a three-story masonry structure of symmetrical massing. Measuring in by 125 feet in depth, the floor plan has been divided, since its sections of approximately equal volume. The front portion is divided into sections of various sizes; the rear portion is a theater. On the exterior, were employed. Instead, paired windows and colossal-order pilasters create a stark, structural effect. Bands of contrasting masonry above accentuate the horizontal thrust.

SINCE Since its completion in 1905, the Elks Building has been a possession of the community of Prescott. As a commercial structure, the building
