The building presently known as "Old North" or the "Old North Tower," on the campus of Central State College in Edmond, Oklahoma, was originally constructed in the fall of 1892 as a three-story square structure of pressed red bricks, manufactured on the present campus site. In addition to the three stories above ground there was a basement floor in the original configuration. The building was financed by the sale of bonds, which were voted on August 4, 1892, and by the sale of lots from the original 40 acres donated by Anton Classen of Edmond. (Ten acres were retained for the campus of what was then the "Territorial Normal School.")

Today Old North is air conditioned and equipped with forced air heating. It contains 98 rooms, including offices, seminar rooms, classrooms, and other utility rooms. Its outside gross square footage is 32,096, and its assignable square footage inside is 21,183. It has a slate roof, which is in need of repair.

The Territorial Normal School was established by the First Territorial Legislature of the Territory of Oklahoma on December 23, 1890, and signed into law on December 24, 1890, by Governor George W. Steele. First classes were held in the North Building on January 2, 1893, under Principal Richard M. Thatcher. During the spring of 1893, the Third Territorial Legislature approved the addition of a tower and wings to the original building. These were constructed the following year of native red sandstone, quarried from a farm five miles northwest of Edmond.

On July 20, 1894, the Board of Regents for the Normal School met at Edmond and formally accepted the building addition. The Report of the Governor of Oklahoma for 1900 states:

The legislature of 1891 enacted that the "normal school for Oklahoma" be located at Edmond, an ideal college town on the Santa Fe, midway between Guthrie and Oklahoma City. Oklahoma County donated \$5,000 in bonds. Edmond gave 40 acres of land and bonds amounting to \$2,000. With this small amount the building was begun in the summer of 1892. The legislature of 1894 donated an additional amount for the completion of the building. In the past eight years many valuable improvements have been made until to-day it is a fine and commodious building of brick and red sandstone, costing upward of \$50,000. With broad halls and well-equipped class rooms, heated by the Smead system, it offers every opportunity to student and teacher.

STATEMENT OF SIGNIFICANCE

Old North Tower is not only the state's first structure erected expressly for "normal school" training, but also the first building built for a state-supported institution of higher learning in Oklahoma. It is, in fact, a monument to teacher education in Oklahoma and signifies the original edifice constructed and dedicated to the purpose of educating the teachers so badly needed throughout the newly settled area of Oklahoma Territory. It was in 1893, and still is, a source of much pride to the city of Edmond, one of the first settlements in Oklahoma Territory, and to the profession of teacher education.

Old North further has the distinction of being the first educational structure of the oldest state-supported school in Oklahoma. The Territorial Normal was the first of the three initial institutions to get under way, holding its first classes on November 9, 1891, while Oklahoma A. & M. College first met on December 14, 1891, and Oklahoma University nearly a year later on September 15, 1892.

Since the first classes were held in the North Building in 1893, the structure has continuously served the cause of teacher education and higher education. A great many of the teachers of Oklahoma and of the nation have received their training and education within the walls of Old North. It is still very much in active use today, housing the Central State College Department of Education and Psychology, Special Education, The Reading Clinic, and the Speech and Hearing Clinic.
