Description

The barn at the Louis Gray Homestead is a two story, wood frame, livestock/feed barn with a metal gambrel roof, board-and-batten siding, and a foundation of concrete piers. It has a transverse crib plan with a shed roof drive addition on its eastern elevation. Its interior is divided into five cribs on the western side of the first story and six on the eastern side. The upper floor is used for hay storage. The front or southern elevation is relieved only by the large central drive, the side drive to the east, and the opening beneath the hay hood above.

Reviewer's Comments

The boundaries of this property are presently located along building lines. A resource listed in the National Register should include all features of the property which contribute to its significance. In almost all cases this includes its historic setting. Page 77 of National Register Bulletin 16, Guidelines for Completing National Register of Historic Places Forms, states that "the boundaries of buildings should include the land surrounding the building, unless the lot occupied by the building contains no surrounding land as in the central business district of most cities."

Please revise the boundaries to include the property historically associated with the resource. If a portion of the original setting has lost its integrity, please explain.
