DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

A few years ago the point of land on which Forts Duquesne and Pitt had stood was buried beneath commercial buildings and railroad tracks. Fortunately, this situation has disappeared thanks to the development of the new Point State Park. The Point area has been virtually cleared of intrusions which at one time buried the fort sites. The railroad yards and commercial buildings are gone; although one expressway still traverses the point. The site of Fort Pitt was the subject of intensive archaeological investigation in 1942-43, and sufficient underground evidence was found to define with considerable accuracy the outlines and features of the fort. The original lower ramparts of the music bastion have been excavated and made a permanent exhibit. (See photograph) Interpretive markers are located on the south side of this exhibit. Just west of the expressway, or the southwest section of the fort, The Fort Pitt Museum has been constructed on the original site of the Monongahela Bastion. The Museum is an impressive interpretive facility. In the main lobby is a 20 feet (in diameter) scale model of the fort. Earphones, located around the display, relate the story of the area while spotlights point out the specific sites. The interior of the museum relates the story of the region during Indian, French, English, and American occupation.

Located to the north of the museum entrance stands a small brick blockhouse owned by the Daughters of the American Revolution. This is the only structure original to the point.

At the extreme tip of the point has been constructed a gigantic fountain. This fountain measures about 80 feet in diameter and has a spray of 60 feet in height. Typical of any park, there are benches located throughout. On either river side are stands from which, during the summer months, visitors view floating concerts. The park is maintained in immaculate condition.

STATEMENT OF SIGNIFICANCE

From the middle of the 18th century through the early 19th century, the Forks of the Ohio represented the strategic key from the east to the Ohio Valley and the vast territory drained by the Mississippi. Control of this key point was the objective in French, English, and American struggles for North America.

At this point of land where the Monongahela and Allegheny Rivers meet to form the Ohio, grew the bustling frontier town of Pittsburgh, the first permanent English settlement west of the Appalachian mountains in the present United States. In the late 18th and early 19th centuries the town at the Forks of the Ohio was the major point of entry for the mass of settlers pushing westward into the Ohio and Upper Mississippi Valleys.

Early in 1754 the first outpost at the Forks of the Ohio was begun by American colonials, on ground first chosen and described by young Lt. Col. George Washington. Shortly thereafter it was seized by the French and named Fort Duquesne. It was captured in 1758 by a British and Colonial force during the French and Indian War. Its fall was a decisive blow to the French defense of the Ohio country. Shortly thereafter the British erected Fort Pitt on higher ground a few hundred yards away from the older fort.

HISTORY

Control of the strategically important confluence of the Monongahela and the Allegheny Rivers to form the Ohio, was a decisive element in the climactic struggle between England and France for the control of North America. The site was also of great importance in the American Revolution and in the opening of the western frontier. The first outpost on the site was begun by English colonies early in 1754 on ground first chosen and described by Lieutenant George Washington. On April 17, 1754, the unfinished fort was seized by a force of French and Indians. The French completed the post and named it Duquesne. Thus the site saw one of the first acts of hostility in the final American war between England and France.

Duquesne gave the French control of the Ohio River and was the keystone of their defense line on the western frontier of the Colonies. George Washington, with a small force, was on the way to the Forks of the Ohio when he learned that the French had captured the unfinished American fort.

He halted his advance and a short time later surprised and defeated a

small French scouting party. Thus were fired the first shots in the Seven Years War, called in America the French and Indian War. A short time later Washington, himself, was attacked and forced to capitulate at Fort Necessity.

Fort Duquesne was also the objective of British General Braddock's ill-fated campaign in 1755. In 1758 British and Colonial forces under the leadership of General John Forbes, hacked their way through the wilderness to find Fort Duquesne destroyed and abandoned by the weakened French, who had been deserted by their Indian allies. The fall of Fort Duquesne was decisive in the decline of French power in the vital western frontier south of the Great Lakes.

Realizing belatedly the importance of this tip of land as the open road to the vast interior of the continent; and the nation controlling this natural highway controlled the future of the land built their most substantial and costly stronghold in America. Approximately 200' from the original site of Fort Duquesne, Fort Pitt was named in honor of the English Prime Minister. A few years later during the bloody Indian uprising, known now as Pontiac's Conspiracy, Fort Pitt was one of the few frontier forts able to hold out against the Indians. A relief column met the Indians at Bushy Run about twenty miles from Fort Pitt, defeating them and raising the siege of the fort. Fort Pitt became an outpost of unquestioned merit in the opening of the western frontier, offering protection to the settlers and traders who were pushing into the Ohio country. The town of Pittsburgh grew under the shelter of the fort. Fort Pitt was occupied by troops during the Revolution and was finally abandoned in 1790. The vast importance of the Forks of the Ohio is attested to by the vigorous efforts of both the French and British to seize and hold this site, and by the rapid spread of English settlement which occurred under the protection of the fort.

From the point of intersection of the western curb of Commonwealth Place extended to the Allegheny River, proceed in a line along the west curb of Commonwealth Place to a point, if extended would intersect the Monongahela River; thence proceed in a northwesterly direction around the point; thence in a northeasterly direction to the point of origin. This area contains approximately 36 acres. The boundaries are indicated on an accompanying map titled Illustrative Site Plan Golden Triangle 1980. The elevated road system, viewing stands, fountains and similar modern features within the boundary do not contribute to the national significance of the landmark.

NATIONAL SURVEY OF HISTORIC SITES AND BUILDINGS

1. STATE Pennsylvania		2. THEME(S). IF ARCHEOLOGICAL SITE, WRITE "ARCH" BEFORE THEME NO. XI Advance of the Frontier, 1763-1830	
3. NAME(S) OF SITE The Forks of the Ohio (Site of Fort Duquesne and Fort Pitt, Bouquet's Blockhouse)		4. APPROX. ACREAGE 36 acres	
5. EXACT LOCATION (County, township, roads, etc. If difficult to find, sketch on Supplementary Sheet) "The Golden Triangle", Point Park, Pittsburgh, Pennsylvania			
6. NAME AND ADDRESS OF PRESENT OWNER (Also administrator if different from owner) Point Park owned and administered by State of Pennsylvania; Bouquet Blockhouse owned and administered by Allegheny County Chapter, DAR.			

7. IMPORTANCE AND DESCRIPTION (Describe briefly what makes site important and what remains are extant)
The point of land where the Monongahela and Allegheny Rivers meet to form the Ohio constitutes a site of surpassing significance in the story of American expansion westward from the Appalachian Mountains. From the mid-18th century through the early years of the 19th, the Forks of the Ohio was the strategic key to the Ohio Valley and the vast territory drained by the Upper Mississippi. Control of this key point was a major strategic objective in the struggle for North America, and for possession of the Forks men of three nations, the French, British and American, fought and died. Within the shelter of the fort grew up the bustling frontier town of Pittsburgh, "the first permanent English settlement west of the mountains in the present United States" In the late 18th and early 19th centuries the town at the Forks of the Ohio was the major point of entry for the waves of settlement pushing into the Ohio and Upper Mississippi Valleys, and with good reason the site won its recognition as the "Gateway to the West."

Features and Condition of the Site

A few years ago the point of land on which Forts Duquesne and Pitt had stood was buried beneath commercial buildings and railroad tracks. Happily, this situation is disappearing, thanks to development of the new Point State Park. The "Point" area has been virtually cleared of artificial intrusions which at one time buried the fort sites. The railroad yards and commercial buildings are gone although portions of the site are still obscured by heavily travelled roadways which give access to the Point and Manchester bridges over the Monongahela and Allegheny Rivers, respectively. The approximate site of Fort Duquesne is partially covered by bridge ramps, but the in-progress relocation of the bridges to a point higher up on the Triangle will free the site for full investigation. The site of Fort Pitt was the subject of intensive archeological investigation in 1942-43, and sufficient underground evidence was found to define with considerable accuracy the outlines and features of the fort. The brick ~~Blockhouse is in good condition and is open to the public.~~ (cont.)
