DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Wapiti Ranger Station is a single-story, brown log cabin built in 1903. Originally rectangular, two additions at the rear make the station today a U-shaped structure. Three stone chimneys pierce the roof, one in the original section and one in each addition. The interior is entirely modernized for us as the forest ranger's residence. A brown, split-rail fence, 175'x150' surrounds the cabin, separating it from eight more recent structures built by the Forest Service nearby. The cabin stands a few yards south of the North Fork of the Shoshone River, beneath the slopes of a steep butte. U.S. Route 16 runs parallel to it some fifty yards south.

STATEMENT OF SIGNIFICANCE

Wapiti Ranger Station is the first ranger station built in the United States. As such it represents better than any other building the beginnings of forest conservation in this country, and a national concern for the preservation of our natural resources.

The Shoshone National Forest is the oldest in the nation, having been created by President Benjamin Harrison in 1891. By 1902 the Forest had been expanded to the point where it had to be divided into four divisions. W.H. Pierce, who owned a stock ranch in the area, was appointed Supervisor of the Shoshone division, containing most of the original preserve. Upon receiving his appointment, Pierce built a log headquarters building at Wapiti Ranger Station. The structure still stands, with large additions to the rear and many modern alterations inside.

Prior to 1902, the strips of forest designated by President Harrison were standing not primarily as forest reserves, but as property for a contemplated enlargement of the Park itself. In 1902 the vast expansion authorized by President Theodore Roosevelt created the first true national forest reserve in this country. Wapiti Ranger Station was the first visible evidence of a new era in American attitudes toward the natural beauty of their nation.

VERBAL BOUNDARY DESCRIPTION

The original Wapiti Ranger Station is part of a cluster of nine Ranger Station structures. It is west of these later buildings and separated from them by a wooden rail administrative fence. The 0.37 acres enclosed provide an unobtrusive setting for the historic structure. The boundaries are therefore defined by the administrative fence as shown by the red line on the accompanying map A, labelled "Wapiti Ranger Station" and dated July 1975. (cont'd.)
