Trinity Protestant Episcopal Church/ Trinity Episcopal Church 424 Juliana St. 92-33

Located on a busy thoroughfare between its rectory and a modern drive-in bank, this is a gable roofed church, 3 bays by 8, attached to the rectory to the NE by a newer wing. Its asymmetrical facade (NW) rises to a N corner tower with a turreted gable roof. A 2nd turret rises at the W corner; it is joined to the central gable by a single flying buttress. The main entrance is below. The gable end is filled by a rose window above a triad of Gothic arched windows flanked by colonettes: The side walls are pierced by Gothic arched windows, the bays defined by buttresses.

The interior features one large space with exposed hammerbeam roof construction.
