DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Clark house is a two-story, reinforced concrete residence in American Colonial style. The main, gable roofed section of the house has two hipped roofed wings extending from its rear corners at 45 degree angles. A pergolaed porch is to the left side.

The main body is six bays wide with a central double door entry. All windows are 9 x 9 double-hunt sash. The second story windows have shutters. Three steep, gabled dormers break the slate tiled roof. Large Palladian-like round arched windows provide illumination at either end of the lateral running second floor hallway. The wings are three bays wide and contain windows similar to those of the main body. These were used by the family servants as quarters.

The interior remains in good condition. All major rooms have fireplaces with dining and living room ones framed in Italian marble. The living room contains hand painted wall paper. Many of the silver light fixtures have unfortunately been removed.

The building is structurally sound, however is in need of restoration as it was used for a number of years as a restaurant and was then vacant. The present owner has already begun interior restoration.

SPECIFIC DATES 1912

BUILDER/ARCHITECT K. K. Cutter

STATEMENT OF SIGNIFICANCE

The Clark house is architecturally significant as a unique example in Idaho of a large scale Colonial revival house in a rural setting. The house was built for the mining millionaire Patrick Clark for a summer house. Costing \$100,000 it was by far the most expensive residence in the state up to that time. Originally Mr. Clark owned the entire east shore of Hayden Lake, with this house situated on a wooded knoll, overlooking the water. He built the road to the house, terraced the land and put in a sea wall.

The house was designed by K. K. Cutter of Spokane, the most celebrated architect in the Pacific Northwest during this period. It is a rare example of the use of reinforced concrete in domestic architecture, both in Idaho and in the work of Cutter.

Patrick Clark was one of the best known mining men in the United States. He had interests in the Anaconda mine in Butte, Montana, and the Poor Man mine in the Coeur d' Alene district, and later operated the War Eagle mine in Rossland, British Columbia. He only used the residence for a few summers before committing suicide in San Francisco.

The house is one of the largest and more splendidly furnished residences in the state. It is a local landmark due to its size and the reknown of its owner, the original developer of this resort area. Over the years the grounds have been sold off, until now the property only includes the five acres immediately surrounding the house.
