside corners of the bridge abutments at each end of the bridge, and includes only the bridge superstructure and substructure.

Boundary Justification: ___ See continuation sheet.

Because the bridge is located on a public road, there are no legal boundary lines for the ends of the bridge. Therefore, these boundaries are drawn to encompass only the superstructure and substructure of the bridge itself.

Located one mile north of the Village of Montrose, Bridge No. 44-212-090 carries an unpaved road over the East Fork of the Vermillion River. Resting on steel pile abutments with plank wing walls and back wall, this 37-foot bridge consists of three rolled steel girders carrying I-beam floor beams and I-beam stringers. The connections are bolted and the decking is timber. The bridge's railing is constructed of angle-section posts and rails with lattice-work bars. State highway department records indicate reconstruction work in 1960, which probably refers to rebuilding of the abutments. The bridge retains very good integrity.

Section number 8 & 9 Bridge No. 44-212-090 Page 7
=====

Bridge no. 44-212-090 is being nominated to the National Register of Historic Places as part of the "Historic Bridges in South Dakota" Multiple Property Nomination. It is related to the historic context of "Historic Bridges in South Dakota, 1893-1943" and is classified with the associated property type for steel stringer and steel girder bridges. This bridge is individually eligible for the National Register under Criterion C as an early example of a steel deck girder, and for its association with the Standard Bridge Company. The bridge retains very good integrity.

The Standard Bridge Company was organized in Omaha in 1900 by Robert Z. Drake. Drake was born and educated in Kansas and began building bridges in the early 1890s when he was in his early twenties. Besides working as a contractor, he was an innovator developing a configuration of steel pilings for bridge substructures and the transverse joist bridge. He also developed standardized plans for truss bridges that were widely used in Nebraska and elsewhere. Bridge No. 44-212-090, a transverse joist structure, represents the Standard Bridge Company's development of various steel girder structures, of which the transverse joist bridge was one type.

Bridge No. 44-212-090 was authorized in January 1914, when the McCook County Commissioners approved a petition that a "thirty-six foot steel bridge be put in between Sections 15 & 22 in Montrose Township." Although county records do not provide a completion date, the structure was presumably built that same year by Standard Bridge Company of Omaha, which had been the successful bidder on the county's annual bridge building contract since 1903. This bridge represents a very early example of a steel girder bridge, as it was not until after the turn of the century that I-beams gained acceptance in bridge construction for use in short span applications, supplanting timber stringers.

Section 8: Applicable Criteria

93001266 Larson Bridge Codington County

Criterion C should be checked and not A to be consistent with bridge's significance in engineering for its method of construction.

Section 8: Period of Significance

93001266 Larson Bridge Codington County

Period of significance is amended to read "1917" to indicate date of construction and to be consistent with significance in engineering.

93001281 Red Shirt Bridge Custer County

Period of significance is amended to read "1943-1944" to cover the period of construction.

93001278 South Dakota Dept. of Transportation Bridge No. 12-503-230 Faulk County

Due to typographical error, period of significance is corrected to read " 1920-1943."

93001265 South Dakota Dept. of Transportation Bridge No. 15-210-136 Codington County

Period of significance is amended to read "1917" since significance is under criterion C in engineering and the date of construction should be entered.

Section number 3 Page 5

93001262 South Dakota Dept. of Transportation Bridge No. 25-380-
142 Faulk County

Period of significance is amended to read "1902" because the area of significance is engineering and the period of significance should be based on the date of construction. The bridge was moved from its original site in 1955.

Section 8: Date of Significance

93001308 Eighth Street Bridge Minnehaha County

"1977" is deleted because the date lies outside the period of significance.

93001317 Hall Bridge Spink County

"1904" is deleted because bridge is significant under criterion C for engineering and the move in 1904 falls outside the period of significance which is based on the date of construction and does not appear to have particular importance.

93001286 South Dakota Dept. of Transportation Bridge No. 20-153-
210 Deuel County

"1960" is deleted because the date lies outside the period of significance.

93001262 South Dakota Dept. of Transportation Bridge No. 25-380-
