42. Total Acreage in Present Property: 1.836 43. Acreage included in proposed N.R. boundary: 1.836

44. Site Plan (and boundary description and justification for N.R. sites):

The boundary occupies lot 27 in Bedinger's Landing subdivision and is roughly 350' x 230' in size.

The boundary includes the house, the remains of the icehouse, and acreage sufficient to provide a setting.

Contributing: 1 building
 1 structure (icehouse)

45. Description and House Plan:

The ^{brick} two-story front block, which faces north, has a side-passage plan and a facade of two rather than the usual three bays. The long one-story ell, also built of brick, was raised to a full two stories late in the 19th century, of frame rather than brick construction. The recessed porch in the east (left) side of the ell was repeated at the second floor, but with a different style and spacing of the posts and with a decoratively pierced parapet.

Exterior detailing includes stone lintels over the openings, recessed small pilasters flanking the transomed front door, and simple square porch posts in the ell's first floor. The brackets in the cornice may date from the construction of the second floor of the ell; the discoloration of the brick shows the outline of the original frieze board. The windows are 6/6 double-hung sash.

All outbuildings have been demolished, at about the time the farmstead was subdivided. The stone well of an icehouse is located near the end of the ell.
