ARCHITECTURE

DESCRIPTION

FORM 6 story warehouse block CONST. DATE c. 1905
MATERIALS Brick, metal frame, stone ARCH. STYLE Commercial
FENESTRATION 1/1 D.H.S. in pairs and 3's; singly below jack arches
DIST. FEATURES Expression of structural system in facade treatment
ALTERATIONS Some sash removed, openings boarded
SITE & RELATED STR. Flat site facing RR tracks & river across major thoroughfare

STATEMENT

This building is a good illustration of the influence of the Chicago commercial style in late 19th century Davenport. The structural system is clearly expressed in the pier-and-spandrel facade. Use of the metal frame permitted increasing window area, as shown in the large amount of glass that characterizes the facade. The building conforms to Sullivan's 3-part composition of base, "column" and top. However, it is quite plain, with only the restrained metal cornice, rustication at corners, and stone jack arches as decorative elements. See also RD-W122. The warehouse may possibly date from 1898, according to the Richardson "Index" (see below), with alterations occurring in 1905.

SIGNIFICANCE

HISTORY

DESCRIPTION

The warehouse was erected in c. 1905 for new headquarters of the Schick's Express and Transfer Company. Location on Front Street, several blocks east of the Chicago, Milwaukee and St. Paul Railroad Freight House, made access to transportation routes efficient. The building is currently used as a warehouse for Petersen's Department store.
