DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

v

The Algoma Boulevard Methodist Church is a compact, sturdy building in the tradition established by the late buildings of Henry Hobson Richardson. It has wide, ample proportions and a simplified shape like the last of the Richardson libraries, for instance, the Crane Memorial Library of 1883. It is constructed of well-cut local stone left--as was the stone of the Allegheny County Courthouse and jail by Richardson--purposely rough for effect. The simplified profile of the Algoma Boulevard Methodist Church is broken in places by small stone turrets with shingle roofs, a stone chimney, and a square, stone bell-tower with a low-pitched, shingle roof. The flat, stone ends of the building protrude slightly above the roof line to give a screen-like effect. A slightly-flattened.apsidal bay is visible at one end, and at the transport ends windows are massed-a set of three very large arched windows above four smaller rectangular ones. The church is overgrown with ivy and stands on a wooded site.

TATEMENT OF SIGNIFICANCE

The Algoma Boulevard Methodist Church demonstrates a fine use of the Romanesque vocabulary established by Henry Hobson Richardson in his later, less picturesque works. It is also a good example of the work of the important Wisconsin architect, William Waters. Waters, who was born and educated in New York State, was a resident of Oshkosh for over fifty years and contributed much to its architectural appearance. He designed a variety of types of buildings in Oshkosh and elsewhere in Wisconsin including churches, high schools, hotels, and the Oshkosh Opera House (which is already on the National Register.) He is best known as the designer of the Wisconsin Building at the World's Columbian Exposition of 1893. The Algoma Boulevard Church was designed by Waters in 1890 for a Methodist congregation which had been founded in Oshkosh in 1870 as an offshoot of the First Methodist Church there.
