RANDALL PARK HISTORIC DISTRICT

General Character:

The Randall Park Historic District is a pleasing neighborhood of broad, tree-lined streets, large frame houses, and imposing church structures. Surveyed in long rectangular blocks with alleys, the district occupies a generally level stretch of land in Adin Randall's Village of Eau Claire City. At the heart of the district is Randall Park, a city block-size area containing the Adin Randall statue in a setting of trees, shrubs, and comfortable open spaces. From the park the district moves west and north to Fifth Avenue and Lake Street, respectively. Within these blocks are a total of seventy buildings of which fifteen are pivotal and fifty-three, contributing. The Adin Randall statue is also considered pivotal. The pivotal structures, including three church buildings, are often prominently sited at corner locations thus providing visual focal points for the district.

Two buildings are non-contributing.

The architecture in the district is predominantly late nineteenth century. Vivid Queen Anne compositions featured are: the Daniel Dulany house, 326 Fourth Avenue, RP 1L/15; the George Johnson house, 414 Broadway Street, RP 1L/21; and the C.A. Bullen house, 606 Third Avenue, RP 1L/31. Transitional and combinational designs are provided by the I.K. Kerr house, 606 Fourth Avenue, RP 1L/33, a merger of Queen Anne and Stick Style elements; and the J.P. Pinkum house, 420 Fourth Avenue, RP 1L/21, a massive clapboard sided residence incorporating Queen Anne and Second Empire features. Turn of the century revival architecture is also handsomely displayed in a four-corner arrangement of pivotal homes. Located at the intersection of Third Avenue and Lake Street are the Charles Ingram house, 617 Third Avenue, RP 2L/5; the Dr. Edmund P. Hayes house, 620 Third Avenue, RP 2L/4; the Nancy Clark house, 21½ Lake Street, RP 2L/9, and the H.C. VanHovenberg house, 310 Lake Street, RP 2L/8. The first two residences mentioned are similar Colonial Revival designs attributed to master architect, Cass Gilbert. The Nancy Clark house is an imposing Colonial/Classical Revival structure highlighted by a tetra-style portico, while the fourth building, the VanHovenberg residence, is an earlier composition inspired more by the picturesque traditions of the late nineteenth century. The contributing residences in the district include vernacular Queen Anne and Colonial Revival designs as well as Builder's Cubes and bungalows.

Complementing the residential structures are the church buildings which with their towers and spires dominate the district's skyline. The First Congregational Church, 310 Broadway Street, RP 2L/13, erected in 1919, is a significant example of twentieth century Gothic church architecture which is in harmony with the adjoining Community House (NRHP, 1974), constructed in 1914. The community house, a design of the Purcell and Elmslie firm, reflects the architects' successful
Continuation Sheet No. 2

RANDALL PARK HISTORIC DISTRICT

General Character (cont.):

experimentation with the high pitch gable roof. The Minneapolis partnership was also responsible for the church parsonage at 403 Third Avenue, which, though altered sympathetically in the mid-twentieth century, is a pivotal site. At the other end of Randall Park is the First Baptist Church, 416 Niagara Street, RP 22/14, a dignified Georgian Revival structure designed by the church's pastor, George Stair. A contributing structure in the district, the Lake Street Methodist Church, 337 Lake Street, RP 34/18, is constructed in the Gothic manner.

Significance:

The Randall Park Historic District, a distinctive grouping of residences and church buildings unified geographically by their proximity to Randall Park, is both architecturally and historically significant. Concentrated around the park, which contains the statue of Adin Randall created by the noted Wisconsin sculptress, Helen Farnsworth Mears, the irregularly shaped district features numerous distinguished examples of late nineteenth century architecture complemented by a smaller component of fine early twentieth century designs. In addition, the area is associated with Eau Claire's lumber history, being the home of several of the city's leading lumbermen.

Adin Randall, an entrepreneur and energetic town "booster", platted the land between the Chippewa River and Half Moon Lake in 1856 and named it the Village of Eau Claire City. Within the plat Randall included land for a park, named for its donor in 1876, and a cemetery. In 1858 he provided parcels for the buildings of the First Congregational Church of which he and many of the early Yankee settlers were members.

During the early years of settlement only scattered dwellings marked the landscape, but as the production of lumber increased in the later decades of the nineteenth century, a substantial neighborhood coalesced. The large lots of Randall's plat were filled with comfortable residences, many of them unpretentious, but others striking large-scale structures owned in several instances by men connected to the city's thriving lumber industry. A number of Eau Claire's most prosperous mills were located along the Chippewa River south of Half Moon Lake within a few block of the Randall Park District.

Prominent among the lumbermen who resided in the district were members of the influential Ingram family. O.H. Ingram, founder of the Empire Lumber Company established in 1861 (The predecessor of the firm was organized in 1857.) was one of the city's well-known lumber barons whose large and lavishly detailed home originally stood just north of the First Congregational Church (see district map). Although this home was demolished in the mid-twentieth century, the Ingram
Continuation Sheet No. 3

RANDALL PARK HISTORIC DISTRICT

Significance (cont.):

Presence in the district is maintained through a number of structures including the impressive Colonial Revival residences of his son, Charles, and daughter, Miriam Ingram Hayes (Charles Ingram house, 617 Third Avenue, RP 2L/5; Dr. Edmund P. Hayes house, 620 Third Avenue, RP 2L/4). Moreover, Ingram donated the Adin Randall statue (Randall Park, RP 33/22) and his wife, Cornelia, provided the construction funds for the First Congregational Church Community House (NRHP, 1974) designed by the prestigious midwest architectural firm of Purcell and Elmslie.

The statue of Adin Randall, situated almost in the center of Randall Park, an open space historically used as a community meeting place, was created by the state's most distinguished sculptress, Helen Farnsworth Mears. Mears, who studied with August Saint-Gaudens, was known to Ingram through his work on the capitol commission. The Oshkosh native was among those submitting sketches for the heroic figure proposed for the top of the capitol dome and, although she did not receive the commission (it went instead to Daniel Chester French.), Ingram was impressed with her work. He commissioned the statue in 1911 and it was completed two years later. The bronze figure mounted on a granite pedestal was formally dedicated in a ceremony on May 12, 1915. Previous to the dedication, the small park was landscaped by Charles B. Ramsdell, a landscape gardener from Minneapolis. The diagonal paths already traversing the rectangular area were curved slightly and additional shrubs and evergreens planted in "suitable arrangements" (I).

Facing the park are several of the district's pivotal properties including two of the three churches contained contained within its boundaries - the First Congregational Church and adjacent Community House (310 Broadway Street, RP 2L/13 and 1L/20) and the First Baptist Church (416 Niagara Street, RP 2L/14). The styles represented by these and the other architecturally significant structures in the district include the Georgian Revival, Colonial Revival, Queen Anne, late picturesque, and twentieth century Gothic. The historical associations, as mentioned above, were most often with lumbermen. The industry figures whose homes are within the district (in addition to the Ingram family members previously discussed) are: J.P. Pinkum, 420 Fourth Avenue, RP 1L/21; Daniel Dulany, 326 Fourth Avenue, RP 1L/15; I.K. Kerr, 606 Fourth Avenue, RP 1L/33; and C.A. Bullen, 606 Third Avenue, RP 1L/31. Sharing the district with these men and their families was a cross section of Eau Claire's business and professional community.

Boundary Justification:

The historic district, a discrete element within a large neighborhood on the city's westside, is bounded on the west by Fifth Avenue, a
Continuation Sheet No. 4

RANDALL PARK HISTORIC DISTRICT

Boundary Justification (cont.):

major thoroughfare also separating two plats; on the north by Lake Street, a similar border; on the east by homes of more recent construction; and on the south by residential structures of lesser quality and/or subjected to loss of integrity.

Boundary Description:

The Randall Park Historic District is an irregularly shaped district described as follows: Beginning at the northeast corner of the property at 244 Lake Street; then south along the east property lines of 244 Lake Street and 617 Third Avenue to the alley between Lake Street and Hudson Street; then west along the centerline of the alley to the centerline of Third Avenue; then south to the centerline of Hudson Street; then west to the centerline of Fourth Avenue; then south to the alley between Hudson Street and Broadway Street; then east along the centerline of the alley to the centerline of Third Avenue; then south to the alley between Broadway Street and Niagara Street; then east to the east property lines of 403 and 323 Third Avenue; then south to the alley between Niagara Street and Chippewa Street; then west to the centerline of Fourth Avenue; then north to the south property line of 326 Fourth Avenue; then west to the west property line of 326 Fourth Avenue; then north to the centerline of Niagara Street; then west to the west property line of 434 Niagara Street; then north to the centerline of Fifth Avenue; then west along the centerline of the alley to the centerline of Lake Street; then east along this line to the property line of 310 Lake Street; then north along this line to the north property lines of 310 and 244 Lake Street; then east along these lines to the point of beginning.

| **Architect and/or Builder:** | | **Source:** | |

**Architectural Significance**
- Represents work of a master
- Possesses high artistic values
- Represents a type, period, or method of construction
- Is a visual landmark in the area
- Other: None

**Architectural Statement:**
Steeply pitched gables with delicate bargeboards identify this picturesque residence. Sided with narrow clapboards, the two story structure is characterized by twin gables on the Fourth Street facade. Four-over-four sash windows framed with label models are beneath the gables. On the ground level a veranda supported by turned posts that are connected by a balustrade is featured. A bay window with a paired opening above distinguishes the major gable on the south facade. (OVER)

**Historical Significance**
- Assoc. with lives of significant persons
- Assoc. with significant historical events
- Assoc. with development of a locality
- Other: None

**Historical Statement:**
W.W. West built portions of this residence in the 1860's. In the 1880's S.S. Kepler, a mayor of the city and associated with the Kepler Dry Goods Company, purchased the property and remodeled it. In 1912 Mrs. Roy Mitchell became the owner. In the following years the barn at the rear of the property was dismantled and the present garage added (A).

---

### Architectural Significance

- Represents work of a master
- Possesses high artistic values
- Represents a type, period, or method of construction
- Is a visual landmark in the area
- Other: None

### Architectural Statement:

This Eau Claire Landmark is one of the few homes within the city which reflect a Greek Revival influence. The clapboard structure features a plain entablature, an approximation of the typical three-bay facade, and a classically detailed - pilasters, transom and sidelights - entrance. In addition, the bays are accented by peaked moldings. The bracketed hood over the entrance may be a later addition.

### Historical Significance

- Assoc. with lives of significant persons
- Assoc. with significant historical events
- Assoc. with development of a locality
- Other: None

### Historical Statement:

Alvah Congdon, the home's original owner, settled in Eau Claire in 1857. He farmed and was a carpenter for the Valley Lumber Company.

In 1936 Mr. and Mrs. Jack O'Brien purchased the home (A).

**City, Village or Town:** Eau Claire  
**County:** Eau Claire  

**Street Address:** 414 Broadway Street  

**Current Name & Use:** Apartments  

**Original Name & Use:** George Johnson House  

**Dates of Construction /Alteration:** 1889  

**Architect and/or Builder:**  

**Architectural Significance:**  
- Represents work of a master  
- Possesses high artistic values  
- Represents a type, period, or method of construction  
- Is a visual landmark in the area  

**Architectural Statement:**  
Designated a pivotal structure in the Randall Park Historic District, the Johnson house is an architecturally significant example of the Queen Anne style. The two and a half story building, constructed in 1889, is a massive clapboard and shingle sided composition, which has, however, lost some of its picturesque feeling with the removal of a richly decorated veranda (see photo collection at Chippewa Valley Museum).

**Sources of Information (Reference to Above):**  
- tax assessment rolls - Univ. of Wis.-Eau Claire Area Research Center.  
- 1890 Eau Claire city directory.  
Architectural Statement (continued):

Resting on a stone foundation, the residential structure is characterized by multiple shingle covered gables which "enclose" or project over upper story balconies. The use of curved surfaces in these prominent elements reflects a Shingle Style influence. On the ground level the veranda which wrapped around the east and south facades has been replaced by a small enclosed entrance porch. At the southeast corner of the building a corner window accented by a canopy and flared roof (asphalt shingles now cover this roof which was originally sided with the same wood shingles used on other parts of the building) is visible.

First Congregational Church Parsonage

### Architect and/or Builder:
Purcell & Elmslie

### Architectural Significance:
- Represents work of a master
- Possesses high artistic values
- Represents a type, period, or method of construction
- Is a visual landmark in the area
- Other: None

### Architectural Statement:
Designed by the Minneapolis architectural firm of Purcell and Elmslie, the parsonage of the First Congregational Church represents that firm's work in the area of small, inexpensive residences. The residence was altered in C.1945 (a second gable was added), but the addition is sympathetic to the form of the original structure, thus the house is a pivotal structure within the district.

**Historical Significance:**

- Assoc. with lives of significant persons
- Assoc. with significant historical events
- Assoc. with development of a locality
- Other:

**Historical Statement:**

The parsonage was erected in 1915 on lots donated by Mrs. Peter Truax (A).
Architectural Statement (continued):

(the blueprints are available at the University of Minnesota's Northwest Architectural Archives in Minneapolis) a broad gable roof reaching out over the first story characterized the stucco dwelling. As quoted in Gebhard (B), Purcell said of this house, "we produced almost a classic type, within whose form the changes of building material, surface treatment, and so on can be varied as it has always been done with the characteristic Colonial type."

In the mid twentieth century a large gable roofed addition, inset within the main gable was constructed. This alteration obscured the original entrance, but is a good solution, dictated by space requirements and lot configuration. The addition is considered compatible.

Historical Statement: Charles Ingram, the eldest child of O.H. Ingram, one of Eau Claire's prominent lumbermen, was born in Eau Claire in 1858. He held a number of positions within his father's company, the Empire Lumber Company, and was particularly responsible for maintaining a supply of good draft animals, which were vital to the logging industry. Before moving to this house which was erected in 1899, Charles resided at 328 Broadway Street. 22/28 (D)

Architectural statement (cont.):

width, is covered by a truncated hip roof. An ornamental railing trims the
deck of the roof and three hip roof dormers project from its sloping surface.
The main facade is identified by two bowed features, reminiscent of Colonial
Revival row housing. The features contain on the second floor three part
windows accented by distinct window heads. Between the bowed features is
a Palladian window and on the ground floor the main entrance which is
classically framed by a pediment and pilasters. Sidelights are also
featured. A veranda further distinguishes the facade. Supported by
Corinthian columns and piers, the veranda is embellished with both modillions
and dentils. On the north elevation where an entrance porch is located,
a polygonal two story bay provides interest. Additional details include
a round arched stained glass window and an entrance flanked by sidelights.
The porch, like the veranda, is supported by Corinthian columns and piers
and emphasized by modillions and dentils. Modillions also decorate the
residence's eave line except for the rear section which is unadorned.
Behind the home is a large carriage house highlighted by two Palladian
windows.

Note on attribution of architect: Cass Gilbert is generally believed
to have designed this residence and its counterpart across the street.
The information is contained in a tour booklet distributed by the Land-
marks Commission. At this time no additional information verifying the
architect has been found. Gilbert was practicing in nearby Minneapolis
when the house was constructed and owing to the Ingrams' prominence, it
is not unlikely that they would have requested his services.

Architectural statement (cont.):

defined by a centrally located main entrance accented by stained glass sidelights and an elliptical fanlight; a semicircular portico supported by Ionic columns and embellished with modillions that are also visible at the cornice line of the main structure; two bowed projections which flank the entrance and the window above; and three dormers. A swan's neck pediment caps the center dormer, while triangular pediments distinguish the dormers to either side. Prominent window heads accent all of the building's openings. The window above the entrance is especially enhanced by a projecting cornice supported by consoles. A third bowed projection marks the south elevation where an entrance porch is located. On the second story above the porch a Palladian-like grouping of windows is evident.

At the rear of the property is a large carriage house.

As indicated above, the design of the building is attributed to Cass Gilbert, a distinguished architect who practiced in Minneapolis from 1882 to c. 1905. See the Ingram house, 617 Third Avenue, 2L/5.

(1981 photo - 38/5)

Historical statement (cont.):

Ingram, the remaining Ingram son. In later years, Hayes discontinued his medical practice and took on additional responsibilities within the company (D).

of the frame building. Rising from the ground story and above the roof line is a square tower which highlights the composition. The three and a half story tower which contains the dwelling's front entrance is crowned by a pyramidal roof that is punctuated by gabled dormers. Also projecting from the main block is a three story corner tower (at the northeast corner) and a two story bay window capped by a cantilevered gable (at the northeast corner). Shingles appear on the gabled portions of these elements as well as on a narrow band separating the clapboard siding of the first and second floors. Attached at the south side is a one and a half story rectangular addition, covered again by a mansard roof which in this instance is interrupted by gable roofed dormers, the section has been somewhat altered through the removal of an entrance porch and the addition of a modern picture window. A veranda, an original feature, is visible on the main portion of the building. The metal cresting which originally decorated the roofs has been removed.

An early (1904) photo of the residence is available at the Chippewa Valley Museum.

Architectural Statement (continued):

is generally rectangular in plan with projecting elements on each major facade. On the Fourth Street facade which contains the main entrance, a two story bay window and cantilevered gable form a dominant component. Large machine-sawn brackets support the gable which is shingle covered as is the area separating the windows. An ornament with a semi-circular latticework design further distinguishes the gable. Similar ornaments are visible on a dormer located just to the north and on the prominent gable on the south elevation. Flanking the projecting section on the ground level are two nearly identical verandas. Embellished by spindle valances and turned posts, this element is repeated on the west elevation. On the south elevation (facing Broadway Street) a boxed bay window is featured. Sheltered by a pent roof, the bay is composed of three narrow one-over-one sash windows with small panes of stained glass above. All gabled areas are shingled while the walls of the house are covered with narrow clapboards. Corner boards outline each section of the structure.

Architectural Statement (cont.):

Ambulatory on the south elevation which faces Randall Park is punctuated by paired lancet openings. Above, the wall is marked by a clerestory containing five large stained glass windows separated by buttresses which are also evident on the ambulatory. The north elevation was originally of similar design with the exception of a one-story Sunday school building that projected from the center of the structure. In 1954 a chapel was added on this side of the church.

At the southeast corner of the church is a square tower which dominates the composition. Containing the main entrance framed within a lancet arch, the tower rises ninety feet from base to pinnacle. A belfry identified by recessed louvered openings is located in the upper portion of the tower which is also distinguished by buttresses, a parapet, and four elaborate pinnacles. Narrow rectangular openings indicate the tower's lower stages. The tower is attached to the narthex which forms the Third Avenue elevation. Highlighting this area is a five-part stained glass window contained within a lancet opening and accented by a label mold. Smooth stone mullions divide the opening which extends to the ground level where five rectangular windows are located. A number of smaller lancet windows also with label molds are additional features of this elevation.

(Note: Much of this information came from the Eau Claire Leader article (C))

(1981 photos - 22/32, 39/34)

Historical statement (cont.):

area, was invited to preach a Sunday service and, as a result, to relocate in Eau Claire and to organize a Congregation church. The church was officially established December 19, 1856.

A frame church was erected in 1857 at the corner of Barstow and Emery Streets on the east side of the Chippewa River, but in 1858 that building was left for the Presbyterian congregation which had also recently organized. Moving to the west side of the river, the Congregationalists erected a new structure on lots donated by Adin Randall. The church was dedicated in 1859 (B). As the congregation grew, a new and larger edifice was required. In 1887 a fine stone structure was completed. This building served the church until 1918 when it was destroyed by fire. The present church was dedicated in 1921. At the rear of the church is the community house (1L/20) built with funds donated by Cornelia Pierce Ingram, a prominent church member. The former pastorage (403 Third Avenue, 1L/19) is located a block south on Third Avenue.

Architectural Statement (continued):

Elmslie experimented with the simple high pitch gable roof from 1913 to 1918. Other Prairie School architects and many clients avoided such a roof because of its association with the Gothic Revival Style. The Community House, which represents the successful use of the roof by the design firm, is a fine example of Purcell and Elmslie's talents with small buildings of simple shapes.

Facing Randall Park, the Community House is a one story building with a broad gable roof. The walls are low and the eaves overhang broadly - the gable itself has a greater height than the walls. The exterior is of rock-face rusticated stone, the material of the adjacent church, interrupted on the main facade by casement windows. Other features are the slightly projecting corners, the two chimneys on the side nearer the church, and the extending roof beams with Sullivanesque ornament panels (B).

(1981 photo - 37/31)

Historical Statement (continued):

In 1918 the adjacent church was destroyed by fire and the present structure erected in 1919-1921 (C). (Note: The parsonage is located at 403 Third Avenue, IL/19.)

Architectural Statement (continued):

its present appearance by C.1890.

The two story clapboard sided residence rests on a stone foundation. Highlighting the main facade is a large shingle covered dormer containing two narrow rectangular windows. On the first floor a veranda which wraps around the southeast corner of the building is featured. Turned posts connected by balustrades and pediments indicating the main entrances characterize the veranda. A gabled projection provides the focus of the east elevation. The gable is shingled and includes an elliptical opening. On the second floor the southern third of the projection is open, forming a balcony supported by a single post. An oval window is framed by the balcony. A less prominent shingled dormer is just north of the projecting element.

Plain moldings outline all of the window openings and corner boards demark each section of the building. Unifying the composition are bracket-like modillions which ornament the eave line.

Facade Orient. 

Original Name & Use: Adin Randall Statue

Dates of Construction/Alteration 1915

Architect and/or Builder: Helen Farnsworth Mears, sculptress

Architectural Significance
- Represents work of a master
- Possesses high artistic values
- Represents a type, period, or method of construction
- Is a visual landmark in the area
- Other: None

Architectural Statement:
The statue of Adin Randall, commissioned by Eau Claire lumberman, O.H. Ingram, and designed by Wisconsin's distinguished sculptress, Helen Farnsworth Mears (1871-1916), is a pivotal site within the Randall Park Historic District.

Mounted on a granite pedestal, the bronze statue features Randall sitting on an architectural chair. The figure is in a "relaxed position, his body and slightly lowered head (OVER)

directed to the front. His coat is draped across his lap, and in his hands he holds his hat and gloves. The figure is dignified but unpretentious. This relaxed position makes him appear to be contemplating the scene before him" (B). The base is inscribed with "Adin Randall who gave this park to the city of Eau Claire, 1857". Dedicated in a formal ceremony on May 12, 1915, the statue was originally accented by a small reflecting pool.

Helen Farnsworth Mears was born in Oshkosh, Wisconsin, in 1871. At the age of nine she exhibited her first work, a bust of Apollo. Seven years later her figure, "Repentance", received special recognition from August Saint-Gardens, one of America's foremost sculptors. Following the 1893 Columbian Exposition, where her "Genius of Wisconsin" (this figure now stands in the State Capitol) was displayed, Mears moved to New York to study with Saint-Gardens, who became a major force in her artistic pursuits.

After additional work and study in Europe, Mears returned to the United States where her major works included, "The Fountain of Life" exhibited at the St. Louis Exposition in 1904, a statue of Frances E. Willard, the dynamic organizer of the Women's Christian Temperance Union, which was placed in Statuary Hall of the U.S. Capitol in 1905, busts of George Rogers Clark and William T.G. Morton, bas-reliefs of August Saint-Gardens, Edward McDowell, and her mother, Mary Mears, and the Adin Randall statue (C).

The Adin Randall statue was commissioned by O.H. Ingram in 1911. Ingram had become familiar with Mears' work through his own work on the capitol commission Mears had submitted sketches for the "heroic" figure which would surmount the dome of Wisconsin's new capitol building. Through a series of misunderstanding Mears' proposal was not selected - the commission going instead to Daniel Chester French.

Mears worked on the full-sized figure of Randall from early 1912 until the summer of 1913. It was dedicated in 1915, and less than a year later Mears died in New York. In 1923, when Helen Mears' work was formally donated to the Milwaukee Art Institute, Dudley Watson, director of the Institute, described Mears as "one of the most distinguished daughters of the State of Wisconsin and in the estimation of leading critics, one of the foremost women sculptors in history" (B,D).

Architectural Significance

- Represents work of a master
- Possesses high artistic values
- Represents a type, period, or method of construction
- Is a visual landmark in the area
- Other: None

Architectural Statement:
Visually prominent and historically associated with the district since 1868, the First Baptist Church is an architecturally significant example of the Georgian Revival Style. Facing Randall Park and located at the corner of Niagara Street and Fourth Avenue, the brick and stone structure was designed by George Stair, who was the church's pastor at the time of construction. The olive brick used on the walls was purchased from the Twin City brick company and the stone from the

- Other: None

Historical Statement:
The Baptist congregation in Eau Claire was organized in 1861. The first church structure was erected on this site in 1868. It was enlarged later in the nineteenth century and replaced by the current structure in 1912. In 1935 a fire destroyed a portion of the building, but it was rebuilt and dedicated March 8, 1936 (B).

Architectural Statement (continued):

Chippewa Falls construction company (C).

The T-shaped church is dominated by a monumental tetrastyle portico in the Ionic order. Rising above the pedimented portico is a three stage wooden steeple crowned by a tent roof. The four faces of the second stage contain six-over-six sash windows framed by a pediment and pilasters. Above, on the top stage are round headed louvred openings. (Note: The steeple replaced a low dome-like element that was part of the original structure.) On the main facade are three round arches containing semi-circular openings and paired rectangular openings. These distinctive features, which are repeated on the side elevations, are separated by small rectangular windows with shouldered moldings. The main entrance is centrally located and accented by a stone frame including cornice and modillions. Engaged pilasters, echoing the columns of the portico, further distinguish the entrance area. A modillioned cornice and a stone stringcourse "wrap" the building, while the corners are marked by quoins.

Additions, erected in 1935 and 1963, are attached to the rear (west end) of the church.
