=====

Amended Items in Nomination:

**Period of Significance:**

The correct Period of Significance should read: 1923—1970.

[The nomination form provides slightly different end dates in the cover form and introduction, but these are clarified in the narrative and 1970 is justified under the selected areas of significance.]

These clarifications were confirmed with the CA SHPO office.

# National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in National Register Bulletin, *How to Complete the National Register of Historic Places Registration Form*. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions.

### 1. Name of Property

Historic name: View Park Historic District  
Other names/site number:  
Name of related multiple property listing: N/A  
(Enter "N/A" if property is not part of a multiple property listing)  
N/A

### 2. Location

Street & number: Various  
City or town: Unincorporated State: CA County: Los Angeles  
Not For Publication:  N/A Vicinity:  N/A

### 3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended,  
I hereby certify that this  nomination  request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60.  
In my opinion, the property  meets  does not meet the National Register Criteria. I recommend that this property be considered significant at the following level(s) of significance:

national  statewide  local  
Applicable National Register Criteria:  
 A  B  C  D

Roof	ASPHALT TERRACOTA STONE SYNTHETICS
Other	METAL

### Narrative Description

(Describe the historic and current physical appearance and condition of the property. Describe contributing and noncontributing resources if applicable. Begin with a **summary paragraph** that briefly describes the general characteristics of the property, such as its location, type, style, method of construction, setting, size, and significant features. Indicate whether the property has historic integrity.)

---

### Summary Paragraph

The View Park Historic District is located in unincorporated Los Angeles County, approximately nine miles southwest of downtown Los Angeles. The larger View Park neighborhood rests on the southeastern face and the crest of the Baldwin Hills, a low-lying mountain range in west-central Los Angeles County. The roughly 450-acre View Park development was initially subdivided in 1923 by the Los Angeles Investment Company. Subdivision continued for two decades and the construction of single- and multiple-family dwellings occurred incrementally from the mid-1920s into the 1960s. View Park is predominately composed of single-family residences, with a small number of multi-family residences, as well as one commercial building (the Los Angeles Investment Company's office) and small neighborhood park. Although the area was developed over time by a single developer – the Los Angeles Investment Company -

View Park Historic District  
Name of Property

Los Angeles, California  
County and State

houses were designed by multiple architects and builders and adhered to loose guidelines enforced by an architectural review board. Therefore, the architectural character of the district is consistent in style, scale, and massing, although diverse in terms of individual house design. In general, the part of View Park that was developed in the pre-World War II era is located east of Presidio Drive and features houses designed predominantly in Period Revival styles, such as Spanish Colonial Revival, American Colonial Revival, Monterey Revival, Mediterranean Revival, and French Revival. The area to the west of Presidio Drive is characterized by postwar styles, predominantly those associated with the Ranch style such as Oriental, Traditional, and Contemporary Ranch. View Park contains numerous examples of Minimal Traditional houses, scattered throughout the district. The View Park Historic District retains a high level of integrity; of 1,789 total properties, 1,479 are district contributors and 310 are district non-contributors.

## 8. Statement of Significance

### Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A. Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B. Property is associated with the lives of persons significant in our past.
- C. Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D. Property has yielded, or is likely to yield, information important in prehistory or history.

### Criteria Considerations

(Mark "x" in all the boxes that apply.)

- A. Owned by a religious institution or used for religious purposes
- B. Removed from its original location
- C. A birthplace or grave
- D. A cemetery
- E. A reconstructed building, object, or structure
- F. A commemorative property
- G. Less than 50 years old or achieving significance within the past 50 years

**Statement of Significance Summary Paragraph** (Provide a summary paragraph that includes level of significance, applicable criteria, justification for the period of significance, and any applicable criteria considerations.)

The View Park Historic District is eligible under Criterion A at the local level of significance. It possesses significance in two areas: Community Planning and Development and Black Ethnic Heritage. The District contains a high percentage of contributing buildings within its borders and retains sufficient integrity to convey its significance despite some alterations to individual buildings and a small amount of infill. The period of significance is 1923-1970, from the initial development of the neighborhood through 1970, when the neighborhood's racial composition had transitioned from exclusively white to 75% African American. The property meets the requirements of Criteria Consideration G due to its exceptional significance in southern California history, a rare example of a racially exclusive suburb that transitioned to become an upwardly mobile African American suburb.

**Narrative Statement of Significance** (Provide at least **one** paragraph for each area of significance.)

**Criterion A: Community Planning and Development**

The buildings in the District were erected from the 1920s to 1960s during a period of rapid population growth in Southern California by one of Los Angeles' most prominent development companies, the Los Angeles Investment Company (LAIC). Developed in the Baldwin Hills with views of the city and mountains, View Park was constructed for middle-income and affluent homeowners. With the use of racially restrictive covenants, the neighborhood was initially restricted to white residents and remained homogeneous through the 1950s.

In the first half of the twentieth century, the population of Los Angeles increased rapidly and residential development occurred at a frenzied pace. Out of this grew powerful development companies with unique organizational structures and competitive marketing tactics. View Park was developed by one such company: the Los Angeles Investment Company, which was a significant player in the Los Angeles real estate development scene, recognized for greatly influencing the local housing market and landscape, as well as building and community development practices in the region and beyond.<sup>1</sup> The physical manifestations of the company's organization and strategies are evident in View Park, one of the company's most important planned community developments, making the View Park Historic District a significant representation of a middle- to upper-middle class single-family residential neighborhood developed by an important development company to accommodate the influx of residents to Los Angeles during the first part of the twentieth century. Additionally, View Park has an unusually long, approximately forty-year building period, and offers within its boundaries a snapshot narrative of the building and community development trends that were occurring throughout Los Angeles during its primary periods of growth from the 1920s through the 1960s. (See attachment, Section 8)

<sup>1</sup> The Los Angeles Investment Company's influence extended at least to Vancouver, Canada, where its business model was replicated by local building companies. G.E. Mills and D. W. Holdsworth, "The B.C. Mills Prefabricated System: The Emergence of Ready-made Buildings in Western Canada," Parks Canada, Canadian Historic Sites: Occasional Papers in Archaeology and History No. 14, 1975, accessed March 17, 2015, <http://parkscanadahistory.com/series/chs/14/chs14-2a.htm>.

View Park Historic District  
Name of Property

Los Angeles, California  
County and State

### **Criterion A: Black Ethnic Heritage**

View Park is also significant in the area of Black Ethnic Heritage. The View Park Historic District is associated with the racially restrictive housing practices that left an indelible mark on our country's history, as well as the rise of the black middle- and upper-class in the United States after World War II and their role in combating housing discrimination and segregation.

View Park's history parallels the pattern of events that unfolded in Los Angeles and across the country as a result of discriminatory practices in the housing industry and federal policy which restricted housing opportunities from people of color and promoted segregation. After restrictive housing practices were declared unconstitutional, affluent African Americans had a significant role in breaking down housing barriers and promoting improved racial relations. Though early black residents of View Park promoted integration as part of the Civil Rights' era neighborhood stabilization movement, the neighborhood would become predominately black by the end of the 1960s. In doing so, however – while retaining its prestige – View Park became distinct as one of a small number of neighborhoods in Los Angeles and the country that was both African American and affluent. For this distinction, and for its ability to tell the story of the country's discriminatory housing practices and how those practices affected Los Angeles, the District is significant.

The View Park Historic District's period of significance begins in 1923 and ends in 1970, spanning the District's 35-year development period, and including its transition from a neighborhood in which restrictive covenants were strictly enforced to its establishment as a thriving and prosperous African American community. Specifically, the period of significance for the area of Community Planning and Development is 1923 to 1958 with the start date reflecting the year in which the Los Angeles Investment Company began development activity in View Park and the end date marking the year in which the last section of View Park was subdivided by the LAIC. Though building activity continued for a several years after 1958 by external businesses with oversight by the LAIC, the Los Angeles Investment Company's major developmental activities ceased in View Park after this date. The period of significance for the area of Black Ethnic Heritage is 1957 to 1970. The start date reflects the year in which the earliest known African Americans homeowners moved into the View Park Historic District, paving the way for additional black buyers in the neighborhood. The end date reflects the year by which the community had become predominately African American.

9. 33.997214, -118.356765

**Verbal Boundary Description** (Describe the boundaries of the property.)

The View Park Historic District has an irregular boundary. The northern boundary follows (from west to east) Mount Vernon Drive, Enoro Drive, Kenway Avenue, Northland Drive, and Stocker Street. The eastern boundary is South Victoria Avenue. The southern boundary follows (from east to west) Floresta Ave, Angeles Vista Boulevard, Escalon Avenue, and Northridge Drive. The western boundary follows the curve of Mount Vernon Drive. In general, View Park's northern, eastern, and part of its southern boundary are coterminous with the boundary of the City of Los Angeles with unincorporated Los Angeles County.

**Boundary Justification** (Explain why the boundaries were selected.)

The View Park Historic District includes properties within a collection of contiguous tracts on the eastern slopes of the Baldwin Hills that were subdivided and developed by the Los Angeles Investment Company and marketed as View Park.<sup>2</sup> There are 19 tracts total, including tract 5535 (recorded in 1922, 1923, and 1924), 8175 (1924), 8864 (1925), 8900 (1925), 4961 (1927), 6177 (1927), 8060 (1927), 9954 (1927), 9955 (1927), 10750 (1933), 10900 (1935), 11155 (1937), 12516 (1940), 12654 (1947), 15978 (1952), 18096 (1952), 17981 (1953), 15335 (1955), and 21687 (1958). The original View Park development, which contains approximately 2,300 parcels, comprises a slightly larger area than the 1,781 property View Park Historic District. Due to a general lack of historic integrity, properties south of Angeles Vista Boulevard between Deane Avenue and Keniston Avenue were excluded from the District. Additionally, a small number of properties on the periphery of the

---

<sup>2</sup> Los Angeles County, California, Department of Public Works, Land Records.

View Park Historic District  
Name of Property

Los Angeles, California  
County and State

neighborhood that did not relate to the period of significance were excluded from the District, including residential properties on Valley Ridge Avenue north of Mount Vernon Drive, park and open space along Stocker Street and Mount Vernon Drive, and commercial properties at the intersection of Crenshaw Boulevard and W. Vernon Avenue.

Section number   7   Page   1  

**Narrative Description (Continued)**

**View Park Location and Setting**

The View Park Historic District is located in west central Los Angeles County, in the Baldwin Hills. Large in size and irregular in shape, the District is roughly bounded by Stocker Street to the north, S. Victoria Avenue to the east, Angeles Vista Boulevard and Floresta Avenue to the south, and Escalon Avenue and Mount Vernon Drive to the west. The area to the south and west of Angeles Vista Boulevard is generally flat and level, and the streets are laid out in rectilinear grid and the lots are consistent in size and shape. North and west of Angeles Vista Boulevard, the terrain is hilly, and the curvilinear streets and irregularly sized and shaped parcels conform to the area’s natural topography. The downtown Los Angeles skyline and surrounding mountains are visible from many locations in the District and most hillside residences were designed and sited accordingly.

View Park’s street plan is hierarchical and streets are paved with concrete; they feature concrete curbs, sidewalks, and parkways. Public utilities are underground, and residences have consistent setbacks. Most front yards feature broad lawns and are largely void of perimeter fences, walls, or hedges, creating a uniform and park-like appearance throughout. Historic street lights have been replaced with contemporary lights, and public staircases, which were built to provide direct walking routes through the hilly terrain, have been converted to private property and most are now gated.<sup>1</sup>

A variety of mature trees are planted in the District’s parkways. Of note are the Mexican Fan Palms lining Angeles Vista Boulevard, View Park’s main thoroughfare, which date to the original subdivision of View Park. The District’s park, Monteith Park, is minimally landscaped, but features a large and prominent Moreton Bay Fig tree. Landscaping varies from residence to residence with some having mature trees of various species and landscapes dating to the period of significance.

**Single-Family Residential Resources**

There are 1,752 single-family residences in the View Park Historic District, comprising a little more than 98 percent of all resources. Due to the District’s incremental development over a period of about 40 years, concentrations of several architectural styles appear in View Park. Residences constructed in the pre-World War II era were designed predominantly in Period Revival styles, such as Spanish Colonial Revival, American Colonial Revival, Monterey Revival, Mediterranean Revival, and French Revival. A number of Minimal Traditional residences dating to the 1930s are located throughout this area. Postwar residences are predominantly one iteration or another of the Ranch style, such as Oriental, Traditional, and Contemporary Ranch. The District also has a small number of residences in other styles, including Storybook, Streamline Moderne, and International Style. All residences have a high degree of workmanship and quality in materials and construction.

The single-family residences constructed in View Park prior to World War II are concentrated in the eastern portion of the District (east of Presidio Drive) and vary considerably in scale and design, ranging from modest to high style. Smaller pre-war residences are generally located in low-lying areas of the District (south and east of Angeles Vista Boulevard) and have qualities that are similar to pattern book designs that were prevalent at the time. Larger, custom-designed residences are generally found

<sup>1</sup> The District’s original streetlights are visible in Herman Schultheis’ ca. 1938 photographs of View Park. Source: Los Angeles Public Library Photo Collection, Herman Schultheis Collection.

Section number   7   Page   2  

in the hillsides and have notable architectural qualities. Though most residences are one or two stories at street grade, many of the hillside homes cascade at the rear, adding an additional story to take advantage of views.

Inter- and post-war residences are concentrated in the western portion of the View Park Historic District (west of Presidio Drive), with most being moderate to large in size. Moderate-sized residences built during and after World War II often share a similar plan, but feature various stylistic elements, whereas the larger residences appear to be custom designed and have more notable architectural qualities.

Older single-family residences have a driveway and, generally, a detached garage; though some of the more sizeable 1920s and 1930s properties contain integral garages upward of three- and four-bays, reflecting the affluence of the original owners. World War II era and post-war residences generally have integral garages, with many, due to the topography, being integrated at the ground level with the residence sited above. Though most single-family residences in the View Park Historic District have driveways, others instead are located in front of alleys, off of which detached garages are placed.

The View Park Historic District, constructed over a period of four decades with oversight by one developer, is distinctive in its range of architectural styles. Architectural harmony exists in the quality of construction, as well as the repetition of styles and materials that were used during each phase of development. Overall, the District presents a varied, yet cohesive appearance that reflects the broader patterns of residential architecture and development occurring in Los Angeles during the time of development.

**Other Resources**

The District’s 23 multi-family residences are generally located on peripheral streets and include duplexes, triplexes, fourplexes, and apartment houses. Generally modest, they were also constructed in popular styles of the time, including Period Revival styles, Minimal Traditional, and Mid-Century Modern.

There is one non-residential building located within the View Park Historic District. It is sited prominently on a triangular parcel at the main entrance to the District on Mount Vernon Drive and is vernacular in style and triangular in shape with a rounded façade. Originally office space for the Los Angeles Investment Company, it has been used for non-profit offices since at least 1975.<sup>2</sup>

Monteith Park is located at the crossroads of Olympiad Drive, Mullen Place, and S. Mullen Avenue in a low-lying area of the District. It is triangular in shape and, at approximately two thirds of an acre, small in size. It is minimally landscaped with trees, though a large Moreton Bay Fig tree along the park’s northern border is a prominent historic feature. The neighborhood park contains no buildings or structures but features moveable and permanent furniture, such as benches, chairs and tables.

Lastly, there are three public utility sites, seven undeveloped lots, and one parking lot within the boundaries of the View Park Historic District, all of which are non-contributing properties.

**Condition and Integrity**

In general, View Park retains its historic appearance from the identified period of significance of 1923 to 1970. The tangible elements of the community’s design are largely intact, and most buildings are very well maintained, largely unaltered, and retain a high degree of integrity. 1,479 buildings, or 83 percent, retain integrity of design, materials, and workmanship and are contributors to the View Park Historic District. At 17 percent, the proportion of non-contributing properties is small and, in general, these properties do not detract from the District’s ability to convey the original design intent of the Los Angeles Investment Company.

Non-contributing properties were identified as such because they were built outside of the period of significance or have been extensively altered. Other non-contributing properties include public utility sites and undeveloped lots. Alterations that preclude a building from being a contributor to the historic district include resizing of windows and thus interruption of fenestration patterns, additions to the primary façade or roofline, and / or a combination of replacement windows, doors, garage doors, and / or cladding, which collectively reduced the property’s ability to convey its significance. Though alterations to individual properties somewhat compromise the District’s integrity of materials and workmanship, overall the alterations are not so prevalent or significant as to diminish the integrity of the district as a whole. Overall, then, View Park retains integrity of location, setting, design, materials and workmanship. The high integrity of the District’s contributing properties, coupled with the small percentage of non-contributing properties and largely extant planned community elements, give View Park a high level of integrity of feeling and association from its historical period.

**Architectural Descriptions of Buildings**

The following descriptions are organized by street name first and then street number, corresponding to the chart of buildings attached in this document. Buildings are described in terms of their date of construction, type, architectural style, basic form, roof type and material, cladding material, and situation on their respective lots. Garages (both integral and detached) are noted. If a building has been altered, alterations are listed. As stated above, buildings with some alterations are still considered contributors, while buildings with significant alterations to character-defining features and which have endured a significant loss of integrity are considered non-contributors even if their basic dimensions are unchanged. Buildings constructed after the end of the period of significance are identified as non-contributors.

Building permit records for View Park (in unincorporated Los Angeles County) are either not available or very difficult to access; therefore, alterations noted are based on field observations made by the preparers of this nomination rather than alteration permits. Where known, original architects and/or builders are noted.

**Angeles Vista Boulevard**

1. 4176 Angeles Vista Blvd Contributor

This is a two-story single-family residence constructed in 1937 in the American Colonial Revival style. It is clad with smooth stucco and wood channel drop siding, and capped with a composition shingle, cross-hipped roof with a medium pitch. The property is generally flat and level and includes a detached two-car garage. Alterations include: driveway gate added, security door added.

2. 4179 Angeles Vista Blvd Contributor

This is a one-story multi-family residence (a fourplex) constructed in 1941 in the Minimal Traditional style. It is clad with textured stucco, wood channel drop siding and brick, and capped with a composition shingle, combination gable and hipped roof with a medium pitch. **Narrative Statement of Significance (Continued)**

**Early History of View Park**

For thousands of years prior to colonization, the Gabrielino-Tongva Indians inhabited what is now known as the Baldwin Hills, including the land where View Park would later be developed.<sup>1</sup> In 1781, during the Spanish colonization of the Americas, El Pueblo de Los Angeles was founded approximately ten miles northeast of the Baldwin Hills. In 1843, during the era of Mexican colonization, the land where View Park is now located was granted by the Governor of Alta California, Manuel Micheltoarena, to Vicente Sánchez for ranching and the area became known as Rancho La Cienega o Paso de la Tijera.<sup>2</sup> Elias J. “Lucky” Baldwin then purchased portions of the rancho in 1875 and 1886 and the western portion of the land, which continued to be used for ranching, at this point became known as “Baldwin Hills.”<sup>3</sup> In 1909, after Baldwin died, Los Angeles was in the midst of a major growth period, and Baldwin’s heirs began to sell portions of the rancho for subdivision, including a large portion (more than 3,000 acres) to the Los Angeles Investment Company in 1912.<sup>4</sup> At the time, it was reportedly the company’s largest purchase, as well as the largest sale in the history of Los Angeles’ suburban development.<sup>5</sup> The Los Angeles Investment Company would subdivide tract after tract within the former rancho, including the View Park tracts, where they would finally break ground in the early 1920s.

**Criterion A: Community Planning and Development (Continued)**

**The Los Angeles Investment Company**

The Los Angeles Investment Company started with humble beginnings in 1898 with the collective savings of three musician friends and grew to become one of Los Angeles’ largest real estate and land development companies of its time.<sup>6</sup> In the early twentieth century, Los Angeles’ leaders embarked on a successful campaign to attract migrants to Southern California with the promise for all of year-round good weather, plentiful jobs, and houses with private yards. The city’s population grew from approximately 100,000 in 1900 to over 1.2 million in 1930.<sup>7</sup> As economic growth and housing demand soared, automobile ownership increased, pushing the boundaries of the city to previously undeveloped territories. This phenomenon set a fertile stage for development companies like the Los Angeles Investment Company.

Using a variety of early and innovative land development strategies, the LAIC primarily subdivided and developed single-family residential neighborhoods, often on speculation. Their business model included property development, home building, mortgage financing, and cooperative investing, a

unique combination which differentiated the LAIC from its competitors.<sup>8</sup> Also unique was that investment funds were exclusively used for the company’s growth and development, meaning that as the Los Angeles real estate market thrived, the company thrived and its investment clients received dividends.<sup>9</sup> As the LAIC explained itself in a 1907 brochure:

We have furnished hundreds of homes for people who are in the same fix that you are. This is the way we do it: Save your nickels and dimes, deposit them with our company either as a deposit or to purchase stock. When you have sufficient money invested, together with its earnings to make us secure, we will buy a lot and build a home to suit you, which you can pay for in monthly installments of just what the house will rent for.<sup>10</sup>

As the advertisement indicates, at this point in the company’s history, the Los Angeles Investment Company specialized in constructing affordable bungalows for modest-income buyers, and, by offering easy, attractive financing terms comparable to rent payments, they turned many small-scale investors into homeowners. With the local economy and real estate market booming, this model was very successful for the LAIC and the company’s growth continued. Responding to demand from the growing population of working-class migrants seeking an improved life in Southern California and selling the dream of homes for all, the company was considered to be a fundamental contributor to Los Angeles’ local economy, growth and development, and transformation from a tourist destination to a major industrial center during the early 1900s building boom.<sup>11</sup>

The company’s approach to building was equally as innovative as its business model. In order to maximize economy of scale, the Los Angeles Investment Company established a network of subsidiary companies, including a building company to purchase construction supplies in large quantities, a paint company to manufacture its own paint, a lumber company to source and mill wood, a nursery to supply landscaping materials for new tracts, and a financial institution. Additionally, the LAIC designed with in-house engineering and architectural services, constructed with company carpenters, masons, and plumbers, and sold with in-house marketing and sales teams.<sup>12</sup> This one-stop shop of house building allowed the LAIC to streamline the development process and deliver a lower cost home to buyers. Because of their success, the Los Angeles Investment Company’s business model began to be replicated by other companies, influencing the way in which home building occurred on a broader level.<sup>13</sup>

The LAIC is also credited with being an early adopter of planned community development practices for moderate-income buyers. Starting in 1905, in addition to building modest houses, the company landscaped the community, connected residences to public utilities, and imposed building regulations

to maintain a cohesive, planned appearance. Though standard now, these community building practices would not become common in the United States for decades to come.<sup>14</sup>

In 1912, the LAIC made their biggest land purchase yet: \$2,400,000 for 3,600 acres of Elias “Lucky” Baldwin’s holdings in the Baldwin Hills, on which they planned to develop 30,000 lots. At the same time, following a national depression in 1913, the local market was beginning to cool, real estate sales were declining, and the company’s liquid assets dwindled as shareholders began to default on their stock and home purchases. With the market no longer booming, the company’s financial model collapsed and as stock prices plummeted, the Los Angeles Investment Company was on the brink of bankruptcy.<sup>15</sup>

With substantial property holdings and a large number of stock holders in relation to the general population, the LAIC was considered to be too big to fail and its potential collapse became a matter of public interest.<sup>16</sup> It would have been, as historian William W. Clary describes, “...the greatest catastrophe in the city’s history.”<sup>17</sup> A group of prominent civic and business leaders stepped forward to reorganize the company and an entirely new board was elected in 1914.<sup>18</sup> The direction of the LAIC shifted at this point, and the company planned to begin constructing higher-end residences. View Park, which would be the newly reorganized company’s first major development, includes the modest residences the company was known for as well as residences for affluent homebuyers. The Los Angeles Investment Company would develop approximately 2,300 parcels in View Park over a period of four decades. Shortly after the neighborhood was complete, the LAIC merged with its own subsidiary, First Colony Life Insurance Company, and became a life insurance company, thus ending the Los Angeles Investment Company’s history as a major land developer.<sup>19</sup>

**Development of View Park**

As part of its development plan for View Park, the Los Angeles Investment Company paved new public roads to provide automobile access to the area and constructed an 18-hole public golf course adjacent to the neighborhood.<sup>20</sup> The LAIC subdivided the area into multiple tracts and, starting in 1924, began developing the lower sections of View Park (south and east of Angeles Vista Blvd) with modest houses on small, rectilinear lots, which suited the flat topography and provided residents with access to nearby streetcar stops.<sup>21</sup> Most residences were designed in either the Spanish Colonial Revival or Tudor Revival styles and though the workmanship and quality of construction were high, they were economical in design, having features common to pattern book houses.

With the rise of the automobile, Los Angeles’ hilly regions were ripe for residential development and

<sup>20</sup> “Public Golf Links Planned,” *Los Angeles Times*, June 25, 1921.

<sup>21</sup> During the development of View Park, news articles and advertisements referred to the neighborhood and its tracts using a variety of names, including “Angeles Vista Heights,” “Viewpark,” (as opposed to “View Park”), “Hilltop,” “View Terrace,” “Mesa Vista,” and “View Heights,” among others. By 1927, the area became consistently referred to as “View Park.”

Section number  8  Page  4

beginning in the 1920s, developers began to use elevation as a status symbol, whereby homes constructed in higher elevations were associated with wealth, privacy, and separation from those below.<sup>22</sup> The Los Angeles Investment Company, then, reserved View Park’s hillside tracts for more affluent buyers believing that the sloping land with panoramic views would provide an ideal setting for luxury residences. Early, 1920s residences in the upper section of View Park were typically large in size, custom designed by the LAIC’s architecture team, and sited on expansive lots offering spectacular views of the city and mountains. These residences were reached via a hierarchical network of curvilinear boulevards with impressive vistas, including the main thoroughfare of View Park, Angeles Vista Boulevard, which was lined with mature palm trees, and narrower, secondary streets in between. Residences featured the use of fine materials and excellent craftsmanship inside and out, and nearly all were constructed in the fashionable Spanish Colonial Revival style, though there are some Tudor Revival residences Mediterranean Revival, and French Revival residences. Some of the early residences in the hillside tracts of View Park have integral garages for up to four cars, which was highly unusual at the time given the nascency of automobile ownership, serving as an indication of the original owners’ wealth.

The Los Angeles Investment Company’s development plan involved establishing, as well as maintaining, a cohesive, beautifully planned community. The company designed and built the infrastructure of each tract, which included graded and paved streets, concrete curbs and sidewalks, landscaped parkways separating sidewalks from roadways, street lights, and graded lots. In some parts of the District there are also alleys, and in the higher elevations, public staircases were constructed so that pedestrians might more easily traverse the hills. Further, all utilities were buried so as not to interfere with the views. In order to preserve the setting they had established, the LAIC utilized 50 year deed and building restrictions, which included use, height, outbuilding, and fence restrictions, as well as minimum square footage, setback, sideline, garage, and maintenance requirements.<sup>23</sup>

Early in View Park’s development, the LAIC set aside a small, triangular plot of land in the center of the development for a community park, named “Monteith Park.” Located at the intersection of Olympiad Drive, Mullen Place, and S. Mullen Avenue, the company advertised in 1927 that the park would feature shrubs, trees, lawns, flowers, and walks.<sup>24</sup> A 1937 aerial photo of the area reveals that the park’s design included three walkways extending from the corners of the triangular parcel and meeting at the center. Trees and plants were located at the park’s corners and center, and open, grassy land filled the remaining space.<sup>25</sup> Today, the park has a grassy lawn, medium sized trees of various species, and a large Moreton Bay Fig tree, which dates to the park’s development. The walkways are no longer extant.

From 1923 to 1927 the LAIC provided the architectural plans and construction services for all residences built in View Park. The identities of the staff architects are generally unknown, but

presumably the architectural staff was relatively young and still gaining experience, contributing designs according to the company's specifications. There are no records indicating that the Los Angeles Investment Company employed notable architects. After 1927, the LAIC began to sell View Park parcels to independent builders who would erect residences on speculation or for clients. In order to ensure consistency in design and quality, however, the company maintained an approval process over each new building and builders had to adhere to the aforementioned deed and building restrictions.<sup>26</sup> By 1931, the Los Angeles Investment Company reported that it had discontinued its architectural and building services, and after this point, presumably, all residences were constructed by external entities, with oversight by the LAIC.<sup>27</sup>

Construction was suspended briefly in the northern tracts of the District prior to and during the 1932 Los Angeles Olympics because a temporary Olympic village was erected in View Park to house male athletes. The site was selected for its proximity to Olympic Park just a few miles to the east, and, due to its topography and location relatively near the Pacific Ocean, View Park has lower temperatures than other locations in Los Angeles. After the games were over, the Olympic buildings were sold and relocated and residential development ensued once again. Though there are no extant resources from the Olympic Village in View Park, some of the street names were renamed by the LAIC as a marketing strategy, including Olympiad Drive and Athenian Way.<sup>28</sup> During the Depression and World War II, development continued at a conservative pace in both the lower and upper tracts of View Park, and at this point, building diversified. Single-family residences were constructed for middle- and upper-middle-income buyers, and the number of architectural styles expanded to include Spanish Colonial, Tudor, American Colonial, Dutch Colonial, French, Mediterranean, and Monterey Revival styles, as well as early Ranch style residences. Starting in the mid-1930s, as Period Revival styles began to fall out of favor in Los Angeles and a more simple aesthetic was desired, Minimal Traditional residences became the most prevalent style being constructed in View Park. Also constructed at this time were a small handful of Streamline Moderne residences, as well as an International Style residence by the noted modern architect Raphael Soriano. Beginning in the 1930s, a small number of multi-family residences were also constructed in View Park (including duplexes, triplexes, fourplexes, and small apartment houses), with the majority being concentrated at the District's boundary on S. Victoria Avenue and primarily being designed in Spanish Colonial Revival and Minimal Traditional styles.

By the end of World War II, nearly all the lots in the eastern portion of View Park were developed and so construction of single-family residences expanded to the remaining Los Angeles Investment Company tracts west of Presidio Drive. At this point in View Park's development, the LAIC would open a segment of the tract and sell a small number of parcels, primarily to builders who would typically build on speculation, but also to individuals seeking to erect their own home. Building and sales reportedly occurred quickly and once a segment was complete or nearly complete, the company would offer additional parcels for sale in the next segment of the tract. Development occurred incrementally in this fashion until the neighborhood was fully built in the late 1960s.<sup>29</sup>

Section number  8  Page  6

The end of the 1940s was again a transitional period in the development of View Park, with the number of new, Minimal Traditional and Period Revival style houses declining as Southern California buyers began to prefer a more contemporary aesthetic. From 1945 through the end of the View Park's residential construction in the late 1960s, most new buildings were single-family Ranch houses for middle- and upper-middle-income buyers. Most common styles included Contemporary Ranches, Minimal Ranches, Traditional Ranches, and Oriental Ranches, as well as a small number of American Colonial Ranches, Cape Cod Ranches, French Ranches, and Cinderella Ranches. There were additionally a small number of Mid-Century Modern and Hollywood Regency residences. Many of the post-war Ranch houses share similar plans but are treated with different stylistic elements, giving each residence a unique appearance despite consistency in plan.

The Los Angeles Investment Company maintained offices in several locations in and near View Park in order to facilitate development and sales. Extant is a two-story vernacular brick building erected in 1945 at 3450 Mount Vernon Drive. Originally the site of a tract office, the 1945 building was constructed to serve as the company's new main office, replacing the former main office in the Western Pacific Building in downtown Los Angeles, which the LAIC constructed in 1927.<sup>30</sup> The building at 3450 Mount Vernon Drive is prominently sited at View Park's primary entrance and features a triangular shape and rounded façade. Now in use as offices for a community non-profit, it is the only non-residential building in the View Park Historic District.

With home building occurring at a rapid pace in Southern California in the first half of the 20<sup>th</sup> century, development companies relied on strategic marketing and advertising campaigns. The Los Angeles Investment Company, who maintained control of View Park's marketing and advertising throughout its period of development, used a number of innovative strategies over the years. In addition to design and building services and land improvements, the LAIC marketed a variety of additional services in View Park, including fire department, insurance, and financing services, making purchasing a home with the LAIC more convenient for buyers. Additionally, early advertisements indicate the company would place oil paintings in the yard of each residence under construction so prospective buyers would know how the houses would look when complete.<sup>31</sup> The LAIC also built a number of model homes which were open to the public. Extant today are: "The Barcelona" at 3879 W. Mount Vernon Avenue (erected in 1928); "Casa de Vista" at 3711 Northland Drive (1936), which is reportedly constructed of steel; "Honeymoon Home" at 4833 Keniston Avenue (1936); "Cozy Glen Cottage" at 4544 Mullen Avenue (1937); and "Home of Charm" at 4826 Victoria Avenue (1927).<sup>32</sup> In 1933, after outside builders

and architects were invited to construct residences in View Park, the Los Angeles Investment Company's new President, R.F. Ingold, announced a cash reward home design contest in order to encourage builders "in maintaining originality, landscaping, and the best construction;" contestants were to be judged on "originality, harmony and practicability."<sup>33</sup> In 1934, the passage of the National Housing Act sparked another advertising campaign and the LAIC began promoting View Park as a Federal Housing Administration (FHA) approved development.<sup>34</sup> Around this time, the LAIC also participated in several housing exhibitions at which miniature, model houses, were presented to the public, including the California International Pacific-Exposition in San Diego and an exhibit they hosted on site.<sup>35</sup> Throughout the period of development, advertisements for View Park emphasized the scenic setting, large lots, convenient location, modern amenities, fashionable architecture, and quality construction, as well as the deed and building restrictions which the company claimed would ensure the community's lasting appeal and protect buyers' investments.<sup>36</sup>

**Builders and Architects**

Information about the architects (both LAIC and external) who contributed to View Park is limited and residences are, for the most part, unattributed. The Los Angeles Investment Company occasionally included the name of a building's architect in newspaper advertisements, including M.C. Drebbin (building location unknown); Postle & Postle, architects of the steel frame model home, "Casa de Vista" (3711 Northland Drive, constructed in 1936); Vincent Palmer, architect of another reportedly steel frame house (unknown address on Olympiad Drive, constructed in 1937); W. F. Ruck (3785 Northland Drive, constructed in 1937); and Theodore Pletsch (unknown address at Palmero Boulevard and Homeland Drive, constructed in 1939).<sup>37</sup> Building records also identify Paul Haynes and Leopold Fischer as the respective architects of 4530 and 4554 Circle View Boulevard (constructed in 1947 and 1951). These architects, because of the dates of construction, do not appear to have been LAIC staff architects, and additionally, the extent to which they designed further houses in View Park is unknown. None of the aforementioned architects, however, are recognized as having notable careers.

Four known architects of View Park residences are notable: H. Roy Kelley, Raphael Soriano, Charles W. Wong, and Robert L. Earl. The residence at 3750 Northland Drive, constructed in 1937, is the work of H. Roy Kelley (though somewhat altered). Raphael Soriano, an acclaimed modernist, built a residence early in his career in 1941 at 3852 Olympiad Drive. Constructed in the International Style, the house was a stark contradiction to the eclectic style of the residences being constructed in View Park and stands as a representation of the experimental modernism that was beginning to dot the Southern California landscape in the midst of more prevalent, traditional buildings.<sup>38</sup> After World War II,

as modernism became more prevalent in Southern California, a number of Mid-Century Modern residences would be constructed in View Park, including a large, post-and-beam residence built in 1962 at 4476 Mount Vernon Drive and attributed to the noted local architect Charles W. Wong.<sup>39</sup> A young draftsman, Robert L. Earl, who would go on to have a notable career building estates for the rich and famous, also contributed a number of residences to View Park after World War II. Though the exact properties cannot be attributed, it is estimated that Earl designed over 50 residences in View Park in partnership with the builder Homer C. Valentine.<sup>40</sup> Valentine was one of the builders who contributed to the development of View Park after World War II. He erected a small number of houses in the eastern section of View Park in lots that had not yet been developed, but his work is primarily concentrated in the western tracts the LAIC opened after the war, along Athenian Way and west of Valley Ridge Avenue. Most of his buildings were what he called “farm style” houses, which were one-story residences, with traditional Ranch style elements such as diamond light windows and exposed rafter tails. Many, though not all, of Valentine’s houses in View Park were designed by Robert L. Earl, including the View Park residence of the Los Angeles Investment Company President Reuben Ingold (address unknown). The only buildings that can be definitively attributed to Valentine at this time include Valentine’s own residence at 4165 Fairway Boulevard, which was not designed by Earl, and a residence at 4827 Parkglen Avenue, which may be an Earl design.<sup>41</sup>

Additional builders who worked in View Park include Angelo George, who was a competitor of Valentine’s. He reportedly built a number of houses in the District after WWII, though the number and their locations are unknown.<sup>42</sup> John McLean and Son, one of the earliest external builders to construct in View Park, erected at least three Spanish Colonial Revival residences in the late 1920s, including 3660 Aureola Boulevard.<sup>43</sup> Additional known builders include Fred D. Thomson, who worked with architect M.C. Drebbin in 1933 on a Spanish Colonial Revival residence at an unknown location; George A. Bissel and L.B. Hamilton who were reportedly active builders in the early 1930s, including building 3649 Fairway Boulevard in 1933 and 3790 Northland Drive in 1935; Walley A. Bailey, R. L. Byrd, and Adolf Slechia who constructed 4546, 4545, and 4554 Circle View Boulevard in 1935, 1949, 1951 (respectively); and Chas T. Pike who built 3826 Olympiad Drive in 1941.<sup>44</sup> None of these builders appear to have had particularly prolific or well-known careers, indicating that much of View Park’s construction is the work of a number of small building companies.

Numerous individuals contributed to the design and construction of buildings in View Park, making each residence in the neighborhood unique; however, due to the Los Angeles Investment Company’s

oversight and community planning, the residences are complementary and consistent in size and scale, and thus the District retains a cohesive appearance.

**Criterion A: Black Ethnic Heritage (Continued)**

The social history of the View Park Historic District relates to a broader narrative that occurred in communities throughout the United States during the period of significance. Los Angeles, like many cities across the country, utilized zoning and racially restrictive covenants to segregate white and minority populations.<sup>45</sup> The covenants, appearing for the first time toward the end of the 19<sup>th</sup> century but becoming more common in the early 20<sup>th</sup> century, were a form of a private contract recorded in the deed of the property, where, as a condition of purchasing a home, white buyers agreed they would not later sell or rent to non-whites.<sup>46</sup> The city's zoning practices and these contracts, which were legally enforceable in court, restricted minorities to a few areas of the city, with most living along the Central Avenue corridor, a thriving, multi-ethnic community which became the economic, cultural, religious, and social hub of African American life in Los Angeles.<sup>47</sup>

When development began in View Park, the Los Angeles Investment Company included racial restrictions in the original tract deeds under Clause XVI: Limitation of Ownership. The deeds read:

No persons, except persons of the Caucasian race, shall be allowed to use or occupy said property, or any part thereof, except in the capacity of domestic servants of the occupant thereof.<sup>48</sup>

In its early years, View Park's homeowners were exclusively white. According to the 1930 census records, there were just two black residents and one Japanese resident in the neighborhood, and all three were servants.<sup>49</sup>

In addition to race-based deed restrictions commonly utilized by builders and lenders in the housing industry, federal policy was enacted that would promote a system of racism and segregation in the housing market at the national level. In 1934, the Federal Housing Administration (FHA) introduced our current financial mortgaging system and established a set of lending requirements that had to be met in order for an FHA-insured mortgage to be obtained. Among other requirements, mortgages were approved or denied based on the racial composition of the neighborhood where a property was located. Applicants in new, homogenously white neighborhoods were considered to be better credit risks whereas those in black and low income neighborhoods were considered to be the worst. Maps, known as residential security maps, were created by an organization called the Home Owners' Loan Coalition to convey the assumed level of security for mortgage investments in a given community and, based on the FHA's lending requirements, were color-coded to delineate the security risk.

Neighborhoods that were considered to be low risk, known as “first grade” communities, were marked on the maps in green, whereas “fourth grade” neighborhoods, in which loans would be limited or denied, were marked in red. As such, this restrictive practice became known as “redlining.”<sup>50</sup>

Since View Park was a new development with racially restrictive covenants in place, the neighborhood was given a first grade classification by the Home Owners’ Loan Coalition, making the area attractive for mortgage lenders and sales easier for the Los Angeles Investment Company.<sup>51</sup> The neighborhood was marketed and sold to white buyers exclusively. Because of racial covenants and redlining, Los Angeles’ African American population, meanwhile, was restricted from View Park and neighborhoods like it, and mostly confined to neighborhoods adjacent to the Central Avenue corridor, where quality of life was decreasing. Like Los Angeles’ white population, the city’s minority population had grown significantly throughout the early 20<sup>th</sup> century, yet the space in which people of color could live was increasingly restricted, and as a result, the Central Avenue corridor became increasingly crowded and strained.<sup>52</sup>

After decades of fighting to end housing discrimination, in 1948, the United States Supreme Court finally ruled that restrictive real estate covenants were unconstitutional, opening the door for minorities to migrate to previously restricted neighborhoods.<sup>53</sup> In Los Angeles, the African American population began to move west and south, seeking respite from the housing crisis of the Central Avenue corridor.<sup>54</sup> African Americans with financial means were the first to penetrate previously all-white middle- and upper-class neighborhoods, but as they began to migrate, racial tensions only increased and African Americans continued to struggle to gain access to housing outside of the city’s minority neighborhoods.<sup>55</sup> This was in part because the FHA continued to promote “compatibility among neighborhood occupants” and because loopholes existed which enabled neighborhoods to continue to protect their racial homogeneity.<sup>56</sup> Further, without legal backing from the police and courts, whites began to take matters into their own hands in an effort to maintain racial homogeneity in their communities.<sup>57</sup> By taking the lead in pursuing homes in previously all-white neighborhoods, these early, upwardly mobile African Americans endured significant intimidation and violence, but in doing so, broke down housing barriers and paved the way for future black residents.<sup>58</sup> In 1961, there were 60 reported incidents in Los Angeles initiated by whites against African Americans who had moved into white

neighborhoods (though presumably there were many more unreported instances).<sup>59</sup> This included View Park, whose first black residents experienced racial intimidation.

Though it is unknown who View Park’s first African American homeowner was or when they moved in, a number of blacks began purchasing homes in the neighborhood in the 1950s. They were largely professionals and prominent members of Los Angeles’ African American community, including business people, doctors, lawyers, athletes, entertainers, and civil rights activists.<sup>60</sup> The earliest known instance of racial harassment and violence occurred in 1957, when sisters and school teachers Evangeline Woods Johnson and Ella Redmond purchased a home at 4025 Olympiad Drive and a group of white neighbors repeatedly threatened them, including setting their lawn on fire and burning a cross on their property.<sup>61</sup> Additional early residents recall instances of hostile neighbors, for sale signs immediately going up next door, and difficulty enrolling their children at the local elementary school.<sup>62</sup> In response to the violent incidents at the Johnson-Redmond residence, the Los Angeles NAACP Housing Committee responded by launching an initiative to make it safe for blacks to purchase homes.<sup>63</sup>

Unfortunately, however, efforts to prevent African Americans from moving into View Park continued. Though racially restrictive covenants had been declared unconstitutional (and therefore unenforceable) a decade earlier, when the Los Angeles Investment Company recorded the deed for the neighborhood’s final tract in 1958, they included the following language restricting occupancy by minorities.

No part or portion of said Tract No. 21687 which is subject to this declaration of restrictions shall ever at any time be used, occupied or lived upon, or permitted to be used, occupied or lived upon by an person not wholly of the Caucasian race; EXCEPTING that persons not of the Caucasian race may be kept thereon strictly in the capacity of a servant or employee or servants or employees, of a Caucasian owner or occupant.<sup>64</sup>

In an addendum to this deed, the LAIC noted that even if certain sections of the overall document were no longer relevant, other sections could still be enforced.<sup>65</sup> Presumably, the company understood that racial restrictions were no longer legally enforceable, but retained the language to assist with loopholes in preventing sales to minorities.

By the start of the next decade, the Los Angeles Investment Company and View Park’s builders were still actively discouraging African Americans from buying homes in the area. A 1960 *Los Angeles Sentinel* article reported that the LAIC had a clause in its contract which restricted the sale of residences they financed to Caucasians and that when minorities attempted to buy homes in View

Section number  8  Page  12

Park, they were greeted with unwilling sellers, inflated prices, and a cash only requirement, making it very difficult for minorities to obtain a residence in the neighborhood.<sup>66</sup> Despite these obstacles, by the 1960 census, the proportion of black residents in View Park and adjacent Windsor Hills was 4.2 percent, with the majority living in View Park.<sup>67</sup>

Starting in the early 1960s, with the Civil Rights Movement advancing and attitudes in the U.S. shifting, a greater number of African Americans were able to acquire property in View Park, including celebrities Ike and Tina Turner and Ray Charles, who are credited with enhancing View Park’s reputation and appeal to African Americans.<sup>68</sup> Unfortunately, many of the remaining white neighbors continued to be resistant to integration. Their resistance was made worse by real estate agents, who, incentivized by the opportunity for lucrative commissions, propagated the idea that black residents would result in an expansion of the then impoverished South Central corridor and a decrease in property values and the neighborhood’s status (a scheme known as “blockbusting,” which was practiced by both black and white realtors).<sup>69</sup> Anxious about these possibilities, but unable to rely on legal tactics for segregation and with overt racism becoming less socially acceptable, white homeowners resorted to moving out of View Park.<sup>70</sup> As the number of black residents rose, white homeowners increasingly sold until View Park reached what scholars have termed the “tipping point,” after which sales accelerated rapidly, with white residents of the neighborhood going so far as to list their homes below value in order to quickly depart the changing neighborhood.<sup>71</sup> The tipping point, as studied by sociologists researching post-WWII white flight from America’s urban centers, is the point at which the proportion of minorities migrating to a previously all-white neighborhood passes a critical limit after which white residents move out en masse.<sup>72</sup> Scholars have identified the tipping point to be somewhere between 25 and 40 percent. View Park is thought to have reached its tipping point by 1965.<sup>73</sup>

Middle- and upper-class neighborhoods adjacent to View Park were transitioning in a similar manner and in 1961, a group of multiracial women, who, concerned about the racial conflicts in their communities, organized to discuss the issues they were encountering. The group, called United Neighbors, quickly grew to become a non-profit entity and included both male and female members from View Park as well as adjacent Baldwin Hills Estates, Windsor Hills, and Leimert Park. By partnering with other community groups, their goal was to improve race relations in the area, build a balanced community, and desegregate schools. Importantly, too, they did not want the area to become all black and, thus, segregated again. In 1964, the group organized a separate entity, the Crenshaw Neighbors, Incorporated, which worked to counteract real estate agents’ predatory blockbusting tactics and retain integrated neighborhoods.<sup>74</sup> With other communities across the country experiencing white

flight, neighborhood stabilization groups of this nature had also formed elsewhere, making the Crenshaw Neighbors part of a broader movement in Los Angeles and throughout U.S., and in 1965, the group joined forces with other stabilization groups in the Los Angeles area to form the Council of Integrated Neighborhoods, which provided a greater platform and increased influence. When the Watts Riots occurred later that year, however, white flight accelerated in nearby View Park and adjacent middle- and upper-income neighborhoods. The Crenshaw Neighbors and the Council of Integrated Neighborhoods responded with increased efforts, even contributing to the development of a national organization, National Neighbors, and though many of their efforts had positive, long lasting effects in communities, these groups failed in their quest for neighborhood integration. View Park, as well as adjacent neighborhoods Leimert Park, Baldwin Hills, and Windsor Hills, ultimately became re-segregated.<sup>75</sup>

By 1970, View Park’s African American residents outnumbered Caucasians nearly three to one and by 1980, this ratio had increased to nine to one.<sup>76</sup> Though white flight was fueled by the belief that View Park would depreciate in value and lose its prestige, this did not happen. As a nearly all-black community, View Park’s median annual family income and median property values remained well above the city average, and the neighborhood retained its status and desirability, eventually earning View Park the nickname, “the black Beverly Hills.”<sup>77</sup> Starting in the late 1960s, View Park had the distinction of being one of a small number of communities in the country that was both black and affluent.<sup>78</sup> As neighborhood resident John Gordon stated, “In this community, [my children] can see black doctors, writers, lawyers, artists, craftsmen, law-enforcement officials. They’re all within a hundred yards of where we live.”<sup>79</sup> View Park, then, was a unique opportunity for professional, black Angelenos to live in the type of idyllic, suburban neighborhood that was long unavailable to them, while still being rooted in black culture.<sup>80</sup>

There is extensive scholarship on the role of restrictive housing practices in the shaping of Los Angeles in the first half of the twentieth century (see Section 9, Bibliography), and the direct association of View Park with this context is clear. From the late 1950s to 1965, View Park transformed from an all-white enclave to a community in which the ratio of African American homeownership outnumbered white homeownership, representing the end of the period of significance. It was during this period that Black homeowners overcame intimidation, physical threats, and exclusionary lending and real estate practices, transforming View Park into one of the most prosperous African American neighborhoods in the country. Although the abolition of restrictive housing practices changed a number of Los Angeles neighborhoods in the postwar era, there are very few others in which this pattern had such a clear and direct impact on the identity of a neighborhood. View Park quickly became a symbol of prosperity and upward mobility for African American Angelenos, a population that could not purchase a home in approximately 95% of Los Angeles prior to 1948.

# Merchants, Manufacturers and Professional Men -are buying these homes

**This Home is one of our  
\$1,000,000 Showing  
of "Better" Homes Today**

**IT** is only one of the many high-class VIEW PARK Homes that we are building—English, Spanish and Italian Stuccos—English and Colonial Bricks—of wondrous beauty—a home to suit every taste and requirement—their appointments are unexcelled. We cannot adequately describe the features of these homes—therefore we invite you to drive out today and inspect them for yourself. This beautiful park is located on the eastern slope of the Baldwin Hills—affords a wonderful view overlooking the city and mountains—it is truly one of the residential show places of Southern California.

**Why business men are buying in View Park:**

Because of the slightly location and completeness of the homes—furthermore, they are buying on terms which enable them to live in a luxurious home, paying for it in monthly payments no greater than they would have to pay in rent for a home of the same high character and completeness. We are building View Park Homes of carefully selected materials from our own lumber yard, and other guaranteed products. Our splendid View Park homes are sold to you at a lower price and terms than you could possibly build them for yourself. This is "Better Homes Week" throughout the nation, and if you are interested in homes there is no place in the country where you will find such a group of won-

derful homes as you will find in View Park. Here we have approximately \$1,000,000.00 worth of homes completed and under construction.

**Completed homes ready for inspection today:**

3470 Knollcrest Avenue  
3500 Knollcrest Avenue  
3477 Westmount Avenue  
3457 Crestwood Avenue

You can here inspect homes at all stages of construction. If you contemplate the purchase of a home you should know how it is built, and the materials of which it is built.

# A VIEW PARK HOME

**where your perpetual  
view can *never* be  
obstructed!**

**W**E are completing some wonderfully artistic New Brick and Stucco homes in English and Spanish architecture in VIEW PARK. Others tell us this is the most modern group of homes being built anyplace and selling at the prices and easy terms of \$100.00 or more per month. Think! Nearly 100 homes to view—a 1,000,000.00 dollar show. Homes in all stages of construction. Business men are buying these homes out of their income and using their capital in their business. Seven Homes Sold last week.

*We invite you to look at these completed homes today:*

3470 Knollcrest Ave.	3477 Westmount Ave.
3477 Knollcrest Ave.	3457 Crestwold Ave.

If one of our homes does not meet your requirements we will build one precisely to your order, you pay for it with your rent money.

**Start with a Viewpark site...**

SELECTION of a lot or estate site on the mesa is an excellent way to begin your new home, particularly if you are searching for the very best spot for your better-than-average home.

It's a rare opportunity to build where you are secluded, yet in the very heart of the expanding Los Angeles metropolitan area. A complete shopping center is just a few minutes away, and ribbon-like highways will get you where you want to go in a jiffy.

Drive up to this last Viewpark unit . . . on the mesa. Note the exceptional homes that you will have as neighbors.

# Crossburning Triggers Safe Homes Drive

The Los Angeles NAACP Housing committee, through its chairman, Spencer Wiley, has announced an intensive drive to make it safe for any American to purchase a home and live in peace regardless of race, creed or national origin. It will also focus attention on current discriminatory practices regarding financing of homes.

The action was sparked by the crossburning at the home of Mrs. Evangeline Woods and Mrs. Eva Woods Redmond at 4025 Olympiad, both public school teachers.

Wiley said, "We shall solicit the support of all agencies, labor leaders, the clergy, heads of the Republican and Democratic Parties and other civic bodies to prevail on the District Attorney, the Sheriff's Office, Chief of Police and elected officials to carry out their responsibilities to uphold the law and protect all our citizens in our great city. This means these public officials shall be requested to set up the proper mechanics to prevent such disgraceful and uncivilized conduct that occurred in View Park.

"This is not a problem concerning Negroes alone," Wiley said, "but one of the community as a whole."

ABSTRACT/SUMMARY COMMENTS:

The View Park Historic District is locally significant under National Register Criterion A in the areas of Community Planning and Development and Ethnic Heritage-African American. Conceived and developed by a single company—the Los Angeles Investment Company—the district is a rare example of a racially exclusive suburb that transitioned to become an upwardly-mobile African American suburb in the Los Angeles area. Reflecting the conventional patterns of residential boom development occurring in Los Angeles during the early twentieth century, the Los Angeles Investment Company (LAIC) utilized restrictive covenants to initially exclude minorities from purchasing properties in the area, with the goal of crafting an affluent-middle income neighborhood restricted to white residents. Largely built out by 1958 employing both the typical architectural forms of the day and unique LAIC marketing and development tools, the cohesive View Park neighborhood would eventually begin a fairly rapid, if sometimes uncertain, transition into an affluent African American neighborhood in the post-war period, as former housing restrictions were lifted under legal scrutiny and the city's upwardly mobile African American community sought better housing conditions than those provided in the city's crowded Central Avenue area. Often facing intimidation and violence, View Parks' new African American homeowners broke down significant barriers and paved the way for the creation of a vibrant integrated neighborhood (75% African American by 1970) that would earn it the nickname "the black Beverly Hills."

RECOM./CRITERIA Accept Criterion A

**National Register of Historic Places**

View Park Historic District is a residential subdivision located in unincorporated Los Angeles County, consisting of 1478 contributing buildings, 306 noncontributing buildings, 1 contributing site and 4 non-contributing sites on approximately 450 acres. The buildings of the district are designed in styles including American Colonial Revival, Tudor Revival, Spanish Colonial Revival, French Renaissance, Ranch, Streamline Moderne, International Style, and Minimal Traditional. A complex pattern of curvilinear streets indicates the influence of garden suburb design, platted and built out during the period of Los Angeles County's transition from a region of streetcar suburbs to neighborhoods dominated by the automobile.

The property is eligible under Criterion A for its roles in Community Planning and Development, and African-American history. The period of significance, 1923-1965, indicates the period from the first phases of suburb development by the Los Angeles Investment Company through the period when the neighborhood transitioned from a racially exclusive suburb to a neighborhood primarily occupied by middle class and wealthy African Americans.

In the context of community planning and development, View Park was one of the largest and most significant suburban development projects of the Los Angeles Investment Company, an important player in the Los Angeles real estate development industry in the mid-20<sup>th</sup> century, whose practices greatly influenced the local housing market and landscape throughout the region. Because of the large size and comparatively remote location of View Park, full build-out of the neighborhood took more than four decades, beginning in 1923 and completing in 1958. In addition to the residential properties in the district, View Park includes one significant site, Monteith Park, advertised in company marketing materials as a neighborhood amenity. In the context of African American heritage, this neighborhood initially carried racial exclusion covenants that prohibited sale of land to anyone not of "the Caucasian race." These covenants were one of several mechanisms used throughout the United States to limit sales of suburban properties to nonwhites. These covenants were later found unconstitutional but treated as a *de facto* form of segregation in California long after Supreme Court cases had theoretically prevented their use. Defying these efforts, African American families began moving into View Park in the late 1950s, facing hostility, threats, and even burning crosses on lawns. In response, the Los Angeles NAACP Housing Committee launched an initiative to make it safe for African American families to purchase homes. These families were predominantly middle class and wealthy, with the result that, unlike many other neighborhoods that transitioned from exclusively white to African-American residents, View Park retained a high average family income and property values, earning View Park the nickname "the black Beverly Hills," whose residents included African-American celebrities including Ike and Tina Turner, and Ray Charles.

The nomination was submitted by the View Park Conservancy on behalf of the property owners. The nomination has received 67 letters of support and 17 letters of objection, including 8 formal notarized letters of objection.

Staff supports the nomination as written and recommends that the State Historical Resources Commission determine that the View Park Historic District is eligible for listing in the National Register under Criterion A at the local level of significance, with a period of significance of 1923-1965. Staff recommends the State Historic Preservation Officer approve the nomination for forwarding to the National Park Service for listing in the National Register of Historic Places.

Greetings!

I received this letter and I am overjoyed to see there is a View Park Legacy Fund. Unfortunately, it was addressed to my father who passed away in 1998.

We moved into the View Park/Windsor Hills area in 1958. Wow! How things have changed! I was eight years old at the time and I am now 63.

Here are a few of my memories I would like to share. All of the homes north of Northridge didn't even exist. My brother and my father would walk over to that area and fly kites and ride their little homemade go-carts in the dirt.

The apartments in the jungle were something out of a DREAM! They were the most beautiful apartments I had ever seen in my life. The only blacks were the housekeepers.

I was one of the first blacks to attend Windsor Hills Elementary School. There was only two of us at the time for a LONG time. George was light-skinned so I stood out for a long time. Then Fred came along. Mrs. Morton, my third grade teacher had a problem with blacks but the children in general were WONDERFUL!

All of my friends were white and all of their parents were doctors and lawyers. I even had a friend whose father owned the Wich Stand which is now Simply Wholesome. The race car driver JC Agaganian's family lived on Southridge. When Ray Charles's house was built, that was the biggest house on the block. Barry White used to drive by in his white Seville and long hair and wave and talk to my dad. Terry and I would walk home from school and she wouldn't stay long because she had to be at Ike and Tina's house at a certain time.

On my block, which was white, teenagers would throw trash on the side of our house in protest of us being on the block and eventually they all moved.

I am soooo proud to now own the house I grew up in and also proud to see this legacy fund and I hope you keep in contact with me to keep me updated with your accomplishments.

Sincerely,

A handwritten signature in cursive script that reads "Rosalind Blackmon". The signature is written in black ink and is positioned to the right of the word "Sincerely,".

Re: View Park Conservancy – National Register of historic Places

Dear Ms. Polanco:

My family and I have proudly lived in View Park, California for over 17 years.

I am writing you today in regards to the nomination to list View Park, California on the National Register of Historic Places. I am in 100% support of the nomination and feel that preserving the history of View Park is of the utmost importance not only because I am an Afro-American, but also because the story of View Park is an integral part of Los Angeles as well as well as America's history.

Some of the reasons I support the nomination to list View Park on the National Register are as follows:

While View Park, as with other communities, provides individuals/families to achieve the "American dream" of home ownership, View Park also offers the "African American Dream" of home ownership in a neighborhood, not only consisting of architecturally beautiful homes, but also one with beautiful views and surroundings and a real sense of "community." Further, the rich history of the neighborhood is one that cannot be denied and preserved for generations to come.

Before retirement, my wife and I were hard-working individuals, who during our early years, never dreamed we would live in such a community as View Park. However, our hard work, faith and determination resulted in our being able to afford our home in the "flats" of View Park (where the community consists of beautiful and uniquely-constructed homes with gorgeous trees and landscaping.) Walking through the View Park community is "food for the soul," with its breathtaking views and natural beauty. We also love Montieith Park, which while small in size, it serves as an invaluable place of beauty, comfort and fun in our community.

Ms. Julianne Polanco  
Page Two

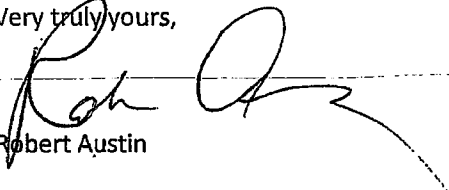

View Park is also where our daughter grew up, left California to attend college, returned home a few years ago and now owns a small business in the area.

As an aside, in the late 1950's, my wife's father, who was one of the original Munford Marines and the first Afro-American driver's license examiner for the State of California, desired to move his family (which included he, his wife and seven children) from Crenshaw Boulevard in Los Angeles, to View Park. However, due to the then existing racial climate which included covenants preventing Afro Americans from purchasing homes in View Park, he was denied such opportunity. Our family is proud in knowing we were blessed to succeed in moving to View Park, although, simply because of the color of his skin, her father could not.

My family is thanking you in advance for your consideration and, hopefully, a positive vote to have View Park listed on the National Register of Historic Places in America.

Very truly yours,

---

Robert Austin

RE: View Park Historic District

Dear Ms. Polanco:

On behalf of the Los Angeles Conservancy and our more than 6,500 members, I am writing to express our strong support for the National Register nomination of the View Park Historic District. The neighborhood represents a tremendous period of early-to-mid 20<sup>th</sup> Century history within unincorporated Los Angeles County, both for its architectural merits and subsequent social and cultural significance.

Few places have an ability to tell the story of fast-paced growth within Los Angeles while also illustrating the important and compelling narrative of African-American heritage. View Park is extraordinary -- in the greater Los Angeles area and nationwide -- for its story of housing discrimination and a community that nevertheless persevered to become one of the country's most affluent African-American neighborhoods.

For several years the Los Angeles Conservancy has been working closely with View Park residents who care strongly about their neighborhood, many of which have become active founding members of the View Park Conservancy and sponsor for this nomination. It is a special place that has long been overlooked and underappreciated. The Conservancy could not be more pleased to see this nomination prepared and the neighborhood advancing toward much-deserved National Register recognition.

In late 2016 the Los Angeles Conservancy plans to include View Park as part of our annual neighborhood tour to help highlight the history and its impressive collection of period revival and mid-century modern residential architecture. We urge your

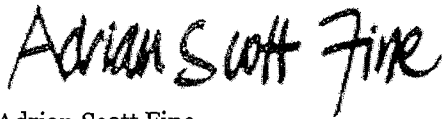

strong support for this nomination and the community who has worked so hard to engage the residents in the process and research and document its heritage.

**About the Los Angeles Conservancy:**

The Los Angeles Conservancy is the largest local historic preservation organization in the United States, with nearly 6,500 members throughout the Los Angeles area. Established in 1978, the Conservancy works to preserve and revitalize the significant architectural and cultural heritage of Los Angeles County through advocacy and education.

Please do not hesitate to contact me at (213) 430-4203 or [afine@laconservancy.org](mailto:afine@laconservancy.org) should you have any questions and if we can be of assistance.

Sincerely,

Adrian Scott Fine

Subject: View Park Conservancy

Dear Commission,

It would be an honor to be in the National Register of Historic Places. I believe that we do qualify.

My sister, Myrtle Williams and her husband (a physician) purchased their home in the neighborhood in 1955. My wife and I visited my sister often. My wife was very impressed with my sister's lovely home and the beautiful neighborhood. We were inspired to become a part of this community.

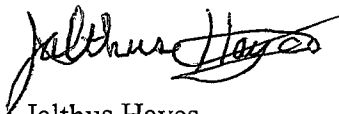

My family has now been residents of this lovely community for 39 years. The area has quite a history. I understand it was used as an Olympics Village in 1932.

This community was featured in Ebony Magazine as one of the wealthiest African-American neighborhoods in the United States. It has been home for many African-American professionals, i.e. doctors, lawyers, education administrators and teachers. UCLA's Dean of Students has lived here. Other celebrities include Ray Charles, Norm Nixon and his wife, Debbie Allen, Reverend James Lawson, who marched with Dr. Martin Luther King Jr., Leslie Sykes, news anchor for ABC's channel 7 of Los Angeles, and real estate developer Charles Quarles, who recently hosted President Obama for brunch. Our community was also featured in the Los Angeles Times.

I, myself, was a hair stylist in Beverly Hills. I have since retired. Some of my clients were Valerie Harper, better known as TV star, Rhoda, Senator Diane Watson, and singer Nancy Wilson.

My family and I look forward to receiving this honor bestowed upon this well-deserving community.

Sincerely,

Dear Ms. Polanco,

I am writing you today in regards to the nomination to list View Park, California on the National Register of Historic Places. I am in 100% support of the nomination and feel that preserving the history of View Park is of the utmost importance.

My family and I have lived in View Park for 1 years.

I support the nomination to list View Park on the National Register because it's an  
important piece of the history of Los Angeles. I've been learning  
this more and more everyday since moving here. It's diversity,  
architecture, history, sense of community is something I feel  
needs to be preserved and celebrated. This is  
representative of what is in the fabric of the United  
States and Los Angeles. It would be a shame if  
View Park's integrity on any of these points were to be  
sacrificed for any reason.

Sincerely,

Julianne Polanco - State Historic Preservation Officer  
Office of Historic Preservation - California State Parks  
P.O. Box 94296  
Sacramento, California 94296-000

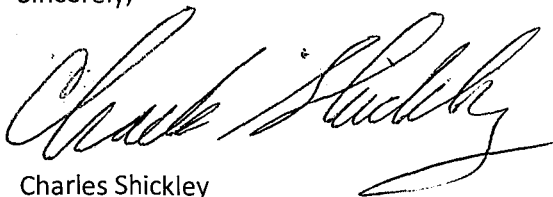

Dear Ms. Polanco:

I am a non-African American who has lived in View Park, a predominantly African-American community, for five years. My wife is African-American and has owned the home for 24 years. I have an outsider's view of the nomination to list View Park, California on the National Register of Historic Places. I am in 100% support of the nomination and feel that preserving the history of View Park is of the utmost importance.

I support the nomination to list View Park on the National Register because this housing development shows the beauty and strength of the African-American community in the face of modern, ongoing, exclusionary banking industry, Federal governmental and local zoning practices. Before moving into this community I researched the history of View Park. In so doing, many of my opinions regarding present day race issues were challenged. I was surprised to learn that the U.S. Supreme Court did not strike down racial covenants until 1948. I was shocked to learn that the notorious Black street gangs of South Los Angeles can be traced to black protection leagues formed in defense against white gangs terrorizing blacks in the 1950's. Considering a wealthy, affluent and successful African American community could arise in View Park is a testimony to the good and noble aspirations of all people regardless of race. The community story in View Park is unique and important American history.

But, many forces are changing View Park. The Southern California housing economy is squeezing the working and middle class families out regardless of race. View Park is being integrated and some McMansions are being built. Also, African Americans who have been able to get around FHA regulations and develop wealth have been able to move to traditionally white neighborhoods without much resistance since white attitudes toward having black neighbors have moderated. It will be a great loss to the American story when this community becomes another homogeneous, West side suburb. Major pressures for change are the new Leimert Park Metro-rail station, Baldwin Hills Mall development, Silicon Beach wealth influx, the new Rams stadium development, proximity to LAX airport and closeness to downtown LA. These pressures along with View Park's aging African American homeowners conspire to homogenize this neighborhood. With the slow yet unstoppable progress toward racial equality the View Park story will be lost unless action is taken to preserve this remarkable piece of history. Would you list View Park, California on the National Register of Historic Places?

Dear Ms. Polanco:

I am an African American who has owned my home in View Park for 24 years. This letter is regarding the nomination to list View Park, California on the National Register of Historic Places. I am in 100% support of the nomination and feel that preserving the history of View Park is of the utmost importance.

I support the nomination to list View Park on the National Register because of what it means to so many African-Americans. This community, a predominantly African-American community, has been and still is aspirational to many people because of its block clubs providing not only a sense of community but a positive link to the Sheriff's department and other local government officials. The clubs also provided social and safety events from block parties to Citizen Emergency Response Team training. The housing stock is beautiful because it retains much of the original splendor showing mid-century, middle-class sensibility with lovely single family detached homes, yards front and back as well as swimming pools and incredible views. This type of housing development is becoming rare in Southern California.

But, many forces are changing View Park. The Southern California housing economy is squeezing the working and middle class families out regardless of race. View Park is being integrated and some McMansions are being built. Happily, many African Americans have been able to move to traditionally white neighborhoods without much resistance. But, it will be a great loss to the American story when this community becomes another homogeneous, West side suburb. Major pressures for change are the new Leimert Park Metro-rail station, Baldwin Hills Mall development, Silicon Beach wealth influx, the new Rams stadium development, proximity to LAX airport and closeness to downtown LA will all conspire to remake this neighborhood. These forces along with the slow yet unstoppable progress toward racial equality will erase the View Park story unless action is taken to preserve this timely piece of history. Would you list View Park, California on the National Register of Historic Places?

Dear Ms. Polanco,

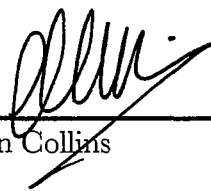

I am writing you today in regards to the nomination to list View Park, California on the National Register of Historic Places. I am in 100% support of the nomination and feel that preserving the history of View Park is of the utmost importance.

My family and I have lived in View Park for 52 years.

I support the nomination to list View Park on the National Register because \_\_\_\_\_

I support the nomination to list View Park on the National Register of National Places because View Park is an historic place: it has his own unique history:

**History**

- Its history started with the 1932 Olympic Village.
- This was followed by the construction of View Park by famous builders and architects: Reuben F. Ingold of the L.A. Investment Company, Homer Valentine builder, Robert L. Earl architect.

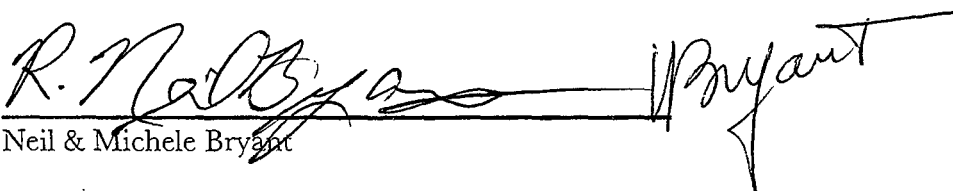

A brief mention here:

- Reuben Ingold and L.A. Investment Company were pivotal in selling large expanses of vacant land in View Park.
- Homer Valentine bought dirt lots from Reuben Ingold and constructed a large number of homes in View Park.

Despite the difference of style, there is a unity in the construction of the houses in View Park.

**Today:**

- 83% of the homes in View Park have retains most of their original architectural integrity.
- The residents have a strong sense of community.
- There is also a solid sense of African American identity.

 Sacramento, California 94296-000

Dear Ms. Polanco,

I am writing you today in regards to the nomination to list View Park, California on the National Register of Historic Places. I am in 100% support of the nomination and feel that preserving the history of View Park is of the utmost importance.

My family and I have lived in View Park for 8 years.

I support the nomination to list View Park on the National Register because View Park  
is a culturally diverse community with beautiful architecture  
and design that is a treasure not just for our residents  
to enjoy but all that come in this area. The history  
of the community is rich and storied unlike anything  
Los Angeles has to offer. Location-wise it is the heart  
of the city for travel to any and all points in the  
L.A. Basin. History is preserved here, let's make it official.

Sincerely,

Herbert Hale

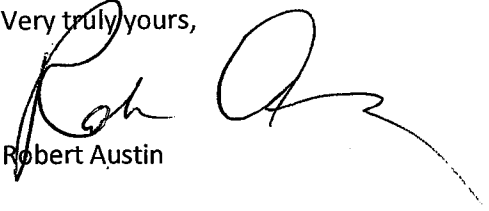

Ms. Julianne Polanco  
Page Two

View Park is also where our daughter grew up, left California to attend college, returned home a few years ago and now owns a small business in the area.

As an aside, in the late 1950's, my wife's father, who was one of the original Munford Marines and the first Afro-American driver's license examiner for the State of California, desired to move his family (which included he, his wife and seven children) from Crenshaw Boulevard in Los Angeles, to View Park. However, due to the then existing racial climate which included covenants preventing Afro Americans from purchasing homes in View Park, he was denied such opportunity. Our family is proud in knowing we were blessed to succeed in moving to View Park, although, simply because of the color of his skin, her father could not.

My family is thanking you in advance for your consideration and, hopefully, a positive vote to have View Park listed on the National Register of Historic Places in America.

Very truly yours,

  
Robert Austin

Re: View Park Conservancy – National Register of historic Places

Dear Ms. Polanco:

My family and I have proudly lived in View Park, California for over 17 years.

I am writing you today in regards to the nomination to list View Park, California on the National Register of Historic Places. I am in 100% support of the nomination and feel that preserving the history of View Park is of the utmost importance not only because I am an Afro-American, but also because the story of View Park is an integral part of Los Angeles as well as well as America's history.

Some of the reasons I support the nomination to list View Park on the National Register are as follows:

While View Park, as with other communities, provides individuals/families to achieve the "American dream" of home ownership, View Park also offers the "African American Dream" of home ownership in a neighborhood, not only consisting of architecturally beautiful homes, but also one with beautiful views and surroundings and a real sense of "community." Further, the rich history of the neighborhood is one that cannot be denied and preserved for generations to come.

Before retirement, my wife and I were hard-working individuals, who during our early years, never dreamed we would live in such a community as View Park. However, our hard work, faith and determination resulted in our being able to afford our home in the "flats" of View Park (where the community consists of beautiful and uniquely-constructed homes with gorgeous trees and landscaping.) Walking through the View Park community is "food for the soul," with its breathtaking views and natural beauty. We also love Montieith Park, which while small in size, it serves as an invaluable place of beauty, comfort and fun in our community.

Dear Ms. Polanco,

I am writing you today in regards to the nomination to list View Park, California on the National Register of Historic Places. I am in 100% support of the nomination and feel that preserving the history of View Park is of the utmost importance.

My family and I have lived in View Park for 31 years.

I support the nomination to list View Park on the National Register because the history and legacy of View Park is vital to future generations. Having lived here for over 30 years I have seen changes - some good and some bad. I anticipate more changes and View Park to change as well. I would like to see the history preserved.

Sincerely,

  
 Donald Wilson

Dear Ms. Polanco,

I am writing you today in regards to the nomination to list View Park, California on the National Register of Historic Places. I am in 100% support of the nomination and feel that preserving the history of View Park is of the utmost importance.

My family and I have lived in View Park for 16 years.

I support the nomination to list View Park on the National Register because View Park  
is a beautiful, historic, tranquil place  
nestled in the heart of Los Angeles.  
The Architecture of the homes is varied  
and historical. My home was built in  
1932 and the wood flooring, doors and  
molding are irreplaceable.

Sincerely,

  
 Shawn Davis

Dear Ms. Polanco,

I am writing you today in regards to the nomination to list View Park, California on the National Register of Historic Places. I am in 100% support of the nomination and feel that preserving the history of View Park is of the utmost importance. The nomination to list View Park on the National Register officially recognizes, protects, and maintains the rich cultural and architectural history of Los Angeles.

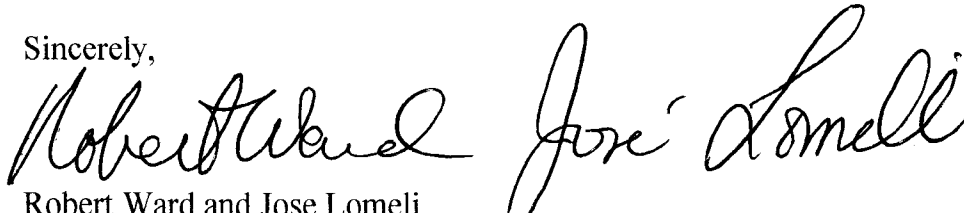

My family and I have lived in View Park for seven years. We are the proud owners of a lovingly restored 1947 Colonial Revival home perched prominently on the corner of one of two grand thoroughfares that run through View Park. My husband and I are the third owners of this majestic home.

The home was built by the Lehman family, and most likely designed by the renowned African-American architect Paul Revere Williams. Mr. Lehman was the personal attorney to Richard Nixon, and Mrs. Lehman was a delegate to the Republican National Convention in the '50s and '60s, along with Paul Revere Williams. The home hosted many political figures of the day, including Earl Warren.

The home was later purchased by the Barnes family in 1964. Dr. Barnes was a prominent African-American radiologist, and a meticulous restoration was done to the home by the family in 2006.

More than homeowners, we think of ourselves as ones in a continuous line of caretakers who are privileged to call View Park our home and beloved neighborhood. Thank you for your consideration and support.

Sincerely,

Handwritten signatures of Robert Ward and Jose Lomeli in black ink. The signatures are written in a cursive style and are positioned to the right of the typed names.

Dear Ms. Polanco:

I am writing today in regard to the nomination to list View Park, California on the National Register of Historic Places. I 100% support the nomination and feel that preserving the history of View Park is of the utmost importance.

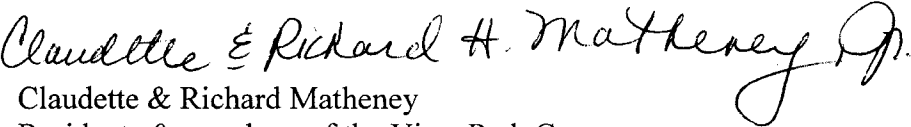

My family and I have lived in View Park/Windsor Hills areas for over 16 years.

I support the nomination to list View Park on the National Register for many reasons, but mainly due to its historic value to Los Angeles and the African American community within it. View Park-Windsor Hills is one of the wealthiest primarily African-American areas in the U.S. This was an area developed in the 1920s (View Park) and 1930s (Windsor Hills) as high upper-class neighborhoods. View Park was home to many celebrities, including Ray Charles whose home was on Southridge Avenue and built in 1965.

I further support the designation as historic because it wasn't until 1948 that African Americans could live in either View Park or Windsor Hills ***after the Supreme Court invalidated the racial restrictive covenants in 1948.*** Even with this restriction until 1948, African Americans today make up 84.8% of View Park-Windsor Hills. Based on these restrictions and obstacles, we believe that the time is NOW to preserve this history for our children and our children's children for many generations to come.

Thank you for your consideration.

Sincerely,

  
Claudette & Richard Matheney

RE: National Register of Historic Places Nomination for View Park

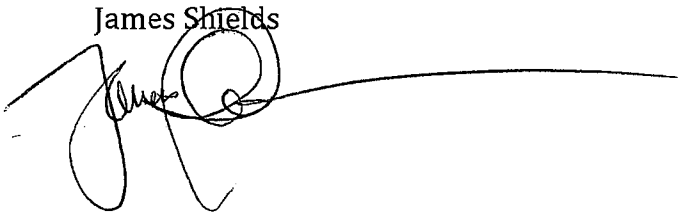

Dear Julianne Polanco:

Please be advised as the sole owner of the property located at: 4878 Presidio Drive, Los Angeles, CA 90043-1609 and I DO NOT want to be nominated to the National Register of Historic Places.

Thank for the consideration, but I OBJECT to being listed.

Sincerely,

James Shields

**Concerning:** Objection to listing my property as a contributor on the application of the National Register of Historic Places

To The State Preservation Officer,

I, Janice M. Woods owner of the property at:

4035 Mount Vernon Drive  
View Park, CA. 90008

do strongly and adamantly object to having my home listed on the registry for Historic Preservation Places. It has come to my attention that my house is appearing on a map that was part of an application process, as a **contributor**. **At no time was I asked or advised to be part of this process by the View Park Conservancy Entity or any other agency, as to whether or not they had my consent to include my home in this process or application. I do not know who this Conservancy represents and I'm not participating in any of their endeavors to apply for this status.**

**I object to the status of "contributor" and want my home released from this application and process.**

**Please communicate with me when my home has been taken off the list.**

**Respectfully,  
Janice M. Woods**

**Concerning:** Objection to listing our property as a contributor on the application of the National Register of Historic Places

To The State Preservation Officer,

We, Elizabeth M. Evans, Mark E. Galloway, and Patricia Galloway Banday, as equal owners of the property at:

3740 Northland Drive  
View Park, CA. 90008

do strongly and adamantly object to having our home listed on the registry for Historic Preservation Places. It has come to our attention that our house is appearing on a map that was part of an application process, as a **contributor**. **At no time were we asked or advised to be part of this process by the View Park Conservancy Entity or any other agency, as to whether or not they had our consent to include our home in this process or application. We as a family do not know who this Conservancy represents and we are not participating in any of their endeavors to apply for this status.**

**We object to the status of "contributor" and want our home released from this application and process.**

**Please communicate with us when you receive this request and have been successful in removing our home off the application list and map.**

**Respectfully,**

Dear Ms. Polanco:

In response to your letter of February 12, 2016 announcing the April 18 meeting regarding the nomination of my home to the National Register of Historic Place, I request that:

1. The location of the meeting be moved from San Francisco to Los Angeles. Because View Park is an unusually large Historic District of over 1,400 homes the spirit of democratic due process should facilitate participation by those directly affected.
2. The date of the meeting be moved to six months after the proposed date of April 18, 2016, to allow time for those directly affected to evaluate the impact of this nomination.

Best regards,

**Subject:** View Park Historic District

Dear Commission,

I am writing this email in **OBJECTION to nominating View Park as a Historic district!** I have been a resident since 1962 when my parents purchased our property. It was initially difficult for my parents to buy this property due to the covenants that were in place for Black families. To have this area become a Historic district would further restrict the possibility for renovations for the older homes and families to remodel as well as costly.

Please accept my email as a NO vote.

Thank you,

Los Angeles County, California  
National Register of Historic Places**

Dear Mr. Loether:

The enclosed disk contains the true and correct copy of the nomination for the Willow Glen Trestle to the National Register of Historic Places. This property is located in Los Angeles County, California. On April 18, 2016, the State Historical Resources Commission unanimously found the property eligible for the National Register under Criterion A at the local level of significance.

The property is nominated by the View Park Conservancy. 62 letters of support and 17 letters of objection were received, including 8 notarized letters of objection.

If you have any questions regarding this nomination, please contact William Burg of my staff at 916-445-7004.

Sincerely,

A handwritten signature in blue ink, appearing to read "Julianne Polanco".
