The current Symphony House in Bangor was designed by Richard Upjohn as a residence for Isaac Farrar in 1833. It was the architect's first important commission. The house stands on the western corner of the intersection of Union and Second Streets, facing northeast toward Union Street.

As originally designed and built, the Isaac Farrar House had strong Greek Revival detailing. It was two and a half stories high, built of brick. The wall surfaces were slightly recessed behind corner columns and a narrow architrave. The center bay of the three bay facade was recessed, featuring a wrought iron balcony above the entrance way. The entrance projected slightly from the facade wall surface. An outer pair of semifreestanding, flat pilasters and an inner pair of freestanding, fluted doric columns supported a wide entabulature. One passed through the space behind this entrance to reach the entrance door. The narrow framed windows all had granite lintels.

The hipped roof of the house was hidden behind a solid parapet punctuated by flat pilasters located over the corner columns and windows of the house. Gable windows were added to the roof after the house was built. The house had five interior chimneys.

A low, solid wall was built around the lot line of the house. Double recessed panels occurred between columns of a slightly pyramidal shape.

The proportions of the Isaac Farrar House were exceptionally handsome and were reinforced by the treatment of the wall surfaces as massive panels and by the bold simplicity of the few exterior details. The house had a commanding presence.

On the interior, the Isaac Farrar House had a wide central hall with a double stair. To one side was a large elliptical room, planned as one room but divided into two when the house was built. On the other side were two rooms, one a circular salon with a domed ceiling which was finished in solid mahogony. Its simple detail emphasized the surface quality of the wood. This room is intact today.

The Isaac Farrar House was a private residence until 1911. Owner Isaac Merrill made many changes to the exterior and interior of the house. He removed the wall around the property line. He moved the entrance door forward and added a bay window above it. He added bay windows to the sides of the house. Another story was added. On the interior, Merrill refinished several rooms.

From 1911 until 1929, the house was occupied as a residency by the University of Maine Law School and called Stewart Hall. From 1929 until the present, it has been used by the Bangor Symphony as the Northern Conservatory of Music and called "Symphony House".

STATEMENT OF SIGNIFICANCE			

The Isaac Farrar House was the first major work of architect. Richard Upjohn, 1802-1878. It is important because it shows that Upjohn, well known for his Gothic designs, began his career by building in the Greek Revival style, the traditional style of the time. ∠ Handsomely proportioned and boldly detailed, the Isaac Farrar House shows Upjohn to be a talented designer in this style. The Symphony House today retains many of the features of the original house.

Richard Upjohn's other commissions in Bangor were the Samuel Farrar House, 1836, a two and a half story brick house with the end treated to look like a temple and St. John's Church, finished in 1837. The Samuel Farrar House is still standing, but the church burned in the fire of 1911. Other commissions by Richard Upjohn in Maine included "Oaklands", The R. H. Gardiner House in Gardiner, The Bowdoin College Chapel and Library in Brunswick, St. Pauls Church and The First Parish Church in Brunswick, and Berwick Academy in South Berwick. It was Upjohn's work in Maine which started him on a successful architectural career.

Isaac Farrar (1798-1860), for whom the house was built, came to Bangor from Dexter in 1836. He was a lumberman and merchant, and president of the Maritime Bank of Bangor. Charles B. Sanford, who lived in the house from 1865-1878, was proprietor of the Sanford Steamship Lines. Owen Davis, who lived in the house from 1882-1888, was the owner and manager of the Katahdin Iron Works and the father of Owen Davis, Jr., the author of the Pulitzer Prize winning play, Ice Bound.
