		Mary Edwards House now stands unoccupied in Gomewhat	
		ted state. The house went through three puilding particular	
	c.1830, c	.1880 and 1930. It will be restored to 14371837	nce.
		0 and 1930 renovations were not so extensive that this	
	restorati	on will be a disguised reconstruction. The brick kitchen	2
	to the re	ar of the house survives intact.	
	The	house is of an L-shaped plan with two front rooms separat	ed
	by a cent	ral hallway. The third room is joined to the rear of	
	the room	on the left side of the hallway. This occurs on both	
	of the tw	o floors. It is best described as of the plantation-	
	plain sty	le with simple Greek Revival features. The foundation	
	structure	is mortised and tenoned, with the main beams of hand	
	hewn timb	ers about 12"x12" size. All timbers are of single prede	6
	in the sp	an.	
			ш
	The	exterior of the house is of weatherboarding with simple	ш
	gables, g	iven a completed pediment treatment in each case. Each	
	of the ro	oms is served by a fireplace contained in large stucco	z
	covered b	rick chimneys on the exterior of the building. The	
	cornice d	oes show an entablature with triglyphs of half round	Ś
	dowels.		
			ע סג
	Seve	ral changes have been made to the front facade. It appea	c s
	that the	original structure had a two story front porch of a doubl	e l
	temple fo	rm which extended only on the central portion of the	
	facade.	The porch had four square simple styled columns on both	-1
	levels, c	rowned with a simple unadorned pediment. Both levels	_
	used doub	le doors with side lights and overlights of a rectangular	P
ļ	construct	ion. A shed porch ran along the back of the single	z
			5
		ed nine-over-nine windows were symetrically arranged in	
		ooms, including windows on either side of the chimneys	
	in all ro	•	
	The	exterior has had some additions and changes during the	
		f the house. The lower porch has had two wing-like	
	-	s added, which necessitate the change to a single floor	
		ndow in the front wall of the two lower rooms. The	
	-	e been added on the rear of the second floor (see note	
		tions below.)	
	One	enters the central hall which contains the main staircase	•
		are sheathed in wide boards. The staircase rises to	
		landing over an enclosed area. From this landing the	
		free standing, making two ninety degree turns. The balus	sters
)	posts are simple and square cut. On the string is a	-
		quarter round design.	

The two rooms on either side of the central hall on both (continued)

7. <u>Descri</u>	ption	

floors are plastered over the wainscotting. The rear room on the lower level, which is joined to the front room with wide bifold doors (a later addition) is sheathed in wood but has been covered in plaster. All rooms in the house are almost square varying from 17'1" to 17'6" in each dimension.

The window and door treatment is consistent on each of the two floors. The trim has some molded distinction. The second floor trim is consistent throughout and is different from that found on the first floor. A simple wainscotting is found in each room, although the second floor's wainscotting is reduced in height to accomodate the height of the ceilings.

Doors are five panelled with one horizontal panel in the middle of the door separating two vertical panels on both top and bottom. Many of the lockson both interior and exterior doors are Carpenter Co. locks and still can be operated by a single large key. The mantelpieces are simple and use a column motif in all cases. Each mantelpiece is essentially the same in dimension but each has unique features and treatments in its execution.

One interesting feature that was in the original plan was a stairway connecting the two rear rooms. In fact, until the additional porches were added on the second floor this stair was the only way to reach the rear room on the second floor. From traces in the walls, floor and ceiling of the extant structure, it appears that the stair was a dog-leg to the right, from a short landing.

Two separate out buildings complete the estate. One is a brick building now joined to the house by an enclosed passage. This appears to have been a kitchen. It is the most deteriorated portion of the structure. Standing a number of yards from the house is another brick building. Its walls are of three brick thicknesses, laid in an American bond. It has a large open hearthed fireplace in one end and conjecture has given it a variety of usages. In later years it was seriously altered when a large section around the original door was knocked out to accomodate an automobile.

Note on alterations: The date of the alterations has not been determined, although they were probably made shortly after the change of ownership in the 1880's. The alterations were not particularly extensive, and were mostly additions that can be easily traced. Due to the seemingly inferior quality of the materials used in the additions the additions are the most deteriorated parts of the structure.

STATEMENT OF SIGNIFICANCE

The date of the construction of the house, and its builder are subjects still under research. Documentary evidence is lacking for any date. Architectural details point to construction in the 1830's and such details compare closely with other houses in the area known to have been built in that era. If built in the 1830's it was probably built by Benjamin Hammock, who owned the property at that time and is known to have been the builder for the first Walton County Courthouse. Since Hammock's ownership, this property has been owned by several of Walton County's prominent citizens, and now is anticipated for use as a museum.

Hammock sold this property in 1845 to Josiah Clark, builder of several railroad supper hotels in Social Circle and Stone Mountain. In September of 1846, Charles D. Davis, <u>lawyer</u> and Georgia politician, bought the property which remained in his family until the 1880's when John Prior Edwards acquired the estate. The Edwards family lived in the house until 1969. Presently the Mary Edwards House is in the process of restoration by the Historical Society of Walton County for use as a museum and historical center.

Although the architectural features of this house have been discussed on the facing page, several statements about alterations and architectural significance should be made. A 1936 HABS photograph shows the first floor porch roof line without the present awkward wooden wedge support, but with a pedimented gable identical to the second story one. Identical doorways and square column types on both floors suggest that these porches were similar If one is to conjecture that the original facade had a set of double temple formed porches, each with a gabled end, then this occurrence is unusual. However, as in many other framed versions of the Greek Revival in Georgia, this lack of adherence to standard procedures of classical depart is often the case.
