STATEMENT Unlike many churches included in this survey, the First Bible Missionary Church is not grandly ornamental nor clearly definable in terms of style. Rather, it represents the architecture of the city's smaller, less ceremonial denominations whose budgets would not allow construction of great edifices. Originally built as the Berea Congregational Church, this building is characterized by plain surfaces and clean, sharp lines. Decoration is limited to narrow, molded string- courses and stained glass windows. The variety of window shapes provides additional interest. The early 20th century date of construction is stylistically expressed in the use of short cornice returns, pedimented roof dormer and palladian-like arrangement of windows on the east side, all derived from the turn of the century Neoclassicism.
