DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE Victorian

In its present form, the building is a four-storey rectangular, structure approx. 50' in width, and 100' in length. The main, or rear, element measures approx. 50' x 75', and the frontal (SE) element is 40' x 25'. A 1' x 2. projection covers the center of the frontal element.

A pasement of unknown dimensions houses a rail passageway emerging from a tunnel under Tremont Place from the Brown palace Hotel on the opposite side of the street. The passageway, now sealed off, leads to the building's steam heating plant.

The Building's steam hereing prime. The main entrance is on the first floor below the street level in the 1953 addition. The original wooden double doors with large oval glass inserts are in use there. A rear wooden entrance from the second floor exists on the NE side. Leading to the entrance are 12 metal steps with metal railings.

The walls are of common brick construction and are of undetermined thickness. A 1' wide stone beltcourse girds the building between the first and second storeys.

The roof is a truncated hip style and includes pediment gables with returns on the SE, NE, and SW sides, and is trimmed with double-bracketed cornices. One brick single chimney stack unit approx. 9'to 10' high is located on the NW rear slope of the roof. A metal chimney stack is located on the top of the NE pediment gable. Three gable-shaped pediment dormers exist on the roof, located on the NE, NW, and SW slopes.

The window openings are segmental in shapp with arched surrounds containing radiating voussoirs. The windows on the frontal (SE) side are shuttered with wooden shutters the length of the windows. The middle windows of the second and third floors on the NE side have been bricked in.

On the front (SE), curved has reliefs over the middle window of the fourth floor spell out the words THE NUMARES in two curved lines. A straight has relief below the middle window of the fourth floor spells out the date of construction 1880.

ADDITIONS: Added to the front in 1953 was a two-level porch approx. 40' in width and 12'6" in length. This addition abuts the sidewalk. Exterior cloth-canopied, metal stairs with railings on the NE side rise to the second level of the porch which is flush with the second storey of the building. Connected to the porch is a metal canopy extending over the sidewalk to the curb. A fiberglas roof covers the porch with a higher elevation at the point of attachment to the building. The exterior of the porch consists of six wooden hinged panels with oval glass inserts overhanging a brick veneer construction on the first level. A recessed opening allows access to the main entrance of the building by way of two cerent side steps. The second level of this porch evidences fibreglas on the sides with a face of floor-to-ceiling windows fronted by white, decorative wrought iron floor-to-ceiling panels 1' wide and fencing approx. 3' high. A cloth canopy extends the top 13' width of the second level.

A worch of wooden construction was added to the third' storey level on the SW side at an unknown date. It measures approx. 10' x 25' and was added as a covering for a separate entrance which has since been blocked off and replaced with a large window not visible from the street. The exterior of this porch is only partially visible and has a flat roof, trimed with dentiled cornice on the 35 side. An enclosed decorative wooden rathing corprises the lower frontal exterior.

## SPECIFIC DATES 1880

STATEMENT OF S'GNIFICANCE

Built in 1880, the Old Navarre Building has a colorful, intriguing history characteristically representative of early Denver. In close proximity to the Brown Palace Hotel (1888) and the Trinity Methodist Church (1888), the Navarre adds a triangular base point of Mistorical reference for the upper downtown area of Denver.

The building wis crected to serve as the permanent edifice of the Brinker Collegiate Institute and was hailed by the local press to be "an architectural as well as educational ornament to the City." The name of the building's architect is unknown, but a Jan. 1, 1991 newspaper account reveals that the building was "planned by F.E. Edbrooke," a nationally known architect of that time.

The Brinker Collegiate Institute was established in September 1877 as the Denver Collegiate Institute by Joseph and Elizabeth Brinker. The private school was one of the first co-educational colleges west of the Mississippi River and offered a range from primary through collegiate including commercial, music, art, and military courses. The first floor housed the President's office and the commercial department in front, with classrooms and the dining room and kitchen in the rear. The second, or principal, floor contained parlors, reception and music rooms, the kindergarten department, and a chapel which seated 300. The third and fourth floors constituted the dormitory guarters for the female and mal' students respectively. The school rapidly achieved a noteworthy reputation for its moral and academic excellence. Following Joseph Brinker's death in 1686, the school closed and the proceedy was foreclosed in 1999.

After extensive remodeling, the building was reopened in 1889 as the Richelieu Hotel. Operated by area gambling kings C.W. Hunsicker and Robt. Stockton, the building's reputation quickly became antithetical to its original purpose. The operation was turned over to gamblers PS chase and Vaso Chucovich and gwaty reigned. Chase and Chucovich renamed the building the Navarre after the fun-loving Henry of Chavarre. In 1893 owner Owen LeFevre rented the upper floors to known ladies of the evening, Belle Malone and Mary paxton. It was during this period that the underground rail system to the Brown Palace Hotel on the opposite side of the street, accompositing unseen passage as well as coal delivery.

In 1904, the main portion of the Navarre was leased to the colorado Republicans but the women's auxiliary preferred to remain in their Champa Street headquarters. After their lease expired in 1909, the building was sold to the Interocean Investment and Brokerage Company headed by Ei Chass and Vaso Chucovich. Heavy gambling activities took place on the first two floors and continued until 1014, when pressure from reformist Mayor Robert Speer was exerted upon the owners. Involutely it was converted into the Navarre Cafe as a private club. 0

A large brick addition extends across the width of the rear (NW) side, and measures approx. 10' to 12' in depth. Date of the early addition is unknown. The northeasterly 20' rise to the fourth storey just beneath the roof line, while the remaining southwesterly 30' comprises only one storey. The addition has two entrances; one of metal and the other of wood. This addition abuts the alley. Roof composition of the two sections of this addition is undetermined.

ore

Originally, the building evidenced a domed cupola approx. 20' to 30' high, with creating atop. Six single chimney stack units approx. 9' to 10' high of brick construction were located on the roof slopes. An open porch with engaged columns and decorative railings centered over the main entrance on the second storey. Construction was of wood. Wooden stairs with railings were mounted to the second storey.

The original entrance appendage and roof elements were removed around the turn of the 20th century, according to photographic evidence available. The building was erected at a cost of \$20,000.00.
