13. Statement of Significance: (continued)

Sh-35 are the only two houses recorded in the county which exhibit the same variation on the standard double-pile plan - a secondary stair between the front and rear rooms on one side of the passage giving access to the second floor chambers which did not originally open onto the center passage. Both houses appear to have been built at approximately the same time and exhibit similar stylistic elements.

45. Description and House Plan: (continued)

greenhouse (on south side), 1-story wood porch in angle of ell sheltering rear entrance to house and door into north wall of ell, 6/6 sash on rear of house.

Interior:

Earred door and window surrounds except in passage, high molded baseboards, original metal mantel in southeast room, turn-of-the-century replacement mantels in both north rooms, southwest room has been converted into modern kitchen with plaster removed, secondary stair between southwest and southeast rooms leads to corresponding second floor chambers which originally did not open into passage, doors have been cut into passage by present owner and a bathroom inserted between these two rooms and at the west end of the passage on the second floor.

Outbuildings:

A contributing brick gable-roofed meat house is located at the rear of the house. Slave houses are said to have destroyed in a 1934 tornado. The meat house is original to the site and demonstrates an integral feature of the house's setting.

The nominated area encompasses two contributing buildings.
