Meandering Salkehatchie River offers a pleasant seiling for these extensive, large Confederate earthen breastworks which are in an excellent state of preservation. Before becoming a state park, the area was maintained by Rivers Bridge Confederate Memorial Association as a historical site. The state added recreational facilities for picnicking, swimming, fishing, family camping, and now the park offers outdoor recreational as well as historical interests. The park also has a recreational building and a museum. Artifacts include battle cannons and the Confederate battle flag. Having completed Union army was re	his march through	h Georgia, General o South Carolina b	William T. Sherma y early February,

Realizing the crucial situation, Confederate Generals Beauregard, Hill, and Smith gathered to discuss plans for the defense of South Carolina against Sherman's onrushing troops. They asked President Davis for additional troops, but these efforts were almost futile as time was running out for the South; Most of the Confederate army had been demolished, weakened by desertions, or was engaged in activity elsewhere.

Thus, while southern defensive plans were still being mapped, Sherman pushed deeper and deeper into South Carolina, and forestalled the opportunity for any effective concentration against the Union troops. So swift and deceptive were Sherman's movements that Beauregard and his lieutenants did not even have time to utilize the few troops at their disposal.

As a result, federal forces met little Confederate resistance until they reached the flooded Coosawhatchie Swamp and Pocataligo (in South Carolina's Low Country), where Confederates had felled trees, burned bridges, and erected obstructions to impede Sherman's march.

In spite of these delaying tactics, the Confederates had fallen back to Rivers Bridge by February 2, 1865. Although they crossed the Salkehatch, they were unable to burn the approaches or the main bridge.

At this point the Salkehatchie was a dense swamp about a mile and one-half wide. The approach to the main bridge was over a narrow causeway commanded by General Lafayette McLaw's artillery, numbering about 1200 men.

The strength of the Confederate position was disregarded and Sherman's men were ordered to advance across the causeway without stopping.

(8) Significance

Behind breastworks, Confederate artillery, though much smaller in numbwr than the Union forces, repulsed the advance. Many of thw wounded had to remain in the swamp all night. Only by propping themselves against the trees did they avoid drowning.

For two days, in spite of the overwhelming odds, the Confederates were able to delay the Union troops, which numbered about 22,000. Finally, by cutting two roads through the swamps, and at the same time continuing a frontal attack, the Unionists outflanked the Confederates and forced them to withdraw. Sherman then continued his march towards Columbia.
