DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Situated on the south side of Main Street across from the County Courthouse the Fox California Theater is an example of late Spanish Colonial Revival Architecture.

Located on an irregular site of approximately 100 feet wide by 300 feet deep. The exterior is dominated by a tower that was a fashionable feature for the Fox Theater chain. Affixed to the tower, the "Fox" sign was designed to be seen from great distances. Detailing of the front facade and tower reflect the Spanish-Moorish feeling of the interior of the theater.

The general plan of the theater structure consists of; a two story entrance rotunda with a circular mezzanine off 'which are lounges, offices and restrooms; the theater with mezzanine seating a total of approximately 2500; a stage 70' high, 90' wide and 30' deep; the lower level under the stage includes choir rooms, band rooms, offices and dressing rooms.

The structure includes several retail shops and offices to the south and east that are incidental to the theater itself.

Safety and luxury were major considerations of the building design. Reinforced concrete and steel are the main structural materials of the building that was designed to be vacated in two minutes.

Dominated by massive ornately decorated columns supporting the mezzanine and ceiling the elegant rotunda serves as the mood setting entrance to the theater. Curved stairs to the mezzanine were once enhanced by a bubbling fountain and pool that have now given way to a refreshment stand. The original mirrored chandelier hangs from the rotunda ceiling.

The theater itself is focused upon the stage with its colorful and detailed proscenium.

Huge painted plastered ceiling beams give the appearance of carved wood. The box seat balconies are elegantly painted plaster that again appear to be carved wood.

Considered gigantic when constructed, the stage was designed for both live performances and motion pictures.

Organ pipes one time occupied a double set of lofts on each side of the stage. The pipes were screened with two landscapes painted in oil on canvas that still remain in place.

Throughout the interior, beautifully executed detailing of painted plaster reflecting a Spanish-Moorish-Baroque feeling is dominant.

Special mechanical features include complicated stage lighting, electrical generator, automatic vacuum cleaning system, exhaust and air circulating system, steam heating system and modern motion picture equipment.

STATEMENT OF SIGNIFICANCE

There is only one other theater rivaling the true 'movie palace' characteristics of the Fox California throughout all interior California. The Fox theater and the Warnor in Fresno are the only two survivors in this area from the vast chain of Fox West Coast theaters that once operated 32 theaters in Northern and Central California alone. Stockton was always known as a 'good show town' and to help preserve and encourage this image the great theater chain established a facility here that represented more than an ordinary commitment. The Fox West Coast Theaters invested over \$500,000 in constructing this theater after they paid \$285,000 for the large, older T&D Theater that already occupied the site only to demolish it for new construction. The 2500 capacity theater was not built solely for the people of Stockton. This facility, the largest theater ever constructed in the city, was built also to serve and attract people from surrounding counties, including the Mother Lode. Upon completion it had the statewide distinction of being the largest Vaudeville house in California, a significance retained until eclipsed a year later by the Oakland Paramount.

Construction of this theater commenced during the outset of the great Depression and it is significant that over \$200,000 of the construction cost was spent locally for labor, materials and services. Such a commitment to the community developed strong feeling among Stocktonians, a spirit that has always been associated with this building and is once again on the upsurge. To build additional confidence among the public, extroadinary care was excercised throughout the construction regarding safety provisions, fire precautions and ventilation. Extra steel was placed in the structure of the balcony designed to seat about 900 and four times the required weight was applied to the balcony during a stress test. This and other features noted during construction inspired a city building inspector of the time to state that construction was performed in such a way that it was one of the safest buildings ever constructed. (1)

One of the major interior appointments was a \$40,000 three manual Wurlitzer organ with twin pipe lofts. Other interior features included extensive dressing room facilities, as well as band and chorus rooms under the gigantic stage floor measuring 90' wide by 30' deep. The 70' high stage was and is the largest of any in this region. Such facilities, installed with live performances in mind, were never extensively utilized. The reasons for this were the devastating effect the Depression had upon travelling road shows and the emphasis the management placed upon their affiliation with major motion picture studios and a commitment to feature "the latest pictures first". Some releases were shown here before offered in larger cities.

When the theater opened on October 14, 1930, the city witnessed the greatest public celebration in terms of number of participants seen before or since. It was estimated 22,000 people crowded the streets that evening. Downtown streets and stores were especially lit and decorated, a temporary stage was constructed in the adjacent courthouse square and Kleig lights illuminated the sky. Several major streets in the center of the city were closed to accommodate the record crowds, less than 25% of which was actually able to enter the theater for the two opening performances of the 'talkie' "Up the River". The following day W. A. Fitzgerald, editor of the Stockton Independent, a leading newspaper, commented "The opening of the handsome Fox California theater this evening restores Stockton to its former prestige as one of the most important theatrical centers in Central California" (2)

The first of many celebrities appeared at the theater that night including Swedish impersonator and vaudeville and film figure, El Brendel; Irish actress, Maureen O'Sullivan, later to become famous with a role as Jane in the Tarzan movies and Marjorie White, a singing comediene. Other major personalities to perform at the Fox over the years were Al Jolson, the Marx Brothers, Ted Lewis and Henry Lauder. The big bands of Duke Ellington, Paul Whiteman and Tommy Dorsey as well as the dance revue of Fanchon & Marco also came to attract theater goers.
