**Describe the present and original (if known) physical appearance**

The Christopher Apple House is located on a 1½ acre site enhanced by three very old Austrian pine trees. The two-story brick house is in a simple Federal style, although the gable trim and wide entablature are drawn from the Greek Revival. The facade is four bays across, with the simple entrance in the second bay from the right. A 1½ story rear section appears to have been added to the house, although the materials and trim suggest that it was built shortly after the original construction. Two windows and two doors appear on the southwest side of this addition.

The house exhibits a rubble limestone lower foundation, cut limestone upper foundation, cut limestone thresholds, six over six window sash, wooden lintels, and pegged shutters. In 1973 an early slate roof in a diamond pattern was removed and replaced with slate-colored asbestos shingles. White aluminum gutters were also installed at that time, the original gutters having been removed some time before.

The present house and site were originally part of a large farm that was deeded to Christopher Apple through a land grant by President Andrew Jackson in 1832. The house faced the Pendleton gravel road, now Highway 67, with three barns opposite the house. Southwest of the house were a summer kitchen, smokehouse, milkhouse, and a hen house.

Specific dates 1859

Builder/Architect Christopher Apple

### Statement of Significance (in one paragraph)

The primary significance of the Christopher Apple House lies in its being a well-preserved example of a mid-nineteenth-century Indiana farmhouse built in classic Federal style. Historically, the house represents the rise of a farmer who achieved social and financial success as Indiana progressed from a frontier to an expanded market economy.

In 1837, 30-year-old Christopher Apple, his wife, and three children moved from Ohio to Indiana, settling on 80 acres of farmland in Lawrence Township, Marion County. He built a two-story house of hewed logs on the site. Later, he purchased an additional 180 acres of land. Apple became a highly successful and prosperous farmer who served his community, primarily, as an elder in the local Christian Church.

Construction of the current Christopher Apple House in 1859 represented in the most positive way his financial and social prominence. While of classic Federal design, the house is built of locally produced materials. The limestone for the foundation came from the nearby quarries. Christopher Apple, himself, made the bricks on the site. He drove a yoke of oxen repeatedly through a mudhole to give the mud a smooth texture and baked the hand-molded bricks in an improvised outdoor kiln. The present excellent condition of the house attests to the quality inherent in the original materials and workmanship.

Christopher Apple's son, John W. Apple, also compiled an outstanding record in the local community. Born in 1841 in the hewn-log house originally on the site under consideration, he became extremely interested in education and religion. John attended district school, a subscription school, and Northwestern Christian University, now Butler University. He taught in central Indiana for many years, earning a reputation as a fine educator. He was ordained a minister of the Christian Church in 1868 and remained active in church affairs until his death. He also helped organize the Independent Order of Good Templars dedicated to suppressing saloons and the liquor traffic.
