Section number 7

Mana Pillbox (66-09-1213)

=====

The pillbox, strategically located on the south side of As Anite Cove about 50.0m west of the point, was built into a niche in the limestone ledge. The pillbox is constructed of cement mixed with coral rocks. The structure is well camouflaged from the sea and air. The structure is in excellent condition.

The interior of the structure forms one room which measures about 3.0m by 1.80m with the entrance in the south wall. The entrance measures .85m wide and 1.45m high. Maximum interior height is 1.68m. Vertical impressions of the boards used to build the form into which the cement was poured are present on the wall of the interior. One ceiling board measuring .17m wide and .03m thick is still in place in the ceiling above the gun port. The ceiling is flat on the western side of the structure, but slopes down to the east wall. There is one vent in the ceiling. The roof measures .50m thick. A second vent occurs in the west wall, which is .30m thick.

One gun port, measuring .32m by .90m at its exterior opening, has a view of the coastline to the north. The seaward, or north wall in which the gun port occurs is 1.20m thick. Inside the structure, abutting the wall with the gun port, is a concrete pad with a circular depression. This feature probably served as a gun mount or brace.
