DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Situated on a rise between Churchill Butte to the north and the Carson River to the south, Fort Churchill was once a series of adobe buildings around a parade ground, the company building (headquarters, quartermaster storehouse, commissary, and hospital) to the east, the officers' quarters to the north, the enlisted men's barracks and mess hall to the west, and the magazine and guardhouse to the south. Farther to the south were the horse barns and corrals. Only the officers' quarters were two-storied. As in most western posts, there was no wall.

Today the post is a collection of deteriorating adobe ruins, 15 buildings and some foundations, clustered around a sagebrush overgrown parade ground. The fort is one of the few remaining in its natural setting around which a town never grew. Seen stark against the mountains the ruins are strongly evocative of the loneliness of the intermountain frontier and its distance from anything familiar.

STATEMENT OF SIGNIFICANCE

Fort Churchill (1860-1871), on the north bank of the Carson River, was established in the Carson Valley as a result of the Paiute War of 1860. Throughout its brief life the adobe fort provided protection for the emigrant trail to California and the lines of communication that went along with it: the Central Overland Mail Route, the Pony Express, and the projected transcontinental telegraph.

HISTORY

The first white man known to have visited the site of Fort Churchill was mountain man Jedediah Smith who crossed into California by the Humbolt-Carson River in route in 1825. As American exploration progressed more people passed through the area: Captain Bonneville, the Bidwell party, John C. Fremont, and Kit Carson (after whom Fremont named the river). With the beginning of emigration to California some of the wagon trains traveling along the Humbolt River took the Carson River route, the most famous being the doomed Donner Party, who passed about 20 miles to the north of the Fort Churchill site. The discovery of gold in California brought settlement (mostly from Utah) and government to Nevada, which became part of Utah territory. Small way stations grew up along the trail. Settlers were beginning to exploit the fertile valleys that were well watered, at least for the Great Basin. Although the early settlers lived in peace with their Indian neighbors, the rush to Washoe in 1859 and 1860 brought in many more whites of a new type--veterans of the California gold fields who had brusquely pushed aside the California Indians and who would brooke no interference in their savage quest for mineral wealth. The Carson River Paiutes soon realized that they would be pushed out of their homeland. They also resented the white's destruction of the game and pine trees necessary for their survival.

It was not economics, however, but sex, that started the Paiute War of 1860. Some ten miles northeast of the site of Fort Churchill stood Williams Station (now under the waters of Lake Lahontan), operated by James Williams and his two younger brothers. In May of 1860 while James was away on business, some Indian women were

held captive at the station. On May 7 Moguanoga (Captain Soo) and a group of Paiutes attacked the station and killed all five whites there: the Williams brothers, Sam Sullivan, James Fleming, and Dutch Phil. When James discovered the killings he hurried to Carson City with the news. Angry and frightened settlers demanded action. Two days later 105 men set out from Buckland Station, the Carson City men led by Major William Ormsby, the Virginia City men under Archie McDonald, the Genoa men under Thomas F. Condon, Jr., and the Silver City men led by Captain Richard G. Watkins. Nobody was in overall command, and the men, ill-armed and untrained in Indian warfare seemed to regard victory as a foregone conclusion. They were wrong. After burying the dead at Williams Station they got as far as Pyramid Lake forty miles to the north before they sighted any Indians. With a great shout the force charged pell-mell after the Indians, and before long the whites found themselves encircled in a cleverly constructed trap. They lost 46 men cutting out of the trap and 30 more in the rout that ensued. Major Ormsby was among the dead.

Late in May a combined force of Californians, Nevadians, and U.S. regulars under Captain Joseph Stewart moved on Pyramid Lake under the command of Colonel John C. Hays of the Nevada volunteers. This well organized force saw the Indians simply melt before them.

Concerned for the safety of the line of communications to the east, the California Army Headquarters ordered Captain Stewart to build a fort in the Carson River Valley. He chose 200 acres on the north side of the river on the Buckland Ranch. Two months after the initial defeat 207 soldiers under the command of Captains Joseph Stewart and F. F. Flint were busily constructing adobe buildings. The adobe came from the river bed, the foundation stones were local, the lumber came from the Sierras, and other supplies were shipped in from San Francisco.

The most elegant of the buildings were the officers' quarters, which contained a set of parlors, two bedrooms, two closets, a woodshed, and an indoor privy for each officer. The enlisted men's quarters were designed to house 300 men. The total cost of the fort was \$178,889.

In July 1860 the fort was complete. It was named for General Sylvester Churchill, the Inspector General of the U.S. Army, under whom Stewart had served. The fort had a population of 337 men and 12 women. It was soon the eastern terminus of the telegraph from San Francisco and the western end of the Pony Express run from Fort Kearney, Nebraska. The troops at the fort attempted to protect the line, the mail, and the settlers from sporadic Indian attack.

In 1861, with the fort's garrison down to 30 dragoons and 10 infantry, the Indians conceived the plan of entering the unwallled fort with concealed weapons and slaughtering the troops. Indian Agent Warren Wasson rode alone and unarmed into the Indian meeting and talked them out of it. Wa-he, the leader, fled to Oregon, returned a short time later and was murdered by two Paiutes.

When the Civil War broke out, the remaining regulars were drawn east, their place taken by California and Nevada volunteers. Added to the normal duty of keeping an eye on the Indians was the task of preventing Southern sympathizers and supplies from reaching the Confederacy, and the life line to California was even more important. After the war was over the fort was a supply depot manned by a small company. In May 1868 what remained of the garrison was ordered to Fort Halleck, Nevada (near present Elko). In 1870 the State of Nevada declined to garrison the fort, and in March 1871, the buildings were auctioned to Sam Buckland for \$750. He took the wood of the roofs, windows, and doors a few yards to the Fernley-Yerington Road and used it to build the Towle House. The land was turned over to the General Land Office. In 1880 the bodies burried in the post cemetery were removed to Carson City and San Francisco for reinterment. The reservation was used for an Indian school for a while, but the school was moved to Schurz.

At the urging of the Sagebrush Chapter of D.A.R. the State of Nevada acquired 200 acres of the old reservation in 1931 for use as a park. The 1934 National Park Service plan for stabilization of the adobe ruins resulted in a Civilian Conservation Corps' camp being opened there in 1935 to do extensive work on the old fort. New bricks made in the old manner reinforced old walls, a visitor center/headquarters building (not a part of the landmark) was a reconstruction of one of the old fort buildings, and a public campground was built. During World War II the park was closed and subject to vandalism. Finally in 1961 the State got clear title to the site and redevelopment of the park began.

The fort is today included in the public park maintained by the State of Nevada, which provides both some interpretation of the historic site and picnic and camping grounds on the Carson River.

ITEM NUMBER 10 PAGE 1

The Fort Churchill ruins are a part of the Fort Churchill State Park in Lyon County, Nevada, in the southeast one-half of section 34, township 17 north, range 23 east. The Fort Churchill National Historic Landmark includes only the ruins of the old fort so as to exclude a trailer camp ground and the interpretive center which is a recent reconstruction.

Beginning at a point on the southern edge of the Fort Churchill State Park Road about one mile southwest of alternate U.S. 95 where the dirt road goes south around the adobe ruins of Fort Churchill, proceed south on the inside edge of the dirt road approximately .1 mile south, then approximately .2 miles west, then approximately .1 mile north to the point where the dirt road intersects the Fort Churchill State Road; thence approximately .2 miles east on the southern edge of said road to the point of origin.
