# National Register of Historic Places Continuation Sheet

Section number 7 Page 1

---

## Summary

The Smithville Public School Building is a single-story, T-shaped structure built in 1936 by the WPA and designed in the Plain Traditional style. The building is constructed of structural field-stone walls on a continuous stone foundation. The elements are repelled by a composition-shingled gable roof with Craftsman exposed rafters that are now hidden by rain gutters. An interior brick chimney protrudes from the roofline.

## Elaboration

The central projecting cross-gable bay dominates the southern or front elevation. Originally fenestrated by six nine-over-nine, double-hung windows, the bay now contains only two original windows with the remainder having been boarded over. The pediment is stuccoed and otherwise contains only a triangle-shaped louvered attic vent. On both sides of the cross-gable bay, southern-facing, double-leaf doors with twelve-pane transoms provide access to the classrooms. The entrances are accessed by a stoop with nine concrete steps and are covered by shed roofs that are supported by ornate wood brackets. A set of two nine-over-nine, double-hung windows are located near both corners.

The western elevation is not fenestrated. The pediment is identical to the one in the southern elevation. The northern elevation is lighted by two sets of six nine-over-nine, double-hung windows and a smaller nine-over-nine window near the eastern corner. The eastern elevation is identical to that of the western elevation with the exception of an open foundation access and the boarding over of the triangular louvered vent.

There is a stage in one of the classrooms. The building is currently unoccupied.

## Smithville Public School

In the 19th Century, the Lawrence County seat of Smithville had been a prosperous and thriving community, an inland distribution center serving an intensively farmed hinterland. However, shifts in agricultural patterns from the uplands to the lowlands, as well as the loss of the county seat with the creation of Sharp County from western Lawrence County, all resulted in the community's relative decline. By the mid-1930's, virtually all that remained of Smithville was a gin, a grist mill, and a struggling bank. The Works Progress Administration's construction of the Smithville Public School in 1936 was an attempt to revitalize the fading community and the failing economy.<sup>1</sup>

The Smithville Public School Building, constructed during the period covered by the historic context *The Evolution of the Public School System in the Arkansas Ozarks, 1920-1940*, is a representative example of a small stone school building constructed for a rural school district. Its documented construction by the W.P.A. and its use during this period as a local school building clearly identify it with this historic context and with this property type. It is significant locally under Criterion A through its direct associations with both the history of the evolution of the public school system in the Ozark Mountain region of the state during this period and the W.P.A.

Date 5/18/92

**Smithville Public School Building  
Lawrence County, ARKANSAS**

Reviewer's Comments

There is a significant discrepancy between the photographs submitted with this nomination and the description of the property in Section No. 7. The description indicates that the windows are boarded over, there are exposed rafters supporting the roof and that there is an interior chimney. The photographs seem to show that the windows have been repaired or replaced, there are no visible exposed rafters, and there is no sign of a chimney. The steps leading to the entrance to the left of the front gable seem to have been replaced with a handicapped ramp. Since there are construction trucks and equipment in the photos, it looks like the building may have been in the process of being adapted for some new use when the photos were taken (January 1990).

Please clarify this discrepancy; the photos and the description must both show the current appearance of the property. If the building is being used, please indicate its new function. If it is still in process of being renovated, it can be shown as "Work in Progress."

**Summary**

The Smithville Public School Building is a single-story, T-shaped structure built in 1936 by the WPA and designed in the Plain Traditional style. The building is constructed of structural field-stone walls on a continuous stone foundation. The elements are repelled by a composition-shingled gable roof.

**Elaboration**

The central projecting cross-gable bay dominates the southern or front elevation. Originally fenestrated by six nine-over-nine, double-hung windows, the recent restoration of the building has either refurbished or replaced in-kind all of these windows, thus retaining its original appearance and pane configuration. The pediment is stuccoed and otherwise contains only a triangle-shaped louvered attic vent. On both sides of the cross-gable bay, southern-facing, double-leaf doors with twelve-pane transoms provide access to the classrooms. The eastern entrance is accessed by a stoop with nine concrete steps and the western entrance is now accessed via a concrete handicapped-access ramp; both are covered by shed roofs that are supported by ornate wood brackets. A set of two nine-over-nine, double-hung windows are located near both corners.

The western elevation is not fenestrated. The pediment is identical to the one in the southern elevation. The northern elevation is lighted by two sets of six nine-over-nine, double-hung windows and a smaller nine-over-nine window near the eastern corner. The eastern elevation is identical to that of the western elevation with the exception of an open foundation access and the boarding over of the triangular louvered vent.

There is a stage in one of the classrooms. The building currently functions as a fire station office.
