NATIONAL REGISTER OF HISTORIC PLACES
REGISTRATION FORM

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name Chesterfield Highlands Historic District
other names/site number DHR File No. 106-5063

2. Location

street & number Roughly bounded by East Westover Avenue (formerly Lyons Road) on the north; Lafayette Avenue on the east; Pickwick, Danville, Lafayette and Lee Avenues on the south, and the Boulevard on the west
not for publication N/A
city or town Colonial Heights vicinity N/A
state Virginia code VA county Independent City code 570 zip code 23834

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this X nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property X meets does not meet the National Register Criteria. I recommend that this property be considered significant nationally statewide X locally. (See continuation sheet for additional comments.)

Julie K. Langan 5/30/13
Signature of certifying official Date
Virginia Department of Historic Resources
State or Federal Agency or Tribal government

In my opinion, the property meets does not meet the National Register criteria. (See continuation sheet for additional comments.)

8. Statement of Significance

=====

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B** Property is associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield information important in prehistory or history.

Criteria Considerations (Mark "X" in all the boxes that apply.)

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or a grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

Areas of Significance (Enter categories from instructions) Architecture; Community Planning and Development

Period of Significance 1916-1954

Significant Dates 1916

**Chesterfield Highlands Historic District
Colonial Heights Independent City, VA**

Section 7 Page 1

NARRATIVE DESCRIPTION

Summary

The Chesterfield Highlands Historic District is located in the City of Colonial Heights, Virginia, approximately one mile north of downtown Petersburg and twenty-five miles south of Richmond, Virginia. The City adjoins Chesterfield County on the north and west, the City of Petersburg on the south, and Prince George County on the east. The district was developed in the early decades of the twentieth century as a carefully planned middle class neighborhood. Covering approximately fifty acres, the historic district is bounded by East Westover Avenue on the north, Pickwick Avenue on the south, Lafayette Avenue on the east, and the Boulevard on the west. The boundaries of the district correspond to the legally platted subdivision boundaries filed in Chesterfield County in 1916.¹ The district features a spectrum of architectural styles popular in the first half of the twentieth century. Integrated within the district are three prominent community churches. At the southwest corner of the district, a cluster of small-scale commercial buildings are included within the boundaries because of their perennial association with the residential neighborhood.

Chesterfield Highlands is laid out in a gridiron plan. The original platted lots were moderate and uniform in size and setback, typically twenty-five feet wide and one hundred to one-hundred-and-twenty feet deep. Contributing to the park-like, suburban feeling, the majority of the houses are situated on double-lots. Nine lots fronting on the Boulevard were within the original boundaries of the Chesterfield Highlands neighborhood. However, eight of these are now excluded from the historic district because they have been filled with commercial buildings that are not in keeping with the overall character of the district.

Setting and Landscape

The Chesterfield Highlands Historic District, composed of fifteen city blocks, is a compact urban neighborhood in the heart of the City of Colonial Heights with an overall terrain that is level and fertile. The west boundary of the district is reinforced by a major national north-south thoroughfare, Route 1/301 (historically known as the Richmond-Petersburg Road or Boulevard and now called The Boulevard), with a steady and uninterrupted flow of vehicular traffic. East Westover Avenue, which defines the north boundary, supports a steady volume of local traffic. Still, the internal streets of the district are quiet and protected such that the neighborhood retains the peaceful feeling of its suburban origin. Mature shade trees, mostly deciduous oak, maple, and poplars, are a distinguishing characteristic of the neighborhood. Among the more common evergreen trees are hemlocks, magnolias, and hollies. The properties are dotted with hundred-year-old trees that survive from the initial platting of the district though maple trees from a planting initiative fifty years ago are the most numerous type. Mature foundation plantings, notably azaleas, boxwood, acuba japonicas, hydrangeas, and nandinas, contribute to the well-established neighborhood setting.

The district encompasses all of Lee, Norfolk, Richmond, and Suffolk Avenues, each just three blocks long. The district also includes substantial portions, three or four block stretches, of Danville, East Westover, Lafayette, and Lynchburg Avenues. Pickwick Avenue, an L-shaped street at the southwest corner of the

**United States Department of the Interior
National Park Service**

**NATIONAL REGISTER OF HISTORIC PLACES
CONTINUATION SHEET**

**Chesterfield Highlands Historic District
Colonial Heights Independent City, VA**

Section 7 Page 2

residential district, is lined on both sides of the street with small-scale commercial buildings, erected between 1946 and 1953 to support the burgeoning residential community. The streets throughout the neighborhood are generally fifty feet wide with two-way traffic flow and on-street parking. All of the streets are asphalt-paved and most are edged on both sides by concrete curbs and on at least one side by concrete sidewalks.² Houses are generally set back approximately thirty feet from the curb. Few of the front yards are fenced although chain link and tall wood privacy fences often surround the rear yards. Nearly all of the blocks are divided centrally and longitudinally by thirty-foot-wide public alleys that provide rear access to garages and sheds.

Established in 2000, the Flora M. Hill Park, 300 Norfolk Avenue (106-5063-0115), occupies the two-acre site of the former Flora M. Hill School. Bounded by Lafayette, Norfolk and Richmond Avenues and Lee Place, the verdant, grassy park is dotted with ornamental trees and bordered on all four sides by concrete sidewalks. There are two inter-connected circular walkways which provide access to the interior of the park. The raised, semi-circular, brick planter-box and the sidewalk that wraps around it are original. Both structures were located in front of the Flora Hill School building. A raised brick planter, filled with low-growing shrubs, ornamental trees, and flowering bulbs, borders the sidewalk along Norfolk Avenue. There are two play-gyms for children in the park.

Typical Building Materials

The Chesterfield Highlands Historic District is an intact example of a traditional streetcar suburb from the first half of the twentieth century. The majority of the houses in Chesterfield Highlands were built between 1916 and 1948, the year that Colonial Heights became an independent City. The contributing residential resources include architectural styles and forms typical for the early and mid-twentieth century. There is little infill housing. Building heights range from one story to two-and-one-half stories.

The district features a variety of materials. The most common materials employed for exterior walls are traditional materials such as brick, stucco, shingle, and weatherboard. A visual hallmark of the neighborhood is the large, intact collection of roofs sheathed in heavy-gauge, standing-seam metal. Seventy-one primary resources retain their original metal roofs.

The district also serves to showcase what were considered revolutionary early- to mid-twentieth-century materials, such as concrete, aluminum, and Permastone. The dwelling at 313 Norfolk Avenue (106-5063-0118), a one-story, two-bay masonry dwelling, is an example of a small house whose exterior walls are veneered with rusticated concrete, pillow-shaped blocks tooled to imitate stone. The coursing is interrupted by a smooth band of concrete, about two feet above grade all around the perimeter of the house, suggesting a sort of water-table. The one-and-one-half-story, Cape Cod-style house at 319 Norfolk Avenue (106-5063-0121) is built with unusually large rusticated concrete blocks separated by one-inch-wide struck mortar joints. The foundation is composed of a bottom course of rusticated blocks topped with four courses of bricks laid in stretcher bond.

An example of Permastone is the Craftsman-inspired dwelling at 118 Lynchburg Avenue (106-5063-0070). The exterior walls are clad at the first story with multi-hued Permastone in shades of pink, yellow, apricot and taupe and at the second story in cream-colored aluminum siding. This dwelling is further distinguished

National Park Service**

**NATIONAL REGISTER OF HISTORIC PLACES
CONTINUATION SHEET**

**Chesterfield Highlands Historic District
Colonial Heights Independent City, VA**

Section 7 Page 3

by a cross-gable, metal-clad roof, deep bracketed eaves on all elevations, and a bold full-width, front-gabled porch. Another example is the application of Permastone to the exterior of the commercial building at 104 Pickwick Avenue (106-5063-0122).

Numerous houses in the district constructed or renovated in the post-World War II boom display high quality aluminum siding. Introduced in the 1940s, aluminum siding became popular for its non-rusting longevity and its paint-bonding properties. The popular use of aluminum siding in Colonial Heights is not surprising with the second largest aluminum manufacturer in the world, Reynolds Metals, in nearby Richmond, Virginia. Well-preserved examples of aluminum siding are at 915 Lafayette Avenue (106-5063-0052) and 111 Lynchburg Avenue (106-5063-0069).

Residential Architecture

Craftsman-influenced architecture is predominant throughout the Chesterfield Highlands Historic District with two basic forms displaying its characteristics. Modest-sized, one or one-and-one-half-story bungalows are the most numerous house type. Larger two or two-and-one-half-story Craftsman houses are mostly American Foursquares in form. Craftsman-influenced houses are often characterized by low-pitched hipped or gabled roofs; deep overhanging eaves, exposed rafter tails and/or brackets; full- or partial-width porches; and classical or battered columns.

A particularly fine example of the Craftsman style is 816 Lafayette Avenue (106-5063-0047). Constructed circa 1932, the one-and-one-half-story, two-bay dwelling exhibits a metal-clad gambrel roof, a prominent front-gabled central dormer, tripartite double-hung windows, and a wrap-around shed-roofed porch. The Craftsman character of this dwelling is conveyed in the deep overhanging and bracketed eaves, in the five monolithic, stuccoed porch columns, and the use of mixed materials, including red brick and pebble-dashed stucco.

A handsome row of brick Bungalows are situated at 115, 119, and 121 Richmond Avenue (106-5063-0140; 106-5063-0141 & 106-5063-0142). Constructed between 1930 and 1935, the houses are similar in design, but each is distinctive in detailing. For example, the one-story, three-bay brick Bungalow at 115 Richmond Avenue (106-5063-0140) features a front-gabled porch with battered columns, a side-gable roof with standing-seam metal covering, overhanging eaves with exposed rafter tails, and weatherboard in the front gable. Fenestration is composed of six-over-one double-hung wood windows with one-inch-wide muntins. The façade is veneered with bricks, laid in a distinctive pattern of eight courses of stretchers alternating with one course of Flemish bond. The lime-based mortar joints are relatively wide, about $\frac{3}{4}$ -inch. The side walls are also constructed of old bricks.

American Foursquare houses though mostly in the Craftsman style also display some Colonial Revival details. Wood-frame examples are 111 Suffolk Avenue (106-5063-0170) and 201 Suffolk Avenue (106-5063-0180). Each house has a nearly square form, symmetrical composition, a hipped roof, and a full-width porch. Colonial Revival influence is displayed in the Doric porch columns at 111 Suffolk Avenue while Craftsman influence is displayed in the heavy stuccoed columns and the arched stucco entablature of the porch at 201 Suffolk Avenue.

**United States Department of the Interior
National Park Service**

**NATIONAL REGISTER OF HISTORIC PLACES
CONTINUATION SHEET**

**Chesterfield Highlands Historic District
Colonial Heights Independent City, VA**

Section 7 Page 4

Another American Foursquare house is 130 Lynchburg Avenue (106-5063-0073). Character-defining features of the boxy two-bay, two-story dwelling are a center brick chimney, a full-width porch with fluted and enriched Doric columns, deep overhanging eaves and a porte-cochere on the west elevation supported over large fluted Doric columns. All of the windows on the east, west, and south elevations are covered with green-striped canvas awnings. A brick example of the American Foursquare is 206 Norfolk Avenue (106-5063-0107). The nearly square, two-and-one-half-story, two-bay brick dwelling features orange-red walls laid in 1:7 American bond; a hipped roof of standing-seam metal; paired, double-hung sash windows; a one-story, full-width porch with Doric columns and a balustrade composed of "heavy" square, often fluted, balusters and a broad molded handrail, sometimes called a "Richmond railing".³

A number of the Bungalow and American Four Square dwellings in Chesterfield Highlands are comparable in form and detail to houses found in popular period pattern books and catalogues for kit-houses published between 1920 and 1940. In 2008, Rosemary Thornton, author of *Houses That Sears Built*, conducted a survey for the City of Colonial Heights to identify potential kit-houses. Six likely examples in the district are the Bungalow with Tudor Colonial Revival-style details at 220 Danville Avenue (106-5063-0007); the American Foursquare with Colonial Revival details at 203 Norfolk Avenue (106-5063-0105); and the Bungalows at 108, 120, and 211 Suffolk Avenue (106-5063-0168, 106-5063-0175 & 106-5063-0187) and 601 Lafayette Avenue (106-5063-0025). Of these houses, five are from period Sears kit-house catalogs and one is from a period Aladdin catalog.⁴

In addition to the Craftsman-influenced styles, which may also display other stylistic details, the district includes basic variations of the Colonial Revival style including Tudor and Cape Cod. Most are distinguished by symmetrical composition, hip or side-gable roofs, double-hung sash windows, and porches with classical columns, while some also display features of a Victorian nature.

Victorian features are displayed in some of the earliest Colonial Revival houses. Side-by-side examples are found at 202 and 204 Suffolk Avenue (105-6053-0181 & 105-6053-0182). Colonial Revival features include Doric porch columns, double-hung sash windows, and entrance systems with multi-paned sidelights and transoms. Although the dwelling at 202 Suffolk Avenue displays a symmetrical façade, a touch of Victorian is visible in the shallow, two-story semi-hexagonal bay with its large, overhanging pedimented gable. Character-defining features of 204 Suffolk Avenue include an asymmetrical façade, a prominent roof-top gable, a metal-clad pyramidal roof, and a shallow, semi-hexagonal front bay.

Tudor Revival characteristics are often represented in asymmetrical composition, steeply pitched roofs; cross gables; mixed use of wall sheathing; and massive chimneys. The house at 131 Danville Avenue (106-5063-0002), circa 1920, is a modest one-story, three-bay frame building distinguished by a steeply-pitched, asymmetrical, front-gabled entrance bay, a side-gable roof, and a simple cornice with dentils. Tudor influence is also apparent in the arched entrance and the stucco-and-half-timbering in the gable end.

Though most of the streets in the district are characterized by small groups of architecturally related houses, there are several singular architectural styles represented within the boundaries. The dwelling at 105 Suffolk Avenue (106-5063-0167) is a one-of-a-kind dwelling constructed circa 1917. This Eclectic-style house displays three bays at the first story, two bays at the second story, a full-width porch, and a complex roof system with a hip-on-mansard roof and intersecting asymmetrical shed roof and side dormers. The

National Park Service**

**NATIONAL REGISTER OF HISTORIC PLACES
CONTINUATION SHEET**

**Chesterfield Highlands Historic District
Colonial Heights Independent City, VA**

Section 7 Page 5

odd, top-heavy appearance of this dwelling is attributable to the full-story height of the mansard roof, the deep inset face of the gable on the face of the second story, and the depth of the first-story porch that is sheltered beneath the extension of the story above. Four substantial square columns with paneled bases, equally spaced across the first-story façade and the broad architrave, provide some measure of balance.

Another one-of-a-kind dwelling is 309 East Westover Avenue (106-5063-0226), dated circa 1900.⁵ The two-and-one-half-story, three-bay frame dwelling displays the distinctive gambrel roof associated with the Dutch Colonial style. The house features boxed eaves, a full-width, shed-roofed porch with Doric columns, a standing-seam metal roof, and full-width shed-roofed dormer topped with a front gable. The orientation of this house is different from houses built during suburban development; it is the only house in the district that does not face a principal street. Rather, the side of the house faces East Westover while the façade looks toward a short side-street, Fisher Avenue.

A significant wave of mid-twentieth-century construction in the district produced a collection of Southern Colonial Cape Cod-style houses, a compact derivative of the Colonial Revival style. The Williamsburg Colonial Revival movement that swept the state in the late 1920s and 1930s inspired the construction of some accurately detailed Colonial-styled houses in Chesterfield Highlands. Between 1940 and 1954, twenty-four Cape Cod-style houses, representing ten percent of the residential fabric, were erected in the district. Typically, the Williamsburg-influenced houses are symmetrical, one-and-one-half-story, three-bay buildings, executed in brick or wood-frame, with steeply pitched, side-gable roofs. One example is the one-and-one-half-story, five-bay, red brick dwelling at 220 Norfolk Avenue (106-5063-0114), erected in 1949. The house features a symmetrical façade; a steeply pitched, side-gable roof; a corbelled exterior-end brick chimney; multi-paned double-hung wood windows with wide muntins; a trio of evenly spaced front-gabled dormers; and symmetrical wings. A smaller example is the wood-frame dwelling at 915 Lafayette Avenue (106-5063-0052). Constructed in 1938, this one-and-one-half-story, three-bay dwelling features a steeply-pitched, side-gable roof of standing-seam metal; a front-gabled entrance porch with a pediment and Doric columns; symmetrical front-gabled dormers and double-hung sash windows.

Approximately 20 examples of Minimal Traditional houses were identified in the historic district. Typical features of these compact dwellings include a brick foundation, side-gabled roof, one exterior brick chimney (although some have an interior chimney), and shed-roofed porch. Minimal Traditional houses feature very little architectural embellishment, although a nod to the Colonial Revival tradition may be seen in the arrangement of fenestration, very simple door surrounds, or porch columns. The appeal of Minimal Traditional dwellings during the post-World War II period lay in their compact size and affordability, making them easy to build and within financial reach of many families.

Another mid-twentieth-century house-type, the Ranch, was constructed in Chesterfield Highlands in the post-World War II building boom. A typical Ranch-style house in the district is an elongated, one-story building with a rectangular or L-shaped form, a low-pitched, side-gable or hipped roof, mixed window configurations often including picture or strip windows, a low-to-the-ground profile, and minimal application of exterior decoration. The ranch houses in the district generally have brick-veneer exterior walls. A representative example of the Ranch style in the district is 122 Norfolk Avenue (106-5063-0098). Constructed in 1950, the one-story, five-bay brick dwelling features a low-slung hipped roof, overhanging eaves, a central porch inset beneath the roof, and paired double-hung wood windows. A smaller, plainer

**United States Department of the Interior
National Park Service**

**NATIONAL REGISTER OF HISTORIC PLACES
CONTINUATION SHEET**

**Chesterfield Highlands Historic District
Colonial Heights Independent City, VA**

Section 7 Page 6

variation of the Ranch style is 215 Suffolk Avenue (106-5063-0189). Also built in 1950, this one story, four-bay ranch house has exterior walls of cream, apricot, red-orange, and terra cotta-colored bricks, a low-pitched, side-gable roof, and a combination of double-hung and tripartite windows.

The only apartment building in the district is 303 Lynchburg Avenue (106-5063-0085), a two-story, five-bay brick building in the Colonial Revival style. Constructed in 1950, the building displays richly colored red and blue brickwork, brick sills and flat arches, a hipped roof, and a combination of single and tripartite double-hung sash windows. The Colonial Revival character is displayed in the stately Georgian presentation and in the classically inspired pent at the front entrance. The pent features a molded returning cornice, a modillion raking cornice, and heavy scrolled support brackets.

Secondary Resources

The contributing dependencies are mostly one or two-bay or two-bay garages or utility sheds. Approximately twenty percent of the houses in the district have a contributing garage, reflecting the progressive transition of the district from "streetcar suburb" to "automobile suburb". Historic garages are most often wood-frame construction with gable roofs and standing-seam or corrugated metal siding. Typical examples include 201 Danville Avenue (106-5063-0003), 120 Lynchburg Avenue (106-5063-0071) and the string of garages associated with the Bungalows at 115, 119, and 121 Richmond Avenue (106-5063-0140; 106-5063-0141 & 106-5063-0142). The latter group, built circa 1930, is composed of one-story, one-bay, side-gable-roofed buildings of wood-frame and corrugated metal composition. As is often typical of early "auto-barns", these buildings are positioned behind their respective associated houses, near the rear property line and along the public alley.⁶ The one-story, one-bay, wood-frame-and-weatherboard garage at 201 Danville Avenue retains a character-defining three-part, hinged, folding wood door with recessed vertical panels and four-light fenestration. The garage at 120 Lynchburg Avenue is a one-story, one-bay building with a metal-clad pyramidal roof, exposed rafter tails, and board-and-batten siding.

Newer garages and sheds are finished to match the primary resource with exterior walls finished with brick, weatherboard, vinyl or stucco. Generally, backyard garages and sheds are not visible from the primary streets and walkways, except where the dwellings occupy corner lots. The non-contributing secondary buildings are small, portable sheds which have little impact on the visual integrity of the district or newer garages erected outside the period of significance.

Institutional and Commercial Resources

There are three neighborhood churches in Chesterfield Highlands Historic District. The Baptist, Methodist, and Presbyterian congregations responsible for the construction of the original church sanctuaries in the district were offshoots of congregations in Petersburg.⁷ The formation of the congregations and their subsequent expansive building programs correlate with the growth of the residential neighborhood.

The first Church built within the district boundaries was Highland Methodist Episcopal Church (106-5063-0210) (present-day Highland United Methodist Church).⁸ In 1919, Watson Realty Company donated two lots for the church at 125 East Westover Avenue.⁹ The cornerstone for the Colonial Revival-style church was laid in 1920 and the building program was supervised by Jacob Savage.¹⁰ Anchored by the sanctuary

Colonial Heights Independent City, VA**

Section 7 Page 7

building fronting on East Westover Avenue, the present-day church complex is composed of six inter-connected brick units. The sanctuary is a cruciform-shaped, temple-front building with a regular rhythm of arch-topped stained glass windows on all elevations. The building is constructed of deep red brick, laid in stretcher bond, and is capped with a standing seam metal roof. The focal point of the sanctuary unit is its soaring, three-part belfry and steeple. Additions and renovations were completed in 1942; 1947; 1969; and 1995. In 1998, a bell tower was installed in the courtyard adjacent to the sanctuary and the stained glass windows in the sanctuary were restored.¹¹

The congregation of Immanuel Baptist Church (106-5063-0029) was first organized at the Colonial Heights Graded School (demolished and replaced by Flora Hill Park). The cornerstone of the original sanctuary, situated at the corner of Lafayette and Lynchburg Avenues, was laid in 1932. The red brick, Colonial Revival building features a temple-front supported over monolithic, two-story fluted columns and square fluted pilasters. An extensive building campaign, begun in 1959, produced three additional, monumental brick buildings that are connected to the original sanctuary by smaller brick hyphens. The largest building is the 1959 Colonial Revival-style sanctuary, distinguished by a soaring five-part steeple, a front-gabled roof, and shallow pedimented entrance bay. Late in the twentieth century, five houses across the street from the church complex were demolished to install a parking lot.

The last neighborhood church erected within the district was the Colonial Revival-style Colonial Heights Presbyterian Church, 211 Lynchburg Avenue (106-5063-0078). The congregation was formed in 1923. That same year, the congregation purchased a lot and built a two-story frame house that served initially as both a church and a manse. After a slow start, the cornerstone for the sanctuary was laid in April 1950.¹² Local architect Randolph Gailey designed the building. Constructed of red brick laid in Flemish bond, the sanctuary displays a front-gabled façade embellished with a deep, returning modillion cornice. A conical, copper-roofed belvedere straddles the ridgeline. The entrance features a classical frontispiece with fluted pilasters and a broken pediment. The side elevations are supported by a regular rhythm of limestone-embellished engaged pilasters. Fenestration is composed of stained glass windows with arched tops and limestone accents. A one-story, two-bay brick hyphen connects the back of the sanctuary to an L-shaped, two-story Sunday school building.¹³ The two-story frame house was demolished to make way for the construction of the Sunday school building in 1965. The parking lot was installed on vacant church property in the 200-block of Danville Avenue, behind the sanctuary, in 1981.¹⁴

At the southwest corner of the district, a cluster of small-scale commercial buildings are included within the district boundaries because of their perennial association with the residential neighborhood. The Pickwick Avenue shopping area, built in the 1940s and early 1950s, is composed of one and two-story brick buildings, most with common sidewalls.¹⁵ The buildings display flat or low-pitched hipped roofs; parapets with limestone coping; recessed entrance doors with transoms; and large storefront windows. Decorative embellishments include molded door and windows surrounds; engaged pilasters, modillion cornices; and awnings.

Condition and Integrity

The Chesterfield Highlands Historic District retains high physical integrity in the areas of architecture and community planning and development. Most of the historic dwellings retain their original form, building

CONTINUATION SHEET**

**Chesterfield Highlands Historic District
Colonial Heights Independent City, VA**

Section 7 Page 8

fabric, and character-defining features. A majority of frame houses seem to have newer surface materials such as vinyl siding, but the architectural character and general integrity conveyed by the form and decorative elements remain intact. At least half of the houses have vinyl replacement windows. The historic plan of the district, generally defined by the linear quality of the streets, the alleys that run parallel to the streets behind a majority of houses, and the size and shape of the lots, is preserved as recorded on plats filed in Chesterfield County in 1916. A small number of the district's historic resources have been lost through the years, mostly due to encroaching commercial development along the Boulevard or the installation of surface parking around the churches.

Organization and Labeling of the Inventory

All of the resources in the inventory, both primary and secondary, are listed numerically by street address. Named streets are listed in alphabetical order. All resources, both primary and secondary, are designated contributing or non-contributing based upon the areas of significance and their integrity to the period of significance. All non-contributing resources are so designated either because they were constructed after 1954 or because they do not have sufficient physical integrity to represent the period and areas of significance.

INVENTORY

BOULEVARD

1021 Boulevard 106-5063-0231

Primary Resource Information: Single Dwelling, Stories 2.00, Style: Tudor Revival, ca 1920

1021 Boulevard is a two-story, three-bay frame dwelling representing the Tudor Revival style. The house has one exterior-end brick chimney, a continuous brick foundation, a one-story, partial-width, front-gabled porch (enclosed), a front-gable roof with standing-seam metal covering, and aluminum siding. Fenestration on the façade is composed of 8/8 and 6/6 double-hung vinyl (replacement) windows. There is a one-story, three-bay concrete block wing on the south elevation. The dwelling occupies a level, rectangular corner lot. The building is setback approximately thirty-five feet from the street. There is paved parking along the north and west property lines. The foundation is planted with a mix of ornamental shrubs. There is a one-and-one-half-story, gable-roofed brick and wood-frame building behind (south elevation) the primary resource.

630 Lafayette Avenue 106-5063-0029

Primary Resource Information: **Church, Stories 2.00, Style: Colonial Revival, 1932**

Immanuel Baptist Church, 630 Lafayette Avenue, is a sprawling brick complex composed of four monumental brick units connected by smaller brick hyphens. The entire complex forms a monolithic unit. The church complex occupies more than three-fourths of the (even) 600-block of Lafayette Avenue, on the west side of the street. Two of the building-units wrap around the corner of Lynchburg Avenue. The church parking lot is situated across the street and occupies all of the (odd) 600-block. The entire complex is constructed of red brick, laid in stretcher bond. In the middle of the block, the principal building unit, built in 1959, is the Colonial Revival-style sanctuary, distinguished by its soaring, steeple-topped, bell tower. The sanctuary features a front-gabled roof, a shallow pedimented entrance bay, four evenly spaced, two-story fluted pilasters, and brick quoins. The front entrance is recessed and is faced with cream-colored limestone. A smaller sanctuary, built in 1932, is located at the corner of Lafayette and Lynchburg Avenues. The temple-front is supported over monolithic, two-story Doric columns and square fluted pilasters. The space between the sanctuaries is filled with a recessed two-bay hyphen; a boxy two-story, brick educational building; a side-gable-roofed wing; and a one-story, semi-hexagonal entrance pavilion.

There are two pre-fabricated wood-frame sheds at the edge of the church parking lot, one at the north edge and the other at the south edge.

401 Lee Avenue 106-5063-0063

Primary Resource Information: Single Dwelling, Stories 1.50, Style: Colonial Revival, Cape Cod, ca 1939

401 Lee Avenue, circa 1930, is a one-and-one-half-story, three-bay brick dwelling representing the Cape Cod style. The house features one interior brick chimney, a continuous brick foundation, a front-gabled hood with decorative brackets over the front entrance, a side-gable roof with metal covering, and symmetrical front-gabled dormers. The dwelling is attractively balanced by symmetrical frame-and-weatherboard wings. The wings are set-back from the façade of the main block, and they have a lower roof plane. The roofline of the main dwelling displays a dentilled cornice. Fenestration on the façade is composed of 6/6 double-hung wood windows with aluminum storm windows and a tripartite picture window.

There is a frame and corrugated metal, gable-roofed shed behind the dwelling near the east property line.

108 Lynchburg Avenue 106-5063-0067

Primary Resource Information: **Single Dwelling, Stories 1.00, Style: Mixed (more than 3 styles from Different periods), ca 1920**

108 Lynchburg Avenue is a one-story, three-bay frame dwelling with both Craftsman and Italianate stylistic elements. The house features a continuous brick foundation, a one-story, full-width porch with battered columns on brick piers, a hipped roof with asphalt shingle covering, a central front hipped dormer, and vinyl siding. Fenestration on the façade is composed of paired, 4/4 double-hung wood windows with arched tops. Each pair of windows is topped by a molded cornice, supported by three corbels. The over-hanging eave is embellished with a bracketed cornice. The overall form and the porch borrow from the Craftsman style, but the decorative details are inspired by Italianate elements. There is a wood-frame, gable-roofed shed behind the dwelling, near the rear property line.

211 Lynchburg Avenue 106-5063-0078

Primary Resource Information: **Church, Stories 2.00, Style: Colonial Revival, ca 1940**

Colonial Heights Presbyterian Church, 211 Lynchburg Avenue, overlooks a triangular park, dedicated to the Chesterfield Highlands neighborhood, at the intersection of Lynchburg and Danville Avenues. Constructed of red brick laid in Flemish bond, the sanctuary displays a front-gabled façade embellished with a deep, returning modillion cornice. A conical, copper-roofed belvedere straddles the ridgeline, set back a few feet from the apex of the front gable. The double-leaf entrance is surrounded by a classically inspired frontispiece composed of fluted pilasters and a molded, broken pediment topped with an urn. The side (north and south) elevations are characterized by a regular rhythm of structural, engaged brick pilasters, each topped with a limestone block, and arch-top stained glass windows with limestone accents. The rectangular sanctuary building is noticeably elongated, three bays wide and eight bays long. A small, one-story, 2-bay brick hyphen at

the back of the sanctuary connects it to a large L-shaped, two-story, hip-roofed brick educational and administrative building.

The Colonial Heights Presbyterian Church Office Building is a one-story, front-gabled, brick building that faces Lynchburg Avenue. The façade is distinguished by its pedimented gable with molded horizontal and raking cornice; 12/12 windows, and classical portico with square fluted columns and engaged pilasters, beaded frieze, and double-leaf doors topped with a multi-light transom. The church complex occupies a level, wedge-shaped lot, edged by a concrete city sidewalk. A concrete walkway leads from the front sidewalk to the main entrance. The parcel is dotted with large trees that soften the visual impact of the church complex. A paved parking lot, situated south and east of the sanctuary, is accessed from Danville Avenue.

There is a one-story, gable-roofed, wood frame shed in the church parking lot, near the center of the east property line.

300 Norfolk Avenue 106-5063-0115

Primary Resource Information: **Flora M. Hill Park, c. 2000**

300 Norfolk Avenue is the Flora M. Hill Park, a park that is owned and maintained by the City of Colonial Heights Department of Recreation and Parks. A bronze plaque located in the heart of the park notes that "Flora M. Hill Park was developed by individuals, businesses, civic groups, Flora M. Hill Neighborhood Association, and the City of Colonial Heights in a cooperative effort to improve the quality of life in Colonial Heights." The 2.1-acre park occupies the site of the former Flora M. Hill School, named for a principal who served the community for many years. The level grassy park is bordered on all four sides by a concrete city sidewalk. Two inter-connected circular walkways provide access to the interior of the park. The park is dotted with a variety of trees. A raised brick planter, filled with low-growing shrubs, ornamental trees, and flowering bulbs, borders the sidewalk along Norfolk Avenue.

111 Pickwick Avenue is a one-story, brick commercial building. The building features a flat roof hidden behind a low (painted) brick parapet. The facade is filled with a band of large plate glass windows with aluminum frames, vertical mullions, and soldier-coursed brick sills. The bulkhead is veneered with brick laid in stretcher bond. The entrance is composed of a double-leaf glass-and metal door and transom system. The façade is characterized by a shallow, full-width pent. The building is currently occupied by Tae Kwon Do.

*Individual Resource Status: Commercial Building Contributing Total: 1***114 Pickwick Avenue 106-5063-0128***Primary Resource Information: Commercial Building, Stories 1.00, Style: Commercial, ca 1953*

114 Pickwick Avenue is a one-story, three-bay brick commercial building with minimalist neo-classical ornamentation. The building features a flat roof hidden behind a low parapet and brick exterior walls laid in seven-course American bond. The entrance is recessed, flanked by paired fluted pilasters and topped with a shallow pediment that is supported by a full-width molded cornice. The cornice is supported at each of the corners on the façade by paired, engaged, fluted pilasters. Fenestration on the façade is composed of symmetrical, multi-light, fixed-glass wood windows with wood siding in the apron beneath each window sill. The building is currently occupied by Hamilton Law Office.

125 Pickwick Avenue is a one-story, two-bay brick commercial building. The building features a flat roof hidden behind a low parapet, and brick walls laid in seven-course bond. The building has decorative rowlock brickwork at the roofline and brick sills. There is a modillion cornice above the window and door heads on the façade. The building shares common walls with the buildings at 123 and 127 Pickwick Avenue. There is one large plate glass window and one door-and-transom entrance on the façade. The building is currently occupied by Yellow Cab.

Individual Resource Status: Commercial Building *Contributing Total: 1***127 Pickwick Avenue 106-5063-0133****Primary Resource Information: Commercial Building, Stories 2.00, Style: Commercial, ca 1949**

127 Pickwick Avenue is a large, two-story brick commercial (first floor) and residential apartment (second floor) building. The first floor is sub-divided into four separate commercial units. The building features a flat roof hidden behind a parapet and brick walls laid in seven-course American bond. There are four plate-glass commercial storefronts at the first story and a regular rhythm of thirteen metal casement windows at the second story. The building has a pent. One commercial unit (131) retains its original recessed, wood door-and-transom entrance system. The other units have aluminum and glass replacement entrance systems. The second story of this building contains eight residential apartments. The building is currently occupied by Tobacco Zone (127); L. E. Print Gallery & Custom Framing (131); and Dominion Communications Systems (135). Unit 129 is vacant. Signage shows that the building was formerly occupied by Back-N-Time Antiques-

105 Suffolk Avenue 106-5063-0167

Primary Resource Information: Single Dwelling, Stories 2.50, Style: Other, ca 1917

105 Suffolk Avenue is one of the most unusual dwellings in Chesterfield Highlands; it is one-of-a-kind. The dwelling may be best categorized as Eclectic. The building has two stories, three bays at the first story, and two bays at the second story. The house features one interior brick chimney and one exterior brick chimney, a continuous concrete foundation, a one-story, full-width engaged porch with paneled square columns, a hip-on-mansard roof with asphalt shingle covering, hipped dormers on the side elevations (east and west elevations), and aluminum siding. Fenestration on the façade is composed of 6/1 double-hung wood windows. The dwelling has a top-heavy appearance due to its substantial roof and the depth of the engaged porch beneath it. Four substantial square columns, equally spaced across the first-story façade, provide some measure of balance. The columns have inset panels and molded bases and capitols.

There is an elongated wood-frame, gable-roofed garage with a shed-roofed extension behind the dwelling, near the rear property line.

Westover Avenue, East

125 Westover Avenue, East 106-5063-0210

Primary Resource Information: Church/Chapel, Style: Colonial Revival, ca 1920

The Highland United Methodist Church complex occupies approximately two-thirds of the city block bounded by East Westover Avenue on the north; Hill Place on the east; Richmond Avenue on the south; and Boulevard on the west. The church complex is composed of six inter-connected brick units anchored by the original sanctuary building fronting along East Westover Avenue, at the corner of Hill Place. The sanctuary, built in 1920, is a cruciform-shaped building with a bold pedimented gable on the façade and wings and a regular rhythm of richly-hued, round-arched stained glass windows on all elevations. The building is constructed of deep red brick, laid in stretcher bond, with simple relieving arches, capped with a standing seam metal roof. The principal entrance is recessed with a neo-classical frontispiece. The double-leafed entrance doors are paneled and topped with a stained glass transom. The focal point of the sanctuary unit is its soaring, three-part bell tower, topped with a hexagonal steeple. Wrapping in a U-shape around the sanctuary are three, two-story rectangular brick units that create a landscaped courtyard along East Westover Avenue. The courtyard is criss-crossed by concrete walkways with a metal-capped brick tower in the center. Two small one-story brick hyphens on the west elevation connect the larger complex to a square, modern brick building with an attached porte-cochere at the west end. Additions and renovations were completed in 1942; 1947; 1969; and 1995. In 1998, a bell tower was installed in the courtyard adjacent to the sanctuary and the stained glass windows in the sanctuary were restored.

There is a pre-fabricated wood-frame, gable-roofed shed at the west end of the church parking lot. There is a metal carport in the lot.

SIGNIFICANCE STATEMENT

The Chesterfield Highlands Historic District is significant under National Register Criterion A in community planning and development, and under Criterion C in the area of architecture. The Period of Significance spans the period from 1916 to 1954. The beginning date of 1916 is the date that the original legal plat was filed in Chesterfield County and the end date of 1954 correlates with the final build-out of the district which occurred during the post-World War II building boom. The historic district stands out as one of the largest and earliest of the planned suburbs in the City of Colonial Heights, Virginia. The original plan for Chesterfield Highlands is an important example of early twentieth-century suburban design. Prepared by a civil engineer, the carefully scaled plat incorporated specifications from Pollard's Code of Virginia.¹⁸ The neatly delineated plan, divided into blocks and further subdivided into lots of uniform size, is prototypical of early-twentieth-century suburbanization. The emergence of the suburban town was directly correlated to the successful introduction of the Richmond-Petersburg Interurban Street Railway. Transformation of "the heights" along the north bank of the Appomattox River from undeveloped farm land to a town of planned suburbs was rapid, attributable to speculative real estate ventures. The original legal plat for Chesterfield Highlands was filed in 1916 by R. L. Watson, a real estate developer from the City of Petersburg. The plat depicted the street railway track running along the Boulevard from present-day Pickwick Avenue, past East Westover Avenue (then Lyons Road) with two passenger stops within easy walking distance of the suburb. House building was brisk after the original legal plat was filed, with the majority of houses constructed between 1920 and 1940. The architecture showcases several period kit-houses and numerous other examples of houses that appear to be period catalog-inspired designs. The form, massing, and roof composition of a large number of houses appear to be borrowed from the Craftsman movement, although all do not necessarily display characteristic Craftsman-style details. In the decade following World War II, new buildings constructed in the district reflected evolving preferences in residential design. Nearly all of the houses built between 1945 and 1954 are building types popular in the post-World War II period, particularly Cape Cod, Minimal Traditional, and Ranch. Chesterfield Highlands, with uniform massing, standardized setbacks, dense residential character, sidewalks, mature trees, and service alleys, is representative of a significant period in American residential suburban design.

Community Planning and Development

The Chesterfield Highlands Historic District is significant in the area of community planning and development as an illustration of an important trend in the history of suburbanization in America.¹⁹ The context of the district is the suburbanization of Colonial Heights, a city almost wholly comprised of contiguous, carefully designed suburbs. Many American cities, including nearby Petersburg and Richmond, include turn-of-the-twentieth-century suburbs established in concentric rings around an older urban core. The formation of Chesterfield Highlands is synchronous with the progression of Colonial Heights from an emerging cluster of suburban residential neighborhoods to a town and finally to a city.

The birth of the American suburb was influenced by the "White City", a showcase designed by Frederick Law Olmstead for the World's Fair Columbian Exposition of 1893.²⁰ The emphasis on the classical orders

Section 8 Page 61

of architecture, orderly planning, and cleanliness appealed to the expanding and increasingly prosperous American middle class. By the late-nineteenth century, American cities were considered overcrowded, dirty, and noisy. In response to a nationwide desire to live in a clean, healthy environment, families looked to outlying "green" areas that were increasingly accessible through improvements in transportation. Early twentieth-century suburbs were platted, subdivided and built according to a plan and laid out in accordance with specific design principles.²¹

As a suburban neighborhood, Chesterfield Highlands took its form in a three-layered process: (1) selection of a location; (2) platting and layout; and (3) design of the house and yard.²² The new, emerging model for residential neighborhoods offered efficient, comfortable houses constructed in then-fashionable architectural styles. A map of Colonial Heights, compiled in 1924 from early-twentieth-century "plats of record", showed that the present-day City of Colonial Heights was almost wholly composed of contiguous, named suburbs: Colonial Heights (1910); Colonial Heights Extended (1912); Chesterfield Heights (1916); Chesterfield Highlands (1916); Riverside Park (1916/1920); Riverview (1923); Chesterfield Place; Oak Hill Place; and City View Place. Chesterfield Highlands stands out as the largest and one of the earliest of the designed suburbs situated near the center of Colonial Heights.²³

Trends in planning and domestic land use generally included deed restrictions and subdivision regulations to promote uniformity and to safeguard property values. Curbs, standardized set-backs, and sidewalks between the streets and dwellings were typical mandates.²⁴ Modern amenities, including granolithic sidewalks, municipal water, sewer service, and electric light and telephone service, were within the realm of possibility at the turn of the twentieth century.²⁵ The original legal plats for the various suburbs in Colonial Heights, including Chesterfield Highlands, complied with building specifications and deed restrictions. Protective covenants were a two-way street, with requirements spelled out for both the real estate development company and the prospective property owner.

In Chesterfield Highlands and throughout the emerging City of Colonial Heights, street frontage on house-lots ranged between 50 and 150 feet. Lot depths ranged between 100 and 600 feet. The developer's commitment generally required (1) that a granolithic sidewalk be laid in front of each lot; (2) that streets and avenues be graded and curbed with concrete curbs and gutters; (3) that the streets be macadamized (paved); (4) that sewage and water pipes be laid across the front of each lot; (5) that electric lights be guaranteed; and (6) that shade trees be planted on all streets and avenues.²⁶ Initially, the short list of mandates for property owners were (1) that no more than one dwelling be built per lot; (2) that houses be set back 25 feet from the street or avenue; (3) that no board fences be built on the property; (4) and that all houses be connected to the sewer system.²⁷

Architecture

The historic district's significance in the area of architecture is associated with the consistency of architectural design. Many of the dwellings in the neighborhood are Craftsman-inspired in form but were apparently built with an eye to economy and thus lack typical Craftsman-style embellishments. The Colonial Revival style is represented and frequently embellished with Victorian-era or Tudor Revival characteristics. Several dwellings in the district compare to published drawings of period kit-houses or

catalog-inspired architectural designs. Widely popular among working and middle-class Americans in the early decades of the twentieth-century, kit-houses and architect-designed plans published in catalogs offered an efficient and economical path to home ownership. House-kits and design catalogs produced homogenous residential neighborhoods, like Chesterfield Highlands, of well-crafted houses.

Kit House and Catalog Designs

In 2008, Rosemary Thornton, author of Houses That Sears Built, identified forty kit-houses in Colonial Heights. The majority of kit-houses were ordered from Aladdin and Sears catalogs. Five kit-houses were identified in Chesterfield Highlands.²⁸

According to Thornton, "*Between 1908 and 1940, more than 75,000 Sears homes were built. Sears kit homes contained 30,000 pieces, including 750 pounds of nails, 27 gallons of paint and a 75-page instruction book. Sears estimated that the average carpenter would charge \$450 to assemble those 30,000 pieces of house. The painter's fee: \$34.50. Sears estimated that other skilled labor would cost \$1 an hour. Prices for these build-it-yourself kit houses ranged from \$600 to \$6000.*"²⁹ Houses built from Sears kits between 1915 and 1940 were identified by Sears part numbers, stamped in dark blue, black or red ink. The numbers, about less than one-inch high, consisted of a capital letter followed by one or more numerals, e.g. A159, C23, etc. Most houses built before 1920 did not have stamped lumber.³⁰ Sears kit houses also had 15 inches between the framing members, shipping labels on the back of millwork and moldings, sheetrock (4-foot by 4-foot) stamped with "Goodall Sheet Plaster", and plumbing fixtures stamped with "S" or "SR".³¹

Two houses on Suffolk Avenue correlate with Sears kit-house types and a third house on Suffolk Avenue was probably inspired by a kit-house design. The dwelling at 108 Suffolk Avenue (106-5063-0168) is "The Westly" from the *1928 Sears Modern Homes Catalog*.³² This model was advertised as a Sears "Top 10 Best Seller" with "the architectural beauty of a modern bungalow".³³ Distinctive features include a roofline that is shorter in the rear than in the front and a large, central, front-gabled dormer with a door and flanking windows that lead to a balconette. The original advertisement notes that the large front porch, 30 feet long by 8 feet wide, "can be screened or glazed".

"The Sunbeam" from the *1922 Sears, Roebuck and Company Catalog* is exemplified in the dwelling at 211 Suffolk Avenue (106-5063-0187). Described as a "five-room modern bungalow with an open air sleeping porch", the "already cut and fitted" house kit sold for \$2425.³⁴ Although this house has been extensively re-modeled, it retains features characteristic of The Sunbeam including the side gables, with the front longer than the back; fireplace mantel; windows flanking the recessed space in the dining room (for a buffet); and five-panel interior doors with original hardware.³⁵

The dwelling at 112 Suffolk Avenue (106-5063-0171) may have been inspired by "The Westly" prototype but it was probably not built from a Sears kit.³⁶ It was built circa 1928 by Ivey N. and Ruth J. Woodall, the latter a saleslady at the Rucker Dry Goods Store. The metal roof could have been sheathed by Henry C. and Lewis V. Woodall (who also occupied the house); both were listed as "tinnerns" in the 1928 City Directory.

NATIONAL REGISTER OF HISTORIC PLACES
CONTINUATION SHEET

Chesterfield Highlands Historic District
Colonial Heights Independent City, VA

Section 8 Page 63

The dwelling at 203 Norfolk Avenue (106-5063-0105) is similar to the "The Americus" kit house in the 1925 *Sears Modern Homes Catalog*.³⁷ According to the advertisement, the Americus was a Sears "Top 10 Best Seller". The model was described as "a dignified, substantial house that will...never go 'out of style'...with lots of big closets". Typical character-defining features of this model include the multi-level hipped roof and a solitary window next to the front door, apart from the other paired windows on the facade.

The dwelling at 220 Danville Avenue (106-5063-0007) correlates with the "The Mitchell" kit-house in the 1928 *Sears Modern Homes Catalog*, though its roof pitch is slightly lower than the original design.³⁸ The advertisement notes that "The Mitchell follows the latest ideas in English architecture with a touch of the popular California studio type". The advertisement described the design as refined, economical, modern throughout, and well-planned with liberal space. The dwelling is characterized by two front gables, one higher than the other, a vented louver near the peak of the higher gable, a chimney with a stone base and a brick upper-extension, operable colonial-type shutters with iron hardware on the façade, and an arched front door with strap-iron hinges with a lamp above. The dwelling deviates from the prototype in that the walls are of brick veneer in place of shake siding and that the front bay has triple sash windows in place of paired French doors. On the interior, the 992-square-foot plan compares favorably with "The Mitchell".³⁹ Features include a vestibule on the right with a small casement window and "roomy closet"; a plaster archway leading from the vestibule to the living room; a plaster arch between the dining and living rooms; recessed spaces in the living room wall, opposite the vestibule, with built-in bookcases; and floor boards laid on the diagonal.⁴⁰ The Mitchell-house had clones in both Aladdin and Gordon Van Tyne catalogs; it is difficult to distinguish one from the other except when exterior dimensions vary slightly from one company to the other, a common practice when one company "borrowed" from another.⁴¹

The dwelling at 601 Lafayette Avenue (106-5063-0025) correlates with the "Winthrop", a model kit-house manufactured by Aladdin of Bay City, Michigan.⁴² The *Aladdin Read-cut Kit Homes* catalog was published in 1916. Aladdin kit-houses offered modern amenities including indoor bathrooms, built-in clothes closets, and storage in the kitchen for pots and pans. Character-defining features of this one-story, three-bay brick bungalow include a front-gabled porch with battered columns, a cross-gable roof, deep overhanging eaves, and decorative brackets.

Craftsman-Influenced Architecture

There are two predominant types of Craftsman-influenced houses in the Chesterfield Highlands Historic District, the bungalow, popular nationwide between 1905 and 1930, and the American Foursquare, popular between 1895 and 1930. The bungalows in the district most often display one or one-and-one-half stories, low-pitched roofs, gabled dormers, wide eaves with exposed rafter tails or brackets, decorative brackets or consoles, and full-width porches with square or battered columns. The larger house-type in the district, the American Foursquare, was popular because it offered roomy interiors even on small suburban lots. The American Foursquare featured a plain box form, two-and-one-half-story height, a four-room plan, a low-pitched hipped roof, deep eaves with brackets, a central front dormer, a full-width porch, brick, stucco or weatherboard siding, and elements derived from Craftsman or Colonial Revival design. A majority of bungalows and American Foursquares exhibit roofs sheathed in expertly-crafted, heavy-gauge, standing-seam metal. As a significant and unifying feature, the district retains, in a good state of preservation, one of

Section 8 Page 64

the largest concentrations of metal roofs in the Colonial Heights area.

Post-World War II Architecture

The final surge of residential development in the Chesterfield Highlands Historic District continued the emphasis on modest dwellings with limited architectural embellishments, but also highlighted an important trend in mid-twentieth-century American residential design. Reflecting the evolving aesthetic and utilitarian preferences of the burgeoning middle class in the post World War II environment, three quintessential house-types appeared - the Cape Cod, Minimal Traditional, and Ranch. Between 1945 and 1954, a substantial wave of construction filled the remaining lots in the district, mostly with variations of these house styles. The popularity of the Cape Cod-style house in Virginia was influenced by the rebuilding of Colonial Williamsburg in the late 1920s. Between 1940 and 1954, twenty-four Cape Cod-style houses were erected in the district. During this same period, approximately twenty Minimal Traditional dwellings were built. Described as the "Plain Jane of 20th century residential architecture", the Minimal Traditional designation in Chesterfield Highlands generally describes a compact cottage. This house type was popular in America between 1930 and 1950. Minimal Traditional houses often display asymmetrical composition; one-story; a medium-pitched, side-gable roof; a shallow front-gabled bay; and minimal ornamentation. Finally, four ranch-houses appeared in Chesterfield Highlands during the early 1950s. The twentieth-century Ranch house originated in California in the 1930s. The elongated, low-scale building-type gained popularity through the 1940s and 1950s across America. Over time, the ubiquitous ranch became the most popular and widely recognized middle-class house type in America. The Ranch style houses in the district are generally characterized by simplicity of form, minimal display of ornament, and efficiency in space-utilization.⁴³

HISTORIC CONTEXT

Early Land Use

When John Wood mapped Chesterfield County in 1820, the land area of present-day Colonial Heights, between Swift Creek and the Appomattox River, was criss-crossed with a network of roads. A grid of blocks and streets marked the village of Pocahontas (laid out in 1752) shown on the east side of the bridge to Petersburg.⁴⁴ At the bridge, Conduit Road (then Conjuror's Neck Road) and the Boulevard (then the "Turnpike Road" between Manchester and Petersburg) converged. Several plantations occupied the expansive "heights" overlooking Petersburg and the Appomattox River. From Conjuror's Neck, extending south and east along the Appomattox River were plantations associated with Kennon (Brick) House, Roslyn, Violet Bank, Oak Hill, Mount Pleasant, and Eilerslie.⁴⁵

Development on the north bank of the Appomattox River was dwarfed by the growth of Petersburg.⁴⁶ Civil War-era maps showed that while the north bank was served by several roads and the Richmond & Petersburg Railroad, Petersburg was connected to four major railroad lines, numerous roads, and a canal.⁴⁷ In 1888, when LaPrade published a Map of Chesterfield County, what would become Colonial Heights encompassed several "shops" and numerous plantations. LaPrade depicted Violet Bank (for which

an adjacent neighborhood was named), Oak Hill, Lynch, Wakefield, Brown, Andrews, Whitehead, Hankins and a couple dozen other unnamed farms.⁴⁸

Richmond-Petersburg Interurban Street Railway

The plan to install a railway connecting Richmond, Manchester and Petersburg was launched in 1886.⁴⁹ A promotional brochure, published in Petersburg in 1894, anticipated the impact of improved transportation on the area: "*Two projected lines of the railway promise to extend the city's transportation facilities and enlarge its sphere as a trade center. At the same time...an electric railway is proposed from the city through Chesterfield County to Richmond, a distance of some 20 or 25 miles*".⁵⁰ After more than a decade, Chesterfield County granted the Richmond & Petersburg Electric Railway Company the right to build along the Manchester & Petersburg Turnpike (Boulevard/Route 1/301).⁵¹ Local farmers and residents were proponents of the railway, granting rights of way with little fanfare. The Cleveland Construction Company from Akron, Ohio, won the contract to build the line.⁵² Eight heavyweight wooden cars and heavy-duty motor trucks came from the Jackson & Sharp Factory in Wilmington, Delaware. The primary goal of the railway company was to provide passenger service, and to that end, six of the eight cars were for passengers only.⁵³

At the outset, the Interurban Railway ran only between Manchester and Swift Creek, just north of Colonial Heights. Neither the City of Richmond nor the City of Petersburg had constructed bridges over the James and Appomattox Rivers, respectively, to accommodate the heavy interurban train. In 1901, Petersburg determined to build a new half-mile-long bridge above the river connecting Old Street in Petersburg to the north bank, near the intersection of Archer Avenue. In 1902, the new Bishop's Bridge over the Appomattox River was finished.⁵⁴ The inaugural run, on February 9, 1902, took an hour and fifteen minutes from Petersburg to Manchester. In the first year of operation, the Interurban transported 425,000 passengers. The roundtrip fare was 60 cents.⁵⁵ A promotional booklet for Chesterfield County described the area along the Richmond and Petersburg Electric Railway as "a continuous village" served by "some fifteen stops, with trolleys arriving and departing every half hour".⁵⁶

The correlation between the interurban railway and the development of Colonial Heights is indicated on early plats. For example, the plat for "The Highlands", a precedent of Chesterfield Highlands, noted that the walking distance from the street railway to the platted lots was 3 minutes. Plats for Chesterfield Highlands, filed in Chesterfield County in 1916 and 1917, showed the Richmond-Petersburg Interurban Street Railway running along the eastern edge of the Boulevard with stop number 62 slightly north of Lyon Avenue (present-day East Westover Avenue) and stop number 63 directly across from the north end of Suffolk Avenue.

Suburbanization of Southeastern Chesterfield County

Suburban expansion at the turn of the twentieth century, locally and nationally, was linked to advances in transportation. In Colonial Heights, the electric interurban railway fostered suburban growth by offering affordable and convenient transportation from outlying areas to jobs in nearby cities. Following the successful introduction of the interurban railway, the transformation of "the heights," as it is locally known,

**United States Department of the Interior
National Park Service**

**NATIONAL REGISTER OF HISTORIC PLACES
CONTINUATION SHEET**

**Chesterfield Highlands Historic District
Colonial Heights Independent City, VA**

Section 8 **Page** 66

from undeveloped farm land to a town of suburbs was rapid.

The first speculative real estate developer in Colonial Heights was Augustus Wright. Beginning in 1890, Wright purchased six tracts of farmland, a total of 364 acres, on the north side of the Appomattox River, mostly west of the Boulevard.⁵⁷ By 1894, Wright's Chesterfield Heights Land Company devised a plat of the company's real estate holdings, a subdivision plan of ten numbered blocks of various sizes and shapes. He designed the first suburb in Colonial Heights, "Chesterfield Heights," on the north bank of the Appomattox River. The neighborhood was to have a gridiron plan of uniform lots and a regular rhythm of streets. Between 1895 and his death in 1909, Wright sold most of his real estate in parcels without subdividing them into lots.⁵⁸

The second real estate developer in Colonial Heights was T. Marshall Bellamy. Petersburg's foremost late-nineteenth-to-early-twentieth-century real estate investor purchased three tracts for suburban development: (1) the 90-acre Violet Bank property; (2) the 5.95-acre City View property; and (3) the 105.78-acre Oak Hill property.⁵⁹ In 1909, Bellamy laid out the "Colonial Heights" suburb on the former Oak Hill and City View properties. Bellamy commenced the plan for Colonial Heights Extended in 1912, followed by Riverside Park in 1915.⁶⁰ Concurrently, Bellamy granted the Virginia Railway & Power Company the "privilege of erecting poles and of building, operating, and maintaining electric light and power leads on, over, through and across the streets, alleys, and lots".⁶¹ Bellamy's suburban developments were successful, prompting other investors to follow suit.⁶²

The third important real estate investor-developer in Colonial Heights was R.L. Watson, who formed the Chesterfield Highlands Corporation in 1916 and developed the present-day Chesterfield Highlands neighborhood.⁶³ The American Nations Bank of Richmond provided the company with financing of \$17,500 to purchase and consolidate four separate parcels: (1) a 6-acre tract owned by R.E. Long & wife; (2) an 11 ½ -acre tract owned by Mary C. Whitehead and others; (3) a 34-acre subdivision called "The Highlands" (R.E. Willcox, trustee); and (4) Lots 2 & 16 in The Highlands owned by Combined Realty.⁶⁴ In 1916, Watson filed an initial plat of development for the 52-acre parcel.⁶⁵

A year later, James A. Starkey, a civil engineer from Petersburg, completed a carefully scaled plat for Chesterfield Highlands. Easements for the 52-acre subdivision were derived from Pollard's Code of Virginia.⁶⁶ The tract as illustrated on the plat showed seventeen blocks. All blocks were rectangular except for two linear blocks along the south and east perimeter edges. Each block was divided into lots of uniform size except for blocks 3 and 10 where existing farmhouses were retained and situated on much larger tracts. The dwelling at 109 Norfolk Avenue (demolished circa 1970) occupied an entire square block. The dwelling at 309 East Westover Avenue (106-5063-0226) occupied about three-fourths of a square block. Streets were 50-feet wide and alleys were 15-feet wide.

In the initial legal filings, the Chesterfield Highlands Corporation reserved exclusive rights to install and maintain railroad tracks; sewer, gas and water pipes; telegraph, telephone, and electric light poles; and wires and conduits.⁶⁷ Later, in 1927, Chesterfield Highlands Corporation formulated additional restrictive covenants for the suburb: (1) that said property shall not be sold to, leased to or occupied by any person of African descent for a period of 20 years from the date hereof (August 9, 1927);⁶⁸ (2) that no residence be

**United States Department of the Interior

**Chesterfield Highlands Historic District
Colonial Heights Independent City, VA**

Section 8 Page 67

erected upon said property at cost less than \$3000; (3) that all residences conform to a building line of 20 feet from the line of the sidewalk upon which the property fronts; (4) that no residence be erected upon a lot of less than 37 ½ feet frontage; (5) that no building of any character other than residential shall be erected upon the building lot.

The Watson Realty Company did not build and sell houses as turn-key operations. Rather, most of the lots were either sold to builders or to individuals who contracted with local house-builders. Walter Webb, who erected his personal residence at 108 Lynchburg Avenue, also constructed at least three other houses on Lynchburg Avenue. Leon J. Boisseau, another local builder who specialized in brick construction, was active in the area in the early 1940s.⁶⁹

Real estate developers frequently attracted prospective home buyers by building parks and recreational facilities at the ends of streetcar lines.⁷⁰ Instead of a park or an amusement facility, R.L. Watson attracted potential buyers by donating lots for the Colonial Heights Graded School and the Highland Methodist Church.⁷¹ Not only did these institutions attract homebuyers, but they also became symbolic centers of the neighborhood.

The school-parcel was originally slated for home sites, but by 1921, the Town had erected its first public school, the Colonial Heights Graded School. The school was both literally and figuratively the heart of not only the Chesterfield Highlands suburb but also the adjacent blossoming neighborhoods. Mirroring the rapid growth of the neighborhood, the school's population grew to 300 students between 1921 and 1923.⁷² During World War II, the school served as the local office for military registration and for nationally mandated rationing. War bond drives were held on the premises, and the school children knitted blankets for the Red Cross. On D-Day, June 6, 1944, the community gathered at the school for a service of thanksgiving. The neighborhood school was later renamed Flora M. Hill School in honor of its long-serving principal who lived most of her life in the bungalow at 127 Suffolk Avenue (106-5063-0179). A broad-based community effort resulted in the installation of the park, designed and developed by the Hill Neighborhood Association in 2000. Maintained by the Colonial Heights Department of Recreation and Parks, the commemorative Flora M. Hill Park serves as a neighborhood recreational and community meeting place.

Nearly 75% of the lots in Chesterfield Highlands were filled before the United States entered World War II. During the height of the war, between 1941 and 1945, development proceeded at a snail's pace with only a half-dozen houses completed. Demand for housing in Colonial Heights increased in the decade following the end of World War II. The re-integration of military personnel into the general population after the war contributed to a nationwide housing boom.⁷³ Progressive build-out in the district resumed almost immediately after the war ended. More than a dozen houses were completed between 1945 and 1949, with a dramatic building boom in 1950, when twenty-three houses were built. In 1954, the construction of seventeen commercial buildings on Pickwick Avenue marked the culmination of development in the district.

From Automobile Suburb into the Twenty-first Century

The success of the interurban railway continued into the 1920s, in part because the speed limit for the streetcar was 10 mph faster than that of an automobile.⁷⁴ In the 1930s and early 1940s, the growing

**United States Department of the Interior

**NATIONAL REGISTER OF HISTORIC PLACES
CONTINUATION SHEET**

**Chesterfield Highlands Historic District
Colonial Heights Independent City, VA**

Section 8 Page 68

popularity and affordability of privately owned automobiles coupled with improvements in roadways and bridges diminished ridership of the interurban railway.⁷⁵ In 1936, streetcar service was terminated and replaced by buses.⁷⁶

At the time of establishment, Colonial Heights was geographically part of Chesterfield County but functionally aligned with the City of Petersburg. Following the rapid emergence of Colonial Heights as a population center, demand for municipal services increased. In 1920, a coalition, led by Harry L. Snead, formed the Colonial Heights Citizen League to lobby for improved public services.⁷⁷ The League assigned street addresses, set up a mail delivery system, and improved water supply by drilling two new local wells.⁷⁸ Colonial Heights became an incorporated town in 1926, bounded by Fairfax Avenue on the north, the Appomattox River on the south, Conduit Road on the east, and the Seaboard Airline Railway on the west.⁷⁹ After several decades of steady population growth and moderate expansion to its present-day city limits, the town became an independent city in 1948.⁸⁰

In the final decades of the twentieth century, the Chesterfield Highlands neighborhood showed signs of deterioration. The area was marked by a decline in owner-occupied houses and a surge in rental properties. With support from the Colonial Heights Department of Community Planning and Development and proactive neighborhood involvement, a local initiative was launched to recognize the significance of the design and architecture through nomination to the Virginia Landmarks Register and the National Register of Historic Places. In the aftermath of the economic downturn, there are signs that the affordability of Chesterfield Highlands is attracting a new diverse population, a mix of professionals, tradesmen, college students, and military personnel.

10. GEOGRAPHICAL DATA

Verbal Boundary Description

The boundaries of the Chesterfield Highlands Historic District are shown on the accompanying footprint map, which depicts all of the Contributing and Non-contributing resources and is based on the property information contained in the City of Colonial Heights GIS database. The historic boundaries generally follow Westover Avenue along the north edge of the district, an alley that extends along the rear property lines of resources facing Lafayette Avenue along the east edge of the district, and property lines of contributing resources along the south and west edges of the district.

Boundary Justification

The boundaries for the Chesterfield Highlands Historic District coincide with the original subdivision plat for the neighborhood, filed in the County of Chesterfield, Virginia, in 1916. The boundaries for the neighborhood encompass all of those blocks and lots depicted on the historic subdivision plat, except those lots fronting on the Boulevard. The lots on the Boulevard, except for 1021 Boulevard (106-5063-0231), are excluded because the original buildings, commercial and residential, have been demolished and replaced with non-historic commercial buildings. Boundary-determination, reinforced by consistency of architectural styles and period, encompass those resources that contribute to an understanding of the historic character and the chronological evolution of the district and the associated contributing resources.

¹ The original plat for Chesterfield Highlands was recorded on December 20, 1916, by R.L. Watson, president of the Chesterfield Highlands Corporation. Chesterfield County Plat Book 3-125 and 3-148-149.

² One exception is noted: there are no sidewalks in the 300-block of Lynchburg Avenue.

³ Audrey Tepper, historical architect with the National Park Service noted that a balustrade, composed of "heavy" square, often fluted, balusters and a broad molded handrail is a "Richmond railing". According to Ms. Tepper, this style of railing is a character-defining feature of a significant percentage of early twentieth-century houses in Richmond, Virginia.

⁴ *City of Colonial Heights, Virginia, Kit Homes Identified by Rosemary Thornton, February 25-26, 2008*. Files and documentation on file at the Office of Community Planning and Development, Colonial Heights, VA.

⁵ According to a former owner, the oldest surviving house in Chesterfield Highlands is located at 108 Lynchburg Avenue. Although deed evidence suggests 1915 as the date of construction, the former owner believes that the dwelling was built earlier and moved from its original location on the Boulevard to its present location. The form and overall style are Craftsman-Bungalow and consistent with the architectural fabric of the district, but the windows, window frames, door surround, and cornice are reminiscent of Greek Revival-era houses. It is possible that materials from an earlier dwelling were incorporated into the house.

⁶ The term auto-barn, rather than "garage", appears on most early-twentieth century Sanborn Insurance Maps.

⁷ The core of the Methodist population in Colonial Heights came from two Petersburg churches: Washington Street Methodist Church and Market Street (later Trinity) Methodist Church. Presbyterians in Colonial Heights came from Tabb Street Presbyterian Church and Second Presbyterian Church.

⁸ *Dedication of Highland Methodist Church: 1919-1942*. Unpublished paper. n.d.

⁹ The owner of the Watson Realty Company, R.L. Watson, was the president of the Chesterfield Highlands Corporation, the company responsible for the development of the district.

¹⁰ The initial construction cost was about \$13,000.

¹¹ *Dedication of Highland Methodist Church: 1919-1942*. Unpublished paper. n.d.

¹² *Colonial Heights Presbyterian Church, 1923-1998: 80 Years of Witness and Service*. Report compiled and written by John McKlveen. n.d.

¹³ Originally, the Presbyterian congregation owned the entire 100-block of Lynchburg, a triangular parcel that also fronts along Danville Avenue behind the Sunday school building. Some of the church-owned lots were sold off during the Great Depression.

¹⁴ Oral history provided, 7 August 2012, by Mrs. Halbert, a senior member of the Presbyterian Church, who grew up on Arlington Avenue in Colonial Heights.

¹⁵ Originally the commercial area included a post office, a hardware store, a drug store, a fabric store, a five-and-dime store, a bank and a beauty shop. The Pickwick buildings also had various types of offices, including that of the Commonwealth's Attorney.

³⁷ Sears 1925 Modern Homes Catalog. The Americus, model #13063X, advertised for \$2096 with a list of options.

³⁸ Sears 1928 Modern Homes Catalog, 102. The Mitchell, model #C3263, first advertised for \$1953 with various options listed, was available between 1928 and 1940. www.arts-crafts.com/archive/sears/page116.html

³⁹ Several rooms vary a few inches in dimension. Of this, Thorn notes "Elyria, which is another reincarnation of The Sears Mitchell, with room dimensions altered by a few inches, to make it [copying] all legal. So who copied from whom? Did Sears steal the design from Homebuilders or did Homebuilders steal it from Sears, or did they both take it from Aladdin—who also had their own version of this house?" Architectural analysis by Rose Thornton, 2008. File at the Colonial Heights Department of Planning and Community Development.

⁵⁷ Chesterfield County Deed Books 86-378; 90-457; 90-46-462; 90-464. Wright initially had a partner, C. O'Leary, about whom little is known.

⁵⁸ The subdivision plan was the work of John W. Hays, a civil engineer from Petersburg. See Chesterfield County Plat Book 1-408 and Hoge, Elizabeth P. *Phase 2 Architectural Evaluations of Route 1 in Colonial Heights, Virginia: A Report Prepared for the Virginia Department of Transportation*. Richmond, VA: Virginia Commonwealth University Archeological Research Center, 1988, 15.

⁵⁹ Bellamy began assembling land circa 1903. Chesterfield County Deed Book 189-312; Plat Book 3-60. In addition to Bellamy, principals in the Greater Petersburg Developer Corporation were Samuel W. Zimmer, James C. Rees, Jr. (secretary in 1915), and C.F. Scott, Jr. (secretary in 1920). Bellamy purchased the 90-acre Violet Bank property from C.F.W. Haskins; the 5.95-acre City View property from W.J. Traylor; and the Oak Hill property, from the widow of Augustus Wright. Bellamy also formed the Colonial Heights Corporation in 1903 and the Colonial Park Land Corporation, his holding company based in Norfolk.

⁶⁰ Chesterfield County Deed Books 145-143 and 145-147. The Colonial Park Land Company sold the land for Colonial Heights Extended to T. Marshall Bellamy and his wife on 27 November 1918. Bellamy did not retain and develop all of his accumulated real estate in Colonial Heights. On

RE: Chesterfield Highlands Historic District, City of Colonial Heights, Virginia

Dear Mr. Loether:

The enclosed nomination, referenced above, is being submitted for inclusion in the National Register of Historic Places. The nomination has been considered, and approved, by the State Review Board and the SHPO has recommended it for listing. Any letters of comment or objection have been copied at the end of the nomination material, along with any FPO notification letters.

Should you have any questions, please do not hesitate to contact me. My direct phone line is 804-482-6439.

Sincerely

Lena Sweeten McDonald
