# National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in National Register Bulletin, *How to Complete the National Register of Historic Places Registration Form*. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. **Place additional certification comments, entries, and narrative items on continuation sheets if needed (NPS Form 10-900a).**

### 1. Name of Property

historic name Squirrel Creek Bridge  
other names/site number Structure # 60N3410E1180003

### 2. Location

street & number Carries Rangeline Road over Squirrel Creek  not for publication  
city or town Shawnee  Vicinity  
state Oklahoma code OK county Pottawatomie code 125 zip code 74802

### 3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended,  
I hereby certify that this X nomination     request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60.  
In my opinion, the property X meets     does not meet the National Register Criteria. I recommend that this property be considered significant at the following level(s) of significance:  
    national X statewide     local  
Bob Seubler Signature of certifying official/Title July 17, 2010 Date  
State or Federal agency/bureau or Tribal Government

In my opinion, the property     meets     does not meet the National Register criteria.

Squirrel Creek Bridge  
Name of Property

Pottawatomie County, Oklahoma  
County and State

---

**Narrative Description**

(Describe the historic and current physical appearance of the property. Explain contributing and noncontributing resources if necessary. Begin with a **summary paragraph** that briefly describes the general characteristics of the property, such as its location, setting, size, and significant features.)

**Summary Paragraph**

Constructed in 1917, the Squirrel Creek Bridge is a single span concrete rainbow arch bridge located on the west edge of Shawnee in Pottawatomie County. The structure carries a county road over Squirrel Creek, a tributary of the Canadian River. Owned by Pottawatomie County, it is in good condition.

---

**Narrative Description**

The bridge consists of two parallel reinforced concrete semi-circular arches, from which the floor system is suspended by four pairs of reinforced concrete hangers. These arches are attached to the front of the concrete abutments below the level of the floor. Dimensions of the structure are 67 feet in length and 20 feet in width. Vertical concrete members extend from the deck to the arch. Two horizontal bars serve as railings through the vertical members.

**8. Statement of Significance**

**Applicable National Register Criteria**

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B Property is associated with the lives of persons significant in our past.
- C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D Property has yielded, or is likely to yield, information important in prehistory or history.

**Criteria Considerations**

(Mark "x" in all the boxes that apply.)

Property is:

- A Owned by a religious institution or used for religious purposes.
- B removed from its original location.
- C a birthplace or grave.
- D a cemetery.
- E a reconstructed building, object, or structure.
- F a commemorative property.
- G less than 50 years old or achieving significance within the past 50 years.

Name of Property

Pottawatomie County, Oklahoma

County and State

**Statement of Significance Summary Paragraph** (Provide a summary paragraph that includes level of significance and applicable criteria.)

The Squirrel Creek Bridge is eligible for the National Register of Historic Places at the state level under Criterion A for its association with transportation and Criterion C for its engineering design. The Squirrel Creek Bridge embodies the distinctive characteristics of bridge engineering; specifically the rainbow arch bridge design. It is the only extant example of this type in Oklahoma.

**Narrative Statement of Significance** (Provide at least **one** paragraph for each area of significance.)

The Squirrel Creek Bridge is in its original configuration including the connections and the configuration of the arches. Because the superstructure is the most important feature of the bridge, the replacement of the deck does not impact the integrity or eligibility of the bridge. The Squirrel Creek Bridge embodies the distinctive characteristics of bridge engineering; specifically the rainbow arch bridge design.

**Developmental history/additional historic context information** (if appropriate)

Concrete bridges were first in use as early as 1871 in Brooklyn, New York. Evolution in concrete bridge construction included different uses of I-beams, steel bars, rods and reinforced concrete. By the 1910s concrete was being used for longer arch spans but these used significantly more steel than a barrel arch, slab or girder bridge.

John Marsh, of Des Moines, developed and patented the design known as the Rainbow Arch or Marsh Arch. He formed his own company in 1896 and began investigating the use of steel and concrete together, and became a leader in the technological studies that resulted in the general acceptance of reinforced concrete for bridge construction.<sup>i</sup> In 1911, Marsh made a patent application for the Rainbow Arch design. His design was a two-ribbed concrete through arch. The cores of the arches were a steel arch consisting of lattice work similar to the chords of a truss bridge. The first step in construction was to assemble and erect the steel much like a steel truss. The lattice work forms two parallel four angle arches that are covered with concrete. The angles of the arches are hidden in the concrete which is formed into two semi-elliptical arches. The floor of the bridge is suspended from the arches by reinforced concrete hangers riveted to the arches and the floor stringers.

Once the steel ribs were set on the abutments or piers and the vertical steel hangers, the steel floor beams, and the reinforcing for the deck were put in place, concrete was encased around them in a specific order. The arch ribs were encased in concrete first, followed by the floor beams and floor slab, the bridge railing and finally the vertical hangers.<sup>ii</sup>

A characteristic of the Rainbow Arch Bridge is that temperature changes are allowed to cause movements in the arches and floor system independent of each other. This is accomplished by providing expansion plates between the floor slab and the arches. The floor slab is also allowed to move freely over the abutments.

Arch bridges may be designed as single-arch spans, multiple single-arch spans, or continuous arch spans. The fundamental difference is that single spans in any arrangement are independent and can stand alone. Continuous spans are dependent upon each other and can not stand alone. Most arches in Oklahoma are "deck arches" meaning that the arch is below the floor. The only other version in Oklahoma is the rainbow arch of which the Squirrel Creek Bridge is the only extant example in Oklahoma.

The Squirrel Creek Bridge is also significant for its association with transportation in Pottawatomie County. Squirrel Creek Bridge is located along the Williams Highway and provided an important link between Shawnee and Tecumseh, Oklahoma. The Williams Highway, as it traveled through Pottawatomie County was constructed by convict laborers from

<sup>i</sup> Larry Jochims, "Rainbow Arch Bridges Add Variety to Kansas Highways," *Kansas Preservation* 2 (September-October 1980): 1-2; Clay County Commissioners Record, 13 May 1911.

<sup>ii</sup> Jochims, "Rainbow Arch Bridges," p. 2.

Squirrel Creek Bridge

Name of Property

Pottawatomie County, Oklahoma

County and State

the state penitentiary at McAlester.<sup>iii</sup> The construction of Squirrel Creek Bridge was supervised by Gus Pecore and Joe Jarvis.<sup>iv</sup>

Rainbow Arch bridges generally cost more than steel-truss bridges of like span, but because they were located at major crossings in cities, local governments were willing to accept the extra cost because of the aesthetic dimension the arches offered.

The Squirrel Creek Bridge is eligible at the state level for its role in transportation in Pottawatomie County and as the only extant example of the Rainbow Arch Bridge type in Oklahoma. The bridge embodies the distinctive characteristics of bridge engineering and construction.

**Verbal Boundary Description** (describe the boundaries of the property)

The bridge carries Rangeline Road over Squirrel Creek approximately 2000 feet south from the Hardesty and Rangeline Road intersection in Pottawatomie County. The property boundary extends fifteen feet on either side of the centerline of the road as it crosses the bridge, and fifteen feet from each end (abutment) of the bridge.

**Boundary Justification** (explain why the boundaries were selected)

Includes the area historically associated with the bridge.

National Register of Historic Places  
1201 "I" (Eye) Street, NW  
Washington D.C. 20005

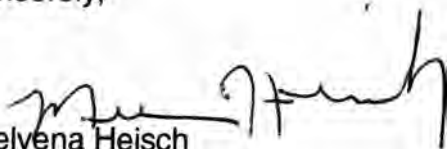

Dear Ms. Shull:

We are pleased to transmit twelve National Register of Historic Places nominations for Oklahoma properties. The nominations are for the following properties:

Brady Historic District, Tulsa, Tulsa County  
Casa Loma Hotel, Tulsa, Tulsa County  
Morrow Home Place, Collinsville, Tulsa County  
Moore Ranch, Nowata Vicinity, Nowata County  
White Cloud Lodge, Payne County  
Wentz Camp, Ponca City, Kay County  
Pond Creek Masonic Lodge #125, Pond Creek, Grant County  
Nickels Ensor McClure House, Alva, Woods County  
First United Methodist Church, Fairview, Major County  
Squirrel Creek Bridge, Shawnee, Pottawatomie County  
American Baptist Home Mission House, Tahlequah, Cherokee County  
Administration Building, Wilburton Vicinity, Latimer County

We look forward to the results of your review. If there may be any questions, please do not hesitate to contact either Lynda B. Schwan of my staff or myself.

Sincerely,

  
Melvena Heisch  
Deputy State Historic  
Preservation Officer

## Notice to file:

This property has been automatically listed in the National Register of Historic Places. This is due to the fact that the publication of our Federal Register Notice: "National Register of Historic Places: Pending Nominations and Other Actions" was delayed beyond our control to the point where the mandated 15 day public comment period ended after our required 45 day time frame to act on the nomination. If the 45<sup>th</sup> day falls on a weekend or Federal holiday, the property will be automatically listed the next business day. The nomination is technically adequate and meets the National Register criteria for evaluation, and thus, automatically listed in the National Register of Historic Places.
