| 61 | 1118 DESCRIPTION |
|---------------------|--|
| | |
| 107 | (Check One) |
| 8 1 | (Check One) Altered Unaltered Moved Strainal Site |
| i vie | DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL ADDEADANCE |
| the of | |
| $\langle c \rangle$ | Surrounded by groves of Norfolk and Australian pines, Keaiwa |
| | Heiau is located on Aiea Heights overlooking Pearl Harbor. |
| | Within a state park and forest reserve area, the site is access- |
| | ible by roads leading to within about 40' of the structure. |
| | Adjacent to the structure itself is a small herb garden contain- ing several of the trees and herbs used by the medical practi- |
| | tioners, kahuna lapa'au, of ancient Hawaii. |
| | (healing craftimen) |
| | Keaiwa Heiau was once a medical school, a temple for the gods |
| | who guided the kahuna lapa'au and a gateway guarding the medic- |
| | inal herbs used in treating illness and disease among the |
| | Hawailans. The structure was first adequately described in 1933 |
| | by McAllister: // |
| | "A small rectangular structure, 100 feet by 160 feet, of one terrace with low surrounding walls. The only definite |
| | feature within the inclosure is a short low stone wall |
| | running parallel with the sides. The walls average |
| | about 4 feet in height and about 5 feet wide and are |
| | evenly faced with one-foot stones with a rubble fill. |
| | A small outer step or terrace on the southwest corner |
| | may have formerly have been an entrance. Since the surrounding area was once under cultivation, any ad- |
| | joining features were obliterated. The slope west of |
| | the heiau must have eroded very rapidly after being |
| | plowed, for that wall has almost completely destroyed |
| | by the large amount of soil that has washed over and into |
| | the heiau. The great number of loose stones lying on the |
| | whole of the west end would indicate former platforms |
| | or cerraces. The neral races south, overrooking Fulloa. |
| | Thrum notes that it was erected in the time of Kakuhihewa with Keaiwa for priest." |
| | with Realwa lot pilest. |
| | McAllister's ground plan and perspective sketch are included on a |
| | continuation sheet. As he indicates, there seems to have been |
| | some reduction of the original scope of the heiau and there are |
| | reports that some of the stones were removed for road building |
| | in World War II by military personnel. Still, there remains |
| | enough of the structure for a clear picture of the nature of the site. In 1951 the heiau was cleared of hau and other brush but |
| | no reconstruction was undertakien and the site remains essential- |
| | ly as described by McAllister. On November 15, 1951 Keaiwa |
| | Heiau was rededicated in traditional ceremonies led by Kahuna |
| | Lapa'au Kamakaokalanikapiliokomoku and two other direct descend- |
| | ants of Hawaii's highest chiefs. Present as honored guests were |
| | representatives of modern medicine, then meeting in Hawaii for |
| | the Pan-Pacific Surgical Congress. |
| | |

| TATEMENT OF SIGNIFICANCE | | | |

Hawaii stands alone as the only group within Polynesia to step beyond superstitions treatment of disease and illness; the only place where heiau lapa'au, temples of healing, were constructed and where kahuna lapa'au, master craftsmen in the healing arts, were trained to administer to the needs of the people. Often this process took twenty years as the young novices followed daily the activities of the kahuna lapa'au. Selected for their kind and gentle dispositions, the novices were sent to live with the kahuna and learn by example and teaching the more than 300 herbs useful in treating the varied ills of the populace. Identification, method of selection, preparation of the medication, the chants to be used each step of the way ... all these had to be learned before the young novice could be considered competent to treat on his own. Following this portion of training, some were sent on to other centers for advanced training in diagnosis and specialized treatments. (Larsen 1951)

While two other <u>heiau lapa'au</u> are located on Oahu, they are relatively unknown and inaccessible. Keaiwa's location within a State Park makes it accessible to the general public and should provide opportunity for more extensive interpretation than is now offered. While there is little that is structurally unique about this heiau as compared to others on this island, it is significant as the single representative of its functional class now available to the public. With the small herb garden adjacent, the structure provides a nucleus for presenting the story of Hawaii's singular achievment in the field of medical arts in the Pacific.
