## National Register of Historic Places Registration Form

828

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

### 1. Name of Property

## SUMMARY

The First Hotze House is located at 1620 South Main Street at the south edge of the Original City of Little Rock, Pulaski County, Arkansas. Built in 1869 by Peter Hotze, it is a one-story wood frame cottage with cypress trim and weatherboard siding on a foundation of brick piers. The Italianate-style front porch has a railing over repeated decorative panels and eight columns grouped in pairs supporting a wood shake roof. The floor plan of the original house is two rooms on either side of a central hall, with a back wing that makes the house an L-shape. The original brick foundation piers have been filled in with brick in order to enclose the crawl space under the cottage and the porches. The entire house was restored in 2001-02, retaining as much original fabric as possible. An outbuilding was constructed in 2006 in matching style on the footprint of the original detached kitchen, and does not contribute to this nomination. No other outbuildings survive.

## ELABORATION

When the First Hotze House was built in 1869, the south extension of Main Street was essentially a country road, and was the only structure on the block at that time. The block upon which the house was built, Block 166, was acquired in 1863 on the south edge of the Original City of Little Rock for Peter Hotze by his brother Conrad, both immigrants from Innsbruck, Austria.

During the following years, the neighborhood became exclusively residential until the mid-20<sup>th</sup> century when commercial development began to in-fill the empty lots between the residences. Today the house shares the block with the Hotze House (NR listed 8/11/1975) at 1619 South Louisiana Street, a church, three commercial buildings and the intersection of 17<sup>th</sup> and Main Streets with a post office, a restaurant and a grocery store on the other three corners.

### Front/East Façade

The First Hotze House is a one-story wood frame cottage with cypress clapboard siding and Italianate detailing on the centered porch and trim. The cottage is basically symmetrical both in plan and elevation. The front (east) elevation features eight columns grouped in pairs, with railings and brackets, topped by a cornice with dentils at the roof level. Centered on the porch are double-panel doors topped by a transom window and flanked by tall six-over-nine double-hung windows on each side that extend to the floor. Another pair of these windows flanks the sides of the porch. All four windows are topped by a cornice and flanked by reproductions of the original wood shutters. At each corner of the front elevation are wood pilasters topped by paired Italianate-style brackets. The symmetry of the elevation is carried through with two brick chimneys located equally distant from the north and south ends of the building. These chimneys feature decorative brickwork with corbels and rowlock courses. The sagging roof line was leveled during the restoration and covered with wood shingles like on the original roof, common for modest homes of this era.

United States Department of the Interior  
National Park Service

## National Register of Historic Places Continuation Sheet

Section number 7 Page 2

### Side/South Façade

The south elevation continues with the details and materials found on the front, with a few exceptions. This elevation is not perfectly symmetrical owing to the wing to the west, added to the original cottage, probably in the 1880s. On the east side of this elevation, there are two six-over-six double-hung windows symmetrically placed in the elevation of the main mass of the cottage. These windows are similar to the ones on the front, but they are not as tall. They also feature cornices and flanking shutters. An attic vent in the roof gable is located above and centered between these windows. Pilasters and paired brackets detail the corners of the main mass of the cottage on the south elevation. The west end of the south elevation is the added wing with a more utilitarian appearance. Three smaller six-over-six double-hung windows on the back wing lack the cornice and shutter detailing found on the windows on the main part of the cottage. The addition also lacks the corner trim details of the main mass of the cottage. During the restoration, the sagging roof line was leveled. A chimney, slightly less ornate in detailing than the two main chimneys, was re-located about one-third of the way from the west end of the elevation.

### Rear/West Façade

The west elevation of the building suffered extensive damage from a fire before the restoration. To the south of the added wing is an original six-over-six window and the corner pilaster and double brackets of the main cottage mass. A back porch was added about 1910, and it together with the original exterior material and the entire wall on the north side of the addition were lost in the fire with only the south wall and the blank back/west wall and original wall material surviving. Before the restoration, two original door locations and one window location could be seen in the fire-damaged west wall of the main part of the cottage north of the wing. During the restoration the back porch was restored using the footprints of its brick piers for sizing and a typical design of the period created by the architect, John D. Jarrard. The doors and window designs of the original house were also replicated in the north part of the west elevation of the main part of the house.

### Side/North Façade

The building's north elevation features the same six-over-six double-hung windows as the south elevation, but not in a symmetrical arrangement. On the west end of the main cottage is a double window which appears to be a later addition added possibly to allow more sunlight to enter the north side into what is thought to be the original dining room. The three windows on the north elevation have cornice molding and replicated replacement shutters, and the corner pilasters and paired brackets are identical to those found on the south elevation. As previously noted, the north wall of the ell wing was so damaged by fire that a door and the two replacement windows in the north wall of the wing were assumed by the restoration architect to be typical of the period style.

### **INTEGRITY**

The First Hotze House, built in 1869, retains all seven elements of integrity. Although a comprehensive restoration was undertaken in 2000-2001, as much original fabric as possible was used and the original design and detailing of the house has been well-preserved. As such, the house retains the elements of design, materials, and workmanship. At the time of construction the house, built on Block 166 in the Original City of Little Rock, was the only residential structure on the block. Although there are a few properties on the block today, the house is still set-back from the street, providing it with a sense of seclusion, and therefore retains the elements of location, setting, and feeling. The property, built a few years after Peter Hotze returned to Arkansas after the conclusion of the Civil War, was the first residence for him and his wife, Johanna Kraus. Designed and constructed in the Italianate style, the First Hotze House tells us that Peter Hotze was, at the time of construction, a man of moderate means. After living and working in New York City as a cotton broker (a business venture he entered with his brother-in-law, John Gould Fletcher), Peter Hotze returned to Little Rock and built the very elaborate Hotze House on the back of Block 166, at 1619 South Louisiana Street. Though not as grand in design and scale as the Hotze House, the First Hotze House provides a tangible link to the early beginnings of a rather prominent Little Rock businessman, and thus retains the element of association.

## 8. Statement of Significance

### Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- ☐ **A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- ☐ **B** Property is associated with the lives of persons significant in our past.
- ☒ **C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- ☐ **D** Property has yielded, or is likely to yield, information important in prehistory or history.

### Criteria Considerations

(Mark "x" in all the boxes that apply.)

Property is:

- ☐ **A** owned by a religious institution or used for religious purposes.
- ☐ **B** removed from its original location.
- ☐ **C** birthplace or grave of a historical figure of outstanding importance.
- ☐ **D** a cemetery.
- ☐ **E** a reconstructed building, object, or structure.
- ☐ **F** a commemorative property
- ☐ **G** less than 50 years of age or achieved significance within the past 50 years.

Section number 8 Page 1

## SUMMARY

The First Hotze House is being nominated to the National Register of Historic Places with **local significance** under **Criterion C** as a good example of the Italianate architectural style. The house is a small-scale example of the style and a fine example of the style in Arkansas. A successful cotton broker and businessman based in Little Rock and New York City, Peter Hotze built the more elaborate Hotze House at 1619 South Louisiana Street in 1900 for him and his wife, Johanna Kraus, and helped finance the 1908 Beaux-Arts Arkansas Gazette Building (NR listed 10/22/1976) in downtown Little Rock.

## ELABORATION

Settlement of the area known as Pulaski County began around the turn of the nineteenth century; however, it wasn't until 1819 that Pulaski County was officially established. The first census taken in 1820 after Pulaski County was established denotes the population of the county as being that of 1,921 people. In 1821, two years after the establishment of the county, Little Rock became the capital of the Arkansas Territory and was later incorporated October 27, 1825. By 1832 Little Rock contained 16 small brick buildings, various log and frame houses, and had a population between 700 and 800 people. Little Rock's population continued to grow until the financial panic of 1837 and for the next 10 to 12 years few settlers came to Little Rock. However, by 1853 Little Rock was prospering once again and it was into this atmosphere that Peter Hotze arrived in 1856.

Born in Innsbruck, Austria, in 1836, Peter Hotze immigrated to the United States about 1853 with his older brother, Conrad. Peter settled in Little Rock, Pulaski County, Arkansas, in 1856, and entered into the general merchandise business. He voluntarily enlisted in the Confederate Army in 1861, serving in the Capital Guards during the Civil War. In 1862, his brother, Conrad, arrived in Little Rock, bringing with him \$5,000 in gold to pay his brother's Northern debts. Shortly after his arrival in Little Rock, Conrad purchased a block of land (Block 166) for Peter's use after the war. Wounded in 1864, Peter was captured and sent to the prisoner-of-war camp in Camp Chase, Ohio, where he remained for the rest of the war. After the war he married Johanna Krause and entered into a partnership with her sister, Adolphine's, husband, John Gould Fletcher.

Hotze purchased the plans for his cottage from Memphis architect M. H. Baldwin for \$35.00 and built the 2,000 square-foot house on Block 166 at the southern edge of the Original City of Little Rock. Fletcher & Hotze became successful mercantilists and cotton brokers, with Fletcher handling the cotton purchases in Arkansas and Hotze managing the sales in New York. Hotze's early payment of his Northern debts meant he was able to obtain unlimited credit in the North. After making his fortune and living in New York City for over 25 years, Hotze returned to Little Rock in 1900, and built the Colonial Revival-styled residence at 17<sup>th</sup> and South Louisiana Streets just behind the First Hotze House. In 1907-08, he helped finance the Arkansas Gazette building in the Beaux-Arts architectural style at 3<sup>rd</sup> and Louisiana Streets, in commercial downtown Little Rock. It housed the editing, printing and publication of the newspaper for over 80 years.

National Park Service

## National Register of Historic Places Continuation Sheet

Section number 8 Page 2

Peter Hotze died in April 1909, and is buried in Mount Holly Cemetery (NR listed 03/05/1970) beside his wife and brother, and is near both his business partner, John G. Fletcher, and his wife, Adolphine Krause Fletcher.

After Peter and Johanna Hotze moved to New York, the First Hotze House became a rented residence and continued as such until about 1932, the last tenant being Albert Haynes, the local U.S. Army recruiter. During the depression Mrs. Mary Dodge Hodges, a local schoolteacher who was married to Edwin Ligon Hodges, decided she could use the house as her private school. She converted the four main rooms into classrooms for kindergarten, first, second and third grades. About this time, the doorway at the west end of the central hall and the doorways between the two north rooms and between the two south rooms were closed up with closets and shelving for school supplies. Hodges continued to operate the Mary Dodge School for about 10 years until World War II brought on gasoline rationing. This forced the parents of the students to limit their use of automobiles. Because of the rationing, many took their children out of private schools to attend neighborhood schools within walking distance, and Hodges had to close her school on Main Street. She then moved the school to an old church building on Woodlawn Avenue.

For approximately the next 25 years the Ouachita Council of the Girl Scouts used the house as their headquarters. Many of the scouts and volunteers have fond memories of their "Little House" as they called it. In 1968, a new Girl Scouts headquarters building was constructed on West 29<sup>th</sup> Street in North Little Rock on land that an urban renewal project cleared for a Civic Center, a new hotel and the Interstate 30 and Interstate 40 interchange. After the Girl Scouts vacated the First Hotze House, it was used for many businesses, including the Charles House of Beauty Salon, a day care center and the Pettit paint stripping shop. The property remained vacant for about 14 years immediately prior its 2001-02 restoration.

### SIGNIFICANCE

The First Hotze House is being nominated to the National Register of Historic Places with **local significance** under **Criterion C** as a good example of the Italianate architectural style in Little Rock, Pulaski County, Arkansas. A good small-scale Italianate residence, the First Hotze House tells the story of the modest beginnings of a businessman who saw great success as a cotton broker in New York state, a business so successful he returned to Little Rock after 25 years and built the much larger, Colonial Revival residence (the Hotze House at 1619 South Louisiana Street) on the rear of the lot upon which this First Hotze House was constructed.

RE: First Hotze House; Little Rock, Pulaski County

Dear Dr. Matthews,

We are enclosing for your review the above-referenced nomination. The Arkansas Historic Preservation Program has complied with all applicable nominating procedures and notification requirements in the nomination process.

If you need further information, please call Sarah A. Jampole of my staff at (501) 324-9874. Thank you for your cooperation in this matter.

Sincerely,

Cathie Matthews  
State Historic Preservation Officer
