14. History:

Built ca. 1860, possibly by Thomas Stephenson (who built addition to older nearby mill now known as Doe Run Inn). Operated in 1906-1930 as Doe Run Flour Mill by William A. Coleman and Dr. Pusey. Later used as hay barn.

44. Description and H	louse Plan:		

<sup>44.</sup> Description and House Plan:

Large dry-stone mill on bank of Doe Run Creek, size ca. 45 x 60 feet. Upper Mississippian limestone, sealed with lime mortar, roughly steeply pointed. Two full floors plus ground floor are stone; top floor plus cupoloed garrett are recessed on eave sides only and are frame. Four bays on gable ends, six on eave sides. Most ground floor lintels are solid stones, one segmental-arch doorway with voussoirs adjoining mill race, first and second floor openings have timber lintels. Most frames butted; but at least one mitered corner frame. Wide foundation creates unusually large watertable. Exterior stair on west side to second floor (see drawing). Foundation of additional space on north end. Race and wheel housing, of stone, on east side of building and later one-story metal clad shed beyond. Much machinery remains.

One section of the west side, second floor is missing, as are the weatherboards in the south gable. All window sash are missing.
