Ţ

Significance (Indicate sources of information for all statements)

20. Architectural significance

- a. Key structure/individually may qualify for the National Register
- □ b. Contributing structure
- C. Not eligible/intrusion
- N/A

```
Interior - open, feed bunk around central silo. Diameter - 60'.
Silo - clay tile, diameter 14'. Asphalt shingles over wood. 13 - sided.
```

21. Historical Significance

Theme(s) Common Variation; Flat Roofed type.

- a. Key structure/individually may qualify for the National Register
- b. Contributing structure
- C. Not eligible/intrusion

One of four flat roofed barns known to have been built on an lowa farm, the Nus Round Barn, built in 1906, has the earliest construction date of the four. This 1906 date slightly preceeds the busiest years of round barn building in lowa and the period of most frequent experimental design variation, 1910-1920. The flat roof and the central silo extending above the roof are the identifying characteristics of this type.
