DESCRIBE THE PRESENT AND ORIGINAL (II known) PHYSICAL APPEARANCE

The property consists of 219 acres of high quality farmland. Several historic buildings remain standing. The most impressive is the <u>original log cabin built</u> in 1875. It was constructed of cottonwood logs from the Yakima River Canyon and is currently furnished with articles used in pioneer days by the Olmstead family and is open to the public.

It is generally in a good state of repair, but does need a new roof; at present a protection roof entirely covers the cabin structure and distracts from historic setting.

Other historic buildings include the dairy barn and granary both built in 1892; the wagon shed, built in 1894; the red barn for storing hay, built in 1908 and the Olmstead family house built in 1908 and currently occupied by the Smith sisters, granddaughters of Samuel Bedient Olmstead who homesteaded Olmstead Place. These buildings are in from fair to good condition and require some restoration.

The location of Interstate 90 adjoining the South boundary of the property is the only distraction from the historical setting. The land has been used for farming since it was homesteaded.

Washington. It wa a descendant of a	as homesteaded in I founder of Hartford,	pioneers agriculture L875 by Samuel Be Connecticut. Tuenced by the prese	dient Olmstead,

The original homestead cabin is an outstanding example of squared timber construction of the period and is furnished with many items originating from the homestead period.

During the Nez Perce uprising of 1877-78, the cabin was used for mutual protection of the Olmsteads and their neighbors.

Olmstead Place is being developed by the Washington State Parks and Recreation Commission to interpret the story of agriculture in the State of Washington.
