National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in National Register Bulletin, How to Complete the National Register of Historic Places Registration Form. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional certification comments, entries, and narrative items on continuation sheets if needed (NPS Form 10-900a).

County and State

Narrative Description

(Describe the historic and current physical appearance of the property. Explain contributing and noncontributing resources if necessary. Begin with **a summary paragraph** that briefly describes the general characteristics of the property, such as its location, setting, size, and significant features.)

Summary Paragraph

This is the first of three residences that Ellwood designed for the program. A highly rational design, Case Study House #16 was built of steel, glass, and concrete. Ellwood was trained as an engineer and had a passion for using industrial materials and construction techniques in residential architecture. The interior walls are floating panels inset between steel posts. Translucent glass panels screen the house from the street. Frameless floor to ceiling glass walls in the living room merge with floors, ceilings, and a massive natural rock fireplace that extends through the glass to the covered patio. The property exhibits a high level of integrity.

Narrative Description

The one-story flat-roofed residence was built on a flat pad in the hills of Bel Air with magnificent views to the south and west. The layout and siting take into account the views and sun orientation, taking full advantage of both. Of steel frame construction, the house is 1750-square feet in size with a rectangular footprint. The dimensions of the house are 28 feet by 56 feet based on a four-foot modular rectangle. The walls were fashioned as floating screens of interchangeable panels that are recessed at their bases and separated from the ceiling by empty space or glazing.

From the street the house presents itself as a glowing, floating glass pavilion. A wall of frosted glass fronts the dwelling and encloses the interior courtyards that adjoin the bedrooms. The roofline cantilevers over exteriors of grooved fir siding. The main entrance is located just past a low brick wall, which separates the entry walkway from the carport. The roof appears to float above the carport, which sits on a concrete slab that extends to the street. Two wire-glass skylights illuminate the entryway. A second translucent glass wall at the back of the carport gives obscured views of the house and hints at the forms beyond, as well as unifying the street elevation. Interior detailing was aligned to practicality.

The interior walls and ceiling extend out onto exterior terraces, creating both a wide overhang and partitions for the exterior courtyards, further merging the inside with the outside. The large rear patio to the west reiterates the modular articulations of the house by being laid out in rectangular sections of concrete. There is an exterior fireplace made of Palo Verde stone that shares its chimney with the interior fireplace to anchor the southwest corner of the house. A second "viewing terrace" extends beyond the floor-to-ceiling glass doors of the living room along the south elevation.

The backyard area had many areas for play, and from the rear elevation you can see a low brick wall with custom designed built-in climbing bars that also act as a minimalist sculpture. This brick wall blocks the exterior yard from the service area and the interior courtyard.

The current owner, who bought the house a year after its construction, has maintained it with all of the original built-in furniture and appliances, replacing only the original sisal flooring of the interior, and covering the concrete floors of the outside terraces with a gray bisque tile that unifies the exterior and interior. In addition she has added vertical blinds inside of the sliding-glass doors, which were not

County and State

fitted with sunscreens, because additional shade was needed. With its simple planer geometry, clear structural massing and "floating planes" the house has as open spaciousness that welcomes the exterior environment and fits beautifully into the wooded hillside.

The publicly visible street facade is unaltered and the noted modifications relatively minor. As a result, the property maintains a high level of integrity of design, materials and workmanship. It is at its original location and the setting has been retained, and the property remains a single-family dwelling associated with the Case Study House Program. Because of these factors, integrity of feeling also remains high.

Statement of Significance Summary Paragraph (Provide a summary paragraph that includes level of significance and applicable criteria.)

Case Study House #16 meets Criterion A for its association with experimental modern housing in the postwar years under the auspices of John Entenza's *Arts & Architecture* magazine. The property is also significant under Criterion C because it embodies the distinctive characteristics of residential architecture associated with the Case Study House Program. In addition, CSH #16 was designed by master architect Craig Ellwood. Therefore, the property qualifies for listing under Criteria A and C at the local level of significance.

Narrative Statement of Significance (Provide at least one paragraph for each area of significance.)

Craig Ellwood, who had been a contractor and had no formal architectural training, designed this residence in 1952. It was the first of three he designed for the program. The residence was built as a display home and was ultimately sold to Muriel Norton who had just moved from New York City and had no previous experience with modern architecture. Located in the hills above Bel Air, the house orients out onto spectacular views that the dwelling's floor-to-ceiling glass walls take full advantage of. The house, with its geometric open floor plan, is a testament to indoor/outdoor open living in California. The property meets National Register Criterion A for its association with experimental modern housing in the postwar years under the auspices of John Entenza's *Arts & Architecture* magazine.

Case Study House #16 is a vital component of the Case Study House Program due to its innovative use of exposed steel structural framing and the fact that it remains in pristine as-built condition to this day. The importance of the house, its significance within the program, and the work of its architect are thoroughly discussed within the historic context argument presented in the Multiple Property submission cover document. That historic context being, "Experimental Modern residential architecture of the Case Study House Program in California: 1945-1966." The house is a key example of the property type, "Single family residences of the Case Study House Program," and the "steel-frame dwelling" subtype. In addition, the property represents the work of master architect Craig Ellwood. As a result, the property meets National Register Criterion C because it embodies the distinctive characteristics of residential architecture associated with the Case Study House Program and is the work of a master architect.

ABSTRACT/SUMMARY COMMENTS:
Case Study House No. 16 is locally significant under National Register Criteria A and C in the areas of Architecture and Social History. Built in 1953, as one of three model homes built by contractor/engineer Craig Ellwood under the Case Study House program, the residence is a fine example of mid-twentieth-century Modernist design and exemplifies the tenants of John Entenza's Arts & Architecture-sponsored design program for modest, experimental residences. The steel, glass, and concrete house utilized modern materials in innovative ways to create a dynamic residential property set upon a site with expansive views.

Subject:

Case Study House Program: 1945-1966 MPS

Los Angeles, Marin, San Diego, and Ventura Counties, California

National Register of Historic Places Nomination

Dear Ms. Shull:

Enclosed please find the Case Study House Program: 1945-1966 Multiple Property Submission consisting of the Multiple Property Documentation Form and eleven associated individual nominations to the National Register of Historic Places. On May 1, 2013 in Anaheim, California, the California State Historical Resources Commission unanimously approved the MPS and found eleven individual properties eligible for the National Register of Historic Places under Criteria A and C at the local level of significance. The enclosed disk contains the true and correct copy of the nominations for the CASE STUDY HOUSE PROGRAM: 1945-1966 MULTIPLE PROPERY SUBMISSION (including the Multiple Property Documentation Form and eleven associated individual nominations for Case Study Houses #1, #9, #10, #16, #18, #20, #21, #22, #23A, #23C, and #28) to the National Register of Historic Places.

The houses are eligible under Criterion A for their association with experimental modern housing in the postwar years under the auspices of John Entenza's *Arts & Architecture* magazine. The buildings are also significant under Criterion C because they embody the distinctive characteristics of residential architecture associated with the Case Study House Program. In many cases the properties are also associated with a master architect.

This multi-year program of experimental housing utilized a vast array of traditional and new construction methods, materials, floor plans, fixtures, finishes, furnishings, landscaping, and ways of living under the unifying banner of Modernism as interpreted by John Entenza, editor of *Arts & Architecture* magazine. Case Study houses embody the distinctive characteristics of residential architecture associated with the Modern Movement in California, and the Case Study program in particular. Whether of wood-frame or steel-frame construction, the houses share the modern qualities of flat roofs, deep overhangs, open floor plans, extensive use of glass, indoor/outdoor flow, and concrete slab foundations. The designs reject applied ornamentation or historical references.

The first eleven properties nominated at this time are:

CSH #1: 10152 Toluca Lake Avenue, Los Angeles, Los Angeles County (1948)

- CSH #9: 205 Chautaugua Boulevard, Los Angeles, Los Angeles County (1949)
- CSH #10: 711 San Rafael Avenue, Pasadena, Los Angeles County (1947)
- CSH #16: 1811 Bel Air Road, Los Angeles, Los Angeles County (1953)
- CSH #18 199 Chautauqua Boulevard, Los Angeles, Los Angeles County (1948)
- CSH #20: 219 Chautauqua Boulevard, Los Angeles, Los Angeles County (1958)
- CSH #21: 9038 Wonderland Park Ave, Los Angeles, Los Angeles County (1958)
- CSH #22: 1635 Woods Drive, Los Angeles, Los Angeles County (1960)
- CSH #23A: 2342 Rue de Anne, San Diego, San Diego County (1960)
- CSH #23C: 2329 Rue de Anne, San Diego, San Diego County (1960)
- CSH #28: 91 Inverness Road, Thousand Oaks, Ventura County (1966)

The MPS, including the MPDF and eleven associated properties, is nominated by the Los Angeles Conservancy Modern Committee.

In its role as representative of the City of Pasadena, a Certified Local Government, the Pasadena Historic Preservation Commission and City Council sent the enclosed letter of support for the Case Study House #10 nomination.

In its role as representative of the City of Los Angeles, a Certified Local Government, the Los Angeles Cultural Heritage Commission authorized Los Angeles Office of Historic Resources staff to transmit the enclosed supportive draft resolution to the Los Angeles City Council for approval of the nominations for Case Study Houses #1, #9, #16, #18,# 21, and #22.

In its role as contractor of cultural resource services for the City of Thousand Oaks, and as the Certified Local Government for this jurisdiction, the Ventura County Cultural Heritage Board approved the nomination for Case Study House #28 as indicated in the enclosed draft minutes.

In its role as representative of the City of San Diego, a Certified Local Government, the San Diego Historical Resources Board (HRB) approved the nominations for Case Study Houses #23A and #23C and submitted the enclosed HRB Reports Nos. HRB-13-017 for Case Study House #23A and HRB-13-018 for Case Study House #23C.

One letter of objection was received, from the owner of Case Study House #23A.

A letter of support was received from the Los Angeles County Historical Landmarks and Records Commission on behalf of Case Study House #20, located in a non-CLG and unincorporated community of Los Angeles County.

If you have any questions regarding this nomination, please contact Amy Crain of my staff at (916) 445-7009.

Sincerely

Carol Roland-Nawi, Ph.D.

State Historic Preservation Officer

Enclosures

The Case Study House Program: 1945-1966 MPS Los Angeles, Marin, San Diego, Ventura Counties Staff Report

The National Park Service (NPS) introduced the Multiple Property Submission (MPS) in 1984. The purpose of the MPS is to document as a group for listing in the National Register of Historic Places (National Register) properties related by theme, general geographical area, and period of time. It may cover any geographical scale – local, regional, state, or national. It is used to register thematically-related properties simultaneously and establishes the registration criteria for properties that may be nominated in the future.

Technically the MPS acts as a cover document and is not a nomination in its own right. It is a combination of the **Multiple Property Documentation Form** (MPDF) and the **Individual Registration Form**. Information common to the group of properties is presented on the Multiple Property Documentation Form, and the Individual Registration Form is specific to the nominated individual building, site, district, structure, or object. Once an MPS is listed, additional associated property nominations may be submitted to the Commission at any time.

The Case Study House Program: 1945-1966 MPS has a single associated historic context: Experimental modern residential architecture of the Case Study House Program in California: 1945-1966. The associated property type "Single family residences of the Case Study House Program" is comprised of two subtypes: woodframe dwellings and steel-frame dwellings. The geographic area of the MPDF includes Los Angeles, Marin, San Diego, and Ventura Counties.

This multi-year program of experimental housing utilized a vast array of traditional and new construction methods, materials, floor plans, fixtures, finishes, furnishings, landscaping, and ways of living under the unifying banner of Modernism as interpreted by John Entenza, editor of *Arts* + *Architecture* magazine. Case Study houses embody the distinctive characteristics of residential architecture associated with the Modern Movement in California, and the Case Study program in particular. Whether of woodframe or steel-frame construction, the houses share the modern qualities of flat roofs, deep overhangs, open floor plans, extensive use of glass, indoor/outdoor flow, and concrete slab foundations. The designs reject applied ornamentation or historical references.

Associated properties nominated at this time are:

- CSH #1: 10152 Toluca Lake Avenue, Los Angeles, Los Angeles County (1948)
- CSH #9: 205 Chautaugua Boulevard, Los Angeles, Los Angeles County (1949)
- CSH #10: 711 San Rafael Avenue, Pasadena, Los Angeles County (1947)
- CSH #16: 1811 Bel Air Road, Los Angeles, Los Angeles County (1953)
- CSH #18 199 Chautaugua Boulevard, Los Angeles, Los Angeles County (1948)
- CSH #20: 219 Chautaugua Boulevard, Los Angeles, Los Angeles County (1958)

- CSH #21: 9038 Wonderland Park Ave, Los Angeles, Los Angeles County (1958)
- CSH #22: 1635 Woods Drive, Los Angeles, Los Angeles County (1960)
- CSH #23A: 2342 Rue de Anne, San Diego, San Diego County (1960)
- CSH #23C: 2329 Rue de Anne, San Diego, San Diego County (1960)
- CSH #28: 91 Inverness Road, Thousand Oaks, Ventura County (1966)

See **A note on chronology** on Continuation Sheet E-15 for an explanation of the unusual and inconsistent numbering system.

For the first four years of the Case Study House program, 1945-1948, all of the houses designed and built were of wood-frame construction. From 1949 and through the 1950s, wood-frame construction appeared sporadically with steel-frame construction predominating. Finally, in the 1960s, there was a fairly even mix of wood-frame and steel-frame buildings.

Starting with the Eames House (CSH #9) built in 1949, the steel-frame became the signature construction method that seemed to define the Case Study House program. The architects using steel were experimenting in the application of an industrial material, steel, to residential design. While the goal to create a prototypical, replicable house that could be mass-produced at minimal cost was generally not attained, the steel-frame Case Study houses had a profound effect on the profession of architecture and in establishing the look of mid-century Modernism as seen by a wide audience.

To qualify for listing individually under Criterion A, a building must be one of the single family residences constructed under the auspices of The Case Study House Program, 1945-1966, as published in *Arts & Architecture* magazine. To qualify for listing individually under Criteria A and C, a residence must maintain enough physical integrity to be readily identifiable as a contributor to the program. To meet physical integrity requirements, the residence must possess a preponderance of original character-defining exterior features as documented by historic photographs and/or detailed plans when available. Original construction material should be evident or have been replaced in-kind in a manner consistent with the original design and materials. Character-defining features include original exterior sheathing, overhangs, roof slope, foundation, doors, and windows. Doors and windows should be original on the exposures visible from the public right of way, or if replaced or altered, should be compatible with the original design and materials.

The first eleven properties nominated under this MPS are as follows:

Case Study House #1 is located on a sloping site in the Toluca Lake District of Los Angeles. Two thousand square feet in size, the dwelling contains architectural elements that would feature prominently in future Case Study houses including floor-to-ceiling glass, a flat roof, open floor plan, easy access to the outdoors, and standardized materials such as concrete block, plywood panels, and industrial glass. It was designed by Julius Ralph Davidson, one of the European émigrés who jump-started California's modern architecture movement. The house was built over a three-year period starting in

1945. It was completed in 1948 and was the first dwelling constructed under the auspices of The Case Study House Program.

Case Study House #9 is approximately 1600 square feet in size with the largest portion of the interior devoted to an oversized bi-level living area originally overlooking the meadow-like grounds and the Pacific Ocean. Designed by master architects Charles Eames and Eero Saarinen for *Arts & Architecture* publisher/editor John Entenza, the house was the first steel framed project to be built in the Case Study Program. It was soon followed by Case Study House #8, the Eames house, sited on the adjacent lot. Both were built as part of a compound of five significant modern buildings off of Chautauqua Boulevard, four of which are Case Study Houses. These houses are on contiguous lots, and all five form a tightly knit grouping. Four of the five homes share a common narrow driveway. Despite a modification in the 1990s to accommodate a much larger residence on the ocean side of the property, CSH #9 continues to maintain enough physical integrity to be readily identifiable as a contributor to the program.

Case Study House #10 was built on a sloping corner lot in the San Rafael Hills neighborhood of Pasadena. The angle of the lot descending from the street inspired the house's three-level plan. The house is primarily of wood post and beam construction, set upon a single concrete slab and featuring extensive use of large walls of glass. A father and son team of architects, Kemper Nomland and Kemper Nomland Jr., designed the house for use by the architects' own family. The house was not sponsored by the Case Study House program from the design phase, as were others in the program. It was added after completion in 1947 due to delays in the construction of other houses in the program and because the house exemplified a number of program goals, including the use of new building materials and techniques, affordability for the average American, simplicity of construction, economy of materials, and integration of indoor and outdoor living. The house was also chosen for inclusion due to the harmony of the structure with the landscaping and topography of the site.

Case Study House #16 was designed as a display home by Craig Ellwood, a contractor with no formal architectural training. Trained as an engineer, Ellwood had a passion for using industrial materials and construction techniques in residential architecture. The interior walls are floating panels inset between steel posts.

Translucent glass panels screen the house from the street. Frameless floor to ceiling glass walls in the living room merge with floors, ceilings, and a massive natural rock fireplace that extends through the glass to the covered patio. The one-story flat-roofed residence was built on a flat pad in the hills of Bel Air with magnificent views to the south and west. The layout and siting take into account the views and sun orientation, taking full advantage of both. Completed in 1953, this is the first of three residences that Ellwood designed for the program. They were given the numbers 16, 17, and 18 originally assigned to the 1940s houses designed by Rodney Walker.

Case Study House #18 is a one-story, flat-roofed residence built by Rodney Walker in 1948, on a high one-half acre meadow with an ocean view and within walking distance to the Pacific Ocean. It was sited adjacent to parcels of land that would soon become

the sites for the Case Study Houses #8, #9, and #20. Walker positioned wood framing at three-foot intervals, citing the inherent strength, absence of waste, construction speed, and symmetry as advantages of such a module system. The most unique interior feature is a large floor-to-ceiling brick fireplace faced with copper that dominates the living room and around which the roof is raised to eleven feet to accommodate clerestory windows. The fireplace is double sided with one side facing the living room and the other facing the garden room. A number of the glass walls are sliding panels opening to outdoor terraces.

Case Study House #20 represents a departure from other Case Study houses of the late 1950s in that it was constructed of wood rather than steel and employs the use of prefabricated plywood barrel vaults. Completed in 1958, the house was designed by master architects Conrad Buff III, Calvin C. Straub, and Donald C. Hensman of the architectural firm Buff, Straub and Hensman. The location of the house in an unincorporated area of Los Angeles County and the design preferences of the owners, industrial and graphic designer Saul Bass and his wife, biochemist Dr. Ruth Bass, resulted in the introduction of sculptural forms in the residence. The 1958 Bass House replaced the 1948 Bailey House built by Richard Neutra as Case Study House #20.

Case Study House #21 was Pierre Koenig's first Case Study house and an experiment in on-site assembly and the careful detailing of the steel frame. The use of steel allowed the architect to open up the floor plan and take advantage of wide expanses of floor to ceiling plate glass. This highly rational design employs no overhangs, relying on screens over the glass walls to reduce sunlight and heat. The small, square house has a central utility core of kitchen and bathrooms that divide the public and private areas. The infill walls of the steel frame are glass or gypsum with a ceiling of corrugated steel. The house was built in 1958 and restored by the architect in the 1990s.

Case Study House #22 is perhaps the most iconic and recognizable house constructed in the Case Study House program. Completed by Pierre Koenig in 1960, the L-shaped house consists almost entirely of steel and glass set on a concrete pad, with a rectangular swimming pool occupying the space within the L. Twenty foot wide modules allow for large expanses of glass to face the swimming pool. Situated atop a promontory overlooking Los Angeles, the living room cantilevers over a dramatic precipice. The two bedrooms occupy one wing of the house with the master bathroom tucked into the inside corner of the L behind the kitchen. The kitchen, dining room, and living room are surrounded by glass with the appliances "floating" on steel legs and a freestanding fireplace centering the living room. Deep overhangs shelter the interiors from the harshest sunlight.

Case Study House #23A is one of three adjacent single-family residences of the Triad grouping that were intended to be the pilot project for a large tract of houses in La Jolla. Only this Triad was ever built. The houses are designed in relation to one another, and each differs in floor plan, landscaping, and treatment of exterior sheathing. Common materials employed include wood framing, concrete slab foundations, infill panel walls, and identical cabinetry, kitchen appliances, and fixtures. All three were designed by the

architectural firm of Edward Killingsworth, Jules Brady, and Waugh Smith. House A, the largest of the three houses, is the house located by itself on the north side of the road; it is on the downslope side of the road and is located three feet below the street.

Case Study House #23C is the simplest of the three houses; its plan is a rectangle bisected by the entry hall. On the north end of the house, oriented toward the views, are the living room (now used as a dining room) and master bedroom suite. Houses B and C share a driveway on the south side of the road. As does House A, House C takes advantage of opportunities for outdoor living. Almost every room has direct access to the outdoors.

Case Study House #28 was designed by Conrad Buff and Donald Hensman of the architectural firm Buff and Hensman. This one-story, flat-roofed residence was built in 1966 on a knoll overlooking the Conejo Development of the Janss Development Corporation 40 miles north of Los Angeles in Thousand Oaks. The architects were asked by Janss and Pacific Clay Products to design a house that used face brick as a structural material to demonstrate its advantages. A steel frame was incorporated in the design to supplement the brick. CSH #28 was the last single-family house built under the auspices of the Case Study program and among the largest at 5000 square feet.

CSH #28 meets Criteria Consideration G because it is a contributor to the Case Study House Program that has been the subject of comprehensive scholarly research both at the time the program was in existence and in more recent decades. Much of the program's reassessment stems from the 1989-90 exhibition and catalogue titled "Blueprints for Modern Living: History and Legacy of the Case Study houses" organized by the Los Angeles Museum of Contemporary Art and curated by Elizabeth A.T. Smith. Ms. Smith's subsequent book published in 2002 by Taschen further elaborates on the program and its enduring legacy.

The MPS, including the MPDF and eleven associated properties, is nominated by the Los Angeles Conservancy Modern Committee.

In its role as representative of the City of Pasadena, a Certified Local Government, the Pasadena Historic Preservation Commission reviewed and approved the nomination for Case Study House #10 at its March 18, 2013 meeting.

In its role as representative of the City of Los Angeles, a Certified Local Government, the Los Angeles Cultural Heritage Commission reviewed and approved the nominations for Case Study Houses #1, #9, #16, #18,# 21, and #22 at its April 4, 2013 meeting.

In its role as contractor of cultural resource services for the City of Thousand Oaks, and as the Certified Local Government for this jurisdiction, the Ventura County Cultural Heritage Board reviewed and approved the nomination for Case Study House #28 at its April 8, 2013 meeting.

In its role as representative of the City of San Diego, a Certified Local Government, the San Diego Historical Resources Board reviewed and approved the nominations for Case Study Houses #23A and #23C at its April 25, 2013 meeting.

One letter of objection was received, from the owner of Case Study House #23A.

One letter of support was received, from the Los Angeles County Historical Landmarks and Records Commission, on behalf of Case Study House #20.

Staff supports the Multiple Property Submission, consisting of the Multiple Property Documentation Form and eleven associated nominations, as written and recommends the State Historical Resources Commission approve The Case Study House Program: 1945-1966 MPDF, and determine that Case Study Houses #1, #9, #10, #16, #18, #20, #21, #22, #23A, #23C, and #28 meet National Register Criteria A and C at the local level of significance, and that Case Study House #28 satisfies Criteria Consideration G. Staff recommends the State Historic Preservation Officer approve the nominations for forwarding to the National Park Service.

INFORMATION www.planning.lacity.org

WHEREAS, any official position of the City of Los Angeles with respect to legislation, regulations or policies proposed to or pending before a local, state or federal governmental body or agency must have first been adopted in the form of a Resolution by the City Council with the concurrence of the Mayor; and

WHEREAS, the City of Los Angeles through the Cultural Heritage Commission and its duties as a Certified Local Government reviewed the National Register of Historic Places nominations for Case Study Houses #1, #9, #16, #18, #21, and #22 at a public hearing on April 4, 2013; and

WHEREAS, the City of Los Angeles deems that the applicants submitted complete applications and followed proper notification procedures for National Register of Historic Places nominations; and

WHEREAS, the City of Los Angeles believes that the applications thoroughly provide exhaustive architectural descriptions, and statements of significance; and

WHEREAS, the City of Los Angeles has previously declared several Case Study Homes as Historic-Cultural Monuments;

NOW THEREFORE, BE IT RESOLVED, with the concurrence of the Mayor, that by adoption of this Resolution, the City of Los Angeles **SUPPORTS** the proposed listing of Case Study Houses #1, #9, #16, #18, #21, and #22 to the National Register of Historic Places.
