DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

The Commercial Bank was chartered in 1833. For reasons of security, a condition in the design of its building was the physical incorporation of the banker's residence, a linear extension of the mass of the bank.

The plan of the bank is simple. From the portico one enters a short hall with an office on each side. Originally for the bank's officers, these rooms have become a salesroom and reading room for the Christian Science congregation. Behind these is the main banking room with three tall (16/16) windows on each side. It is now furnished with seating for church services. The congregation faces a low platform and pulpit placed in front of a curtained alcove flanked by the bank vaults. The alcove is framed by Greek Doric columns supporting a full entablature.

An identical Doric treatment shelters the entrance to the banker's house which faces Canal Street. From its entrance one enters a central hall leading to an open stair. The plan is very open; pairs of rooms on either side of the hall are connected with large double doors. The second floor has a similar room arrangement but is larger because of rooms extending over the bank vaults. A galleried service wing is set back from the facade of the house at its right.

Although the bank facade is of marble, the other elevations are stuccoed brick. The present division of ownership of the building places the property line at the front wall of the bank vaults.

STATEMENT OF SIGNIFICANCE

This unique complex unites in a single structure a bank and a fine residence, each representing a superb expression of the Greek Revival. The bank facade is an Ionic tetrastyle temple of gray-white marble; the residence, entirely domestic in character, has an appropriately scaled entrance portico with impeccably detailed Doric columns and cornice. Interiors are notable for the massive scale of the wood trim, particularly apparent in the residence. Corner blocks adapt Greek motifs to a specifically 19th-century fashion. After a sequence of unsympathetic uses, the bank has been adapted to use as a church with almost total fidelity to its original architectural qualities.
