Section number \_\_\_\_\_\_ Page \_\_\_\_\_1

### **Summary**

Constructed from 1912 to 1914, the Nesburt T. Ruggles House is a single-story, wood-frame, Plain Traditional-styled bungalow with a metal-shingled, multi-hipped roof. Located to the southeast of Shover Springs on the eastern side of Arkansas Highway 32, the Nesburt T. Ruggles House is in good condition and now used as a weekend home by the owners.

#### Elaboration

The Nesburt T. Ruggles House is a single-story, Plain Traditional-styled bungalow constructed from 1912 to 1914. The cypress frame structure is clad with white-painted, false-bevel type novelty siding and rests upon a concrete block pier foundation. Covering this structure is a moderate-pitch, hipped roof with two smaller cross-hipped projections on the southwest (front) and northwest elevations. The roof is sheathed with silver-painted metal shingles, which were installed over the original wood shingles c. 1930. Originally, there were two interior brick chimneys; however, they have been capped below the roofline. The house was wired for electricity in 1936.

The front, or southwestern, elevation features a central shed-roof porch nestled within the "L" created by the hipped-roof projection to the right, or southeast. The porch is supported by two wood columns (tapered, square with bases and capitals) on brick piers. A brick pier without a column is positioned asymmetrically in between and abuts the northwestern end of the single porch step. Underneath the porch there are two single-leaf entrances with one leading into the living room while the other leads into the bedroom to the right, or southeast, of the porch. Both wood-panelled doors and their associated screen doors are original. The bedroom door contains a half light, while the living room door is distinguished by a three-quarter light that is decorated with a beaded course underneath the crown. While both screen doors feature delicate spindlework, the living room door is more ornate.

One-over-one, double-hung windows are utilized throughout the house and are of various sizes. The solitary window underneath the porch and the front-facing bedroom window to the right of the porch are of larger-than-standard dimensions. To the left, or northwest, of the porch, the living room wall extends perpendicular toward the rear, or northeast, to its juncture with the cross-hipped bedroom that projects to the northwest. There is a single, standard-sized, one-over-one window in the living room wall facing the northwest and an identical window in the bedroom facing the front, or southwest.

### United States Department of the Interior National Park Service

## National Register of Historic Places Continuation Sheet

		7		2
Section	number		Page	

Aside from the living room window, the northwest elevation is fenestrated by a standard one-over-one window placed in the center the cross-hipped end. A smaller one-over-one window illuminates the shed-roof, bathroom addition that was constructed on the rear of the house in 1947.

The rear, or northeast, elevation is composed of the bathroom addition to the right, or northwest, and a shed-roof projection across the remainder of the facade. The bathroom addition is very narrow and is lighted on this elevation by a single-pane stationary window. While the shed roof is attached below the eave of the main roof on this addition (with exposed rafters), the adjacent shed roof, which is covered with composition shingles, is flush with the main roofline, but with a slightly lower pitch. The section adjacent to the bathroom addition with the standard-size, one-over-one window was the original kitchen, and the center section was a screened-in porch. In 1928 or 1929, a new kitchen was added to the left, or southeast, end of the rear elevation. The center screened-in section was enclosed in the early 1930's with three side-by-side six-over-six windows and a single-leaf entrance to the left. The new kitchen addition is fenestrated on this elevation by a stationary six-pane window to the left, or southeast, of the doorway. The original kitchen was later converted into a large bathroom.

At some point, a new inset porch was created by extending the roofline from the left, or southeast, end of the new kitchen addition to the northwestern end of the tripled six-over-six windows. The porch roof has exposed rafters and is supported by six plain wood posts. Underneath the porch on the northwestern end is the concrete step entrance to a brick-lined cellar that is currently in poor condition.

In comparison, the southeastern elevation is more simplified and consists of four conventionalsized, one-over-one windows on the original facade with the two center windows paired. The rear addition, which extends slightly on this elevation, contains a pair of smaller one-over-one windows.

The interior of the house is unaltered with the exception of the aforementioned kitchen addition and consists of three bedrooms along the southeastern elevation, another bedroom in the cross hip to the northwest, a living room, and a dining room, all with approximately ten-feet ceilings. The papered walls are accented by unornamented, dark-stained wood baseboards and door and window moldings. The original cypress flooring is underneath the modern carpet.

Originally there was a smokehouse, two barns, a two car garage, a one-room servants house, and a privy. The smokehouse and the privy were removed c. 1948, the servants house was razed in the early 1950's, and the barns were taken down in 1969. The historic garage was replaced in

#### **Summary**

The Nesburt T. Ruggles House is being nominated under Criterion C with local significance as the best example of a Plain Traditional-style bungalow in the Shover Springs community.

#### Elaboration

The origins of the Shover Springs community date to 1846 when George Shover, a saloon keeper and cotton merchant from Fulton, purchased land in the area of the "springs that taste of iron." The area had previously been a favorite camping ground for hunters. Shover established a seasonal "pilgrimage" colony around the spring, and "clapboard shanties, made in the style and shape of the camps at camp meetings" were erected for the families.

A town, however, did not begin to emerge until the 1880's. Land for a Missionary Baptist Church and cemetery was donated in 1880. On September 7, 1881, a town plat reflecting four streets and a "spring reservation" was filed for Shover Springs at the Hempstead County Courthouse. A two-story school was constructed in 1885, and in 1890 the post office application indicated a population of fifty people with an area to be served of three hundred.

Nesburt T. Ruggles and his family moved to Arkansas in 1912 and purchased a 135-acre farm in the Shover Springs community. Ruggles constructed a new house over a two year period. In 1932, William Bryan Ruggles, the youngest member of the family, moved into the house with his wife, Mattie, and their four children. Later, two additional offspring were born in the house.

The house that Ruggles constructed was somewhat unusual in that its moderate-pitched hipped roof with cross hips provided a bungalow form that is distinguished from the more traditional vernacular building types, and yet the house does not reflect Craftsman detailing either, which was the most common type of bungalow constructed. For these reasons, the Nesburt T. Ruggles House is locally significant under Criterion C as the best example of a Plain Traditional-style bungalow in the Shover Springs community.

See continuation sheet.
Verbal Boundary Description: See continuation sheet.
Beginning at a point formed by the intersection of the eastern curbline of AR Hwy. 32 and a line formed by, yet twenty feet from, the southeastern elevation of the garage, proceed northeasterly along this line to its intersection with a line formed by, yet twenty feet from, the northeastern elevation of the garage. Then proceed northwesterly along this line to its intersection with a line formed by, yet thirty feet from, the northwestern elevation of the house. Then proceed southwesterly along this line to its intersection with the eastern curbline of AR Hwy. 32. Then proceed southeasterly along the curbline to the point of beginning.
Boundary Justification: See continuation sheet.
This boundary includes the house, well house, nonhistoric garage and the majority of the property that was historically considered the yard and driveway. The remainder of the 135 acre farm is excluded from this boundary.
