NPS Form 10-900 (January 1992)

United States Department of Interior National Park Service

National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin A). Complete each item by marking 'x' in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter 'N/A' for 'not applicable.' For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10A). Use a typewriter, word processor, or computer, to complete all items.

8. Statement of Significance

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for the National Register listing.)

- A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B Property is associated with the lives of persons significant in our past.
- X C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

- (Mark "x" in all the boxes that apply.)
 ____ A owned by a religious institution or
 used for religious purposes.
- ____ B removed from its original location.
- ____ C a birthplace or grave.
- ____ D a cemetery.
- ____ E a reconstructed building, object, or structure.
- ___ F a commemorative property.
- ____ G less than 50 years of age achieved significance within the past 50 years.

Narrative Statement of Significance

(Explain the significance of the property on one or more continuation sheets.)

Paperwork Reduction Act Statement: This information is being collected for applications to the National Register of Historic Places to nominate properties for listing or determine eligibility for listing, to list properties, and to amend existing listings. Response to this request is required to obtain a benefit in accordance with the National Historic Preservation Act, as amended (16 U.S.C. 470 <u>et seg.</u>).

Estimated Burden Statement: Public reporting burden for this form is estimated to average 18.1 hours per response including time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding this burden estimate or any aspect of this form to the Chief, Administrative Services Division, National Park Service, P.O. Box 37127, Washington, DC 20013-7127; and the Office of Management and Budget, Paperwork Reductions Projects, (1024-0018), Washington, DC 20503.

Section 7: Description

The Motor Service Company building is a one-story modern broadfront commercial building with a rectangular floor plan.¹ The Commercial Style building with Art Deco influences, designed by James C. Ewing, was completed in 1929. The building has an exposed concrete foundation, red brick walls, and concrete ornamentation, including a cornice line on all four elevations. The curved tar roof is supported by a system of steel trusses. The interior space of the building is divided into a showroom, office, parts department, and a garage area.

The Motor Service Company building is found in a commercial area of Rapid City and was historically in close proximity to other automobile dealerships. Dean Motor Company, built also in 1929, (currently Midwest Tire and Muffler Company), is located across Fourth Street on the adjacent Main Street block at 329 Main Street. Black Hills Auburn Company, yet another automobile dealership, was located across the street from Motor Service Company at 521 St. Joseph Street.²

The Motor Service Company building, measuring 50 feet x 140 feet, is located on the southeast corner of an urban downtown block. The building has an equal size car lot, also measuring 50 feet x 140 feet, adjacent to it on the west side.³ At the time of construction, the building was initially set back from both St. Joseph and Fourth streets. There was a grassy lawn between the building and the street on both the south (front) and east sides of the building. In the 1940s, the lawn was consumed when St.

Section <u>7</u> Page <u>2</u> Motor Service Company, Rapid City, Pennington County, South Dakota

Joseph and Fourth streets were widened leaving the building to stand closer to the street as it is presently found.⁴

The front (south) elevation is the main facade of the building facing St. Joseph Street. It has three bays with a protruding segmental arch entryway and corner brick piers. The front facade has a dominant brick arched parapet with concrete cornice line. The entryway is flanked by floor to ceiling fixed display windows on both sides. The display windows with glass transom have plain brick sills and lintels, as well as thin mullions. The brick double door entryway is defined by brick pilasters on each side and a concrete cornice line. There is decorative brick checkerwork in the arch above the doorway. The entryway has two wood single pane glass doors with glass transoms.

The side (east) elevation, facing Fourth Street, has seven brick pilasters with defined concrete tops equally spaced across the brick wall. On the side elevation the roof line is horizontal with segmental arches above both the south, original service door, and the corner display window. The entire roof line has a concrete cornice line. The side elevation has a single doorway and two service doors. A double door, which provides access into the showroom, displays wood with single glass pane doors. The entryway is highlighted with brick trim and concrete corner blocks. Both multiple panel wood service doors enter into the garage and maintenance area. Originally, there was only one service door, but the northernmost door was added in the late 1940s or early 1950s. Also at that time the original door was enlarged to accommodate the height of trucks.⁵ Fenestration on the east elevation includes the corner display window with transom and four sixteen pane metal frame windows with brick sills. The center three over three pane portion of the windows open as an awning window.

Section <u>7</u> Page <u>3</u> Motor Service Company, Rapid City, Pennington County, South Dakota

The rear (north) elevation of the building faces the alley between St. Joseph and Main streets. The rear elevation has a dominant arch parapet, identical to the front facade, with a concrete cornice. The rear elevation also displays a single nine pane frosted glass and metal casement window on the western side.

The side (west) elevation of the building faces the car lot for the Motor Service Company and has a utilitarian appearance. It has a horizontal roofline. There are seven brick pilasters equally spaced across the brick wall with only the southern pilaster, closest to the main facade, having a concrete top. The wall features two double metal frame windows with fifteen panes and brick sills located on the northern half of the elevation. The center three-over-three pane portion of each window is an awning type window. There is also a metal sash multiple pane window with brick sill to the south.

The interior of the building is divided into two main spaces, the garage area and the showroom area. The showroom area, located on the southern half of the plan, includes office space in the northeast corner, another office in the southwest corner and a parts department, containing a parts storage area and counter. The showroom has a tan tile floor with black and red stripes, brick block walls painted white and a finished ceiling. Original features remain in the showroom, including the restrooms, a drinking fountain and an arch doorway in the hallway leading to the garage area. In the 1940s the parts department in the northeast corner was remodeled to an office and the ramp and french doors to the garage area were removed.⁶ The parts counter, parts room, and office were added into the showroom floor during a remodeling in the 1950s. The garage area is a large open space with concrete floor and brick block walls with exposed metal steel trusses. In the garage area the floor slopes slightly towards a central drain to collect fluids.

Section <u>7</u>	Page <u>4</u>	Motor Service Company,	Rapid City,	Pennington
		County, South Dakota		

The signage of the Motor Service Company includes signs for the company, services offered, and a history of types of automobiles sold by the company. The original sign for the company was a wooden sign on the main facade above the entryway reading "Motor Service Company, " which was utilized until about 1939.⁸ Currently on the front facade there is a neon sign "Motor Service Co." above the arched entryway dating to the 1950s.⁹ In the 1950s the dealership sold Studebakers and a neon sign hanging above the front door extending out from the building advertised them and it read "Studebaker, Motor Service Co." This sign remained above the main door until it was removed in the late 1960s.¹⁰ Currently, on the top of both of the brick piers are rectangular neon shaped signs which are the Triumph automobile symbol, cars once sold by the Motor Service Company. The neon signs on the main facade date to the 1950s and are currently inoperable.¹¹ On both sides of the entryway are large rectangular illuminated blue and white plastic signs. The one on the right reads "Jaguar, Triumph, British Leyland, " with the company's symbol and the one on the left reads . "Austin, MG, British Leyland, ' with their symbol. On the southeast corner of the building a round plastic sign hangs reading "Alfa Romeo" and on the southwest corner of the building there is a rectangular wooden sign reading "Cars."

Additional signage on the building includes wooden signs over each of the bays on the east elevation, facing Fourth Street. The signs read as follows from left to right: Motor Service Co., Import, Domestic, Sales, Service, Center, and Motor Service Co. The original signs on the building read from left to right: Goodwill, Used Cars, Motor Rebuilding, Brake Service, Battery Service, Washing and Greasing.¹² Also on the east elevation are two signs

National Register of Historic Places Continuation Sheet

Section <u>7</u> Page <u>5</u>

Motor Service Company, Rapid City, Pennington County, South Dakota

extending out from the building on both sides of the original service door. The round glass and brass signs currently read "Triumph and MG" respectively. These two signs were originally Paige signs advertising the automobiles made by the Graham Paige Automobile Company of Detroit and are original to the building. The signs were removed and repainted in the 1970s to represent the automobiles being sold by the dealership at that time.¹³ In the car lot to the west of the building there is a free standing neon sign reading "Motor Service Co."

The Motor Service Company is of local significance as an excellent representation of a Commercial Style building with Art Deco influences in the city of Rapid City, South Dakota. Furthermore, the building is a good example of the commercial work of local architect James C. Ewing. Since the Motor Service Company has been owned by the same family throughout its history and underwent only minimal alterations, the overall integrity of this building is high.

Section 8: Statement of Significance

The Motor Service Company building, built in 1929, is an excellent example of a modern broad-front commercial building with Art Deco style influences, designed by James C. Ewing. The property retains integrity of original design with few exterior and interior alterations to the building and it retains its historic function. The building meets National Register Criterion C in the area of Architecture as one of the best local examples of a commercial modern broad-front Art Deco style building in Rapid City. The Motor Service Company relates to the historic context "Depression and Rebuilding 1893-1929: New Transportation Facilities and the Impact of the New Automobile" outlined by the *Historic Contexts for Historical and Architectural Resources in South Dakota* by the South Dakota State Historical Preservation Center.¹⁴

Historical Background

Rapid City, located in west central South Dakota, lies at the junction of the Black Hills and the rolling plains in Pennington County. Prior to permanent Euro-American settlement in the Black Hills, several mining parties attempted to enter the area and prospect for gold. However, they were often refused entry by the United States Army. This pressure prompted a United States Government sponsored expedition headed by General George A. Custer to the Black Hills in 1874. By 1875, the Black Hills' territory was overrun with approximately 1,000 miners prospecting for gold and mining communities such as nearby Lead and Deadwood, South Dakota were born.¹⁵

Section <u>8</u> Page <u>2</u>

Motor Service Company, Rapid City, Pennington County, South Dakota

Rapid City was founded in 1876 during the initial Black Hills mining boom.¹⁶ It served as a trade center for communities in the Black Hills. By 1877, the city was designated as the county seat of Pennington County and the community was replatted to expand the boundaries of Original Town to include 130 blocks. Three years later, the population of Rapid City reached 312. On October 19, 1882, the city was incorporated and by 1890 the population jumped to 2,128. The growth of Rapid City increased as a result of the arrival of the Fremont, Elkhorn & Missouri Valley Railroad, under the ownership of the Chicago & Northwestern System, on July 4, 1886.¹⁷

After the turn of the century, additional railroad activity included the connection of Rapid City to eastern markets by both the Milwaukee Railroad and Chicago & Northwestern Railroad. Herbert Schell, prominent South Dakota historian, notes that Rapid City served as "the eastern gateway to the mining region and an important station on the transportation routes from south and east."¹⁸ As a result of the improved railroad access, a rush of settlers entered the region stretching from the Cheyenne River to the White River.¹⁹ With the increase in settlers the economy of Rapid City flourished. Increased commercial, social, and industrial activity prompted the construction of many of the current downtown buildings up to World War I. During this period, the city not only served as a trading center and a political center, but growth of the community was also incurred from the

tourism industry of the Black Hills promoted in the 1920s.²⁰ By 1930 the population of Rapid City, according to the U.S. Census, was 10,404 and it was now the largest city in the Black Hills with a greater population than the early mining towns of Deadwood and Lead combined.²¹

The introduction of the automobile brought about the development of varied property types including automobile dealerships and repair and service centers. The first fireproof garage was constructed in Rapid City in 1911. The Rapid City Garage building at 827-829 Main Street provided service and storage of cars for one of the first auto dealerships in the city. In the late 1920s Raymond Motor Company dealership began occupation of the building.²² When the Motor Service Company was constructed in 1929 there were twelve auto dealerships in Rapid City.²³ Three dealerships were located within a block of the new Motor Service Company. The Black Hills Auburn Company was at 521 St. Joseph Street, the previous location of the Motor Service Company. Dean Motor Company, on the corner of Fourth and Main streets, was completed the year after the Motor Service Company building. The James Motor Company, on the corner of Third and Main street was under construction in 1929.²⁴

Section <u>8</u> Page <u>4</u> Motor Service Company, Rapid City, Pennington County, South Dakota

The Motor Service Company was built in Rapid City during a period of significant construction. In 1928 the Rapid City building program was estimated at 1.75 million dollars, including significant buildings such as the Alex Johnson Hotel, St. John's Hospital, and the School of Mines Gymnasium.²⁵ In April of 1929 the Rapid City Journal reported that ten major structures were under construction in Rapid City, including the Rapid City Auditorium, James Motor Company, Western South Dakota Alfalfa Seed Growers Exchange, Fairmount Creamery and three large buildings for the Fish and Hunter Lumber Company, as well as Edgar Morrison Garage.²⁶ In 1929, it was estimated that 140 new homes were constructed and eighteen new businesses.²⁷ During the years 1928-1929 at least six automobile garages were under construction or expanded. They include the James Motor Company Studebaker Garage at 229 Main Street, Rapid City Motor Company at 826 Main Street which doubled its size, Barlow-Hudson-Essex Garage, Dean Motor Company at 325-331 Main Street, Motor Arcade, and Motor Service Company at 402 St. Joseph Street. All of these buildings were one-story commercial structures in the modern broad-front style.²⁸

The Motor Service Company was opened by Edgar Morrison in May of 1923.²⁹ His first shop was located in the Bradsky Building on Main Street and West Boulevard with the service station in the rear of the Boulevard. Edgar Morrison moved the business to a new location

finally Alfa Romeos. Currently the Motor Service Company is phasing out the sale of automobiles and focusing on the service of import and domestic automobiles.³⁶

Architectural Development

The Motor Service Company and the related dealerships and garages built in the same time period often reflected the new commercial style of architecture with the modern broad-front commercial building. Characterized as one-story structures with large open spaces, the building type was able to accommodate the open space needs of automobile showrooms and service garage areas. The Motor Service Company building demonstrates the design and materials characteristic of the modern broad-front commercial building. It is a one-story brick building with parapet, brick piers, concrete and brick ornamentation, on the primary facades, and large display windows.³⁷

Architect: James C. Ewing

James C. Ewing was born on May 16, 1888. He received his formal education from the Chicago School of Technology and Georgia Tech. Ewing worked for the architectural firm of Hulse & Company of Des Moines, Iowa until 1920 when he opened a practice in Rapid City. Ewing was exposed to Rapid City when he worked on the construction of the Pennington County Courthouse while being employed with Hulse & Company. Ewing joined a partnership with Adrian Forrette in 1944. The firm of Forrette and Ewing operated until 1960 when both men retired. Other buildings designed in Rapid City by Ewing include the Rapid City Steam Laundry, Riss Building, Jefferson School, and what is currently the Fair Grounds Administration Building. The latter building was one of the first pre-cast

at 521 St. Joseph Street remaining there until 1929, when the present building was completed a block east at 421 St. Joseph Street.³⁰

Edgar Morrison bought lots 31 and 32 of Block 86 Original Town on January 19, 1929 for \$2,250 from Fannie E. Reeves.³¹ Edgar Morrison, owner of Motor Service Company planned for a new garage to be built. The new garage was designed by James C. Ewing, architect of Rapid City. Plans were discussed in the *Rapid City Journal* on February 23, 1929 indicating that the fire-proof building was to be 50 feet wide and 140 feet long.³² The *Rapid City Journal* also reported that construction was under way in April of 1929 and the "building may be ready for occupancy by June 1 or earlier."³³ The contractor for the building was "Curly" Garland, later of M.A. Garland Construction Company.³⁴ The building construction was completed in 1929.

The Motor Service Company offered both sales and service of automobiles. In the 1932-1933 City Directory the Motor Service Company advertised "Graham, Pontiac, Cadillac and LaSalle Motor Cars, Sales and Service, Auto Repairing, Storage and General Garage Work."³⁵ The Motor Service Company sold a variety of automobiles. Originally the company sold Pontiacs and Cadillacs, then Graham Paige Automobiles through ca. 1939, followed by Studebakers through the mid 1960s and then Triumphs, Land Rovers, MG, Jaguars, and

concrete structures constructed in Rapid City. In 1984, at the age of 96 James Ewing passed away. As a result of the Flood of 1972, all floor plans held by the Ewing Family were destroyed.³⁸

In conclusion, the Motor Service Company building, located at 402 St. Joseph Street in Rapid City, South Dakota is representative of a prominent architectural style, the Commercial Style with Art Deco influences. The building, constructed in 1929, was designed by the regionally renowned Rapid City architect, James C. Ewing. This date of construction clearly falls in the statewide historic context of "Depression and Rebuilding 1893-1929: New Transportation Facilities and the Impact of the New Automobile." Contextually, the building also relates to the commercial development, more specifically the automotive industry in Rapid City. The building has been owned by the Morrison family for over sixty-six years. Based upon the above-referenced information, the Motor Service Company building meets the National Register Criterion C in the area of architecture. It is an excellent example of Commercial Style architecture with Art Deco influence in the city and as the work of architect James C. Ewing.
