NATIONAL REGISTER OF HISTORIC PLACES
REGISTRATION FORM

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name N/A
other names/site number South Dakota Department of Transportation Bridge No. 63-210-282

2. Location

street & number Local Road over east Fork of Vermillion River not for publication
city or town Centerville vicinity
state South Dakota code SD County Turner Code 125 zip code 57014

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1986, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property meets does not meet the National Register Criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments.)

Narrative Description (Describe the historic and current condition of the property on one or more continuation sheets.)

See Continuation Sheets

8. Statement of Significance

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B** Property is associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield information important in prehistory or history.

Criteria Considerations (Mark "X" in all the boxes that apply.)

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or a grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property
- G** less than 50 years of age or achieved significance within the past 50 years.

Areas of Significance (Enter categories from instructions)

Commerce _____
 Engineering _____

Period of Significance

1909 _____

Significant Dates 1909

Significant Person (Complete if Criterion B is marked above)
N/A

Cultural Affiliation N/A

Architect/Builder Iowa Bridge Company

Narrative Statement of Significance (Explain the significance of the property on one or more continuation sheets.)

Section number 7 & 8 Page 1

Architectural Description

Bridge No. 63-210-282 carries an unpaved road across the East Fork of the Vermillion River about one mile southwest of Centerville. The structure consists of 3 spans: 2 timber stringer approach spans on the north and one pin-connected, 6-panel, Pratt through truss measuring 95 feet in length. The truss web is comprised as follows: the upper chord consists of back-to-back angle sections riveted to V-lacing; the other verticals consist of back-to-back channel sections riveted on both sides to V-lacing; the diagonals are paired, rectangular-section eyebars; the counters are paired, square section eyerods with turnbuckles; the lower chord consists of paired, rectangular-section eyebars. Carrying timber stringers and double-layer wood decking, the I-beam floor beams are bolted by means of riveted angle sections to hangar plates at the lower chord pin connections. Portal bracing is a framework of back-to-back angle sections with gusset plates. Sway bracing consists of back-to-back angle sections with V-lacing. Top-lateral and bottom-lateral bracing consist of cross-braced cylindrical eyerods. The timber-pile abutments have plank back walls and wing walls. The approach spans rest on timber pile piers; the truss span on steel cylinder piers. On the approaches, the roadway is bordered by railings of metal posts and twisted wire. The truss span has angle-section railings. The bridge retains excellent integrity.

Statement of Significance

Bridge no. 63-210-282 is being nominated to the National Register of Historic Places as part of the "Historic Bridges in South Dakota" Multiple Property Nomination. It is related to the historic context of "Historic Bridges in South Dakota, 1893-1943" and is classified with the associated property type for iron and steel frame bridges. This bridge is individually eligible for the National Register under Criterion A as a representative example of important patterns of bridge construction in South Dakota during the 1890s and through the first two decades of the 20th century, in which a different out-of-state bridge builder tended to dominate bridge construction in each county. It is also eligible for the National Register under Criterion C as one of the two longest bridges in Turner County built by the Iowa Bridge Company, a long term county bridge builder. The bridge retains excellent integrity.

Around the turn of the 20th century, the homesteading boom west of the Missouri River coupled with the expanded agri-business east of the river led to an increased demand for reliable bridges in South Dakota. Accompanying the increase in bridge construction was the emergence of a pattern of business wherein almost every county in the state seemed to be dominated by a different bridge builder. This pattern began to be evident in the late-19th century. It grew even stronger after the turn of the century when the counties began turning to the system of awarding annual contracts for

Section number 8 Page 2

bridge work. Most typically, the counties awarded annual contracts to the same firm year after year. This relationship between the counties and the bridge firms was probably due to "pooling," an illegal but common practice across the country at this time. Under pooling arrangements, various bridge-building firms agreed to divide states among themselves, assigning particular counties to specific firms. Most such firms operating in South Dakota at this time were based out-of-state. This pattern of business remained strong in South Dakota until about 1920 when the State Highway Commission strengthened its control over bridge construction practices in the counties.

The activities of the Iowa Bridge Company of Des Moines are typical of the bridge-building business in South Dakota during this era. President of the company was James S. Carpenter, who had been a travelling agent for the N.M. Stark Company of Des Moines in the 1890s. Carpenter started the Iowa Bridge Company in Des Moines in about 1902 and was immediately successful in obtaining annual bridge contracts in South Dakota counties such as Bon Homme, Brookings, and Sanborn where his former employer had been active.

During the first two decades of the 20th century, the company became the most active bridge-builder to operate in South Dakota and dominated bridge contracts in at least 11 counties. It held the annual contract in Turner County from 1905 through 1911.

Metal plates above the truss portals of Bridge No. 63-210-282, identify the builder as the Iowa Bridge Company of Des Moines, and the construction date as 1909. Composed of a single 95-ft. span, this bridge is one of the two longest bridges built by the Iowa Bridge Company and surviving in Turner County.

Bibliography

Bridge Plaque.

Verbal Boundary Description

The nominated property consists of a rectangle, 20 feet wide by 175 feet long, whose vertices coincide with the outside corners of the bridge abutments at each end of the bridge and includes only the bridge superstructure and substructure.

Boundary Justification

Because the bridge is located on a public road, there are no legal boundary lines for the ends of the bridge. Therefore, these boundaries are drawn to encompass only the superstructure and substructure of the bridge itself.
