DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

"Rectangular in plan, the rear of the house utilizes a large flat boulder as one end of the structure. Walls of random limestone and sandstone blocks are laid up 3-4 feet high in mud mortar. They are 3' thick at the base and 2' thick at the top. Upright forked poles are set integral with the side-walls with longitudinal poles resting in the forks. Along the central long axis of the room are six similar but longer and heavier uprights supporting center ridge poles in relays. Primary beams extend on either side from center ridge pole to the side supports, flush with the masonry walls. Ocotillo branches, brush, earth, and stone for ballast from the roofing. Jacal curtain walls divided the interior, and the floor is earthen. A door was hung to one edge of the front upright."¹

Level of treatment: Restored in 1971 by the National Park Service, the structure is now in good physical condition. However, the use of soil-cement on the roof is discordant and blatantly not a faithful restoration, and corrections are recommended.

Cost Estimate: \$3,000 initially, \$750.00 P/A thereafter, based on 1973 costs.

STATEMENT OF SIGNIFICANCE

"Gilberto Luna was a pioneer Mexican farmer in the Big Bend country who settled in the Alamo Creek drainage, living there all his long life and raising a very large family. He died in 1947 at the age of 109. In the early years, Alamo Wash was on the Comanche War Trail through the Park, and Luna somehow established peaceful relations with these savage warriors and also with the Apaches resident in the vicinity. That he survived the incursions of these raiding Indians is a tribute to his diplomacy. That he succeeded for nearly a century in farming the dry Alamo Creek drainage using the technique of flood-plain farming is only slightly less amazing.

"The Luna Residence is significant as the prime example within the Park of the primitive Mexican house-shelter typical of earliest pioneer settlement."¹

It is also considered to be a prime example of man's adaptation to the environment in the Big Bend National Park.

Additionally, Luna was a widely known personage in the area, "a legend in his own time."²
