National Register of Historic Places Registration Form

NATIONAL REGISTER

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in Guidelines for Completing National Register Forms (National Register Bulletin 16). Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries.

1. Name of Property

historic name
other names/site number Wards I and III of the Cambridge Historic District D-699

2. Location

street & number bounded by Glasgow, Glenburn, Poplar, Race, Gay streets and N/A not for publication
city, town Cambridge the Choptank River N/A vicinity
state Maryland code MD county Dorchester code 019 zip code 21613

3. Classification

Ownership of Property: [X] private, [X] public-local, [ ] public-State, [ ] public-Federal
Category of Property: [ ] building(s), [X] district, [ ] site, [ ] structure, [ ] object
Number of Resources within Property: Contributing (672), Noncontributing (42 buildings, 2 sites, 0 structures, 1 objects, 42 Total)

Name of related multiple property listing: N/A
Number of contributing resources previously listed in the National Register: 4

4. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1966, as amended, I hereby certify that this [X] nomination [ ] request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property [X] meets [ ] does not meet the National Register criteria. [ ] See continuation sheet.
Signature of certifying official: [Signature] Date: 7/30/90
STATE HISTORIC PRESERVATION OFFICER
State or Federal agency and bureau

In my opinion, the property [ ] meets [ ] does not meet the National Register criteria. [ ] See continuation sheet.
Signature of commenting or other official
Date
State or Federal agency and bureau

5. National Park Service Certification

I, hereby, certify that this property is:
[X] entered in the National Register. Entered in the National Register
[ ] See continuation sheet.
[ ] determined eligible for the National Register. [ ] See continuation sheet.
[ ] determined not eligible for the National Register.
[ ] removed from the National Register.
[ ] other, (explain:)
Signature of the Keeper: [Signature] Date of Action: 9/5/90

DESCRIPTION SUMMARY:

Wards I and III of the Cambridge Historic District is a large residential, commercial and governmental area in the northwest section of the city. Roughly bounded by the Choptank River on the north, Gay and Race streets on the east, Glasgow Street on the south and Glenburn Avenue on the west, the district consists of buildings from the late 18th through the mid 20th century, forming a rich architectural blend of styles and functions. Major architectural styles represented in the residential buildings are the Georgian, Queen Anne, Colonial Revival and American Foursquare. Much of the western part of the district is characterized by rows of modest adaptations from the Gothic Revival, Queen Anne and Colonial Revival styles. Nearly all buildings are of frame or brick construction. Other significant architectural elements include small neighborhood shops, schools and churches which convey cohesiveness of the district. There are also many intact period outbuildings remaining which are to be considered contributing elements of this district. The percentage of intrusive elements is small and widely scattered. Buildings in the district are generally in good condition.

Cambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699

Section number 7 Page 7.1

---

GENERAL DESCRIPTION:

Cambridge, a city of 11,703 (1980) is the county seat of Dorchester County in the heart of Maryland's eastern shore. Located on the south shore of the Choptank River, Cambridge has always derived its livelihood from the surrounding waterways. Cambridge was laid out in 1684, making it among the oldest towns in the state.

Wards I and III form a significant and distinguishable entity within a larger Cambridge Historic District. The Maryland State Historic Preservation Officer believes that the Wards I and III section of this larger district is eligible for listing in the National Register.

Although Cambridge was established during the last quarter of the 17th century and there was a concentration of buildings there certainly by the beginning of the 18th century, none of those initial buildings remains today. The historic district's appearance is one that was taken on generally during the second half of the 19th century and the first three decades of the 20th century during the time that the town achieved great prosperity and growth. Exceptions to this characterization are a cluster of 18th and early 19th century buildings remaining along the 100 and 200 blocks of High Street.

X see continuation sheet No. 7.2

United States Department of the Interior  
National Park ServiceNational Register of Historic Places  
Continuation SheetCambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699Section number 7 Page 7.2

The town is laid out in a grid pattern on level land with streets paralleling the Choptank River and crossing streets running south from the river. On High, Mill, Oakley, Glenburn and Locust Streets, lots are large with buildings set well back from the street with landscaped grounds. On the other streets, building lines are set closer to the sidewalks. The 300 block of High, Gay, Poplar and Race Streets are urban in character with concentration of attached or closely placed commercial buildings. High Street is brick paved and in some places old brick sidewalks remain.

Resource types include houses, churches, schools, commercial structures and governmental buildings. The oldest houses reflect tidewater colonial traditions and the Georgian style and include such elements as story and a half construction with dormers and end chimneys and symmetrical facades. Georgian examples have such features as symmetry and robust detailing such as water tables, contrasting jack arches with projecting keystones and dominant cornice detailing. A few buildings display the more serene and delicate exterior of the Federal style or the angular and scholarly Greek Revival. By far, however, the most prevalent among the residential architecture is from the variety of styles and their vernacular representations of the mid-late 19th century and early 20th century periods. Most of the area west of High Street was developed during the late 19th and early 20th centuries in a mix of mansions of the wealthy alternating with streets of modest look-alike houses in three or four vernacular Victorian types.

Of the high style Victorian examples, the Queen Anne was the most frequent choice with excellent examples found on Locust, Oakley and Mill Streets. The High Victorian Gothic styles was selected for two 1880s churches in the district and was also used as a design source for later 20th century church buildings in the district.

During the early 20th century, Colonial Revival was the most favored architectural style with examples prevalent on Mill, High and Oakley Streets.

National Park ServiceNational Register of Historic Places  
Continuation SheetCambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699Section number 7 Page 7.3

In contrast with early buildings and turn of the century mansions are streets lined with rows of frame vernacular houses of the 1900-1930 period. These are developer-built housing constructed to satisfy the need generated by the rapid growth which occurred at the turn of the century due to development and expansion of the packing, canning and shipping industries. These structures are of four basic types and their repetition along Vue De L'eau, Choptank, West End and Willis Streets form rhythmic patterns which are a distinct and significant feature of the district. The four basic types may be generally characterized as follows: 1) Two story L-shaped frame houses with a forward projecting gabled section which may or may not terminate with a semi-hexagonal bay. 2) Small two or three bay, two story houses with central cross gables which are either plain or embellished with decorative shingles. These houses may have extensions at the rear. 3) Two story, two or three bay gable fronted houses which may or may not have gable ornamentation such as pent roofs, decorative shingles or Palladian windows. These, too, might have extending wings at the rear. 4) Two or three bay, two story Foursquare houses with hipped roofs and dormers. All varieties had one story front or wrap-around porches which are a significant part of the district's visual identity.

Later in the 20th century, and found in the western portions of the district on Belvedere and upper Glasgow Streets and scattered as infill in the older sections are one story cottages usually with three bays and dormers and frequently set gable to the street. Most of these houses date from the 1930s and 1940s.

Bridging the span between these types are 1920s and 1930s bungalows which may be found scattered through the district, but are prominent in the upper portions.

In general, the buildings are well maintained although there has been some loss of historic fabric through replacement of original sidings with vinyl or aluminum and removal of porches and gable ornamentation. Buildings and other property over 50 years old and maintaining a reasonable degree of historic character or integrity are considered to be contributing to the cohesiveness of the district. Those that are more recent or have

been altered beyond recognition are shown as non-contributing. Outbuildings, dated from the period of significance of the district are considered to be contributing elements. The following inventory has been labeled with the Maryland Historical Trust Coding System.

The following inventory lists all principal buildings in the district. Properties with address followed by a number (D-000) in parenthesis are listed in the Maryland Inventory of Historic Properties (Dorchester County) and described in the book Between the Nanticoke and the Choptank. Some information about these buildings in this inventory has been taken from that publication. Each property is identified as to contributing or non-contributing to the significance of the historic district. The letter following the contributive note refers to a contributive value. This value is explained in the legend of the Resource Sketch Map which accompanys this document.

Continuation Sheets 7.6 thru 7.95 are the resource by resource inventory.

Race Street

400 Block

16. 400-402 Race Street (D-383). Three story, three bay brick commercial building with a low-pitched hipped roof, similar in appearance to 501-505 Poplar Street on the opposite corner (D-363). It has a pronounced cornice with modillions. The first story has been altered. Ca. 1920. Contributing building. B.
17. 404-406 Race Street. Two story, four bay brick commercial building with corbeled brick trim. Ca. 1920. Contributing building. B.
18. 408-412 Race Street. Two story brick commercial building with three-part upper story windows, and corbeled trim. Ca. 1920. Contributing building. B.
19. 414 Race Street. Two story, four bay brick commercial building with corbeled brick trim. Ca. 1920. Contributing building. B.
20. 416-418 Race Street. Modern commercial building. Non-contributing building. E.
21. 420-422 Race Street. Two story, nine bay brick building with a massive metal cornice and segmentally arched second story windows. Art Moderne F.W. Woolworth sign panel across front. Facade bricks are a buff brick veneer. East four bays appear added. Ca. 1910. Contributing building. B.
22. 424-426 Race Street (D-356). Two story, three bay frame Gothic vernacular office building. It remains in nearly original condition above the first floor. Notable elements are the window trim with segmentally arched tops and a Gothic-arched window in the gable. Ca. 1890. Contributing building. B.

23. 428-430-432 Race Street (D-367). Two story, five bay brick commercial building with second story windows topped with segmental arches. Recessed panels in the brick facade embellish the area between the tops of the windows and the large cornice. Another cornice separates the first floor storefront area from the second story. Ca. 1900. Contributing building. B.
24. 434-436 Race Street. Modern commercial building. Non-contributing building. E.
25. 438-440 Race Street (D-386). Two story, three bay brick commercial building with a pressed metal or cast iron cornice. The front has been covered with smooth stucco. Ca. 1900. Contributing building. B.
26. 442 Race Street. Modern commercial building. Non-contributing building. E.
27. 444-446 Race Street (D-385). Three story, nine bay commercial building of contrasting red and tan bricks. It has a dominant pressed metal or cast iron cornice typical of late 19th century commercial buildings combined with Neo-classical detailing executed in red brick against the light tan brick of the walls. These Neo-classical elements include oval brick-bordered windows at the third story level, vertical corbeled brick "quoins," horizontal banding and brick corbeling beneath the cornice suggesting "modillions." The first story storefronts have been altered. Transitional Victorian and Neo-classical Revival. Attributed to local architect J. Benjamin Brown. Contributing building. B.

United States Department of the Interior  
National Park ServiceNational Register of Historic Places  
Continuation SheetCambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699Section number 7 Page 7.9

28. 450-452 Race Street (D-370). Three story, four bay brick commercial building similar in character to its neighbor, 444-448, and also attributed to local architect, J. Benjamin Brown. This building utilizes contrasting red and tan brick, opposite to its neighbor. The trim, in light brick includes Neo-classical detailing such as quoins, segmental arches and horizontal banding. The cornice of pressed or cast metal has modillions and is accented with brackets topped with finials. Header corbeling beneath the cornice suggests dentils. Ca. 1900. Contributing building. B.
29. 407 Race Street. Recent facade over an earlier commercial building. Contributing building. B.
30. 409-411 Race Street. Modern commercial building. Non-contributing building. E.
31. 413-419 Race Street. Two story, five bay commercial building with corbeled cornice and recessed window bays with segmentally arched tops. Buff brick facade veneer. Modern first story. Contributing building. B.
32. 421-423-425 Race Street. Modern two story commercial building. Non-contributing building. E.
33. 427-433 Race Street (D-387). Three story, two bay brick commercial building with a central arched crest with the date 1911. Above the altered storefronts is a brick corbel which forms the base for two story high window bays. The bays are outlined with brick corbeling and each is flanked by pairs of vertically aligned narrow sash windows. The cornice is accented by plain modillions. Contributing building. B.
34. 435-441 Race Street. Masonic Temple. Modern metal facade over original brick and cast iron front. Some parts of the original first story are still visible and all are said to remain beneath the applied metal work. Ca. 1890. Contributing building. B.

73. 112 High Street (D-192). Two story, four bay brick foursquare house with late Queen Anne and Colonial Revival style details. It has a semi-hexagonal projecting bay and a wraparound porch with a Colonial Revival projecting pedimented entrance pavillion. Survey documentation in Between the Nanticoke and the Choptank suggests that the present appearance may conceal 18th or 19th century construction. Ca. 1900. Contributing building. B.
74. 114 High Street (D-418). Two story frame L-shaped house with a projecting frontal gable embellished with a gothic-arched window. A one story, hip roofed Colonial Revival porch extends across the front. Ca. 1878. Contributing building. B.
75. 116 High Street (D-190) "Maynadier House." Two story, three bay Greek Revival style frame house. According to survey data in Between the Nanticoke and the Choptank, the rear wing of the house was built after 1759 by the Rev. Daniel Maynadier, rector of the Great Choptank parish from 1765 to 1772. The original main block was moved in 1840 to the 400 block of High Street where it is now used by the Cambridge Women's Club. It is individually listed in the National Register. A new house was built about 1840 and attached to the 18th century rear wing. Ca. 1840. There is also a one story, two bay frame gable roofed office. Two contributing buildings. B.
76. 118 High Street (D-137) "The Leonard House." Two story, three bay gable fronted house embellished with jerkinhead roofs on the gables and decorative barge trim. Survey data in Between the Nanticoke and the Choptank states that this building is part of an 18th century structure which was split and a portion moved to this site in 1906. From 1896 it was the home of Ivy Leonard who established an oyster packing operation on Cambridge Creek, behind the house. Contributing building. B.

77. 120 High Street (D-369). Two story, four bay frame house with a central cross gable embellished with a pointed window. According to survey information in Between the Nanticoke and the Choptank, it is part of an 18th century building which has been split and separated into two buildings, 118 and 120 High Street. It served as a hotel operated as the "Leonard House" by Captain James C. Leonard. This portion of the building is on the original site. Ca. 1906 (rebuilt). Contributing building. B.
78. 101 High Street (D-415). Two story, two bay L-shaped frame house with a projecting frontal gable. It is said to contain parts of a 1796 house. Its present exterior appearance shows evidence of late 19th or early 20th century work. Contributing building. B.
79. 103 High Street (D-416). Two and a half story, three bay frame Second Empire style house with a mansard roof and projecting central bay. Many front windows are double and all have peaked architraves. Built 1884. Contributing building. B.
80. 107 High Street (D-191). Two story, three bay brick house with a two story one bay frame extension. It is a plain but formal structure showing the transition between the Federal and Greek Revival styles. It was built in 1850 as the parsonage for the Great Choptank Parish. Contributing building. B.
81. 111 High Street (D-153). Two story, three bay Greek Revival style house featuring corbeled brick panels between the first and second story windows and pronounced window and door lintels. It was renovated in the 1880s with the addition of an elaborate Second Empire style porch with a crested mansard roof, a cross gable, dormers and arched gable windows. Ca. 1840. Contributing building. B.
82. 113 High Street (D-417). Two story L-shaped frame house with a frontal projecting gable embellished with a semi-hexagonal bay. Other features are gabled dormers, a pointed window in the projecting gable and shingled siding. Ca. 1877. Contributing building. B.

83. 115 High Street (D-419). Two story L-shaped house with a frontal projecting gabled section, embellished with a semi-hexagonal bay. Window architraves have arched tops. A Colonial Revival Palladian dormer and porch with an entrance pediment have been added to the house. Ca. 1882. Contributing building. B.
84. 117 High Street (D-420). Two and a half story frame house with transitional Queen Anne and Colonial Revival elements. Bracketed eaves, projecting semi-hexagonal bays and gables are Queen Anne style features while the square hipped roof, widow's walk, Palladian dormer and pedimented porch are Colonial Revival elements. Ca. 1898. Contributing building. B.

200 Block, High Street

85. 200 High Street (D-12). Individually listed in the National Register. "Goldsborough House." Two story, five bay brick Georgian/Federal transitional style house, embellished with pronounced jack arches with projecting keystones. There is a molded brick water table and arched fan light over the entrance. The entrance porch dates from the Colonial Revival period. Built for Maryland Governor Charles Goldsborough and remained in the family until 1919. Also used as the first home of the Cambridge Yacht Club with the club's boathouse at the rear of the lot. Boxwood gardens of the 19th century. Ca. 1790. Pivotal building and Contributing Outbuilding. A.
86. 202 High Street (D-423). Two story, two bay frame house and office which was rebuilt and expanded around 1919 by prominent local architect J. Benjamin Brown for his office and residence. It is a hip roofed rectangular structure with multiple projecting bays and hip roofed dormers. Part of the structure dates from 1848, although its appearance is now characteristic of the early 20th century. Contributing building. B.

87. 204 High Street (D-188). Two story, three bay Georgian/Federal transitional style brick townhouse with a side-hall front entrance forming the "half Georgian" configuration. Georgian elements include the pronounced jack arches, of stone, with projecting keystones, a Palladian-inspired gable window and an overall massive quality. A gable dormer with a double window and the square-columned entrance porch appear to be 20th century additions. Ca. 1803. There is also a brick outbuilding in the rear with a gabled roof and small louvered windows. Two contributing buildings. B.
88. 206 High Street (D-143) Dorchester County Courthouse. Individually listed in the National Register. Two story Italian villa style brick building with contrasting quoins, designed by prominent American architect, Richard Upjohn. Windows have round arched heads and are defined by belt courses at the second story and upper tower levels. Ca. 1854. Pivotal building. A.
89. 201 High Street (D-422). Two story, two bay frame Colonial Revival style building with double windows, a hipped roof and Palladian-inspired dormer. Projecting bays extend from each side. Ca. 1900. Contributing building. B.
90. 203 High Street (D-388). Two story, five bay frame house with a two story pedimented, columned portico covering the entrance and flanking bays. Front projecting bays have been added as well as overhanging eaves with paired brackets and dormers. Early 19th century with late 19th century renovations. Contributing building. B.
91. 205 High Street (D-136). One and a half story tidewater colonial type, built of brick for John Caille, Ca. 1763. According to information in Between the Nanticoke and the Choptank, it was remodeled in 1880, 1930 and 1965. Among the most obvious changes was the alteration of the roof configuration, a porch addition and the addition of wide dormers with paired windows. There is a one half acre boxwood garden behind the house. Ca. 1930. Contributing building. B.

- 
92. 207 High Street (D-10). Two story five bay frame colonial period house said to be possibly the oldest in Cambridge. According to legend it was built in Annapolis for John Caille who in 1750 moved it to its present site. A two story galleried porch extends across the front and is a mid or late 19th century addition. Early outbuildings and a Colonial Revival Boxwood garden are located behind the house. It was originally located where the Court House now is and moved to its present site when the Court House was built. Its main entrance originally faced the Choptank. A smoke house and slave house are on the property. Four contributing buildings. B.
93. 209 High Street (D-424). Two and a half story, five bay frame house with a central cross gable and a one story hip roofed porch across the front. Early or mid 19th century with early 20th century renovations. Contributing building. B.
94. 213 High Street (D-189) "Josiah Bayley's Law Office." One story, two bay frame office built in 1796 for Josiah Bayley, one of Maryland's early attorney generals. It is the earliest surviving office building in Cambridge. Contributing building. B.
95. 215 High Street (D-140) Christ Episcopal Church. Individually listed in the National Register. High Victorian Gothic style building of granite faced with green serpentine stone, and a slate roof. Significant details include projecting gargoyles and finials. The adjoining cemetery includes graves of five Maryland governors and other prominent people of Cambridge. Ca. 1883. Pivotal building. A.

96. 304 High Street (D-345) Old National Bank of Cambridge. Three bay Romanesque Revival style bank building, of brick with cut or cast stone trim. Details include turrets, clustered colonettes, grotesque faces and an elaborate cornice band. Recent expansion of this bank has eliminated adjoining properties to the north, D-345 and D-350. The building is believed to have been designed by local architect J. Benjamin Brown. Ca. 1892. Contributing building. B.
97. 306 High Street. Brick two story addition to the bank recently remodeled to match the old bank building. Non-contributing building. E.
98. 308 High Street (D-194) Fletcher Mansion. Two and a half story, brick Queen Anne style house of irregular plan with multiple gables and a polygonal tower. The building is embellished with terra cotta trim and a slate roof with contrasting color banding in an imbricated pattern. Ca. 1888. Contributing building. B.
99. 310 High Street (D-426). Two story, two bay brick commercial building with elaborate bracketed cornice. The first story storefront and entrance were replaced, ca. 1920. Ca. 1895. Contributing building. B.
100. 312 High Street (D-427). Mid 20th century two story, three bay brick faced commercial building. Non-contributing building. E.
101. 301 High Street (D-347). Post Office. Large, one story brick Neo-classical Revival style building with a central pedimented portico supported by four corinthian columns. A brick parapet hides a low pitched hipped roof. Corbeled arches and panels trim the windows. Early 20th century. Contributing building. B.

102. 303-309 High Street (D-364). Two story, six bay brick commercial building with second story window bays defined by brick corbeled "pilasters" and "dentils." The first story storefronts have been altered. There is an elaborate pressed metal cornice. Two-tone brick facade. Ca. 1899. Contributing building. B.
103. 311 High Street (D-346). Two story, two bay stuccoed brick commercial building with a massive cornice of pressed metal. Modern storefront. Ca. 1895. Contributing building. B.
104. 313 High Street (D-373) "Orem Building." Two story, four bay brick commercial building with an elaborate pressed metal cornice. Windows have stone lintels and sills. Ca. 1895. Contributing building. B.
105. 315 High Street (D-429). Three story, three bay brick commercial and residential building embellished with segmental brick arches with cut stone accents. An elaborate cornice appears to be pressed metal. It retains its original first story fenestration. Ca. 1895. Contributing building. B.
106. 317 High Street (D-372). Three story, three bay brick commercial building. The second floor features a window grouping that suggests Palladian influence. Two round windows are located in the third story and a pressed metal pediment extends above the cornice. Ca. 1895. Contributing building. B.
107. 319 High Street (D-430). Two story, five bay brick commercial building with the upper floor extending over an alley. An original storefront remains as well as the elaborate cornice. Second story windows have cut stone lintels. A 1950s period "picture" window has been cut into the section above the alley. Ca. 1895. Contributing building. B.

---

568. 611 Locust Street (D-441). Two story L-shaped frame house with a frontal projecting gable. A hip roofed porch extends across the entire front. Ca. 1900. Contributing building. B.
569. 613 Locust Street (D-442). Two story, three bay Colonial Revival brick house with a hip roofed topped with a balustrade. Above the pedimented entrance porch is a larger pedimented balcony porch with a Palladian window. Both are incorporated into a wraparound porch. Windows are segmentally arched. Ca. 1900. Contributing building. B.
570. 615 Locust Street (D-443). Two story, five bay frame house with a central cross gable embellished with a Gothic arched window. Large inside end chimneys are of brick. Ca. 1815, remodeled during the late 19th century. Contributing building. B.
571. 617 Locust Street (D-444). Two story, four bay foursquare brick house with a frontal Palladian dormer and a side projecting bay. There is a one story wraparound porch. Attributed to J. Benjamin Brown, local architect. Shutters are inscribed "J.B. Brown, Cambridge, MD". Built 1909. Contributing building. B.

700 Block, Locust Street

572. 700 Locust Street (D-445). Two story, four bay foursquare brick house with Colonial Revival style detailing, including pedimented dormers and a balustrade at the top of the roof. There is an unusual arched staircase window in the side wall. Designed by J. Benjamin Brown, local architect and built by William Thomas, contractor. 1902. Contributing building. B.
573. 702 Locust Street (D-446). Two story frame house of irregular plan with a three bay projecting frontal gabled section. The front gable has a pent roof and a three part window. Decorative shingles cover the area within the gable. Ca. 1900. Contributing building. B.

United States Department of the Interior

587. 802 Locust Street (D-459). Two story, three bay frame house with a central cross gable, inside end chimneys and a hip roofed porch supported by turned posts. Ca. 1900. Contributing building. B.
588. 804 Locust Street (D-461). Two story, four bay frame house with a cross gable and a semi-hexagonal projecting bay beneath another gable. Both frontal gables have pent roofs and round arched windows. Across the front is a porch with turned posts and balusters, turned spindles at the frieze and decorative brackets. Ca. 1890. Contributing building. B.
589. 806 Locust Street (D-463). Two story, three bay frame house with inside end chimneys and a central cross gable embellished with a Gothic arched window. There is a one story hip roofed porch across the front. Ca. 1900. Contributing building. B.
590. 808 Locust Street (D-465). Two story, L-shaped frame house with a frontal projecting semi-hexagonal bay beneath a gable. The front porch has been replaced. Ca. 1900. Contributing building. B.
591. 810 Locust Street (D-466). Two story, three bay frame house with inside end chimneys and a central cross gable with a Gothic arched window. There is a one story porch across the front with turned posts. Ca. 1900. Contributing building. B.
592. 812 Locust Street (D-468). Two story, L-shaped frame house with a frontal projecting gable. Extending from this gable is a semi-hexagonal bay. A one story wraparound porch has been enclosed. Ca. 1900. Contributing building. B.
593. 814 Locust Street (D-469). Two story, L-shaped frame house with a frontal projecting gable. Extending from this gable is a semi-hexagonal bay. A Gothic arched window embellishes the gable and a small pent roof supported by brackets separates the stories of the projecting bay. A porch across the front has turned posts. Ca. 1900. Contributing building. B.

594. 816 Locust Street (D-471). Two story, five bay frame house with a central entrance and cross gable. Centrally located corbeled brick chimneys and a one story porch across the front make this house more typical of late 19th century farmhouses of the region. Decorative woodwork embellishes the eaves. Large two story barn at the rear of lot. Two contributing buildings. B.
595. 818 Locust Street (D-473). Two story, three bay frame house with a central entrance beneath a two story porch tower topped with a gable. Within the gable are imbricated shingles and a round arched window. A semi-hexagonal projecting bay beneath another gable extends from the east end wall. Ca. 1900. Contributing building. B.
596. 820 Locust Street (D-475). Two story, frame L-shaped house with frontal projection and elaborately ornamented gables. There is a wraparound one story porch. Ca. 1900. Contributing building. B.
597. 822-824 Locust Street (D-477). Two story L-shaped frame building combining a residence and commercial space. Altered storefront and finishes. Ca. 1900. Contributing building. B.
598. 801 Locust Street (D-458). Two story, three bay frame house with a central entrance and a one story hip roofed front porch. There are two frontal gabled dormers. Ca. 1910. Contributing building. B.
599. 803 Locust Street (D-460). Two story T-shaped frame house with a frontal projecting gable ending with a semi-hexagonal bay. Decorative shingles trim the front gable and there is fancy barge trim as well. There is a one story wraparound porch with a pedimented projecting entrance bay. Ca. 1900. Contributing building. B.
600. 805 Locust Street (D-462). Two story, three bay gable fronted frame house embellished with a wraparound porch with turned posts and decorative brackets. Ca. 1900. Contributing building. B.

- 
601. 807-809 Locust Street (D-464). Two story, four bay late Queen Anne style double house with a steeply pitched hipped roof and a pair of gabled bays extending forward from each end of the front elevation. There is also a central hip roofed dormer with double windows and a one story porch across the front. Ca. 1900. Contributing building. B.
602. 811-813 Locust Street (D-467). Two story frame L-shaped corner building constructed for combined commercial and residential use. The diagonal corner store entrance appears to retain its original configuration. Ca. 1900. Contributing building. B.
603. 815 Locust Street (D-470). Two story, three bay gable fronted T-shaped frame house. Within the pent roofed front gable is a three part window. Ca. 1900. Contributing building. B.
604. 817 Locust Street (D-472). Two story L-shaped frame house with a projecting frontal gable ending with a semi-hexagonal bay. A two story porch is embellished with curved brackets extending from the square posts which form repeated broad arches across the front. Ca. 1900. Contributing building. B.
605. 819 Locust Street (D-474). Two story, three bay Queen Anne style house with multiple projecting bays, towers and gables. Patterned shingles on the pent roofs and gables add variety to the surface. Ca. 1890. Contributing building. B.
606. 821 Locust Street (D-476). Two story, late Queen Anne style frame house with projecting pent roofed gables. There is a wraparound front porch with a gabled entrance bay. Large brackets embellish the eaves. Ca. 1900. Contributing building. B.

607. 900 Locust Street (D-478). Two story, L-shaped frame house with a frontal projecting gable ending with a semi-hexagonal bay. There is a wraparound front porch. Ca. 1900. Contributing building. B.
608. 902 Locust Street (D-480). Two story, L-shaped frame house with a frontal projecting section terminating with a semi-hexagonal bay beneath a gable. There is a cross gable on the recessed portion of the house. Both gables are embellished with decorative shingles and arched windows. Ca. 1900. Contributing building. B.
609. 904 Locust Street (D-482). Two story, L-shaped frame house with a frontal projecting gable terminating with a semi-hexagonal bay. The gable has a round arched window. Ca. 1900. Contributing building. B.
610. 906 Locust Street (D-484). Two story, three bay frame house with a central entrance and a central projecting square porch tower with a gable roof. There is a hip-roofed one story porch across the front and two gabled dormers. Ca. 1890. Contributing building. B.
611. 901 Locust Street (D-479). Two story, L-shaped frame house with a frontal projecting gabled section which at its first story level terminates with a semi-hexagonal bay recessed beneath the squared upper levels. Notable embellishments include elaborate carved trim in the gables and a one story porch which extends into a large round pavillion. Ca. 1900. Contributing building. B.
612. 903 Locust Street (D-481). Two story hip-roofed frame house with multiple gables and projections. It has an elaborate wraparound porch with molded wood posts, balusters and turned frieze panel spindles. Ca. 1900. Contributing building. B.

State significance of property, and justify criteria, criteria considerations, and areas and periods of significance noted above.

SIGNIFICANCE SUMMARY:

Wards I and III of the Cambridge Historic District largely grew and developed as a result of the food processing industry. The district through its buildings, objects and sites portrays 18th, 19th and 20th century periods of Cambridge's history, throughout which the district's importance in architecture, commerce as a trade center and its contribution to Maryland's maritime history predominate. There are outstanding examples of residential, commercial, governmental and church architecture including the Italian Villa style courthouse designed by Richard Upjohn in 1852 (individually listed in the National Register) and a collection of turn of the century houses and commercial buildings designed by local architect J. Benjamin Brown. Also architecturally significant are the rhythmic rows of look-a-like houses which were responsive to the need for housing for the packing and canning industry at the turn of the century. Through Cambridge's development as one of Maryland's two port cities, this historic district which grew as a result of shipping and food processing industries relates the maritime heritage and importance of commerce to Cambridge and the surrounding area. Finally, as the county seat, with governmental buildings located in this historic district, its role as a political center is related as well as the district's distinctive position as being the home of five of Maryland's governors.

GEOGRAPHIC ORGANIZATION:

The proposed historic district for Cambridge lies in the city's northwest section along the south side of the Choptank River and west of Cambridge Creek. Cambridge, a city of 11,703, (1980) is the county seat of Dorchester County, in the heart of Maryland's eastern shore. Dorchester County is roughly bounded by the Choptank River on the north, the Chesapeake Bay on the west, the Nanticoke River on south and east, by Caroline County, Maryland and the state of Delaware on the northeast. Dorchester covers the largest number of square miles (688) of any county in Maryland. With a ragged outline formed by countless inlets and rivers of the Chesapeake Bay, much of the county is marshland and forest and even today is thinly populated, with over one-third of the county's population living in or near Cambridge. Dorchester County is often described as isolated from most of the rest of the state, first by the Chesapeake Bay which must be crossed on Route 50, well to the north or on Route 13, well to the south; and secondly by the Choptank River, itself nearly two miles wide where Route 50 crosses it at Cambridge. Aside from its geographical isolation and attendant cultural isolation either perceived or real, Dorchester County has managed to produce six governors for the state and has inspired at least two well known novelists to write books set in the County. John Barth who was raised in Cambridge, placed several of his stories in Dorchester

County, probably most notably The Sot-Weed Factor. Prolific novelist James A. Michener chose Dorchester County as the setting of Chesapeake.

One cannot consider Dorchester County without Cambridge. It is the county seat, and most of the county's population lives in or near this city. Located on the south shore of the Choptank River along the north-central edge of the county, Cambridge has always derived its livelihood from the surrounding waterways. Fishing, boat-building, shipping and other water dependent industries have always been important. Intertwined with water, however is agriculture as a base upon which Cambridge and Dorchester County grew. Cambridge was laid out in 1684, making it among the oldest towns in the state. It became a port city and by the late nineteenth century had a food processing, packing and canning industry second only to Baltimore's in the United States.

The Cambridge Historic District, Wards I and III, largely grew and developed as a result of the food processing industry. Most of the northwest section of town which includes the district is a residential area which developed in the late nineteenth and early twentieth centuries. However, the eastern section of the district, along High and Gay Streets contains governmental buildings, and commercial and residential structures which predate the Civil War.

As with many communities, wars and their aftermath provided watershed dates for Cambridge's history, causing economic and social upheavals which directed the course of the town's development. While the American Revolution, Civil War, World Wars I and II all affected Cambridge, the Revolution and Civil War seem to have had the greatest impact in shaping Cambridge history. Therefore, the history of Cambridge and the context within which the historic district is to be considered divides conveniently into three periods as defined in the Maryland Comprehensive Historic Preservation Plan, separated by important events which helped to bring about economic and social change. The first period (Rural Agrarian Intensification - A.D. 1680-1815) includes initial settlement in the last quarter of the seventeenth century through the American Revolution and post

National Park ServiceNational Register of Historic Places  
Continuation SheetCambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699Section number 8 Page 8.4

Revolutionary period during which time tobacco production and shipping dominated. The second period (Agricultural-Industrial Transition - A.D. 1815-1870) extends from the early 19th century through the Civil War and reconstruction, a time marked by the growing of wheat and other grain crops, and their processing and shipping. Then, after the Civil War, emphasis once again shifted, this time to oyster packing and fruit and vegetable canning (Industrial/Urban Dominance - A.D. 1870-1930). In recent decades, the importance of canning has diminished and emphasis has returned to grain farming. This is the framework which has structured Cambridge, its buildings and the concerns of its people.

PERIOD I: RURAL AGRARIAN INTENSIFICATION - A.D. 1680-1815  
The Early History of Cambridge

"By 1662, the westernmost part of what became the Cambridge District had become settled."<sup>1</sup> This was more than 20 years before the town of Cambridge was laid out. By 1669, the rent rolls recorded more than one hundred heads of households within what was soon to become Dorchester County.<sup>2</sup> With such a population, Governor Calvert ordered in 1669 an election to provide delegates from the area to the provincial assembly. Dorchester County was thus created, although originally it included an area almost twice its present size, extending into what is now Caroline County and southern Delaware.

Such settlement at an early date may seem surprising, given Dorchester County's separation from St. Mary's City, the provincial capitol by the bay and the rivers. However, by the mid-seventeenth century, St. Mary's County was becoming crowded and was also tightly controlled by the Calvert family. Just across the bay lay the lands which became Dorchester County. Easily accessible by boat, they became an attractive place for settlers to locate. "Yet, the colonization of the Eastern Shore counties was as much an object of conscious governmental policy as it was an outcome of the voluntary movement of settlers seeking new land. To the proprietary government that ruled Maryland, it was essential that the colony defined in the original royal charter be filled by men who owed their allegiance

United States Department of the Interior  
National Park ServiceNational Register of Historic Places  
Continuation SheetCambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699Section number 8 Page 8.5

and their land to the Lords Baltimore."<sup>3</sup> Although historians disagree about the extent to which the Calverts transplanted the English feudal manorial system to Maryland, at least the intent seems to have been in the minds of the early Calverts. Throughout the colony, the Lords Baltimore held several manors as reserves, upon which they could collect rents. "The manorial system in Maryland, with the Lord Proprietor at its head, was the only one of its kind in the American colonies and indicates the degree to which the Calverts wished to transplant the heirarchical English aristocracy to the New World."<sup>4</sup> Of course, the system didn't work, the vast expanse of readily available land in the colonies made such a rental system useless. However, in Maryland's early days, it helped to contribute to the slow and rather late development of towns. Since emphasis was on acquisition of large tracts of land and on agriculture, specifically production of tobacco rather than on urban development, towns, with the exception of Annapolis and St. Mary's did not play an important role in the development of early Maryland.<sup>5</sup>

According to early land records, surveying of tracts of land between the Choptank and Nanticoke Rivers began in 1659, and during the following decade, some 170 tracts were surveyed. The majority of those having surveys made were from Calvert County directly across the Bay, and only about half of those who had surveys made actually occupied the land.<sup>6</sup> Dorchester was, then, a land of scattered plantations, only some of which were actually occupied. Records suggest that by 1669, when the county was founded there were slightly more than 100 households providing the area with a population of about 500. The establishment of the county in 1669 created the need for a central government or courthouse building, but it did not create the need for a town. Thus, Dorchester County remained a collection of plantations with little concentration of its population for nearly 20 years after it was established.

Calvin Mowbrey and Maurice Rimpo in their Early Dorchester County History discuss the diffused nature of the county's settlement:

"Almost from the beginning, in Dorchester there were

X see continuation sheet. 8.6

Dorchester County, Maryland D-699Section number 8 Page 8.6

blacksmiths, coopers, carpenters, cordwainers and other artisans, a few mariners and innkeepers, several traders and merchants, doctors, lawyers and other professionals, but even the artisans, professionals and others usually owned plantations. Most early settlers were directly involved in agriculture. Tobacco was the main crop with corn, pork and beef produced in limited quantities."<sup>7</sup>

Tobacco was much more than the main crop in Dorchester County; it formed the structure of the entire economy. It was used as currency as shown in seventeenth and early eighteenth century records where fines were levied, rents charged and payments made in pounds of tobacco. The fact that tobacco was the basis of the economy and social structure of the region was a matter of concern to some leaders of the day. For example, Benedict Leonard Calvert complained in a letter to his brother in 1726:

"Tobacco is our staple, is our all, and indeed leaves no room for anything else, it requires the attendance of all hands and exacts their utmost labor, the whole year round; it requires us to abhor communities or townships, since a planter cannot carry on his affairs without considerable elbow room within his plantation; and when all is done, and our tobacco sent home [to England], it is perchance the most uncertain commodity that come to market, and the management of it there is of such a nature, and method, that it seems to be of all other, most lyable [sic] and subject to frauds, in prejudice to the poor planters; tobacco merchants, who deal in consignments get great estates, run no risk, and labor only with the pen; the planter can scarce get a living, runs all the risks attendant upon trade, both as to his negroes and tobacco, and must work in a variety of labors...when our tobacco is then sold at home [in England] whatever is the product of it, returns not to us in money but it either converted into apparel, tools or other conveniences of life, or else remains there as if it were dead to us..."<sup>8</sup>

Finally, in 1683, again through the need to accommodate the dominating tobacco culture, a bill was passed to set up towns,

Dorchester County, Maryland D-699Section number 8 Page 8.7

ports and points of entry for the export of tobacco throughout the colony. Although several towns in Dorchester County were created through this act, only two, Cambridge and Vienna actually thrived. Early records on the establishment of Cambridge are incomplete, but most sources give the date as 1684. The new town began to grow, and in 1706 when another commission to lay out ports and towns was formed to lay out Cambridge a second time, because of "lost" or "embezzled" records of the first town, and to create several other new towns, Cambridge already had a church for the Great Choptank parish, several dwellings and a courthouse. "During the next thirty years, Cambridge developed into the principal port of entry for goods coming into the county and served as the major marketing point for tobacco, seafood and muskrat pelts."<sup>9</sup> The beginnings of concentration of shipping activities helped to create another industry, shipbuilding, which became important to Cambridge.

PERIOD II: AGRICULTURAL-INDUSTRIAL TRANSITION - A.D. 1815-1870  
Between the Revolution and the Civil War

During the eighteenth century, there began to be a gradual shift away from the growth of tobacco as the sole crop and staple to a more diversified agricultural system. The earliest signs of the coming change were apparent in sentiments such as those expressed in the letter by Leonard Calvert already quoted. However, it was the American Revolution that actually ended the domination of tobacco planting, by eliminating the restrictive trade relationship with England, and the main market for American tobacco. Planters turned to the production of grains, a change which created more general moderate prosperity rather than the concentration of large amounts of wealth in the hands of a few of the biggest tobacco planters.

A greater degree of prosperity among the general population led to increased construction and more substantial buildings, as well as spawning related industries, most particularly milling. The shipping of meal and flour also favored the shipbuilding industry. There were several mills in Cambridge. One of the first of these was on the northwest side of Mill Street near the Choptank River. As a result of this mill, Mill Street got its

X see continuation sheet. 8.8

Continuation SheetCambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699Section number 8 Page 8.8

name. Most of the grain mills were windmills because of the flat, low-lying topography which would not produce the fast-flowing streams necessary for water-powered mills.

Cambridge in the nineteenth century became a trade, manufacturing and milling center although the character of the surrounding countryside remained largely rural with grain and some tobacco planting dominating. In 1849, James A. Stewart started a shipbuilding concern along Cambridge Creek near the start of what is now Maryland Avenue. Nearby pine and oak forests supplied lumber for this shipbuilding activity which expanded under J.W. Crowell in 1869 into lumber for railroad cars and frames for boats and boxcars. This activity eventually became the Cambridge Manufacturing Company. The lumber industry however waned in the 1870s when the forests were depleted, eliminating the source of materials.

In the years before the Civil War, the country began to diverge in its attitudes and sentiments into support for the Union or support for the Southern cause. Unfortunately, border states like Delaware, Maryland and Virginia in the East and Missouri and Kansas in the West had to wrestle with conflicting views within their own borders. In Virginia the pro-Union northern and western parts of the state eventually separated from the eastern part that favored the Confederacy and formed a new state, West Virginia, in 1863. Maryland was also divided into southern and eastern Maryland sympathetic to the South and northern and western Maryland to the Union. To be sure, though, there were many "opposition" supporters in each of these areas. The planter culture which had been in place in Dorchester County since the seventeenth century, and which had depended on slaves for the labor-intensive tobacco growing naturally indentified with the South. Yet, within this climate was also strong Union support. Among the Unionists two are particularly notable. Harriet Tubman, a slave woman from Dorchester County who escaped, helped others to find freedom through the underground railroad and also served as a Union nurse and spy. She became a legendary figure and was known nationwide for her efforts to free slaves. Another protector of the Union was the Governor of Maryland, Thomas Holliday Hicks who was from Cambridge. According to several sources, Hicks almost solely prevented Maryland's

X see continuation sheet.8.9

National Park ServiceNational Register of Historic Places  
Continuation SheetCambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699Section number 8 Page 8.9

secession from the Union by refusing to call a special session of the state legislature. Governor Hicks' home is located on Locust Street in Cambridge within this historic district.

While Cambridge and Dorchester County were not devastated by combat during the Civil War, the ragged shoreline with many natural harbors was ideal for smuggling food, medicine and other supplies into the South. The county also contributed officers and soldiers to the Southern army. The fact that the land was essentially untouched by the war sets the stage for Cambridge's major boom period.

## PERIOD III: INDUSTRIAL/URBAN DOMINANCE - A.D. 1870-1930

The post-Civil War period includes a major turning point in Cambridge's history, for after the Civil War, Cambridge began to take on the character-defining features by which it is known today. The 1870-1930 period was for Cambridge an unprecedented time of growth, development and prosperity. Several factors contributed to the rapid development of the city during this time. Newly freed slaves provided a large employable labor force, willing to work for low wages, a factor attractive to industrialists. Telegraph service became available in 1868 and the Dorchester and Delaware Railroad leading from Cambridge to the Pennsylvania Railroad at Seaford, Delaware, was completed in 1869. The biggest industry in Cambridge in the years following the Civil War was seafood. Oysters and crabs had always been available locally, but had little commercial value since they could not be preserved for shipping. The introduction of the refrigerated railroad car allowed shipment of fresh seafood and greatly escalated the seafood industry for Cambridge.

By far the biggest boost to Cambridge's post-Civil War economy may be considered to have had its beginnings in 1810 when Nicholas Appert, a Frenchman responding to Napoleon's need to get quantities of nutritious food to his far ranging army discovered a method of processing food in sealed glass containers.<sup>10</sup> In 1818, Peter Durand, an Englishman successfully experimented with boiling food sealed in tin cannisters. His process, patented in England and America, had the advantage of using containers less

United States Department of the Interior  
National Park ServiceNational Register of Historic Places  
Continuation SheetCambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699Section number 8 Page 8.10

bulky than glass, unbreakable and cheaper. The term "cannister" was soon shortened to "can" and the term canning came to be applied to the process of sterilizing food in sealed containers.<sup>11</sup>

In 1849, Thomas Kensett established an oyster cannery in Baltimore which eventually led to Baltimore's leadership role in the canning industry nationwide. In the Civil War years, the Baltimore canneries provided a market for the rich source of oysters in the Bay off Dorchester County. Then, in 1870, James Wallace began an oyster canning business in Cambridge. He was the first to start raw shucking and steam packing of oysters in Cambridge. The factory was located along the Cambridge Creek. "By the turn of the century, nearly a million bushels of oysters were shucked annually in Cambridge, making it second only to Baltimore, nationwide in the volume of its oyster trade."<sup>12</sup> During the turn of the century period, the packing/canning industry employed 800-1,000 people, many of them former slaves and there were at a given time as many as 16 packing and/or canning facilities in operation in Cambridge. Most of these were concentrated along the Cambridge Creek near its mouth at the Choptank River. There was originally a distinction between the terms "packing" and "canning". Packing was what was done to oysters and canning referred to the processing of fruits and vegetables in cans. However, as oyster processing facilities diversified and expanded to fruits and vegetables, the terms began to be used interchangeably.

The fruit and vegetable canning industry which came on the heels of oyster packing both took advantage of and helped to create a shift in dominance of agricultural products from grains to fruits and vegetables, mostly tomatoes. After the Civil War, advances in the technology of farm machinery and development of agricultural resources in the plains states greatly reduced the economic advantages of grain production in Dorchester County. Once again, planters made changes in the crops they grew, shifting to truck farming. As a result, Cambridge became known as the tomato canning capitol of the World.<sup>13</sup> In addition to the canning operations, related industries thrived such as box and basket making (containers to hold freshly picked produce and stored canned goods), can making and shipping, also thrived.

5. World War II created labor shortages which led to increased wages. After the war there were new wage and hour laws and more government regulation over labor. One of the factors that made Cambridge and Dorchester County attractive to canners was its large labor force which was not unionized, and was willing to work for low pay.

6. The development of chain grocery stores and the disappearance of independent grocers meant sales of canned goods through large distributors on a low-bid basis which could be more easily won by Florida and California canners.

7. Health and environmental regulations, particularly those governing waste disposal created major expense for the industry which previously piled tomato peels on fields or dumped them in rivers.

8. Finally, retirement of the older canners who had established the industry and nurtured it in the late nineteenth and early twentieth century were at retirement age by World War II. Many canneries did not have the same kind of dedicated leadership to follow them.<sup>15</sup>

In addition to the end of the vegetable canning industry, the oyster industry slowed as well, due to depletion of the oyster beds. These conditions have changed the economic base of Cambridge and Dorchester County once again. Grain farming has returned to importance and in recent years tourism and waterfront development have buoyed the economic life of the county.

PART IV: RESOURCE ANALYSIS, HISTORIC PERIOD THEMES  
Architecture, Landscape Architecture and Community Planning

Although Cambridge was established during the last quarter of the seventeenth century and there was a concentration of buildings there certainly by the beginning of the eighteenth century, none of those initial buildings remains today. The historic district's appearance is one that was taken on generally during the second half of the nineteenth century and the first three decades of the twentieth century during the time that the

United States Department of the Interior  
National Park ServiceNational Register of Historic Places  
Continuation SheetCambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699Section number 8 Page 8.12

These industries brought rapid growth and development to Cambridge as the population rose from 1,200 in 1860 to 8,500 in 1920. This vast growth in the fifty or sixty years following the Civil War meant major prosperity in the building industry with residential construction as well as factory buildings, schools, banks, commercial buildings and hotels. Whole areas of the city were opened for residential development during this time including much of the area contained within this historic district. The physical appearance of Cambridge was changed significantly during this period by two disastrous fires. One occurred on November 30, 1882, and the other on July 30, 1892. The fires resulted in the rebuilding of much of the commercial district of the city, during the late nineteenth century. By 1925 there were 250 retail and wholesale stores, 2,400 residences, seven churches and two theaters.<sup>14</sup>

The canning and packing industries continued to be the base of Cambridge's prosperity until World War II, although the industry was beginning to wane by that time. By 1960 there were only two canners remaining in Cambridge and today there are none. R. Lee Burton, Jr. in Canneries of the Eastern Shore lists the following reasons for the demise of the canning industry:

1. World War I with its high demand for canned goods brought the industry to a rapid and premature peak. After the war there was a surplus of canned goods which forced prices down and drove some of the smaller canners out of business.
2. Competition from Florida and California with their year round growing seasons made it difficult for Maryland's canners to keep up with their business based on a five-month growing season.
3. The large-can business mostly through government contracts was lost to California.
4. Technological advances in canning required canners to keep up-to-date. Smaller canners working with the five-month growing season and older facilities were not financially capable of major improvements.

X see continuation sheet.8.13

National Park ServiceNational Register of Historic Places  
Continuation SheetCambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699Section number 8 Page 8.13

town achieved great prosperity and growth. The historic period themes from the Maryland Comprehensive Historic Plan identified for the district are Architecture, Landscape Architecture and Community Planning; Economic (Commercial and Industrial); and Government/Law.

The district's boundaries follow roughly, Glenburn Avenue on the west, the Choptank River on the north, Gay and Race Streets on the east and Glasgow Street on the south. Much of the area north of Choptank Street was developed during the early twentieth century period as the canning industry brought more and more people to town. The eastern half of the district includes residential buildings from the eighteenth, nineteenth and early twentieth centuries, commercial buildings from the same time periods, churches and governmental buildings, including the jail and courthouse. The courthouse built in 1852, and designed in the Italian Villa style by Richard Upjohn, and the adjacent jail, an excellent example of the Romanesque Revival style are already listed in the National Register of Historic Places and are notable for their architectural significance. Also individually listed is Christ Episcopal Church. Built in 1883 it and Grace Methodist Church (1881) are fine examples of High Victorian Gothic architecture. The district, taking in parts of the city's first and third wards represents an excellent cross section of the town's development, including as it does residential, commercial, religious and governmental architecture as well as the site of part of the port area and abutting the industrial section.

The district includes what is currently recognized as the historic area, essentially the eastern part of the proposed district including High Street, Court Lane, Water Street, Mill Street and Locust Street. This area contains many of the city's oldest buildings. Also within the district are houses that were the homes of five of Dorchester County's six Maryland governors. On High Street are the residences of Governors Charles and Phillips Lee Goldsborough; Emerson C. Harrington, governor from 1916 to 1920 lived on Mill Street and Governors Thomas Holliday Hicks, the Civil War Governor and Henry Lloyd lived on Locust Street. Lying along the Choptank River much of the district was built and occupied by the political, social and economic leaders

X see continuation sheet. 8.14

National Park ServiceNational Register of Historic Places  
Continuation SheetCambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699Section number 8 Page 8.14

of the community, the factory owners and upper level management; and along Choptank, West End and Willis Streets, more modest houses of clerks, foremen, mariners, teachers and sales people. The district is also characterized by small neighborhood grocery stores which help to convey the character of the upper district as a cohesive residential area. Worthy of note is the economic stratification within the district with a concentration of large mansion houses predominantly on High, Mill, Oakley and Locust Streets, contrasting with rows of developer-built modest turn-of-the-century dwellings on Choptank, West End and Willis Streets.

Domestic architecture in the district was influenced by several styles, including Georgian and Federal which is evident in the earlier buildings along High Street, although many of these houses were greatly altered during the prosperous times in the late nineteenth and early twentieth centuries. Notable from the early period is the Bayly House at 207 High Street, possibly the oldest house in Cambridge. According to local tradition, it was built in Annapolis for John Caille and moved to Cambridge by him about 1760. Currently its appearance is dominated by a two story galleried porch which appears to have been added during the late nineteenth or early twentieth century. Several other houses on High Street reflect this 18th century period and a few as well showing colonial period vernacular tradition, being one or one and a half stories high with dormers and end chimneys. The Goldsborough House at 200 High Street is a late 18th century Georgian building associated for much of its history with the prominent Goldsborough family. It is individually listed in the National Register. Houses of the Georgian and Federal periods have neoclassical details typical of the styles with massive trim, water tables, pronounced jack arches and keystones on Georgian inspired examples; and smooth facades, larger paned windows and light, delicate door and window treatments associated with the Federal style-influenced examples. The later neoclassical phase, the Greek Revival style, is exhibited in only a few buildings, particularly 116 High Street with its gable-front orientation suggesting the Greek temple form. Other representations of the Greek Revival style are articulated in window and door treatments on buildings that might otherwise be considered Georgian in form. These characteristics are wide wood window lintels, broad transoms and sidelights at the entrance and

X see continuation sheet.8.15

National Park ServiceNational Register of Historic Places  
Continuation SheetCambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699Section number 8 Page 8.15

recessed rectangular panels trimming the facade.

Next comes the plethora of styles generally referred to as "Victorian." By far the most popular of the late nineteenth century styles in domestic architecture in this historic district is the Queen Anne style with excellent examples found on Oakley Street, Mill Street, Locust Street and the north end of High Street.

During the early twentieth century, the Colonial Revival style was most favored with large mansions built on Mill Street and Oakley Street as well as modernizations and renovations of older houses in the district. The American Foursquare style of 1910-1930 period is well represented throughout the district. Many of these have trim details relating them slightly either to Queen Anne or Colonial Revival stylistic influence. Bungalows are also present in the district, particularly in the upper half that was developed during the early twentieth century. The most recent of the historic styles are the neocolonial, three bay houses of the 1920s through early 1940s, again prominently located in the upper sections of the district, particularly Oakley and Glenburn Streets.

Many of the larger houses of the late nineteenth and early twentieth centuries in the district are the work of J. Benjamin Brown who practiced throughout Maryland, but left a large architectural legacy in his native Cambridge.

Also significant to the district are the rows of modest gable fronted detached houses found along Vue De L'eau, West End, Choptank and Willis Streets dating from the turn of the century. Nearly identical in form and spacing they create a significant rhythmic pattern on those blocks and are an important element of the district. These are developer-built houses constructed to satisfy the need generated by the rapid growth which occurred at the turn of the century due to development and expansion of the packing, canning and shipping industries. These structures are of four basic types: 1) Two story L-shaped frame houses with a forward projecting gabled section which may or may not terminate with a semi-hexagonal bay. 2) Small two or three bay, two story houses with central cross gables which are either plain or

X see continuation sheet. 8.16

United States Department of the Interior  
National Park ServiceNational Register of Historic Places  
Continuation SheetCambridge Historic District: Wards I and III  
Dorchester County, Maryland D-699Section number 8 Page 8.16

embellished with decorative shingles. These houses may have extensions at the rear. 3) Two story, two or three bay gable fronted houses which may or may not have gable ornamentation such as pent roofs, decorative shingles or Palladian windows. 4) Two or three bay, two story foursquare houses with hipped roofs and dormers. All varieties had one story front or wrap-around porches which are a significant part of the district's visual identity.

Later in the 20th century and found in the western portions of the district on Belvedere and upper Glasgow Streets and scattered as infill in the older sections are one story cottages usually with three bays and dormers and frequently set gable to the street. Most of these houses date from the 1930s and 1940s.

Among other types of buildings, the mid-nineteenth century Italianate style is most notably represented by the Courthouse, built in 1852, and also by several commercial buildings along High and Race Streets. The Romanesque Revival style is prominently showcased by the County Jail and two banks on High Street. The High Victorian Gothic style of the 1870s and 1880s is exhibited in Christ Episcopal Church, 1883, individually listed in the National Register, and in Grace Methodist Church, 1881, both on High Street.

## Economic (Commercial and Industrial)

The district is significant as reflecting the commercial and economic history of Cambridge as well, with a few rare surviving office buildings from the early and mid nineteenth century on High Street, Gay Street and Court Lane. From the late nineteenth and early twentieth century is the commercial corridor along Race and Poplar Streets which reflects both the fast growth and prosperity of that period and the affect of two major fires which destroyed much of the downtown in 1882 and 1892.

The district as a whole represents and portrays Cambridge's role in maritime history as one of Maryland's two ports of entry. It is a community which throughout its history has derived its sustenance from the river and bay through shipping, shipbuilding,

fishing, oystering and packing which all relate directly to Cambridge's location on the water.

Government/Law

The role of Cambridge as county seat and a governmental center is reflected by the 1852 County Courthouse built in the Italian Villa style and designed by Richard Upjohn. Built at a time when Upjohn's career was in its peak, the Courthouse illustrates Cambridge attitudes and the statement of confidence and leadership the county seat made with a stylish building designed by a nationally known architect. The Courthouse and attached Romanesque Revival jail are individually listed in the National Register.

BOUNDARY JUSTIFICATION:

The Boundaries are drawn to include as many as possible contributing resources within the district and to exclude non-contributing areas or those which may contribute to other potential districts in Cambridge. In general either the resources or the geographical features of the surrounding areas differ from those of this district. The area beyond Glenburn Avenue is characterized generally by post World War II houses. The areas west of Glasgow and Race streets are generally characterized by historic resources of a nature different from those in this district but which are eligible for National Register listing as part of Wards II and IV of the Cambridge Historic District. East of Race Street to Cambridge Creek are mostly post World War II buildings. South of the district boundary along Race Street are stretches of vacant lots and new buildings.
